Body Sculpting/Contouring

(Ultrasonic Cavitation and/or Lipo Laser)

- **Only at Alternative Therapy & Nutrition**

Body Sculpting

We custom tailor this treatment for each individual. We use either or both of the two most effective technologies to date -Ultrasonic Cavitation and/or Lipo Laser-. This treatment will diminish the appearance of cellulite and eliminate fat cells. This is the perfect alternative to surgery: No downtime, Non-invasive, no pain.

Ultrasonic Cavitation and Lipo Laser treatments are suitable for men and women who want to get rid of the stubborn fat accumulation in areas such as stomach, waist, thighs, upper arms, and back without any downtime.

Ultrasonic Cavitation and Lipo Laser work in the same manner: The trapped fat is emulsified, converted into liquid and then naturally expelled from the body in the urine. We combine Ultrasonic Cavitation or the Lipo Laser treatments with Radio Frequency(RF)- to promote collagen production- and vacuum techniques for optimal results.

Although results may be noticeable after one session, this treatment requires a minimum of four (4) sessions. Up to 10 sessions may be required in order to achieve personal goals.

During the first visit, we will conduct several measurements, and will offer a customized package specifically designed to meet your needs and goals.

30-45 min. (average) per session
1 session: \$150
4 sessions: \$465(\$116 per session)
6 or more sessions: \$99 per session
(Multiple sessions payable in full during the first visit)

Buttocks Lifting

Non Invasive Buttocks Lifting

This is completely non-invasive and virtually painless treatment alternative to glutens lifting surgery. It has none of the risks and discomfort that may occur with surgical procedures.

The buttocks lifting treatment includes Lipo Laser or Cavitation treatment and deep suction massage with negative pressure combined with electro stimulation. As a result, it will enhance, reshape and tighten your buttocks area by countering the effects of age, lack of exercise, and sitting for long periods of time.

This treatment is also effective in reducing the appearance of cellulite.

Although after just one treatment your buttocks area will look lifted and more rounded, with no downtime. For a full Butt Lift, we suggest 6 sessions and returning when needed.

30-45 minutes. (Average) per session
1 session: \$135
3 sessions: \$325(\$108 per session)
6 or more sessions: \$95 per session
(Multiple sessions payable in full during the first visit)

Skin Tightening

RF Face Skin Tightening & Lifting

Not ready for surgery or a face lift? This treatment is the perfect options for those looking for overall improvement and face rejuvenation without injections (Botox, fillers) or surgery.

Using state-of-the-art Radio Frequency (RF) allows for targeting of RF energies which promote the stimulation of new collagen growth and result in the remodeling of the dermal layer of skin. Your skin will become tighter, smoother and with a healthy glow. Many clients have reported changes after 1 or 2 sessions. 4 to 6+ sessions will bring optimal results.

30 min. per session
1 session: \$95
5 sessions or more: \$65
(Multiple sessions payable in full during the first visit)
