

Aviation OnLine Learning Online I A Refresher Seminar

Peter Friedman 925- 818-6642 peter@aviationonlinelearning.com © 2010

Flowchart

If condition one and two are determined to be airworthy, then the aircraft or product is airworthy.

If either condition is determined to be unairworthy, then the entire aircraft or product is unairworthy, until it can be rendered airworthy, by clearing the defect.
