

AIRBRUSH TATTOO

FAQ

How long do the tattoos last?

The tattoos last anywhere from 2-7 days depending on your skin type and where you put your tattoo. Legs in general last the longest, then arms, back, then chest and stomach. Oily skin will cause the tattoo to come off faster than it would for normal to dry skin. Also it is recommended to keep tight clothing and wet clothing off of the tattoo to preserve its life.

How to care for your tattoo?

- *Do NOT apply oils or lotions to tattoo**
- *Do not scrub or rub on your tattoo, pat or air dry tattooed area**
- *Do NOT shave over tattoo**
- *Powder after bathing and before sleeping (to prolong tattoos life)**
- *Avoid wearing tight fitting clothing over tattoo to prevent rubbing**

Are the tattoos waterproof?

Yes the tattoos are waterproof, however it is best to take care of them.

How long does it take to spray on one of your airbrush tattoos?

It takes our airbrush tattoo artist anywhere from 2-5 minutes to do a small tattoo with 1-3 colors.

Can take up to 5+ minutes to do medium, large and extra large tattoos with 2+ colors.

(If inquiring about time on a specific tattoo feel free to contact us via phone or email)

How long before they dry?

They are dry immediately.

How do you take them off?

You take them off with rubbing alcohol or oil. Rubbing alcohol takes them off immediately.

Is this Henna?

No! Henna is an ink that stains your skin; our airbrush ink only sits on the skin and can be removed immediately!

Is it safe?

Yes it is. The ink we use, uses FDA approved and non-toxic ingredients to insure safety and sensitivity to all those who receive a tattoo.
