1

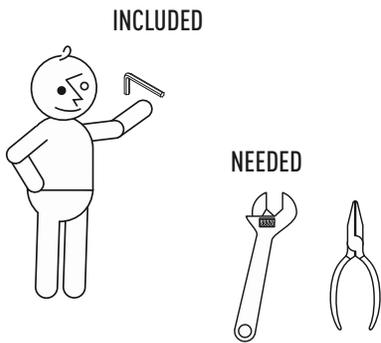

READ THESE INSTRUCTIONS!

If you've never followed instructions before, this is a good time to start! These tips have been compiled to lead you to a successful assembly. We know you can do this!

If you still run into trouble, you can call our Prevue Customer Service line at 1 (312) 243-3624.

2

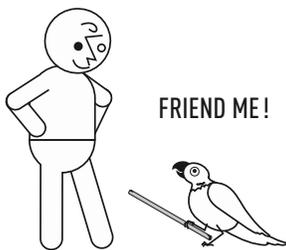

HELPFUL TOOLS

An allen wrench is included with the hardware.

You will need a small **adjustable wrench** for the seed guards. You may also need a pair of **needle nose pliers**.

You may want to use your own hand or power tools, but PREVUE is not responsible for damage caused by over-tightening or improper use.

3

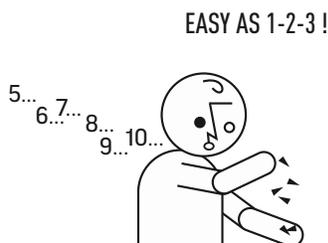

FIND A FRIEND (or GO IT ALONE—both are OK)

If you follow these steps, cage assembly will be easy for one person. But you may find a second person's assistance useful in some steps. Look for this symbol:

4

REVIEW ALL PARTS & HARDWARE

After unpacking all components, review all parts and count the contents of the screw packets and compare the quantities against the Hardware List on the Parts List page.

Please contact Prevue if any problems or issues arise.

CARE FOR BIRDS

CAGE PLACEMENT

Place the cage away from drafts and drafty areas. Make sure the cage is not in direct sun, or that your bird will have plenty of shaded areas. Keep the cage away from strong fumes and odors.

ACTIVITY TOYS

Activity toys are vital for maintaining a bird's mental and physical health. Select a variety of toys to meet different instinctual activities—foraging, grooming, movement, sound, discovery, and more. Regularly rotate new and familiar toys through the cage. Do not overcrowd the cage environment. Periodically supervise birds at play and inspect toys for replacement or replenishment.

ACCESSORIES

Add or upgrade accessories to promote health and happiness. Add variable-shape perches. Include cozy corners for warmth. Use cage covers to quiet and calm birds at night or at high-traffic times.

TRAVEL CARRIERS

Always keep an appropriate size travel carrier on hand for travel, emergencies or temporary housing when cleaning the cage.

1 Assemble the CAGE FRAME.
 You will need these pieces:

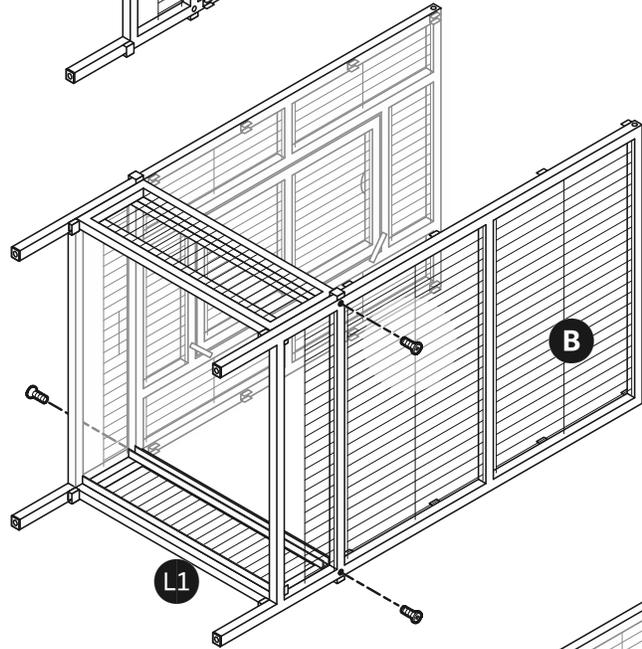

[4] LONG

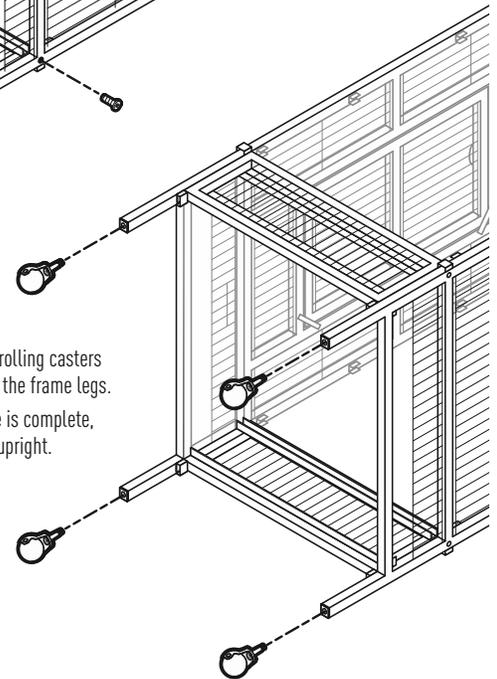

Lay the front panel on the floor.
 Slip the tab on the lower side panel
 onto the sleeve on the frame leg.
 Attach the panels together at the
 top with one LONG screw.

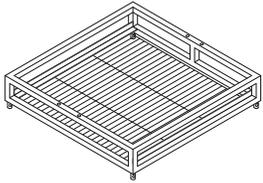

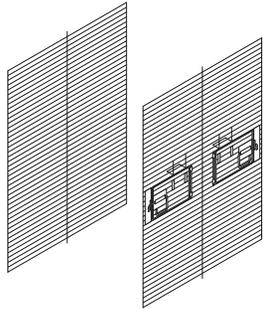

Add the other side panel and
 the back panel, and secure all
 top corners with a LONG screw.

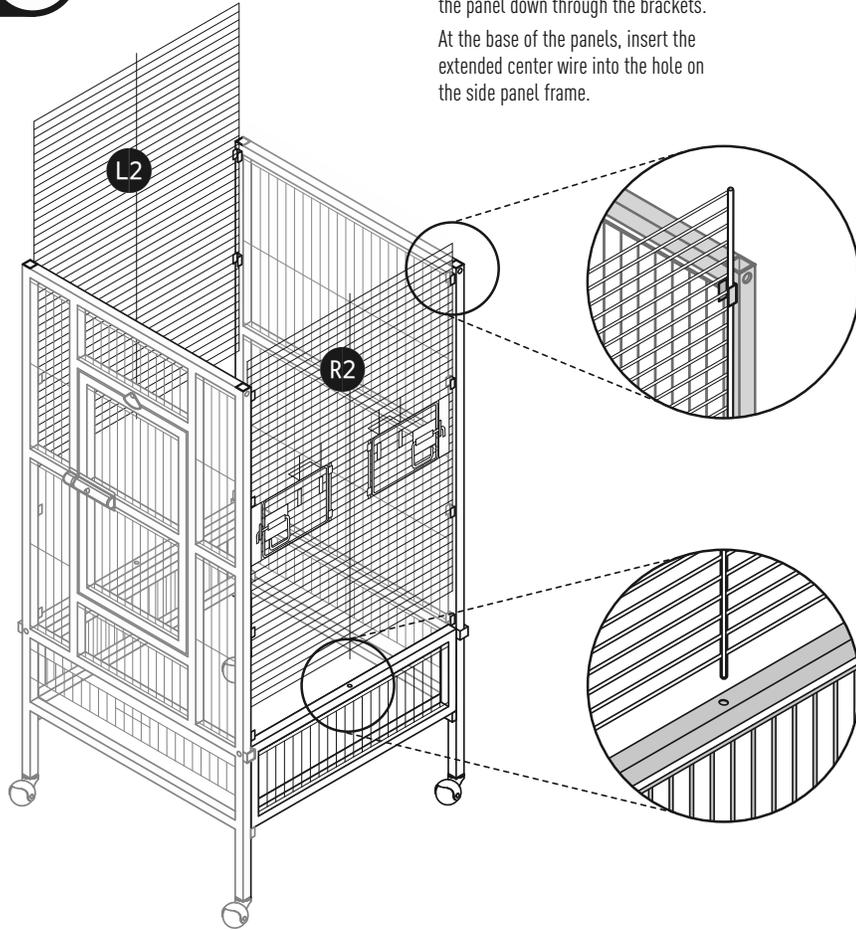

Fully insert the rolling casters
 into the base of the frame legs.
 When this stage is complete,
 stand the cage upright.

2 Assemble the cage **SIDES** & **ROOF**. You will need these pieces:

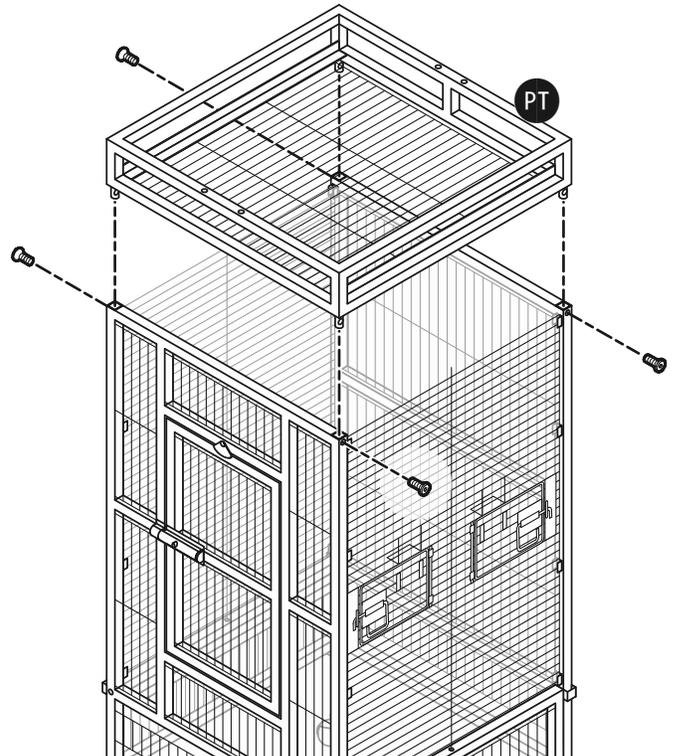

[4] SHORT

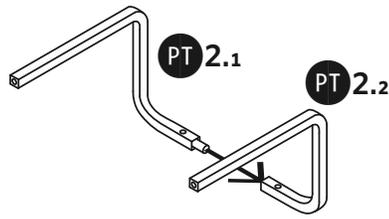

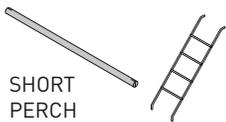

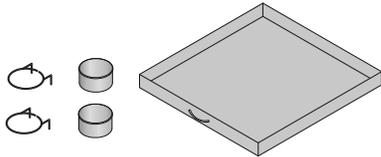

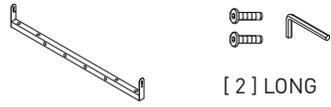

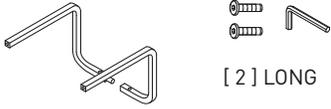

Slip the side panels into place, guiding the panel down through the brackets.
At the base of the panels, insert the extended center wire into the hole on the side panel frame.

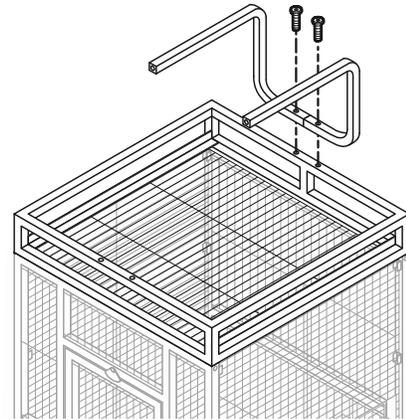

Insert the corner posts at the base of the roof frame into the open corners on the cage frame.
Secure the roof in place with SHORT screws.

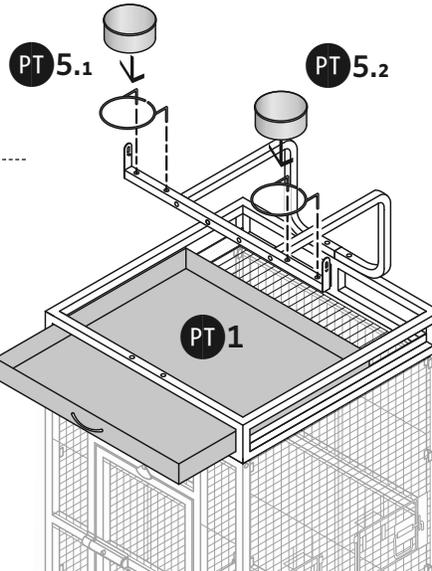

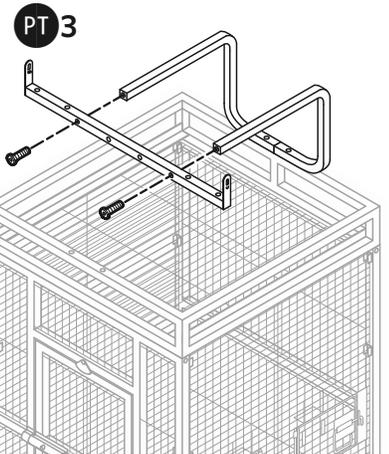

3 Assemble the **HAMMERTONE PLAYTOP UNIT**. You will need these pieces, in this order:

Insert the post from PT 2.1 into the open end of PT 2.2. Attach this unit to the playtop with LONG screws.

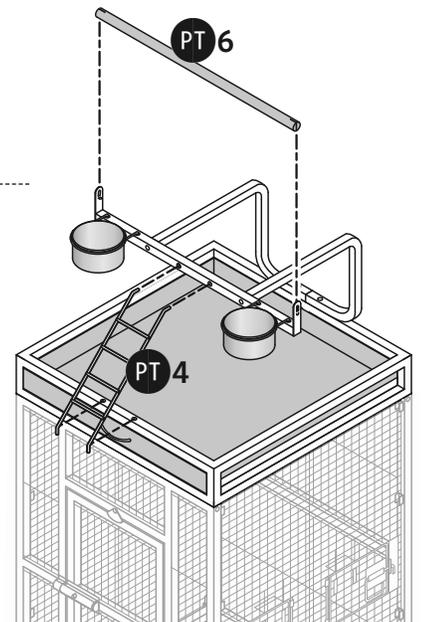

Attach the PT 3 perch/cup bar to the unit with LONG screws.

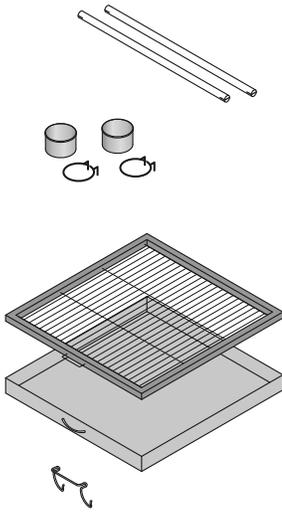

Insert the PT 5 cup holders into the perch/cup bar, and then insert the PT 5 cups into the holders. Insert the PT 1 playtop tray.

Insert the PT 6 short perch into the perch/cup bar. Insert the PT 4 ladder into the perch/cup bar at the top end, and into the playtop frame at the bottom end.

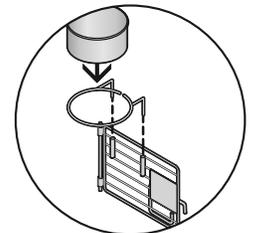

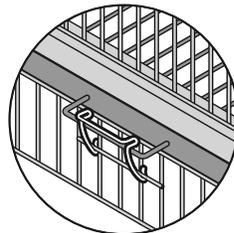

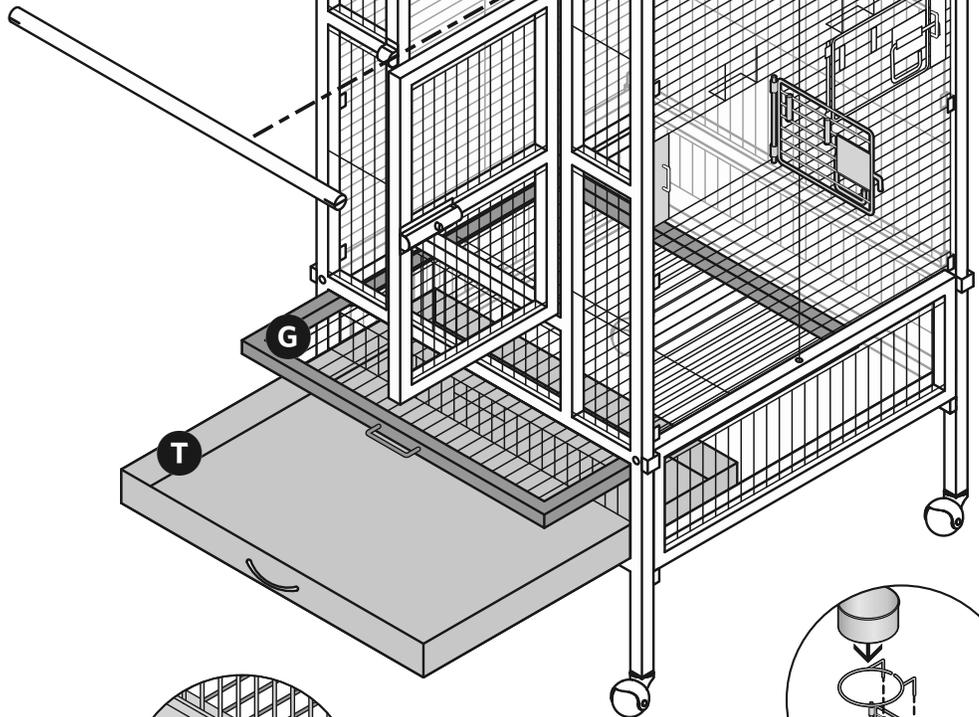

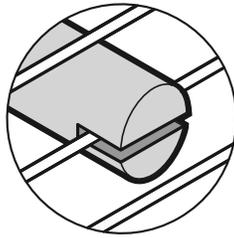

4

Install the **ACCESSORIES**.
You will need these pieces:

Install the perch by inserting both slotted ends onto a horizontal wire of an even height.

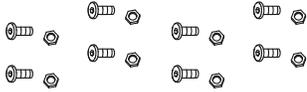

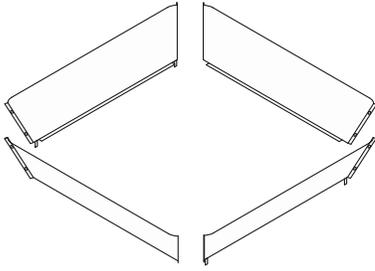

Open the cup door.
Insert the cup holder into the sleeves.
Insert the cup into the cup holder.

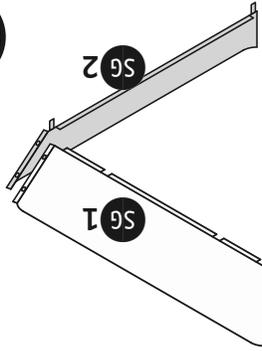

Insert the tray into the bottom channels.
Insert the grille into the top channels.
Hook the grille clip onto the short horizontal wire above the tray. Clip the top portion over the grille handle to secure the grille in place.

5 Assemble the SEED GUARDS.

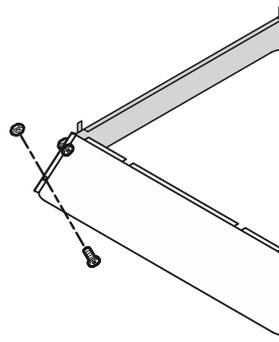

You will need these pieces:

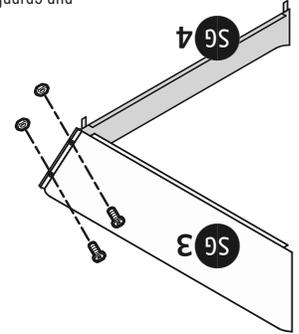

[8] SHORT with Nuts

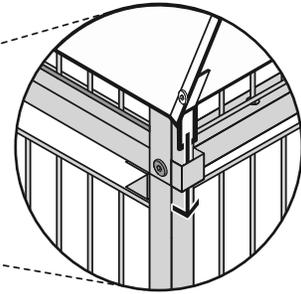

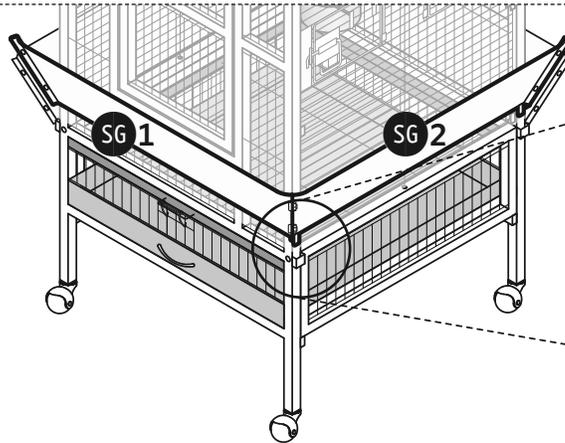

SEED GUARDS:
Both **SIDE** guards (left & right) have extended **TABS** at the bottom corners. The front guard has **NOTCHES** along the bottom strip.

To make assembly easier, flip the **FRONT** and **SIDE** guard upside down on the floor as shown. Align the holes on the flashing strips at the corners. Insert a **SHORT** screw through both guards and tighten the nut in place.

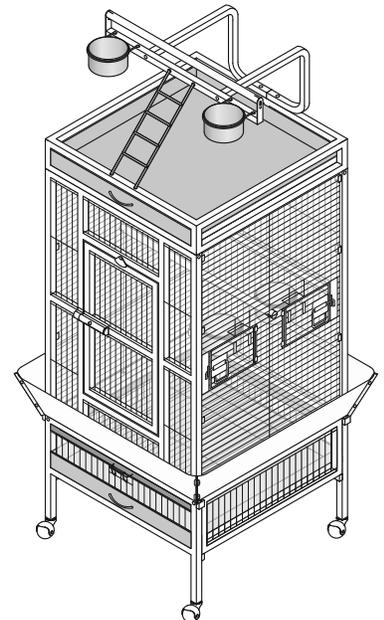

Follow the same method with the **BACK** guard and **SIDE** guard panels.

Flip the two-piece seed guard units right-side-up. Make sure the **FRONT** guard—with the notches along the bottom—is positioned at the front of the cage. Insert the **TABS** on the **SIDE** guards into the sleeves on the frame legs.

Finish attaching the seed guards together at the two open corners with the remaining short screw/nut pairs.

★
Your playtop home is now fully assembled and ready for use.
