

# Backplates

Peek offers a variety of one-piece aluminum signal backplates as optional add-ons for all its vehicle signals, including 12 signals with 1, 2, 3, 4, or 5 sections, and 8 signals with up to 3 sections. Individual backplates can be ordered either flat or louvered (to allow air to flow through the plate.) Backplates will fit on either aluminum or polycarbonate bodied signals.

Peek backplates are fabricated from 0.06 (1.5mm) sheet aluminum which is electrostatically powder-coated in your choice of color. You can specify the color of powder-coating of each backplate by inserting the appropriate color suffix to the end of the part number when ordering.

Available colors include:

- \* Flat back (Standard) – Specify 'FBK'
- \* Federal Yellow – Specify 'FYL'
- \* Olive Green – Specify 'OGR'
- \* Custom Color (Paint chip required) – Specify 'CST'

Borders are 5 inches wide (127mm) on the backplates for 12 signals, and 8 inches wide (203mm) on the backplates for the 8" signals.

Heavier gauge aluminum is available upon request. Stainless steel attaching screws and washers are included with each backplate.

Two inch (51mm) or three inch (76mm) wide reflective tape is also available as an optional item around the edges of flat backplates. (Reflective tape is not available on louvered backplates.)

In addition to those pictured here, backplate assemblies are also available to custom-fit all Peek 2-2-1 and 3-2 signal clusters in 12 inch signal sizes. Options are also available for any of the mounting methods being used for both inline and clustered signals, including standard, Plumbizer, mast arm clusters, and span wire clusters. Plumbizer, mast arm and span wire backplate assemblies include extra filler strips to cover gaps in the signal assembly caused by the mounting hardware. These filler strips require additional mounting screws and associated hardware, available as a cluster hardware kit.
