

Being curious about things is what makes us want to learn about them. It's how we get smarter, and discover great things about the world around us. As we discover these things, it's also important to be smart and safe about how we learn about them. Read the stories below, then choose the ending you think would help learn the most, and still be safe and smart about it.

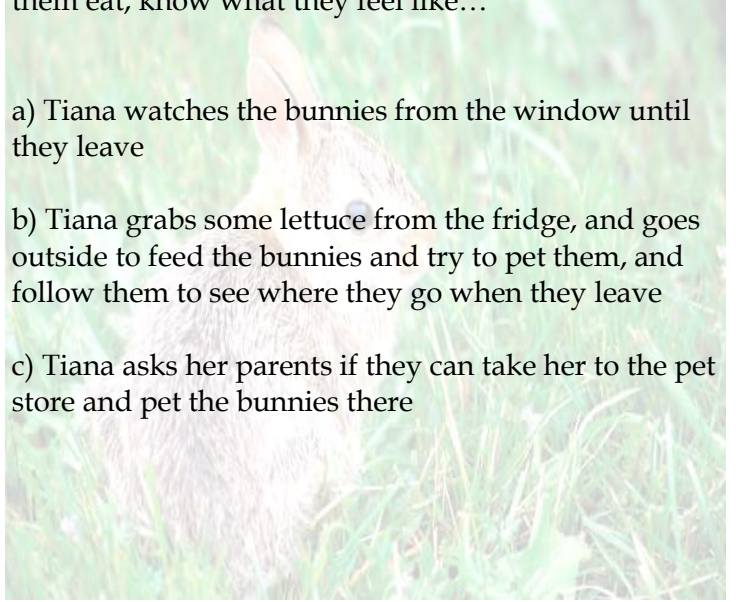

Joey wants to know why the light turns on (or off!) whenever he flips the light switch. He notices that the light switch is screwed into the wall, and wonders what's behind it...

- a) Joey shrugs his shoulders, walks away, and watches some TV
- b) Joey finds a screwdriver, takes the plate off the wall, and pokes around behind it with a screwdriver
- c) Joey could ask his mom or dad to take off the plate, and show him how flipping the switch makes the light turn on

Tiana sees some bunnies playing outside, and wants to go find out more about them. She wants to see them eat, know what they feel like...

- a) Tiana watches the bunnies from the window until they leave
- b) Tiana grabs some lettuce from the fridge, and goes outside to feed the bunnies and try to pet them, and follow them to see where they go when they leave
- c) Tiana asks her parents if they can take her to the pet store and pet the bunnies there

Think about some things you are curious about.
 What is something you would like to know about? _____

How could you find out more about it (while still being safe and smart)? _____

Showing CURIOSITY is how we learn about the world around us. There are many, many things worth learning more about. Our CURIOSITY can be inspired by our imaginations. Check out some of these pictures below, then stretch out your imagination, and write something about what you think they are, or what they do!
