

Home or Business Video Camera Security

New Smart Home Technology has changed the name of the game. Forget about costly monthly fees and security systems that require professional installation.

Instead, you could be the proud owner of a hassle-free home security system for under \$1,000! Our security experts at **JR Computer Experts** will share the best options for every budget so you can protect your home, and your wallet

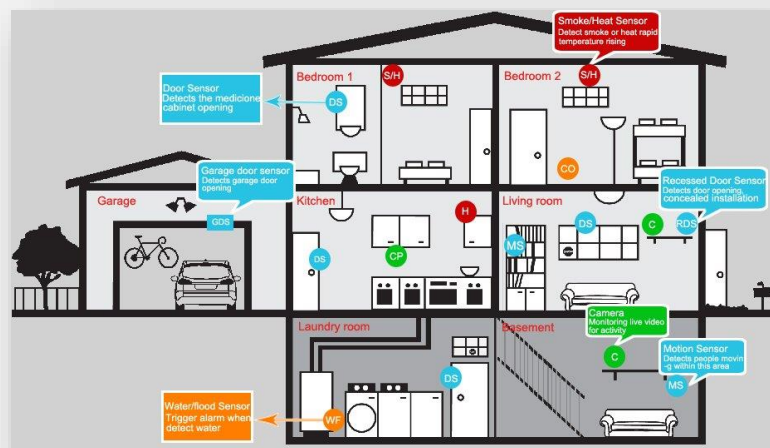

What do you want to do?

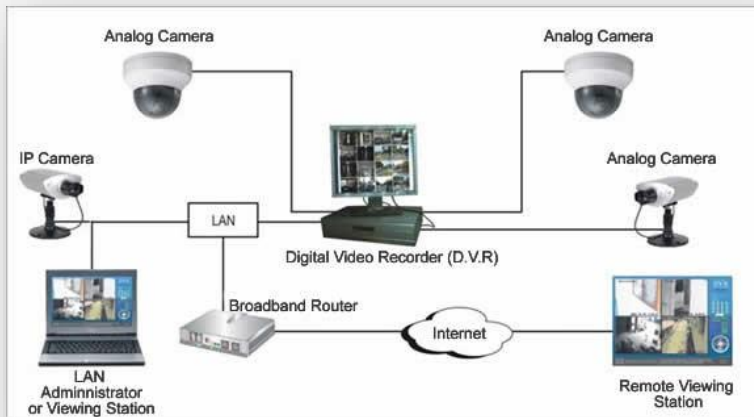

1. Securely monitor home or business
2. Stay connected to family, pets, and possessions when away
3. Get alerted when activity is detected
4. Continually record video
5. Mount camera(s) outside
6. View & play back on your smartphone

Protecting your home is becoming more important and with a security camera you can monitor inside and outside your residence 24 hours a day giving you both confidence and peace of mind that your home is protected.

Be confident when you are away from home. These systems also provide protection while you are home, allowing you to monitor and keep yourself and your belongings safe and secure.

If you do not have any idea about security camera, you can consult **JR Computer Experts** who can help you in choosing the device that would work best for you. Likewise, we can install the camera to ensure that it will monitor everything within its covered area. Otherwise, its purpose will not be fulfilled if it will not work properly.

By setting up security cameras, DVRs and remote viewing capabilities in the surveillance system, you as the home owner or business owner get a ‘virtual security guard’
