

The AO Scan provides comprehensive testing of the electromagnetic field of the body. Because each organ, gland and even areas of the brain have different energy signatures, it is possible to test and get feedback on what areas need balancing.

Healy (means "healing" in German) is more appropriate for the everyday person. The testing is solely for determining what therapies to run and in what order. Whereas the AO scan is testing for imbalances.

Frequency Medicine

The Healy is FDA cleared for pain, sleep and mental wellbeing. It is a convenient wearable device that is also able to be used off-line. The therapy programs instruct you on where to place the electrodes or, such in the case of many pain issues, you may place the electrode adhesives on or near the area of pain.

There are several studies done on the Healy's use in many different countries and the studies involve many years in duration. There are 144,000 frequencies within the therapy programs which have been shown to be beneficial.

Being hydrated is essential for vibrational medicine. Another interesting topic:
