Author: Michael Sullivan
ISBN: 9780134622774

Janet has worked to incorporate technology into the curriculum by participating in the development of Interactive Math and Math Pro. At Southwestern College, she helped develop the self-paced developmental mathematics program. In addition, Janet was the Dean of the School of Mathematics, Science, and Engineering, the Chair of the Mathematics Department, the faculty union president, and the faculty coordinator for

Intermediate Algebra. In the past, free time consisted of racing motorcycles off-road in the Baja and rock climbing, but recently she has given up the adrenaline rush of these activities for the thrill of traveling in Europe. Cloth Bound with Access Card. We're sorry! We don't recognize your username or password. Please try again. Elementary Algebra, 4th Edition. If You're a Student Buy this product. Personalize learning with MyLab Math. The assignments for each section are comprised of two parts: 1 Learn, Explore, and Quick Check Exercises--these assignments are comprised of How-to exercises, applet exercises, video, and Quick Check problems. Students have access to a master teacher regardless of where and when they are studying. These exercises were written and developed by Jessica Bernards and Wendy Fresh who are contributors to the author team. Students are required to respond to questions as the steps to solving problems are developed. They keep students engaged while developing their conceptual understanding. These enable students to explore and manipulate math in a visual and tangible way. Each code links students to the videos and applets that are available for that section, giving them resources at their fingertips. These examples read left to right, so that students understand what each step is accomplishing as they read through.

Often examples have annotations or pointers after each step, rather than before. The left column describes a step, the middle column provides a brief annotation, as needed, to explain the step, and the right column presents the algebra. They link students to the videos and applets that are available for that section, giving them resources at their fingertips. Synthesis Review exercises ask students to perform a single operation adding, solving, and so on on several objects polynomials, rational expressions, and so on. The student is then asked to discuss the similarities and differences in performing the same operation on the different objects. These exercises are entirely optional. Problems with a triangle icon focus on geometry concepts.

Section R. It also identifies some common errors to avoid and helps students work more efficiently. If you need help getting started, read the tutorials on the TestGen site. Pearson offers special pricing when you package your text with other student resources. If you're interested in creating a cost-saving package for your students, contact your Pearson rep. His training is in mathematics, statistics, and economics and he has more than 18 years experience as an instructor. His publications with Pearson cover developmental math, precalculus, and introductory statistics. His experience in course redesign and writing texts for the college-level math and statistics courses gives him a unique insight into where students are headed after the developmental math track, and what they need to do to be successful.

Mike is the father of three children and an avid golfer. Katherine Struve is a full-time instructor with Columbus State Community College and has more than 30 years experience in the classroom. She is in tune with the challenges of teaching mathematics at a large, urban community college. She has served as the Lead Instructor of Developmental Mathematics and has been involved in the recent course redesign effort at Columbus State. We're sorry! Instructors can choose the ideal combination of resources for their students: The text is known for its two-column example format that provides annotations to the left of the algebra.

These annotations explain what the authors are about to do in each step instead of what was just done, just as an instructor would do. The Ready to Go option provides premade assignments for every section of the text. The Sullivan examples and exercise sets are the hallmark features of this text: Sullivan Examples and Showcase Examples provide students with guidance and instruction when they need it most—when they are away from the instructor and the classroom. Sullivan examples feature a two-column format in which annotations are provided to the left of the algebra, mirroring the way that we read.

Reviews What are instructors saying about MyMathLab? Instructor Features Adaptive Learning : Enable personalized learning Not every student learns the same way and at the same rate. Thanks to advances in adaptive learning technology, you no longer have to teach as if they do. With new Companion Study Plan Assignments, you can now assign the Study Plan as a prerequisite to a test or quiz to guide students through the concepts they need to master; students are alerted when they are ready for the test. MyMathLab can personalize homework assignments for students based on their performance on a test or quiz. This way, students can focus on just the topics they have not yet mastered. Interactive Exercises with Immediate Feedback: Provide just-in-time help MyMathLab's homework and practice exercises reflect the approach and learning style you choose, and regenerate algorithmically to give students unlimited opportunity for practice and mastery.

You can choose from the many exercises available for the author you adopted—or even choose additional exercises from other MyMathLab courses. Most exercises include learning aids, such as guided solutions, sample problems, and extra help at point-of-use, and they offer helpful feedback when students enter incorrect answers. A variety of multimedia resources are also available in the homework and study plan exercises. Students can link to the ebook, video clips, and animations to improve their understanding of key concepts. You can also assign media and video as well as accompanying exercises. Videos are captioned in English, and several courses are also captioned in Spanish. Mobile-Friendly Design : Access from most devices MyMathLab's exercise player has been updated with a new, streamlined, mobile-friendly design.

You can access your course from iPad and Android tablets to work on exercises and review completed assignments. Exercises and images are easily magnified with browser-based magnification settings. The fresh look is clean and intuitive for efficient studying any time, anywhere. Comprehensive Gradebook : Manage your grades and track individual student progress The online gradebook automatically tracks students' results on tests, homework, and practice exercises, and gives you control over managing results and calculating grades.

The gradebook provides a number of flexible grading options weighting, drops, including exporting grades to a spreadsheet program such as Microsoft Excel. View, analyze, and report learning outcomes clearly and easily, and get the information you need to keep your students on track throughout the course, with the new Reporting Dashboard. Available via the Gradebook and fully mobile-ready, the Reporting Dashboard presents student performance data at the class, section, and program levels in an accessible, visual manner. Item Analysis also lets you track class-

wide progress on particular learning objectives, so you can refine your class lectures or adjust the syllabus as needed.

Just-in-time teaching has never been easier. Improve Results: MyMathLab delivers proven results in helping students succeed and provides engaging experiences with personalized learning. Support all learning styles and promote good study skills — the complete Carson Math Study System is designed to help students develop the skills e. Rely on a proven pedagogy that explains the why behind algebra— in everyday language the program walks students through the concepts, explaining not only how to do the math, but also where the concepts come from and why they work. Summary and Review Exercises. Practice Test. Chapters 1—2 Cumulative Review Exercises. Chapters 1—3 Cumulative Review Exercises. Chapters 1—4 Cumulative Review Exercises. Chapters 1—5 Cumulative Review Exercises. Chapters 1—6 Cumulative Review Exercises. Chapters 1—7 Cumulative Review Exercises.

Chapters 1—8 Cumulative Review Exercises. Chapters 1—9 Cumulative Review Exercises. Important: To use the test banks below, you must download the TestGen software from the TestGen website. If you need help getting started, read the tutorials on the TestGen site. Unbound Saleable. Access Code Card. That experience helped him to realize that his true gift and passion are for teaching. Elementary Algebra, 4th Edition. If You're a Student. Teaching and Learning Experience This program will provide a better teaching and learning experience for you and your students. Support all learning styles and promote good study skills: the complete Carson Math Study System with Learning Styles Inventory guides students to success in the course. Rely on a proven pedagogy that explains the why behind algebra: in everyday language the program walks students through the concepts, explaining not only how to do the math, but also where the concepts come from and why they work.

Two MyMathLab course options are now available: Standard MyMathLab courses allow instructors to build their course their way, offering maximum flexibility and control over all aspects of assignment creation. Ready to Go courses provide students with all the same great MyMathLab features, but also make it easier for instructors to get started.

Both Carson course options include one premade pre-test and post-test for every chapter, section-level homework, and a chapter review quiz linked to personalized homework. Assignments are also pre-assigned in the Ready to Go courses. Increased exercise coverage gives students more practice exercises than ever before.
