Integrative Solution Services LLC and Pacific Apps, Inc. Jointly announce the Release of CollaborApp^{TM}

CollaborApp^{TM} – A mobile app and a game changer that transforms how communities care for individuals and loved ones is now available on both iOS and Android devices.

Orange County, CA – October 28, 2019 Today, during national disabilities month, Integrative Solution Services LLC and Pacific Apps, Inc. jointly announce the release of CollaborApp^{TM}, a digital collaboration platform for communities who care for patients, individuals and loved ones.

CollaborApp^{TM} is free to download on Apple Store and Google Play Store. It was first conceived by Kerrie Lloyd, the founder and CEO of Integrative Solution Services LLC. CollaborApp^{TM} is a "dream come true" for Ms. Lloyd and the care community that works with her son Adam, who is deaf with Autism. Although the App was born from the vision and the necessity to create a platform that could effectively connect every care provider and organization in the ecosystem who cares for individuals with disabilities, it is applicable for the care coordination of any individual and patient from anywhere at any time.

The App offers calendaring, secure messaging, contact management and document sharing features that allow care givers, parents and institutional care providers such as doctors, schools and care agencies to communicate in real time regarding treatment plans, appointments, and care instructions as well as sharing healthcare information and documentation that are vital to delivering quality care. The App supports multi-patient/multi-household feature that allows care providers to manage multiple patients from a single App.

CollaborApp^{TM} is built on the iDialogue and Salesforce platform. iDialogue is the flagship Document Lifecycle Management product of Pacific Apps, Inc. It provides the functionality for CollaborApp^{TM} to share, route and store documents and healthcare information in a secure, timely and traceable manner. Members of the care team who are invited to connect receive email invitations with secure tokens to access and collaborate in a web portal with secure messaging capabilities. Tracking is made easy with the iDialogue audit trail that provides a history of activities and interactions between users and documents. iDialogue's open REST API allows

the development of mobile apps, such as CollaborApp, and connected to Salesforce and a secure cloud-hosted document repository.

The App's administrative backend functionality is built on the Salesforce cloud platform which makes the application a powerful tool that can be utilized by institutions to manage patient population, deliver personalized care and transform member relationships. This powerful administrative application is offered to institutions at a licensing fee.

Ms. Lloyd and Pacific Apps, Inc. agree that CollaborApp^{TM} transforms the collaborative experience of caregivers and the treatment team by providing access to actionable real-time, on-the-go, anywhere access to timely healthcare information that improves quality of care.

About Integrative Solution Services LLC

Integrative Solution Services LLC was founded in 2013 by Kerrie Lloyd. Ms. Lloyd's career experience of digital transformation in financial services and employee benefits is what has inspired the creation of CollaborApp^{TM}, a registered trademark of Integrative Solution Services LLC. Motivated by a mission to create opportunities for the disabled, Integrative Solution Services LLC and CollaborApp^{TM} provide care communities access to information and tools that are designed to create a positive ripple effect for the disabilities community enabling them to achieve greater gains that improve interactions and their quality of life.
