## Things to Do List and Why.....

**TAKING PUPPY HOME SAFELY:** Use a HARNESS & SEATBELT LEASH DO NOT USE A CRATE IN THE CAR. There is a high crush factor in an accident with a folding crate. Dogs often get lost during a car accident by leaping out the window and can get hit by oncoming traffic if not tethered to the car.

### STRESS STOOL WHEN GOING HOME

Loose stools result from a new environment from stress. We send home a week's worth of probiotic- It is important you continue with the NU VET SUPPLEMENT AND a probiotic chew for life. Add A PUMPKIN MIXTURE to help soothe the bowel. NOT EATING MUCH IN THE FIRST 24-48 HOURS IS NORMAL

**UNCOOKED MARROW BONES:** Uncooked- frozen Cow bones from the butcher are part of the diet and teach self entertainment as well as reducing STRESS from the chewing action.  
No PLASTIC/NYLON BONES or RAW HIDE - THEY ARE MADE WITH TOXIC CHEMICALS. NEVER FEED THEM TO YOUR DOG

### NUTRITION - FOOD AND FEEDING

<https://www.dogfoodadvisor.com/dog-food-reviews/tlc-whole-life-dog-food/>  
Don't forget to order the TLC dog food! Don't feed Low Grade dog food that contain Wheat, and an all raw food diet is not suitable for this breed. Stick with the puppy formula until 1 year.  
<https://tlcpetfood.com/nutrition/lakewoodranchdoodles/105387/>

### CRATE TRAINING - A FULL ARTICLE ON THE WEBSITE

-36" deep for a moyen 30-40 lbs -42" deep for mid-size 40-50 lbs.  
It's his bedroom. Place to retreat. Cover with blanket. Door uncovered.

### TOILET TRAINING USING A BELL - SEE ARTICLE ON WEBSITE

Use a BELL and use your pups paw to ding it before going outside for a toilet break

Protect feet with PAW WAX -preferred over booties

Other contaminants such as road salt can be avoided by using this product.

### PURCHASING DOG ACCESSORIES:

For a puppy: use soft toys only when you are with your pup. They can be ripped up so they are a choking risk. You will need a sweater or coat; food bowls; toy bin; dental care; tick puller; grooming tools. A dog bed is needed for training. A play pen should be used to keep the puppy from roaming the house. Training treats can be bakery items or meat treats. Use a different treat for toilet rewards than treats for training "sit" or "stay" commands.  
You will need boredom busters like a KONG; puzzle balls or snuffle matts; lick matt. See article on website about boredom busters.

### We have a full boutique store!

<https://www.lakewoodpetboutique.com>

We focus on green products-eco /environmentally friendly/ all natural/recycled /North American made products.

WE SHIP AFTER YOUR DOG GOES HOME - ORDER ONLINE..

### GROOMING - see shopping list (left)

### FLEAS & TICKS - ARTICLE ON WEBSITE

Diatomaceous Earth (DE) on the skin weekly helps keep fleas and ticks off your dog. Also use a NATURAL pest spray when going for walks.

For internal parasites - DE ¼ teaspoon in a tablespoon of pumpkin weekly.  
YOU NEED A TICK PULLER!

### PET INSURANCE - ACTION REQUIRED!

TRUPANION INSURANCE COMPANY offers you FREE health insurance for 30 DAYS to be ACTIVATED THE DAY PUPPY GOES HOME you MUST use the code for the free 30 days Call 855.266.2156 |

# Reading on our Website

READ 3 SECTIONS OF WEBSITE:

**CARING FOR YOUR PUPPY** <https://lakewoodranchdoodles.com/caring-for-your-dog>

**TRAINING YOUR DOG:** <https://lakewoodranchdoodles.com/training-your-puppy>

**CLIENT READING:** <https://WWW.lakewoodranchdoodles.com/client-reading>

## Important Information:

### HOW MUCH TO FEED YOUR PUPPY?

MAX 2 to 4 CUPS - MIN 1/2 CUP DAILY Don't feed food or water after 8 pm. They should be allowed to self govern their food intake by grazing. BY 8 MONTHS YOUR PUPPY WILL SLOW DOWN FOOD INTAKE.

### EATING HABITS AND TRAINING TREATS

Dogs eating habits slow down and change as they stop growing. Once toilet trained leave the food out all the time so he can learn to be a grazer - benefits are much healthier digestion health; not gobbling food down; less food aggression & resource guarding. They should self govern their food intake. Avoid carbohydrate or sugary treats.

**BEHAVIOUR** – SEE ARTICLE ON WEBSITE - Nipping or mouthing

### WALKING YOUR DOG FOR EXERCISE

A fenced yard with a doghouse is a bonus, especially for large and active dogs; however, dogs should never be left outside alone or for extended periods of time.

**PUPPY COAT SHEDDING-** puppies lose their puppy coat 3 - 7 months old

PUPPY TEETH FALL OUT AND ADULT GROW IN BY 6 MONTHS

### BATHING SWIMMING GROOMING

Brush your dog regularly to prevent matting. One to 3 times a week. Professional Grooming at every 6-8 weeks; Nails should be trimmed monthly; Regular brushing of hair is a must to avoid tangles (3-4 times weekly); Bathing with water only any-time; Dog soap- no more than once per week.

### HOLISTIC APPROACH

A combination of food choice, avoiding using chemicals, and not over medicating with toxic flea drops. We DO NOT do any altering or invasive procedures such as microchipping which is a health risk due to high rate of tumor and paralysis.

### KEEP YOUR PUPPIES IMMUNE SYSTEM STRONG

To build immunity - Avoid antibiotics. YOU NEED TO Use a probiotic and vitamins for life to help Balance the dogs GUT and prevent yeast build up in ears and feed plain yogurt daily. We offer daily immunity supplements from NU VET (ordering info below) and probiotic chews on our website. OFTEN PEOPLE CONFUSE A FOOD ALLERGY WHEN IT IS REALLY A YEAST OVERGROWTH IN EARS AND SKIN – use a heaping tablespoon of plain yogurt daily.

### NU VET Immunity vitamin & supplement

As a reputable breeder, the health of my dogs is my top priority. That's why I highly suggest that each of my puppy parents keep their pup on NuVet Plus for total body support. This daily supplement offers key immune support for your puppy during this big transition home, but NuVet offers a lifetime of benefits for your new companion.

**CANCER PREVENTION:** GOLDEN RETRIEVERS ARE AT RISK FOR CANCER.

NU VET SUPPLEMENTS AND PROBIOTICS, PREBIOTICS AND DIGESTIVE ENZYME are being linked to raising immunity and gut health and cancer prevention. Cancer and Addison's are not predictable ailments that we can test for or predict which is why they are not covered by our health guarantee.

**ILLNESS** – Can dogs recover from Giardia without medication? If a dog has no clinical signs of giardia, you don't automatically need to treat it – they may recover by themselves if they are healthy & have a strong immune system.

## BEWARE OF VET TRICKS!

1. DO NOT go to the vet before the dog has been home 4 weeks STRESS DROPS YOUR PUP'S IMMUNE SYSTEM.
2. NO NEED to take a POOP sample to the vet when you take your dog home.
3. We test STOOL before pups go home. Be sure to advise your vet that your puppy has already been given preventative parasite medication THE TEST WILL NOT BE ACCURATE
4. DO NOT BUY THE PUPPY PACKAGE FROM YOUR VET You will want to test the waters with a vet and see if you LIKE their approach before committing to a FULL YEAR PACKAGE (stay away from flea and tick chews that we DO NOT RECOMMEND)
5. DO NOT LET YOUR VET SPAY OR NEUTER YOUR DOG AT 6 MONTHS. WAIT UNTIL ONE YEAR SPAY OR NEUTER- ASK US FOR A LIST OF SPAY AND NEUTER CLINICS for spay or neuter at a reduced price
- 6 Vets are subjected to people coming in with puppies that are NOT from licensed breeders. Do not blindly do things the vet is requesting if you do not understand or feel comfortable doing them. Call us ANYTIME IF YOU HAVE QUESTIONS before proceeding with anything your vet tells you.

## DANGER WARNINGS

- DOG PARKS are breeding grounds for bacteria and illness
- DOG PARKS – be careful of other poorly trained abusive dogs and feces not scooped
- PUDDLES, STANDING WATER, FECES are main sources of illness in dogs
- SWIMMING POOLS – Chlorine and SALT are harsh on your dog's skin – rinse well.
- ANTI FREEZE for your car (GLYCOL) will kill your dog
- CHEWING GUM/ MINTS/PEANUT BUTTER Can Contain XYLITOL WILL KILL your pet.
- HOLIDAYS BRING CHOCOLATE! WATCH YOUR PET.
- SUMMER HEAT DEHYDRATION – GATORADE OR PEDIATRIC ELECTROLYTES
- DO NOT LEAVE YOUR DOG IN VEHICLE ALONE.
- BE KIND TO YOUR DOG - STRESS LEADS TO DEHYDRATION WHICH LEADS TO DEATH.
- INFANT PUPPIES HAVE LITTLE OR NO IMMUNITY TO DISEASES, BACTERIA OR PARASITES – KEEP THEM AWAY FROM PUBLIC PLACES & OTHER DOGS
- Be aware that cocoa, chocolate, milk products, grapes, onions, AVOCADO and other human foods are toxic.
- DOG THEFT IS ON THE RISE. DO NOT LEAVE YOUR DOG IN A SITUATION WHERE HE CAN BE STOLEN.
- THC (CANNABIS) POISONING IS RISING. PUBLIC PLACES MAY BE DANGEROUS IF YOUR DOG EATS A BUTT OFF THE GROUND.

### SOME ESSENTIAL OILS AND SCENTS CAN POISON!

Some essential oils are poisonous to dogs. This includes oil of cinnamon, pennyroyal, pine, sweet birch and wintergreen. These oils are toxic whether ingested by mouth, defused or spread on the skin.

### HOUSEHOLD DEODORIZERS:

DO NOT USE DEODORIZING SPRAYS OR AIR FRESHENER OR FEBREEZE. THEY CAN BE TOXIC TO DOGS. SOMETIMES THEY APPEAR AS SKIN IRRITANT AND OFTEN ARE DIAGNOSED AS AN ALLERGY.
