PWR Series

Recovery & Recycle System

The PWR Series allows for wash water to be reclaimed on the jobsite. Water is reclaimed by using the 20-foot berm (included) to stop water from flowing down a drain or away from your area. The suction head draws wash water into a holding chamber where a second pump forces the water through an optional 10-micron bag filter before returning it to the holding tank for reuse or proper disposal.

Features:

- 1/3 HP transfer pump
- Oil absorbing boom/sock
- Vacuum tank drain
- 3-stage vacuum motor
- Stainless-steel suction head
- Cam lock fittings
- 50-foot vacuum hose
- 55-gallon capacity
- 20-foot water berm

PWR-10-OME1 shown with standard accessories: oil absorbing boom, 33-0529; stainless-steel suction head, 21-0306; 50-ft. vacuum hose, 855-0057; and 20-ft. water berm, 33-0520; also shown with wheel kit option, WX-0106 and dual filters option, WX-0109

The Portable Water Recovery Series is the ideal tool for remote cleaning applications. It captures and reclaims wash water for reuse or proper disposal if necessary. The compact design makes it an easy addition to trailer packages.
