

## Why Do I Need The KrusePak?

**Low Manpower**

**Multiple LODD's in High Rise Fires  
Due to Loss of Air**

**Keeps Bottles Confined / Eliminates  
Safety Hazard  
(No Rolling Around)**

**Identifies each Company's Spare  
Bottles (Especially Useful in Mutual  
Aid Situations)**

**Resource Staging Officer Can Easily  
Identify Full vs. Empty Bottles**

### **USFA-TR-082 Special Report: Considerations for High Rise Firefighting (1996):**

*Stresses importance of stockpiling equipment  
(specifically spare SCBA bottles) in the  
interior staging/resource sector in the early  
stages of operations.*

## Uses of the KrusePak:

- **High Rise Fires**
- **Rural Fires**
- **Mutual Aid**
- **Air Bag Extrication**
- **Air Chisel Extrication**

# Carrying & Storing the KrusePak

**Over Your Pack**

**Over Pack  
w/ Hose**

**Over Your  
Shoulder**

**Cross-Body  
(Front/Back)**

The KrusePak boasts multiple options to carry your spare SCBA bottles completely HANDS-FREE. Depending on the individual's strength, comfort, and/or preference, the KrusePak may be carried over your air pack, your shoulder, or cross-body for the most evenly distributed weight. The KrusePak is also fully collapsible, allowing for it to be stored virtually anywhere on your apparatus.

## WHAT IS THE KRUSEPAK?

The KrusePak was created by a firefighter to increase firefighter safety, and possibly even avoid LODDs caused by poor (or a lack of) air management strategies on the fire ground, specifically in high rise fires. It is a patent pending piece of equipment designed to carry two reserve SCBA bottles completely hands-free, in addition to various small tools – which promotes firefighter safety on any emergency scene.

### Some Features of the KrusePak Include:

- **HANDS-FREE** Transportation of Spare SCBA Bottles & Various Equipment
- Highly Durable, Waterproof & Lightweight
- Boasts Handle, Padded Strap & Reflective Striping
- Grommets for Attachment of Rope or Various Small Tools by use of Carabiners (*Carabiners Not Included*)
- 2 Pockets for Small Rescue Tools such as Wedges, Wire Cutters, Knives, etc.
- Easily Identifies “Full” vs “Empty” Bottles in the Resource Staging Area

**Custom Made for 30min, 45min and 60min Bottles**
