## **AIR PURIFIERS**

Three (3) of the most important factors influencing our health are (a) The Air we breathe-**Air Quality** (b) The food we eat-**Nutrition** and (c) Our engagement in physical activity- **Exercise**. The air we breathe that oxygenate our blood contains harmful particles that need to be removed.

contains It is estimated that most people spend more than 85% of their time inside. That means most of the air we breathe throughout any given day is indoor air. It makes sense therefore to learn exactly what is in the air that we breathe and the levels of contaminants. This helps to protect our health.

Air purifiers trap airborne particles with High-Efficiency Particulate Air (HEPA) filters and sometimes UV light that remove approximately 99.9% of particles of 0.1 microns in size and above. They remove harmful bacteria and viruses, mould spores and other fungi, dusts, pollen, mites faeces, chemical pollutants such as formaldehyde, bad odours, cigarette smoke, allergen triggering particles, volatile organic compounds and so on.

Airborne Pollutants	Actual Micron Particle Size Range	A Proportionate Particle Size Comparison
Human Hair	35-200 microns	
Pollen	10-100 microns	
Spores	10-35 microns	
Bacteria	.3-35 microns	
Animal Dander	.3-10 microns	
Lung Damaging Dust	.5-5 microns	
Smoke	.01-1 microns	

Information Source: American Industrial Hygiene Association

(One Micron is a one millionth of a metre)

## OUR AIR PURIFIER UNITS

These are certified by the California Air Resources Board (CARB).

**Medify MA-14** - (Comes in White and Black)

***The Medify MA-14- Air Purifier with H13 HEPA filter - a higher grade of HEPA cleans the air in a 200 Square feet space in 30 minutes. It removes 99.9% of airborne pollutants and impurities including, mould spores, mildew and other fungi, some bacteria and viruses, other germs, dust mites, chemical contaminants, volatile organic compounds, atmospheric dusts, paint fumes, unpleasant odours, allergens, pollen, cigarette smoke, pet hair & dander and so on.***

- Promotes Better Overall Health with Clean Highly Purified Air
- A higher grade of HEPA - H13 Filters (higher rated than True HEPA)
- Clean Air Delivery Rating (CADR): 120-150
- Perfect for Office, Bedroom, Dorms, Baby Nurseries etc.
- 3 Fans Speeds | Night Light | Sleep Mode
- Filter Replacement indicator
- Removes 99.9% of particles down to 0.1 microns.

**MA-14-B  
AIR PURIFIER  
WITH H13 HEPA FILTER**

**CLEANS UP TO 470 SQ. FT. IN AN HOUR**

**200 SQ. FT. IN 30 MINUTES**

**117 SQ. FT. IN 15 MINUTES**

**SIMPLE TO USE**

**A HIGHER STANDARD H13 HEPA**

**99.9% PARTICLE REMOVAL**

### A HIGHER STANDARD OF HEPA

- GERMS
- POLLEN
- SMOKE
- DUST
- ODORS
- MOLD

**ONLY H13 OR BETTER REMOVES 99.9% OF PARTICLES DOWN TO 0.1 MICRONS**  
**PERFECT FOR OFFICE, BEDROOM, DORMS, BABY NURSERIES**

**MA-15 FILTERS**

*Medify MA-18 Air Purifier – (Comes in white and black)*

The MA-18 tabletop air purifier features a modern design and touch operation panel. It uses a four-stage filtration process and with its powerful medical grade filters and an ionizer for fresher air, the Medify MA-18 effectively cleans the air and removes odours in rooms up to 380 square feet in 30 minutes.

It's a favourite for medical and dental practice, small-sized rooms in homes, apartments, offices, schools, universities, hospitals and more. The unit quietly and efficiently removes 99.9% of harmful toxins including some bacteria and viruses, allergens, odours, VOCs, smoke, pollen, pet dander, dust, smog, contaminants, and more down to 0.1 microns in size.

## PRODUCT OVERVIEW

### TRUE HEPA PERFORMANCE

The Medify Air MA-18 Air Purifier uses a four stage filtration process. Together, these filters remove 99.97% of particles down to 0.3 microns in diameter.

The pre-filter removes larger particles such as hair, fibers, animal dander and others.

The medical grade HEPA H13 filter removes PM2.5 smoke, pollen, dust mites, mold spores and others.

The activated carbon filter absorbs odors, harmful VOCs, and other toxic substances such as formaldehyde or common household odors from cooking.

The optional ionizer function produces negative ions to freshen the air. The unit can be used with or without the ionizer.

### ADDITIONAL FEATURES AND CONTROLS

Keep track of filter replacement with the indicator light

Choose among three fan speeds: low, medium, and high

Standby mode: when unit is not in use.

360-degree air intake and outlet for maximum air purification efficiency.

Light-weight design: easy to move between rooms.

Simple filter replacement: filters come together as a single unit for replacement.

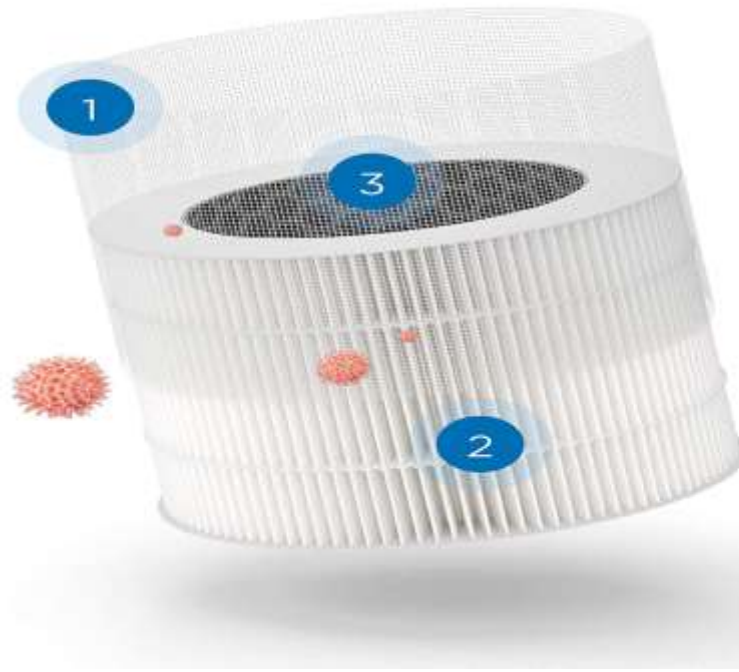

# 3 STAGE FILTER

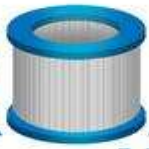

Prefilter catches large particles like hair and dust

H13 HEPA filter catches 99.9% of particles to 0.1 microns including pet dander and pollen

Activated carbon filter absorbs and eliminates odors
