To Our Patients Regarding Cancellations and No-Shows

We take cancellations and no-shows seriously at Foundation Physical Therapy.

We know that your appointments and treatments can make a difference in whether or not you are successful in your goals. Usually your referring doctor and/or your therapist have prescribed a set frequency of treatment. Showing up as scheduled for these visits is your most important job. Other than that, all you need to do is follow your therapist's instructions and we will be able to help you achieve your goals in treatment.

- **We *require* 24 hours notice** in the event that you need to cancel your appointment. It is your responsibility, when you call in, to have an alternative time in mind that will ensure you get in the full prescribed number of treatments that week whenever possible.

- **There is a $60.00 charge for a cancellation without proper notice or if you are a No-Show.** This charge will *not* be covered by insurance and will have to be paid by you personally.

- For Worker's Compensation and Personal Injury patients, documentation of any missed appointments is forwarded to your Case Manager and Primary Physician. This could jeopardize your claim.

- You might need to see a therapist other than the one who normally treats you if you do change your appointment. All of our therapists are experienced doctors of physical therapy. They will review your patient chart, and the quality of care will be consistent.

- Please understand that your pain will probably increase and decrease as your course of treatment progresses and before it is improved or resolved. Either condition can seem to be a reason not to come in: a) You're feeling worse and think the treatment is not working or, b) You're feeling better and it's a great day for yard work. Neither of these conditions is legitimate as a reason not to come. If you're in pain, come in and get it fixed. If you're out of pain, now is the time that we begin doing some real correction of the underlying causes of your problem, educate you so you won't re-injure yourself, or speak to your therapist to discuss a discharge from services etc.

When you don't show as scheduled, three people are hurt: You, because you don't get the treatment you need as prescribed by the doctor and/or Physical Therapist; the therapist, who now has a space in their schedule since the time was reserved for you personally; and another patient, who could have been scheduled for treatment if you had given proper notice.

We appreciate your cooperation and understanding. We look forward to working with you.

TELEMEDICINE INFORMED CONSENT FORM

Patient Name: _____ **DOB:** _____

You are going to have a clinical encounter using videoconferencing technology. You will be able to see and hear the provider and they will be able to see and hear you, just as if you were in the same room. The information may be used for diagnosis, treatment, therapy, follow-up and/or education.

Expected Benefits:

- Improved access to care by enabling a patient to remain within the facility and obtain services from providers at distant sites.
- Patient remains closer to home where local healthcare providers can maintain continuity of care.
- Reduced need to travel for the patient or other provider

The Process:

You will be introduced to the provider and anyone else who is in the room with the provider. If you are unsure of what is happening, you may ask questions of the provider, anyone with the provider, or any telemedicine staff in the room with you. If you are not comfortable with seeing a provider on videoconference technology, you may reject the use of the technology and schedule a traditional face to face encounter at any time. Safety measures are being used to ensure that this videoconference is secure, and no part of the encounter will be recorded without your written consent.

Possible Risks:

There are potential risks associated with the use of telemedicine which include, but are not limited to:

- A provider may determine that the telemedicine encounter is not yielding sufficient information to make an appropriate clinical decision, which may require additional in-person visits.
- Technology problems may delay medical evaluation and treatment for today's encounter.
- In very rare instances, security protocols could fail, causing a breach of privacy of personal medical information. You will be promptly notified if any security issues arise.

By signing this form, I understand the following:

1. I understand that I have the right to withdraw my consent to the use of telemedicine in the course of my care at any time, without affecting my right to future care or treatment.
2. I understand that if the provider believes I would be better served by a traditional face-to-face encounter, the provider may, at any time stop the telehealth visit and schedule a face-to-face visit. Therefore, I understand the technology problems may necessitate an in-person visit with the provider.
3. I understand that I may expect the anticipated benefits from the use of telemedicine in my care, but that no results can be guaranteed or assured.
4. I understand that the laws that protect privacy and confidentiality of medical information also apply to telemedicine.
5. I understand that I will be responsible for any copayments or coinsurances that apply to my telemedicine visit.

Patient Consent to the Use of Telemedicine:

I have read and understand the information provided above regarding telemedicine, and all of my questions have been answered to my satisfaction. I hereby give my informed consent for the use of telemedicine in my care. I also consent to photographs of this video encounter being taken and stored in my patient file.

I hereby authorize Foundation Physical Therapy to use telemedicine in the course of my diagnosis and treatment.
