Complete Management Solutions

Introduction

The following tools are intending to support all businesses keep people safe from the risk of COVID-19 when returning to work. The tools have been created by a team of Health & Safety experts using the latest advice from the government & NHS.

The government advice is clear that where possible work should be undertaken from home. If it is not possible to undertake work from home and your business is not on the list forced to close, you can continue to work but should assess your activities in line with the latest COVID-19 prevention methods.

Please note, all information in this pack is correct as of 29th May 2020.

Where do you start?

There's a lot of information out there regarding COVID-19 and details change daily. Trying to stay on top of the information is incredibly difficult and has created a lot of uncertainty around how to operate as a business. We've therefore structured our toolkit to provide a logical thought process to follow:

Step 1 – Complete the COVID-19 Inspection Form

The inspection form will ask you to consider:

- Employees, social distancing and the impact of returning to work
- Travel, Access & Egress
- Cleaning and Hygiene Practices
- Building Safety

The completed inspection form will allow you to identify gaps where additional measure may be required.

Step 2 – Use the findings from your completed inspection form to complete the COVID-19 Risk Assessment

The risk assessment is setup with the same four topics as the inspection form but delves into more detail on how you intend to mitigate the risk of each identified hazard. The information contained within this document is generic and you should tailor the document to be relevant to your industry and take into consideration any specific regional advice given. We've created a resource list that will allow you to quickly find the information you need from the relevant source.

Step 3 – Action Plan

Completing the risk assessment will provide you with a list of different measures that you now need to implement. This is the time to evaluate the practicality of implementing each measure and determine how to take the necessary steps to ensure they're in place ready for your return to work.

Step 4 – Communication

Communication is key and there's a lot of change that your staff need to digest and consider before returning to work. Continuous communication throughout this process will demonstrate that you're putting your staff's safety at the heart of this decision.

Step 5 – Review

The information around COVID-19 changes on a frequent basis and you will need to monitor the latest advice for any changes that could impact your business. We've provided a library of useful links that can be monitored for the latest information.

COVID-19 Health & Safety Inspection Checklist

The current COVID-19 'coronavirus' outbreak poses a serious risk to individuals and businesses. This inspection checklist assists in identifying the control measures to consider reducing the risk of workplace infections and as part of a proactive monitoring regime and checking that preventative and protective control measures are implemented in line with current health and safety general duties.

| No | mployees – Consider what impact returning to work wo Issues | Y/N/ | Rating | imployees and now to | Comments | | | | | |
| 1. | Has a risk assessment been undertaken for those who have a self-declared health condition which could increase their risk profile. | NA | R/A/G | | | | | | | |
| 2. | Are you tracking people who have been identified as high risk/are shielding. | | | | | | | | | |
| 3. | Where practicable have staff been allowed to work from home/remotely. | | | | | | | | | |
| 4. | Can all staff maintain the government guidelines for social distancing based on your industry (<u>The latest Social Distancing Guidelines available here</u>). These could include but are not limited to the following: | | | | | | | | | |
| 4a | Are you able to segregate staff's activities to promote 2 meters distance. | | | | | | | | | |

| 4b | If you are not able to work whilst maintaining a 2 metre distance. Have you considered the following: • Should the activity continue | |
|-----|---|--|
| | If yes: • Are you able to minimise the frequency and time workers are within 2 metres of each other and minimise the number of workers involved in these activities. | |
| 4c | Are you able to implement a one way flow system and provide visual aids (e.g. distancing markers, signage, flow system markers) for maintaining two meters distance. | |
| 5. | Have staff been trained / notified before returning to work on any new procedures. | |
| 6. | Have staff been instructed on how to hand wash effectively, for the suggested duration and maintain good hygiene practices. | |
| 7. | Have staff been instructed on social distance where practicable while at work. | |
| 8. | Have staff been trained on what to do if they are experiencing COVID-19 symptoms. | |
| 9. | Are daily alerts from government departments e.g. Public Health England / Devolved Agencies being sourced and shared with staff. | |
| 10. | Have staff been instructed to minimise business related travel and use video chat as an alternative method of maintaining contact with colleagues, suppliers and customers. | |
| | | |

| No | Issues | Y/N/ NA | Rating R/A/G | Comments |
|----|---|------------|--------------|----------|
| 1. | Are you able to implement sufficient parking restrictions to maintain social distancing measures. | | | |
| 2. | Are workers using their own transport for work activities. | | | |
| 3. | Are workers avoiding public transport where applicable and using alternatives (e.g. cycling, walking to work etc) and been provided with additional parking or facilities such as bike-racks to help people walk, run, or cycle to work where possible. | | | |
| 4. | Have you considered staff that are required to car share for their role and whether this could continue. | | | |
| 5. | Congestion reduced, for example, by having more entry points to the workplace. | | | |

| 6. | Has access to the building/site been restricted to visitors and contractors etc. | |
|-----|--|--|
| 7. | Is it practicable to confine visitors to strictly defined areas and avoid unnecessary movements around the building. | |
| 8. | Have appropriate hand sanitiser pump action containers been made available in every work area and on main travel routes through the building/site including access and egress areas. | |
| 9. | Is advisory hand washing signage displayed throughout the building/site, especially at entrances and exits and were people congregate. | |
| 10. | Are the signs displayed reviewed and replaced as necessary. | |

C: Cleaning Regime - Consider what cleaning and hygiene measures need to be implemented to reduce the risk of individuals contracting the virus on your premises / site. No Y/N/ Comments Rating Issues NA R/A/G Have you completed a deep clean of the property / site before returning. Is the ongoing cleaning frequency sufficient and can cleaning be undertaken when site/building/premises is occupied. Are all hand contact points cleaned on a frequent basis throughout the day including, door furniture, handrails, IT equipment, desks, phones, flush plates, taps, dispensers, toilets, canteen / food preparation areas. Are appropriate cleaning products being used during daily preventative clean regime. Have persons undertaking the cleaning been instructed with clear safe usage instructions. Can where practical curtains and blinds be removed to minimise the areas where viruses can be difficult or time consuming to remove. Can blinds be kept opened and locked if they cannot be removed. Can rugs and mats be removed where safe to do so to make cleaning and disinfection of floors easier.

| 9 | Is it practicable to introduce a daily steam cleaning procedure/ enhanced cleaning for washrooms. | | |
|----|---|--|--|
| 10 | Have staff been provided with appropriate cleaning products so that they can frequently clean their work stations during the day. | | |

D: Building Safety – Responsible Person Checks – Consider how you ensure your building remains safe for all employees and visitors. Guidance on a suitable inspection can be found here. Y/N/ Rating Comments No Issues R/A/G NA Has your responsible person carried out checks on your building in the following areas: Fire Safety Systems / Emergency Lighting. Ventilation / Humidity / Lighting & Heating. Gas Installations. Legionella Controls. Routine Inspections e.g. Local Exhaust Ventilation, Lifting Equipment and Pressure Systems and Equipment Maintenance. Lift Statutory Inspections.

|---|----------------|---|------------------------------------|---|--|---------------------------------------|-----------------------|-------------------------------------|
| Consider: premises work, equipment, specific tasks etc. | People at risk | Control By: guards, training, supervision, safety equipment, safe working procedures, hygiene monitoring etc. | EXISTING/ PRPOSED 'E' or 'P' | Possible Outcome Negligible, Minor, Moderate, Major, Fatality | Likelihood Very unlikely, Unlikely, Possible, Likely, Very Likely | Risk rating: High Medium Low | Proposed Timescale | Action Completed Date/Initial |
| etc. Psychological well being Psychological | Staff | Regular communication is in place (individual and group) to ensure staff are not ill-informed about returning to work safely. New workplace/controls put in place to reduce risk of exposure to COVID 19 are documented in procedures and policies and disseminated to employees through line managers and HR. Line managers are aware of how big changes to working arrangements may cause additional work-related stress and affect their employees' mental health and wellbeing. Managers hold regular informal discussions with their team and look at ways to reduce causes of stress. Concerns on workload issues or support needs are escalated to line manager. Managers are trained to recognise signs and symptoms that a person is working beyond their capacity to cope and deal sensitively with employees experiencing problems outside of work. Staff who are in vulnerable groups themselves or caring for others are encouraged to contact their line manager to discuss their support needs Undertake a review of your stress risk assessment to reflect new working arrangements. Where you have made | E | | | | | |
| wellbeing – Continued | Staff | significant adjustments to employee's working practices, a review must be undertaken. Employees are made aware of supportive mechanisms available to them (e.g. counselling, occupational health, HR, etc) through line managers. | | | | | | |

| HAZARD | AT RISK | CONTROL MEASURES | | PROBABII | LITY WOR | ST CASE | OUTCOM | E |
|---|------------------------------------|--|------------------------------------|---|---|---------------------------------------|-----------------------|-------------------------------------|
| Consider: premises work, equipment, specific tasks etc. | People at risk | Control By: guards, training, supervision, safety equipment, safe working procedures, hygiene monitoring etc. | EXISTING/ PRPOSED 'E' or 'P' | Possible Outcome Negligible, Minor, Moderate, Major, Fatality | Likelihood Very unlikely, Unlikely, Possible, Likely, Very Likely | Risk rating: High Medium Low | Proposed Timescale | Action Completed Date/Initial |
| Virus transmission in the workplace | Staff, visitors, contractors | Specific individual worker risk assessment been undertaken for those who have a self-declared health condition which could increase their risk profile. An inspection checklist has been undertaken to identify the control measures to consider reducing the risk of workplace infections and as part of a proactive monitoring regime and checking that | | | | | | |
| | | preventative and protective control measures are implemented in line with current health and safety general duties. Staff are requested to work remotely where possible and for the foreseeable future (provided it does not interfere with workload commitments). | | | | | | |
| | | A tracking system/InfoExchange reporting tool is utilised to keep track of when staff can return to work after the symptom free period. | | | | | | |
| | | Training arrangements have been developed including refresher sessions to ensure staff have been trained before returning to work on any new procedures. | | | | | | |
| | | Work has been arranged so that staff are able to maintain the government guidelines for social distancing based on our industry (The latest Guidance on these measure can be found by clicking the following link Social Distancing Guidelines). | | | | | | |
| Virus | Staff, | Staff activities are segregated to promote 2 meters distance. Where the social distancing guidelines cannot be followed in full | | | | | | |
| transmission in the workplace – Continued | visitors, contractors | in relation to a particular activity, consideration has been made whether that activity needs to continue for the business to operate. | | | | | | |
| | | Further increasing the frequency of hand washing and surface cleaning. The activity time involved is kept as short as possible and | | | | | | |
| | | minimise the frequency. | | | | | | |

| HAZARD | AT RISK | CONTROL MEASURES | | PROBABII | LITY WOF | RST CASE | OUTCOM | E |
|---|------------------------------|---|------------------------------------|---|---|---------------------------------------|-----------------------|-------------------------------------|
| Consider: premises work, equipment, specific tasks etc. | People at risk | Control By: guards, training, supervision, safety equipment, safe working procedures, hygiene monitoring etc. | EXISTING/ PRPOSED 'E' or 'P' | Possible Outcome Negligible, Minor, Moderate, Major, Fatality | Likelihood Very unlikely, Unlikely, Possible, Likely, Very Likely | Risk rating: High Medium Low | Proposed Timescale | Action Completed Date/Initial |
| - | Staff, visitors, contractors | Consider introducing an enhanced authorisation process (permit to work) for activities where less than 2m distance may be required. Screens or barriers are used to separate people from each other. Back-to-back or side-to-side working (rather than face-to-face) is used whenever possible. Number of people each person has contact with is reduced by using 'fixed teams or partnering' (so each person works with only a few others). Reduced maximum occupancy for lifts, providing hand sanitiser for the operation of lifts, and use of stairs encouraged. A one-way flow system is implemented and visual aids, such as floor strips, signage are used for maintaining two meters distance. Employees are educated on preventative care. Hygiene guidance is given such as avoiding touching eyes, nose, mouth and unwashed hands, cover your cough or sneeze with a tissue, and throw it away in a bin and wash your hands. Staff informed not to wear neck ties and scarves due to the risk of transmitting the virus when working in close proximity to colleagues. Posters are displayed that encourage staying home when sick, cough and sneeze etiquette. Alcohol hand gel has been placed at the entrance to the workplace and in other areas where they will be seen. Staff have been instructed to clean their hands frequently, to wash | | | | | | |
| | | their hands with soap and water for at least 20 seconds followed by the use of an alcohol-based hand sanitiser that contains at least 60-95% alcohol. | | | | | | |

| HAZARD | AT RISK | CONTROL MEASURES | | PROBABII | LITY WOF | RST CASE | OUTCOM | E |
|---|------------------------------------|--|------------------------------------|---|---|---------------------------------------|-----------------------|-------------------------------------|
| Consider: premises work, equipment, specific tasks etc. | People at risk | Control By: guards, training, supervision, safety equipment, safe working procedures, hygiene monitoring etc. | EXISTING/ PRPOSED 'E' or 'P' | Possible Outcome Negligible, Minor, Moderate, Major, Fatality | Likelihood Very unlikely, Unlikely, Possible, Likely, Very Likely | Risk rating: High Medium Low | Proposed Timescale | Action Completed Date/Initial |
| Virus transmission in the workplace – Continued | Staff, visitors, contractors | Soap and water and alcohol-based hand rubs are provided in the workplace and adequate supplies are maintained. Social distancing while at work is maintained by continuing to limit social interactions by staggering start/finish times and lunchtime. Staff bring their own provisions in for lunch. The canteen is only to be used to provide seating, with staggered entry to maintain social distancing rules. Social gathering amongst employees have been discouraged whilst at work. Staff requested to keep in touch through remote technology such as phone, internet and social media. Staff have been separated into teams to reduce contact between employees. Desks are arranged to maintain a minimum of 2 meters from each other, with employee's facing in opposite directions. Only where it is not possible to move workstations further apart, using screens to separate people from each other. Use of protective screening for staff in receptions or similar areas. Workstations assigned to an individual. If shared, they are shared by the smallest possible number of people. Hot desks avoided. Fixed pairing system for people who have to work in close proximity. For example, during two-person assembly or maintenance. Changed/reviewed layouts, line set-ups or processes to allow people to work further apart from each other. | | | | | | |

| HAZARD | AT RISK | CONTROL MEASURES | | PROBABII | LITY WOR | ST CASE | OUTCOM | E |
|--------|-------------------|--|------------------------------------|---|--|---------------------------------------|-----------------------|-------------------------------------|
| | People at risk | Control By: guards, training, supervision, safety equipment, safe working procedures, hygiene monitoring etc. | EXISTING/ PRPOSED 'E' or 'P' | Possible Outcome Negligible, Minor, Moderate, Major, Fatality | Likelihood Very unlikely, Unlikely, Possible, Likely, Very Likely | Risk rating: High Medium Low | Proposed Timescale | Action Completed Date/Initial |
| etc. | | Sites/building separated into working zones to keep different groups of workers physically separated as much as practical. Restricted access between different areas of a building or site. Reduced movement by discouraging non-essential trips within buildings and sites. For example, encouraged use of telephones where permitted, and cleaning them between use. Reducing job and location rotation and equipment rotation, for example, single tasks for the day. Building/site access is planned and 'area of safety' points to enable social distancing Reduced number of people in attendance at site inductions and considered holding them outdoors wherever possible with social distancing. Regulated use of high traffic areas including corridors, lifts, turnstiles and walkways to maintain social distancing. Where PPE is already utilised as part of a work activity to protect against non-COVID-19 risks, this is continued to do so. Precautionary use of extra PPE to protect against COVID-19 is not encouraged outside of clinical settings or when responding to a suspected or confirmed case of COVID-19. Support is provided to workers in using face coverings safely if they choose to wear one. This includes: • Wash your hands thoroughly with soap and water for 20 seconds or use hand sanitiser before putting a face covering on, and after removing it. | | | | | | |
| | | covering, as you could contaminate them with germs from your hands. | | | | | | |

| HAZARD | AT RISK | CONTROL MEASURES | | PROBABII | LITY WOF | RST CASE | OUTCOM | E |
|---|----------------|--|------------------------------------|---|---|---------------------------------------|-----------------------|-------------------------------------|
| Consider: premises work, equipment, specific tasks etc. | People at risk | Control By: guards, training, supervision, safety equipment, safe working procedures, hygiene monitoring etc. | EXISTING/ PRPOSED 'E' or 'P' | Possible Outcome Negligible, Minor, Moderate, Major, Fatality | Likelihood Very unlikely, Unlikely, Possible, Likely, Very Likely | Risk rating: High Medium Low | Proposed Timescale | Action Completed Date/Initial |
| | | Change your face covering if it becomes damp or if you've touched it. | | | | | | |
| | | Continue to wash your hands regularly. | | | | | | |
| | | Change and wash your face covering daily. | | | | | | |
| | | • If the material is washable, wash in line with manufacturer's instructions. If it's not washable, dispose of it carefully in your usual waste. | | | | | | |
| | | Practise social distancing wherever possible. | | | | | | |
| | | (Note: When managing the risk of COVID-19, additional PPE beyond what you usually wear is not beneficial. This is because COVID-19 is a different type of risk to the risks you normally face in a workplace, and needs to be managed through social distancing, hygiene and fixed teams or partnering, not through the use of PPE. The exception is clinical settings, like a hospital, or a small handful of other roles for which Public Health England advises use of PPE. For example, first responders and immigration enforcement officers.) If you are in one of these groups you should refer to the advice at: https://www.gov.uk/government/publications/coronaviruscovid-19-personal-protective-equipment-ppe-plan/covid-19personal-protective-equipment-ppe-plan and https://www.gov.uk/government/publications/covid-19-decontamination-in-non-healthcare-settings The government's e.g. Public Health England / Devolved Agencies response page is monitored regularly for latest details | | | | | | |
| | | Agencies response page is monitored regularly for latest details on guidance and advice. | | | | | | |

| HAZARD | AT RISK | CONTROL MEASURES | | PROBABII | LITY WOR | ST CASE | OUTCOM | E |
|---|------------------------------------|---|------------------------------------|---|--|---------------------------------------|-----------------------|-------------------------------------|
| Consider: premises work, equipment, specific tasks etc. | People at risk | Control By: guards, training, supervision, safety equipment, safe working procedures, hygiene monitoring etc. | EXISTING/ PRPOSED 'E' or 'P' | Possible Outcome Negligible, Minor, Moderate, Major, Fatality | Likelihood Very unlikely, Unlikely, Possible, Likely, Very Likely | Risk rating: High Medium Low | Proposed Timescale | Action Completed Date/Initial |
| | | Advice is shared with staff members and staff have been fully briefed and kept up to date with current advice on staying protected through the company lines of communications (i,e line managers, HR) and shared with staff. Business related travel is reduced | | | | | | |
| | | All non-essential meetings have been changed to digital consultations with essential face to face meetings following government social distancing guidelines. | | | | | | |
| | | Meetings held outdoors or in well-ventilated rooms whenever possible. | | | | | | |
| | | Staff discouraged from hand shaking and general close personal greetings | | | | | | |
| | | Employees are made aware of the impact of COVID 19 on their job/change of working environment. | | | | | | |
| Someone entering the workplace with COVID-19 | Staff, visitors, contractors | Request that companies who regularly attend our premises or those we work alongside us to provide their health and safety policy/arrangements / or RAMS (risk assessment and method statement) regarding COVID-19 including 'Covid 19 secure' assurance notice. | | | | | | |
| | | Work with our supply chain to ensure that they're adopting good practices to prevent the spread of COVID-19 to discuss arrangements and control measures. | | | | | | |
| | | Staff are made aware of COVID-19 symptoms via training sessions and visual aids such as posters in key locations, screensavers | | | | | | |
| Someone entering the workplace with COVID-19 | Staff, visitors, contractors | Anybody visiting site will be informed that they are not to enter if they're experiencing COVID-19 symptoms and will be advised to self-isolate in line with government recommendations. See | | | | | | |

| HAZARD | AT RISK | CONTROL MEASURES | PROBABILITY WORST CASE OUTCOME | | | | | E |
|---|----------------|--|------------------------------------|---|---|---------------------------------------|-----------------------|-------------------------------------|

Need further assistance?

FS Facilities Management can offer bespoke H&S guidance. If you want more support, contact us using the details below:

E: office@fs-fm.co.uk | T: 0116 4299422 | www.fsfacilitiesmanagement.com

(Company Name) COVID-19 Visitor Questionnaire

The health and safety of our employees, customers, families and visitors remains the top priority of (Company Name). As the Coronavirus situation continues to evolve globally, we're asking you to complete this questionnaire to help prevent the spread of or exposure to COVID-19. If you answer "yes" to any questions, we respectfully request you reschedule your visit or request a virtual consultation. If you answer "no" to these questions and plan to proceed with your visit, please email this completed document back to the originator.

While in our premises, we ask you to exercise safe social distancing guidelines, avoid handshakes and abide by current health guidelines to frequently and thoroughly wash your hands-on arrival and departure (if possible) and where possible carry and use hand sanitiser. Please arrive at your designated time and use the hand sanitisers on entry to the building. If you use any PPE please take it back home with you. Do not dispose of on our site. Do not touch anything whilst on site.

| Visitor Name: Click or tap here to enter text. | Visitor Mobile/Home Phone Number: Click or tap here to enter text. |
|--|---|
| Visitor Company/Organisation: Click or tap here to enter text. | (Company Name) Host: Click or tap here to enter text. |
| Planned Date of visit: Click or tap to enter a date. | Scheduled Time of visit: Click or tap here to enter text. |

| | SELF DECLARATION BY VISITOR | | | | | | | | | |
|----|--|--|--|--|--|--|--|--|--|--|
| 1. | Have you been diagnosed with COVID-19 within 14 days of your visit to (Company Name)? | | | | | | | | | |
| | ☐ Yes ☐ No | | | | | | | | | |
| 2. | Have you been in contact with someone who has been diagnosed with COVID-19 within 14 days of your visit to (Company Name)? | | | | | | | | | |
| | ☐ Yes ☐ No | | | | | | | | | |
| 3. | Have you been in contact with someone who may have been exposed to COVID-19 within 14 days of your visit to (Company Name)? | | | | | | | | | |
| | ☐ Yes ☐ No | | | | | | | | | |
| 4. | Have you experienced any of the following symptoms; within 14 days of your visit to (Company Name)? • High temperature • Dry, persistent cough • Anosmia – loss of taste and smell • Sore throat • Difficulty breathing | | | | | | | | | |
| | Headache and body aches Feeling weak | | | | | | | | | |
| | Chills Blocked nose Diarrhoea | | | | | | | | | |
| | ☐ Yes ☐ No | | | | | | | | | |
| 5. | Have you visited any facility or location with confirmed Covid-19 Cases | | | | | | | | | |
| | ☐ Yes ☐ No | | | | | | | | | |
| 6. | Have you travelled abroad in the last 14 days. https://www.gov.uk/foreign-travel-advice | | | | | | | | | |
| | ☐ Yes ☐ No | | | | | | | | | |

If the answer to any of the above questions is "yes," access to the site will be denied and please defer your visit. If you answer "no," please proceed. Thank you.

If you feel unwell and are displaying the majority of the symptoms listed in section 4, particularly the first three, you should stay at home and follow the current Government guidelines.

Access to site (delete: APPROVED / DEFERRED)

Note: If you plan to be onsite for consecutive days, please immediately advise your host if any of your responses change. This information is for internal use only and not general distribution.

Checklist and Risk Assessment for Individual Worker re COVID-19

Step 1

The checklist should be completed first: this will help you to identify any hazards to the worker. For each point, consider whether it is part of their work and if so, how it may affect them personally. On occasion their work may affect others and this should also be considered.

Step 2

Where you have answered YES in the checklist and identified there is a hazard and assessed the risk to the worker by determining existing controls/further action required, enter this onto the risk assessment pro forma.

You will then be able to put any control measures in place to eliminate the risk, or reduce it to an acceptable level for the worker.

Note

This checklist is not exhaustive: other issues with the worker's work conditions/place may need to be considered.

The risk assessment should be reviewed on a regular basis throughout the employment and any necessary control measures put in place.

| Employee's name: | Date: | | | | | | |
|---|------------------|--|--|--|--|--|--|
| Job title: | Line Manager's N | Name: | | | | | |
| Form completed by: | | | | | | | |
| Any known recommendations made by Doctor and/or Occupational Health Specialist: | | | | | | | |
| | | | | | | | |
| | | | | | | | |
| | | | | | | | |
| | | | | | | | |
| | | | | | | | |
| | | | | | | | |
| | | | | | | | |
| | | | | | | | |
| Covid-19 exposure | Yes/No | Existing control/Further Action Required | | | | | |

| | If the answer to any question is Yes then identify the additional con | ntrol measures introduced to mitigate the risk. |
|-----|--|---|
| 1.1 | <2m distancing: Are employee's required to carry out work in breach of 2 metre social distancing from both work colleagues and non-employees | |
| 1.2 | Contaminated surfaces: Does the work involve touching surfaces that are potentially contaminated | |
| 1.3 | Inadequate welfare facilities: Are welfare facilities inadequate to facilitate regular handwashing eg lack of number of facilities or lack of soap and hot water | |
| 1.4 | Pre-existing chronic conditions: Does the employee have any known pre- existing chronic condition (listed below) that may make them more vulnerable if exposed to the covid-19 virus | |
| 1.5 | Increased vulnerability: Has the employee expressed concern about any other condition which they feel would make them more vulnerable eg mild asthma | |
| 1.6 | High risk work environment: Is there a higher risk of infection due to the work environment eg hospitals, mortuaries, densely populated workplaces etc | |
| 1.7 | High risk of infection: Is there a higher risk of infection due to the geographic location eg those areas with high infection rates | |

Risk

The level of risk will depend on:

- the work environment
- the type of work carried out
- the distance that can be maintained between the employee and any possible source of infection
- the level of hand cleaning regime in place
- the level of information provided
- the effectiveness of existing controls that are in place

In some cases, workers may be more vulnerable to infection because of age (70 and over) or an existing condition these individuals fall into two categories as below;

Clinically extremely vulnerable people may include the following people. Disease severity, history or treatment levels will also affect who is in the group.

- 1. Solid organ transplant recipients.
- 2. People with specific cancers:
 - people with cancer who are undergoing active chemotherapy
 - · people with lung cancer who are undergoing radical radiotherapy
 - people with cancers of the blood or bone marrow such as leukaemia, lymphoma or myeloma who
 are at any stage of treatment
 - people having immunotherapy or other continuing antibody treatments for cancer
 - people having other targeted cancer treatments which can affect the immune system, such as protein kinase inhibitors or PARP inhibitors
 - people who have had bone marrow or stem cell transplants in the last 6 months, or who are still taking immunosuppression drugs
- People with severe respiratory conditions including all cystic fibrosis, severe asthma and severe chronic obstructive pulmonary (COPD).
- People with rare diseases that significantly increase the risk of infections (such as SCID, homozygous sickle cell).
- 5. People on immunosuppression therapies sufficient to significantly increase risk of infection.
- 6. Women who are pregnant with significant heart disease, congenital or acquired.

People who fall in this group should have been contacted to tell them they are clinically extremely vulnerable.

Clinically vulnerable people are those who are:

- 1. aged 70 or older (regardless of medical conditions)
- 2. under 70 with an underlying health condition listed below (that is, anyone instructed to get a flu jab as an adult each year on medical grounds):
 - chronic (long-term) mild to moderate respiratory diseases, such as asthma, chronic obstructive pulmonary disease (COPD), emphysema or bronchitis
 - chronic heart disease, such as heart failure
 - chronic kidney disease
 - chronic liver disease, such as hepatitis
 - chronic neurological conditions, such as Parkinson's disease, motor neurone disease, multiple sclerosis (MS), or cerebral palsy
 - diabetes

Any other issues

- a weakened immune system as the result of conditions such as HIV and AIDS, or medicines such as steroid tablets
- being seriously overweight (a body mass index (BMI) of 40 or above)
- pregnant women

How to minimse the Risk

When assessing the infection risks to staff the following controls should be considered:

Avoid contact with possible sources of infection by;

- Avoiding having to work in areas where there is a known covid-19 sufferer where possible
- always ensure safe distance (2 metres) is maintained between individuals (this includes welfare areas), if not possible for certain activities then minimise time spent in closer proximity
- wearing gloves, where practicable, to prevent contact with potentially contaminated surfaces
- ensure employees have the facilities to carry out regular hand washing using soap and water for 20 seconds or hand sanitiser
- provide employees information about the symptoms and the control measures required
- provide employees with the correct ppe
- employees to report situations which they feel may have exposed them to the virus

Clinically extremely vulnerable individuals have been strongly advised not to work outside the home.

Clinically vulnerable individuals, who are at higher risk of severe illness have been asked to take extra care in observing social distancing and should be helped to work from home, either in their current role or in an alternative role.

If clinically vulnerable (but not extremely clinically vulnerable) individuals cannot work from home, they should be offered the option of the safest available on-site roles, enabling them to stay 2m away from others. If they have to spend time within 2m of others, you should carefully assess whether this involves an acceptable level of risk. As for any workplace risk you must take into account specific duties to those with protected characteristics, including, for example, expectant mothers who are, as always, entitled to suspension on full pay if suitable roles cannot be found. Particular attention should also be paid to people who live with clinically extremely vulnerable individuals.

Further Action Required

| If a risk has been identified, | indicate below | the action to be take | n to remo | ve | the hazard or r | educe the | risk. | | |
|--------------------------------|---------------------|-------------------------------|--------------------|--------------|--------------------|-----------------|---|---|--|

COVID-19 Information for Employees

What is the Coronavirus?

COVID-19 is a highly contagious virus that may result in you displaying the following symptoms;

- High temperature
- Dry, persistent cough
- · anosmia loss of taste and smell
- Difficulty breathing
- Sore throat
- Headache and body aches
- Feeling weak
- Chills
- Blocked nose
- Diarrhoea

If you feel unwell and are displaying the majority of these symptoms, particularly the first three, you should stay at home and follow the current Government guidelines.

General rules to protect yourself and others:

- Pay attention to symptoms
- Stay at home for 7 days if experiencing symptoms
- Cough or sneeze in a disposable tissue. If you don't have a tissue, use your sleeve.
- Throw away disposable handkerchief immediately after use
- Avoid touching your eyes nose and mouth with unwashed hands
- Wash your hands with soap and water or a sanitiser gel several times a day for at least 20 seconds.
- Keep at least 2m away from others where possible
- Wear face coverings when in enclosed public spaces like public transport
- Avoid public transport where possible
- Only travel for essential purposes, getting to and from work and for exercise purposes

COVID-19 Information for Employees

Workplace Control Measures

In order to keep you safe we have introduced the following site rules whilst at work; (please delete and add/modify site rules to suit)

- Arrive at site within your designated staggered time slot
- Use your designated entry point to the building
- Always keep 2m distance from others if queueing to access the workplace
- Use the hand sanitisers placed at the entrance to the site
- Follow the one-way flow system in operation when moving around the site
- Only move around the site if essential to do so
- Observe the maximum occupancies of rooms and lifts
- Use the hand sanitiser stations when moving from one area to another
- Observe the distancing rules when at your workstation and surrounding area
- Follow local rues as indicated by floor and wall signage.
- Clean common touch parts of equipment such as printers, photocopiers before and after use using the wipes provided
- If the activity requires two persons, ensure you always pair up with the same colleague and minimise the time spent together
- Stick to your designated staggered break time, minimise numbers of persons using the kitchen/canteen facilities and maintain distancing
- Maintain distancing rules when using common areas such as toilet facilities and access routes
- When leaving site maintain social distancing in any queues. Do not congregate in groups.

In an emergency, for example, an accident, fire, or break-in, people do not have to stay 2m apart if it would be unsafe.

COVID-19 Information for Employees

Wash your hands regularly

Ensure you're regularly washing your hands for at least 20 seconds, using the below technique:

Hand-washing technique with soap and water

Wet hands with water

Apply enough soap to cover all hand surfaces

Rub hands palm to palm

Rub back of each hand with palm of other hand with fingers interlaced

Rub palm to palm with fingers interlaced

Rub with back of fingers to opposing palms with fingers interlocked

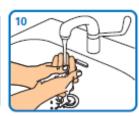

Rub each thumb clasped in opposite hand using a rotational movement

Rub tips of fingers in opposite palm in a circular motion

Rub each wrist with opposite hand

Rinse hands with water

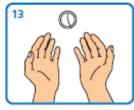

Use elbow to turn off tap

Dry thoroughly with a single-use towel

Hand washing should take 15–30 seconds
