

It's like having a nurse in the family.

- A dedicated RN for your family
- Unlimited consultations, 24/7
- Health coaching & education
- Telemedicine services
- Discounted Rx and more
- HIPAA protected relationship

75%

of doctor, urgent care and ER visits can be handled by phone or video*

When health issues arise, you may not know where to start. But your nurse will.

Two thirds of ER visits are avoidable. A ModRN Health nurse helps you navigate your health journey and provides answers that can save you money. Whether you have questions about diet or finding the right doctor, or when to go to urgent care versus the ER, a dedicated nurse can make a world of difference.

High Touch healthcare combined with High Tech service.

INTERACTIVE MOBILE APP

A powerful mobile app puts technology and your nurse to work for you.

View your health records, labs, doctors' notes and appointments in one place.

MEDICAL EXPERTISE

All ModRN Health nurses are licensed care providers with years of medical training, practical experience and compassion. ModRN Health is 24/7 expertise that is much more than a helpline; it's like having a nurse in the family.

DIRECT RELATIONSHIP

Your nurse will know your family's health history. He or she is dedicated to advocating for you as you navigate your health care together. This relationship is HIPAA protected; no information can be shared with anyone else.

COORDINATED CARE

Your ModRN nurse will act as your health care coordinator. Your nurse will recommend doctors visits, help schedule those visits, monitor prescriptions, explain test results, help you prepare for Dr appointments and so much more.
