Assessment Attributes

Questionnaire • 50 items using a 6-point rating scale (almost never to almost always), plus three open-ended questions

180° Feedback • Self (leader) and Raters (direct reports or individuals with whom the leader sets goals)

Pre- and Post-Assessment • Reports that compare the assessment results prior to and after training

Norms • Included to provide benchmarks or standards of performance determined by tracking scores of managers from various organizations over time

Valid Results • The LAPII has been deemed valid, as evidenced by scientific methods of statistical testing, demonstrating that this instrument accurately measures what it purports to

Psychometric Properties • Construct Validity—subscale factor analysis

- Reliability—alpha coefficients of 16 dimensions range from .60 to .89
- Concurrent validity—significant positive correlation with
 LBAII[®] (Leader Behavior Analysis II[®])
 - LBDQ (Leader Behavior Description Questionnaire)
 - JSI (Job Satisfaction Inventory)
- Normative comparisons—standardized scores derived from means and standard deviations

Administration • Computer scoring with web-based reporting requires Internet access and an email account
