

Solving water shortages out of thin air

“

**When the well is dry, we
know the worth of water.**

- Benjamin Franklin

”

water scarcity & water usage

36%

of the U.S. is
experiencing drought.

30%

of the world's population lives
in water scarce areas

2.7B

people will lack access to
water in 2030

over the last century, water use
has grown 2x+ the rate of
population increase globally

reasons include physical
shortage, institutional failures

lack of adequate infrastructure
to ensure regular supply even
where water is abundant.

“

**Water is the oil of the
21st century**

- Andrew Liveris
CEO, DOW Chemical

”

water barons

Wall Street banks and multibillionaires including Goldman Sachs, former President George H.W. Bush, Hong Kong's Li Ka-shing, and T. Boone Pickens, are buying up water all over the world at unprecedented pace. T. Boone Pickens owned enough of the Ogallala Aquifer to drain approximately 65 billion gallons of water over a year.

“

For any industry utilizing water in its operations, the cost of getting water and distributing it is a concern. It's definitely something we address.

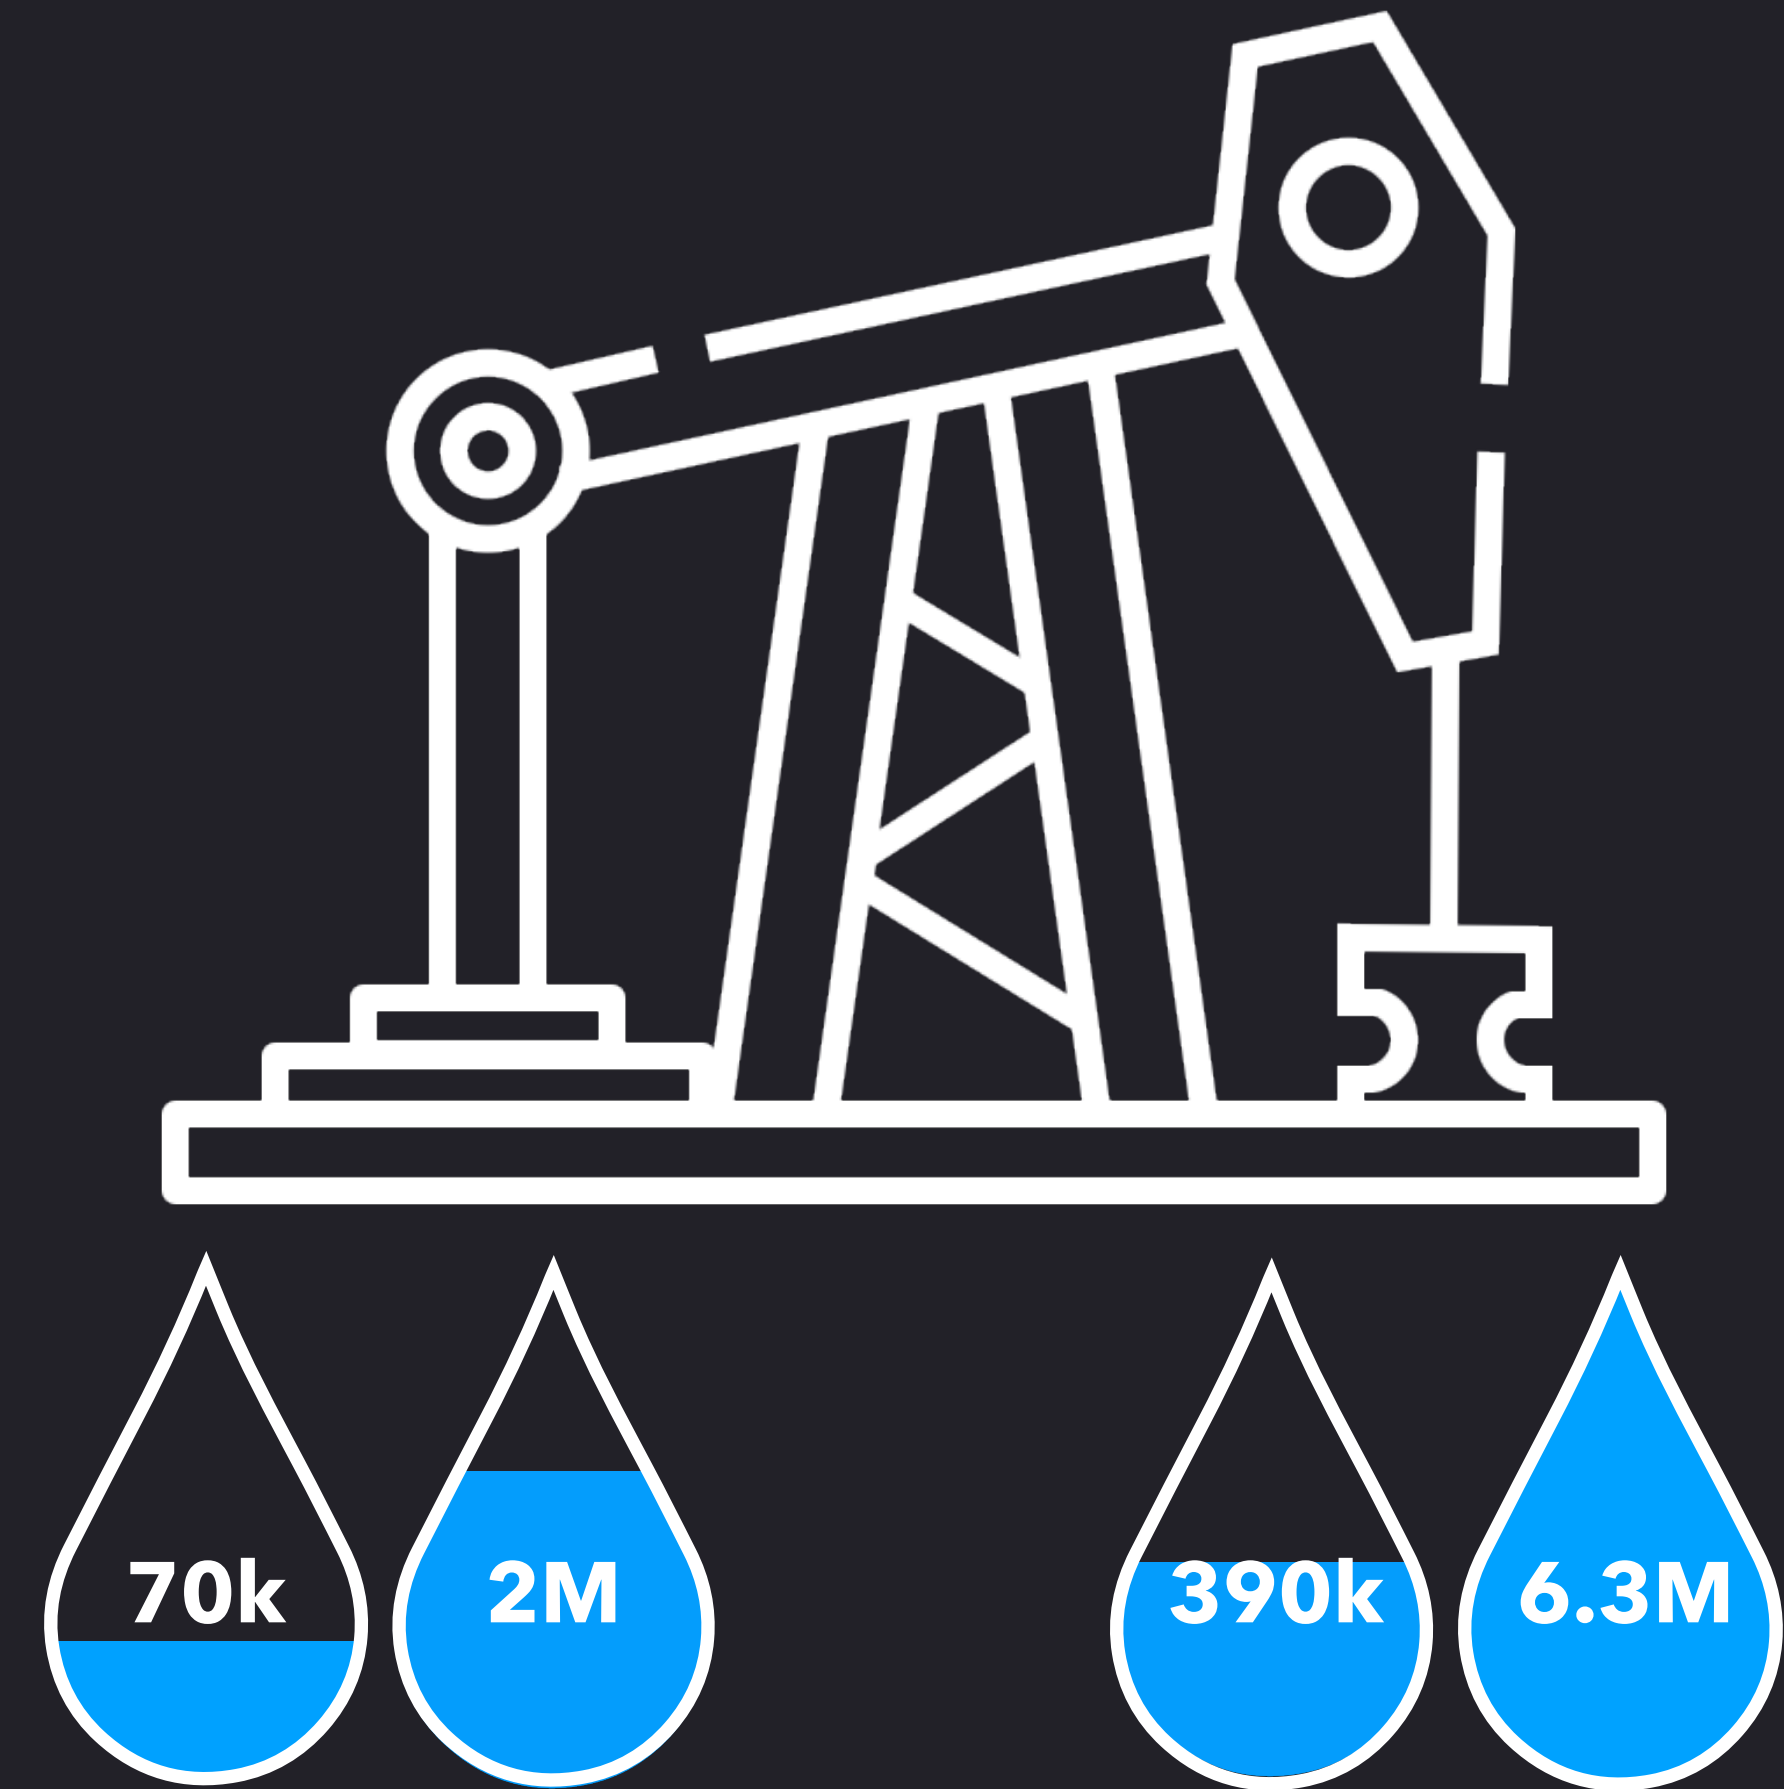

- Ryan Flynn
Executive Director of the NMOGA

”

fracking

51% of oil and gas wells in Texas - the largest oil producing state - are in highly stressed water regions.

The 30 largest publicly traded oil & gas companies have been assigned scores on factors such as wastewater use, water sources, efforts to reduce freshwater use, and water scarcity. The economics are making it more necessary.

gallons used per

gallons used per
shale-gas well

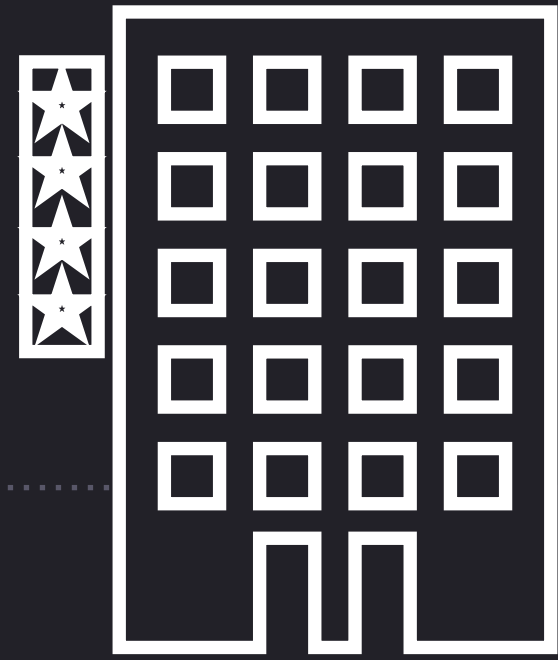

a solution in plain sight

AC units continually produce potable water every day that is simply wasted. A standard residential AC unit produces .68 gallons of water per hour; that's over 16 gallons a day, 114 gallons a week, 456 gallons a month, and 5,472 gallons a year.

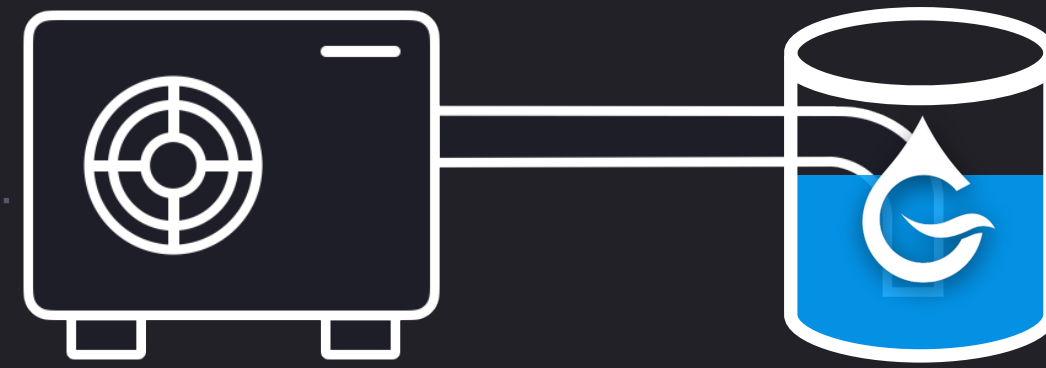

5,472 gallons/year

1

Hotel Partners

104,000 hotel rooms (Dallas)
can produce 76M gallons of
potable water in 6 months.

2

Products + Services

GreenH2O supplies the 2,000 gal.
collection barrels, a mobile app for
real time updates & service requests.

3

Pickup + Resell

Our trucks come to pick it up similar
to a recycling truck, resell and deliver
it to energy/agri-companies

1

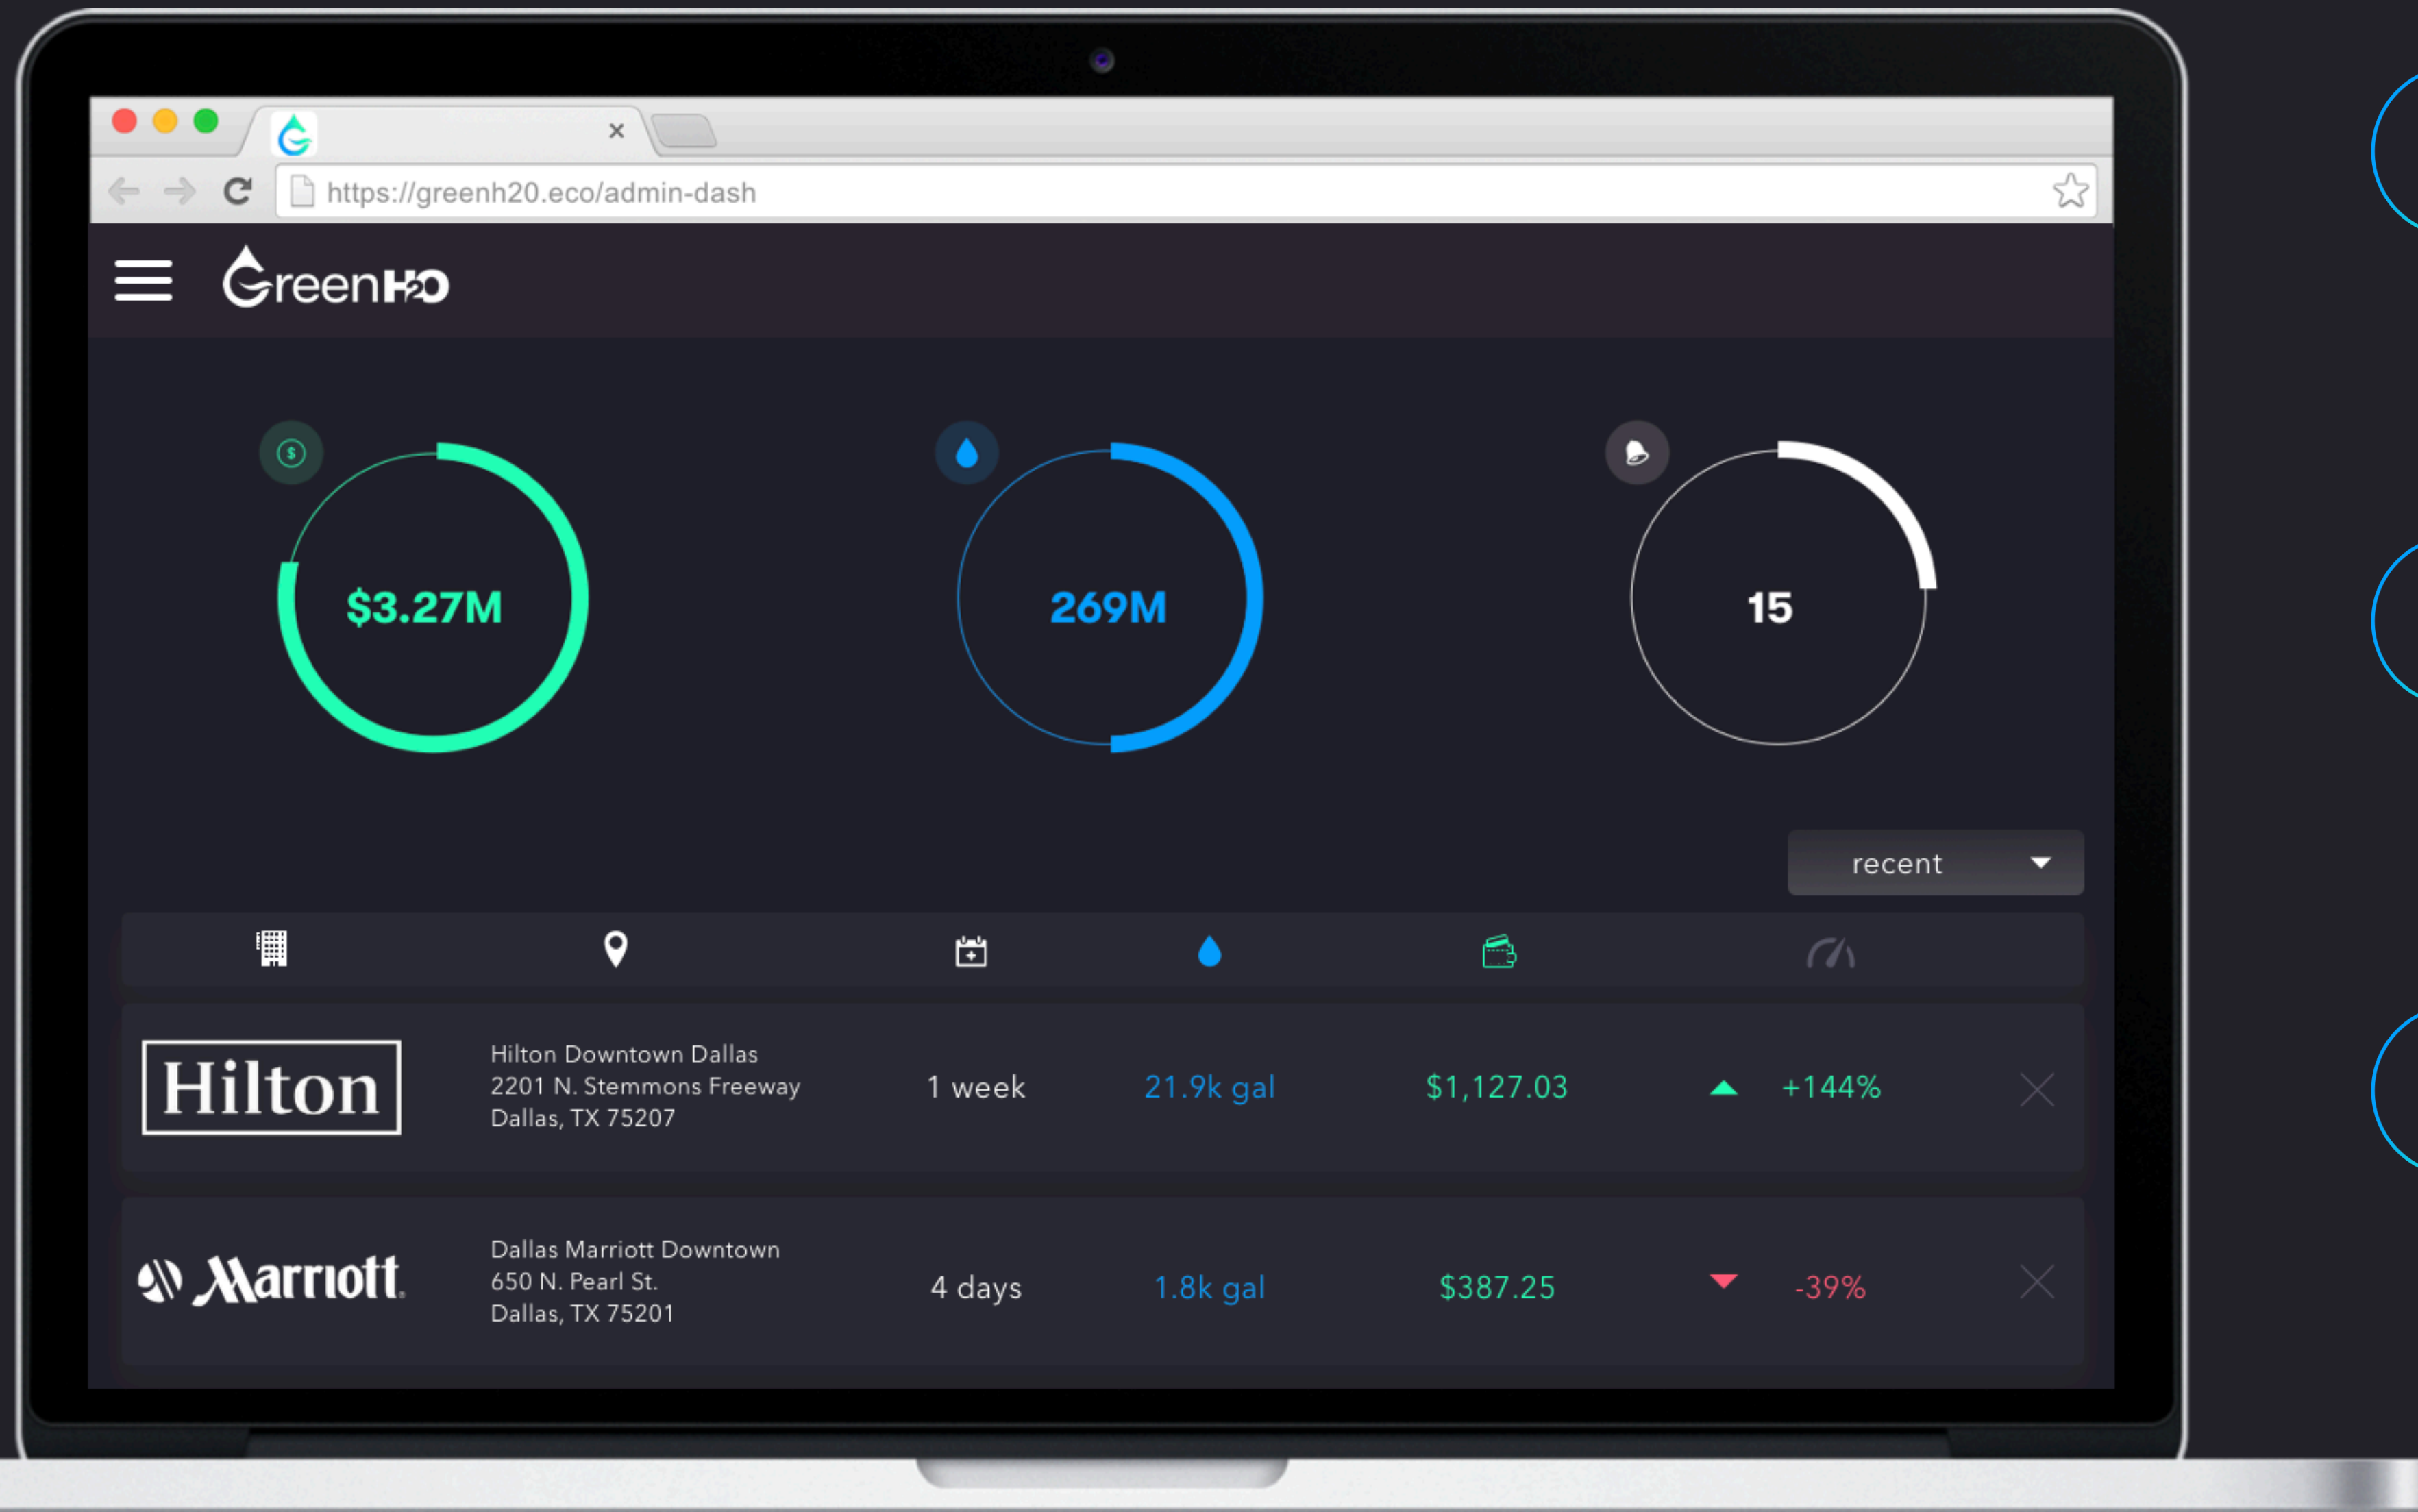

iOS & Android mobile app for real-time insights

2

Gives hotel partners quick access for service & pickup requests

3

Transparency into ecological impact and earnings

1

Client usage statistics,
water production, & alerts

2

Accurate forecasting on
revenue & disbursements

3

Leverage into brokerage
deals
