

Bioelements Surface Peeling Treatment Consent Form

During a Bioelements Surface Peeling Treatment (Bioelements Lactic-Plus Peel, Alphablend Maximum Exfoliant Treatment and Bioelements Double Surface Peeling Treatment) you may experience a transient stinging, tingling sensation, and redness. If you have any conditions that could have bearing on the treatment, including pregnancy, allergies, Retin-A or Accutane use, or recent facial surgery, please tell your skin care professional prior to the treatment.

Special Instructions: Do not use any scrubs or exfoliant for 48 hours prior to the treatment. Avoid unprotected sun exposure as well.

After The Treatment: Do not wax, use any scrubs, abrasives, harsh soaps, or skin care products for 48 hours, except those recommended by the skin care professional who performed the treatment. Be sure to wear your recommended sunscreen daily.

To Achieve Maximum Results: You will need a minimum of six or more treatments as recommended by your skin care professional.

Bioelements Surface Peeling Treatments (Bioelements Lactic-Plus Peel, Alphablend Maximum Exfoliant Treatment and Bioelements Double Surface Peeling Treatment) are cosmetic treatments. Results vary from person to person depending on many factors including age, lifestyle, skin type, condition of skin, post-treatment skin care and other variables.

I fully understand all the above and hereby give consent for: The Bioelements Lactic-Plus Peel (or) Alphablend Maximum Exfoliant Treatment (or) Bioelements Double Surface Peeling Treatment.

I certify that I am not pregnant or using Accutane and have not done so far at least six (6) months. I have informed my skin care professional about my use of Retin-A or any other topical medications. I have also disclosed any allergies, sensitivities or skin conditions I have or have had in the past.
