Listing Activities

Pre-Listing Activities

Before Waymon visits you, he will create a market analysis called a CMA.

A CMA is a Comparative Market Analysis. CMA is the term real estate professionals use when they conduct an in-depth analysis of a home's worth in today's market. It is a FREE service without obligation.

For the Home Seller a CMA is a method to learn what their home's current value so they can select the best Listing price.

For the Home Buyer a CMA is a method to determine the current value so they can make an offer to purchase the home

A CMA is not an appraisal. An appraisal is performed by a licensed appraiser using only information from similar property that has been sold during the last year.

Listing Appointment Presentation

Present the Comparative Market Analysis to you so you can make decision what price to list your home for on MLS.

Fill out the listing agreement and provide copies to Sellers and enter information into MLS data base within 48 hours.

Take up to 50 photos of the home inside and outside for Buyers and Realtors to see when looking for a home on the internet for clients.

I had my home listed with a real estate agent recommended by a member of my church. It was listed for four months, few showings, but no one really interested in making an offer to buy my property. I cancelled my listing and listed it with Waymon. He had a cash offer the next day. Closed in 10 days. I left the closing smiling, in amazement, wondering, how did Waymon do it? CW

I met with Waymon. We had been trying to sell the property for years. Waymon said, "I will sell this property!" He had a contract and closed the deal in two weeks. ABM

REALTORS® aren't just agents. They're professional members of the National Association of REALTORS® and subscribe to its strict code of ethics. This is the REALTOR® difference for home buyers:

- 1. Ethical treatment.** Every REALTOR® must adhere to a strict code of ethics, which is based on professionalism and protection of the public. As a REALTOR®'s client, you can expect honest and ethical treatment in all transaction-related matters. The first obligation is to you, the client.
- 2. An expert guide.** Buying a home usually requires dozens of forms, reports, disclosures, and other technical documents. A knowledgeable expert will help you prepare the best deal and avoid delays or costly mistakes. Also, there's a lot of jargon involved, so you want to work with a professional who can speak the language.
- 3. Objective information and opinions.** REALTORS® can provide local information on utilities, zoning, schools, and more. They also have objective information about each property. REALTORS® can use that data to help you determine if the property has what you need. By understanding both your needs and search area, they can also point out neighborhoods you don't know much about but that might suit your needs better than you'd thought.
- 4. Expanded search power.** Sometimes properties are available but not actively advertised. A REALTOR® can help you find opportunities not listed on home search sites and can help you avoid out-of-date listings that might be showing up as available online but are no longer on the market.
- 5. Negotiation knowledge.** There are many factors up for discussion in a deal. A REALTOR® will look at every angle from your perspective, including crafting a purchase agreement that allows enough time for you to complete inspections and investigations of the property before you are bound to complete the purchase.
- 6. Up-to-date experience.** Most people buy only a few homes in their lifetime, usually with quite a few years in between each purchase. Even if you've done it before, laws and regulations change. REALTORS® handle hundreds of transactions over the course of their career.
- 7. Your rock during emotional moments.** A home is so much more than four walls and a roof. And for most people, property represents the biggest purchase they'll ever make. Having a concerned, but objective, third party helps you stay focused on the issues most important to you.

Why Invest in Apartments? Dependable Income, Asset Appreciation, Capital Preservation, Inflation Hedge, Tax Shelter, Generational Wealth, Demand, One Deal Is All It Takes *

<https://www.theapartmentconsultant.com/invest-in-apartments>

Dependable Income – Generating steady, strong, increasing, and partly tax-sheltered cash flow is the by-product of a well-run strategy for apartment building investing.

Asset Appreciation – By raising rental income on a consistent basis, making property improvements, being in the best cities, and employing top-notch property management, your apartment building value can multiply over time. That's the inherent beauty of apartment ownership.

Capital Preservation – It is said that 90% of the Forbes 400 index of the world's wealthiest people either made or retained their wealth through real estate. But not just any real estate. These people own high-quality, income-producing real estate, like apartment communities. The ultra-wealthy hold real estate long term, because they know that is how to preserve their wealth.

Inflation Hedge – Real estate investments have historically shown the highest correlation to inflation when compared to other asset classes such as the S&P 500, 10-year treasuries, and corporate bonds. As generally speaking, when inflation occurs, the price of real estate, particularly apartment buildings will also rise.

Tax Shelter – The US tax code benefits apartment building owners in several ways including no limit mortgage interest deductions and depreciation accelerations that can shield a portion of the positive cash flow generated or paid out to investors. At the time of sale, IRS allows investors a 1031 provision, allowing investors to exchange into a like kind instrument and defer all taxable gains into the future. This is a tool of the wealthy.

Generational Wealth – Superior returns due to a property's combination of stable revenue (from rents), capital gains (resulting from increased property values), principal pay down (from renters paying down loans) and tax savings (thanks to the investment's special flow-through structure) may provide returns.

Demand – There is still an unfulfilled demand that is expected to be with us for a long time. Seventy-five million millennial plus another 75 million baby boomers is our ace in the hole – that's our pool of renters. The apartment building investment business is poised to perform better than any other asset class because of this strong and predictable demand. More people are renting today than at any time in the past 51 years.

One Deal Is All It Takes – one well-executed apartment building investment can change your financial life and your families for the rest of your lives. Producing what is called "generational wealth" is what apartment building investors have been doing for decades.

Sold

Guaranteed or We'll Buy it

GUARANTEED SALE

The agents offer the bold claim that if we don't sell your home we'll buy it. Sounds like a strong guarantee, until you read the fine print, which requires a deep price discount on the property for the agent to buy it. Most guaranteed sale agents have never bought a client's property, and those that have end up buying it as such a steep discount, they've made more money on the sale than a traditional listing."

NO GIMMICKS

No gimmicks, just satisfied customers: "I had my home listed with a real estate agent recommended by a member of my church. CMA

Do you want your real estate sold fast? A CMA determines what your home is worth in today's market. When the price is too high, buyers will not come to see your home. On the other hand, when the real state is listed too low, the owners will lose money.
