

The independent technical line integrator for all your filling and packaging line equipment.

Looking for a reliable partner in filling and packing? Search no more, here is... Nilsco.be.

Nilsco is an independent technical company specialized in designing, installing, maintaining, optimizing and selling complete filling and packaging lines for a wide range of industries. Our offices and workshop are located at the heart of Europe, in Antwerp (Belgium). With an experienced team of technicians, Nilsco carries out an extensive range of projects in Belgium and abroad. We're active in various sectors such as the food industry, dairy industry, breweries and

beverage industry. All our machinery is able to fill and package cans, glass bottles, PET bottles and kegs.

Nilsco not only sells new machinery but also provides technical service and optimization on existing installations and machinery of all brands. Being a family company, we are experienced, reliable, flexible and provide our customers with everything they need, from line engineering to installation and even further on to after-sales service.

We're simply the best in filling and packing...

Who are our customers?

Any person or company that would like professionally packaged liquids. From small craft brewers to multinationals. Speeds range from 1,000 BPH to 30,000 BPH.

What do we provide?

Complete solutions with high-quality filling and packaging machinery custom-made for each project/customer with important after-sales service from our own well-trained technicians.

Why choose Nilsco?

Quality Nilsco uses partners (machine builders) that are guaranteed to use only top components to build their machines. Our guidance is not low cost but high quality at an acceptable price.

Reliability Reliable functioning of a production line depends on many factors such as planning, quality of components and operational experience. Nilsco invests sufficient time and resources to ensure that the customer makes the right choice of machines that have been tested sufficiently and are delivered according to plan in such a way that the production process is disrupted as little as possible.

Innovation Together with our partners, we are always looking for new reliable technologies that are being developed. In this way, Nilsco can offer up-to-date solutions to its customers.

Experience Nilsco has internal and external partners in the Filling and Packaging industry that have been working in the field for many years. This gives us a broad experience that can benefit you in the future. Many of our customers have expanded from semi-automatic machinery to automatic machinery with us as a long-term partner.

Service Nilsco strives to eliminate any faults in the shortest possible time. We and our partners ensure that we keep as many parts in stock as possible and that the response time of our internal and external service engineers is kept as short as possible. In this way, we aim to solve 90% of our interventions within 24 hours.

Flexibility Everything is negotiable and, as a family company, we go to great lengths to provide our customers with the best service whenever they need it. 24/7 service is one of our plus points.
