

Great Sandhills Railway

General Tariff – GSR 1600 Carbon Emissions Surcharge

Effective July 15, 2019

Item 100 – Carbon Emissions Surcharge

The Government of Canada has passed the Greenhouse Gas Pollution Pricing Act which includes a carbon tax on fuels that emit greenhouse gases when consumed. The tax will be phased in over three years beginning on April 1, 2019.

As a result, the GSR will assess a mileage based carbon emission surcharge of **\$0.11 per mile**. This charge will be included on the freight invoice to be paid by the payer of freight and will apply to all loaded shipments travelling on GSR lines.

Item 200 – Mileages for GSR Stations

GSR Station Mileages Rail Miles from Mayne, SK
