

ANIMAL TUNING FORK PRACTITIONER

During this course you will study techniques to treat both the animals and their companions with tuning forks, bringing the whole body and mind into states of relaxation and balance. You will study over two weekends. The first weekend covers the theoretical modules in a classroom for 2 days. The second long weekend covers the practical elements.

This is a fully insurable course that you can offer to clients and their pets. It is ideal for the new practitioner or existing therapists.

We offer classes in small groups ensuring a personalised teaching approach.
