The World Atlas of Language Structures (WALS)

edited by

Martin Haspelmath, Matthew S. Dryer, David Gil, and
Bernard Comrie

Interactive Reference Tool by
Hans-Jörg Bibiko

Oxford: Oxford University Press, 2005, 695 pages

a five-year project at the Department of Linguistics,
Max Planck Institute for Evolutionary Anthropology
(MPI-EVA), Leipzig (1999-2004)

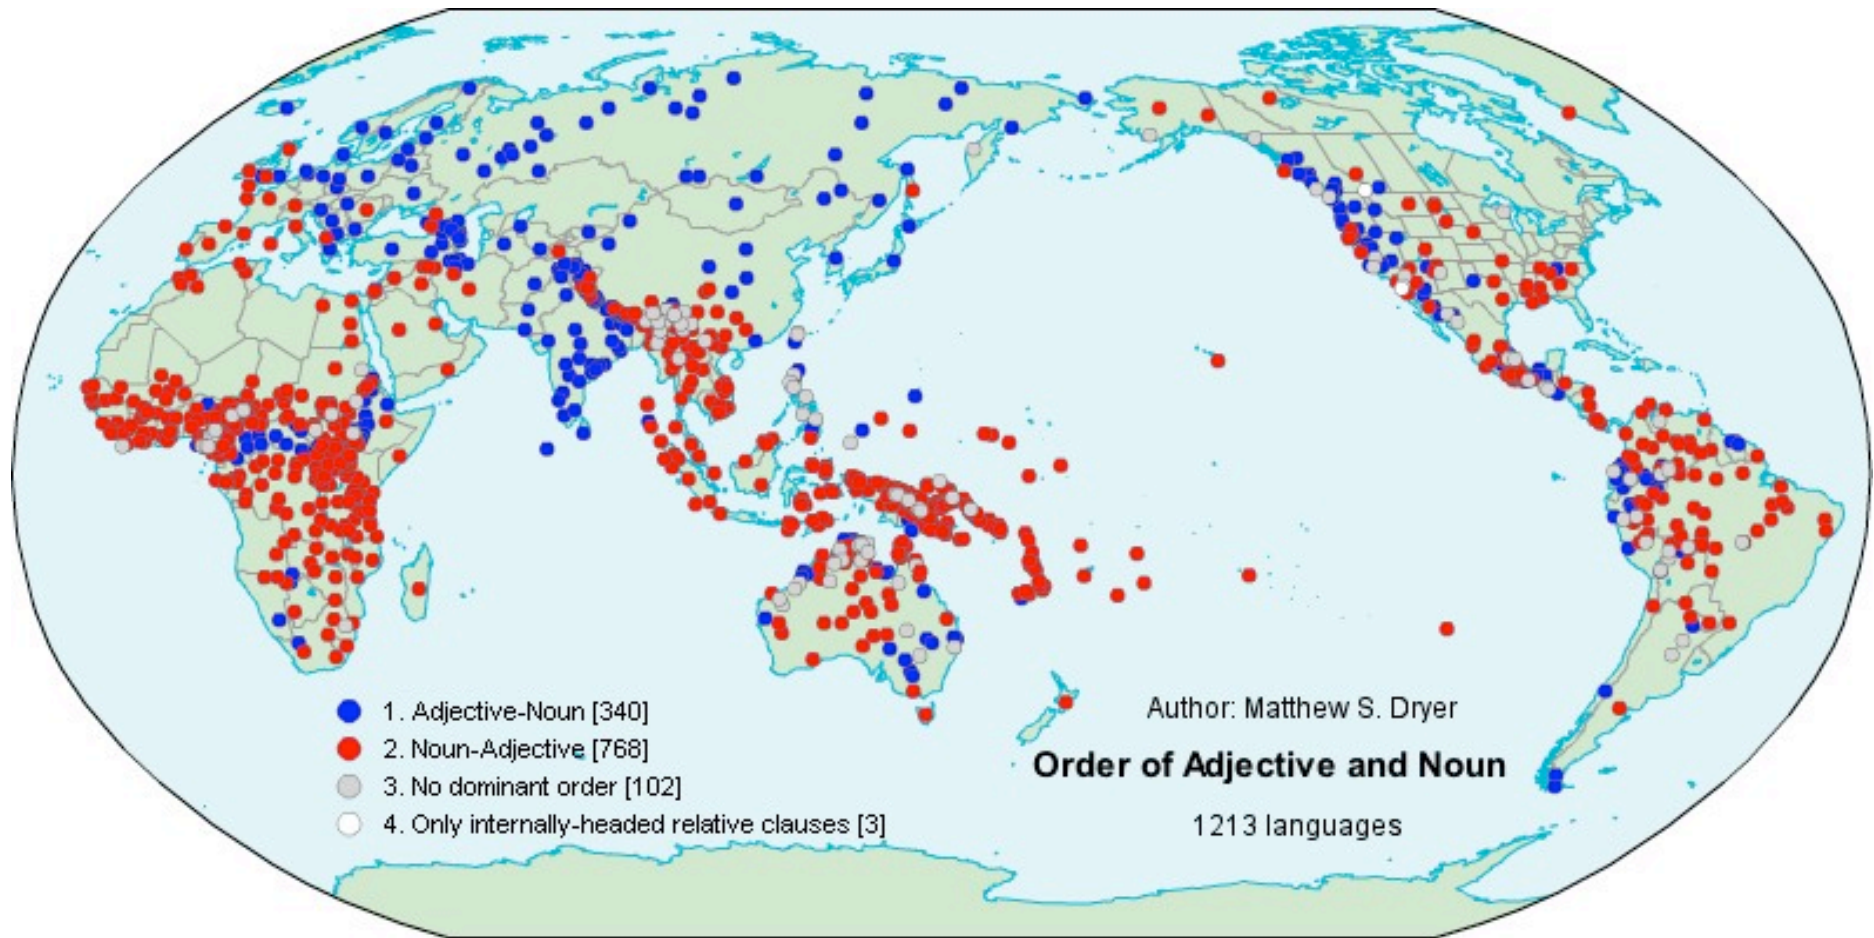

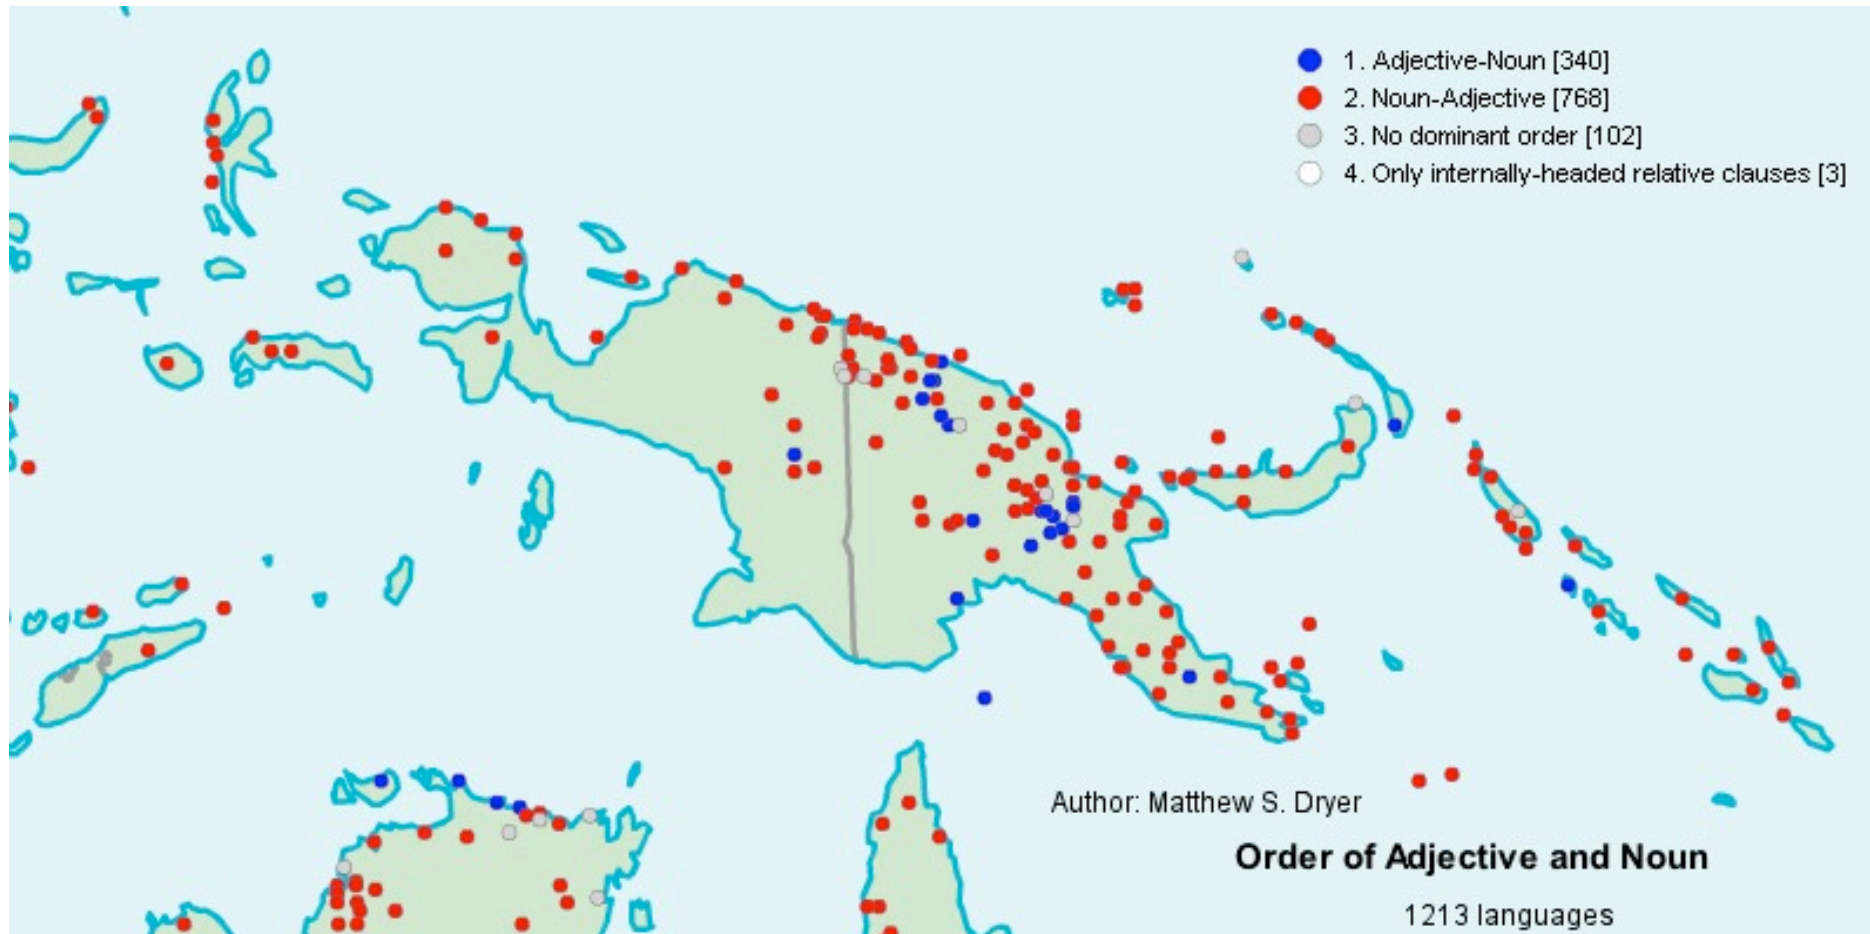

Internet version (latest edition 2011)
edited by Matthew S. Dryer and Martin Haspelmath

wals.info

1. What is *WALS*?

- a book:
an atlas with 142 world maps, showing languages as dots
- a database: each map provides information on a different structural linguistic feature
- an interactive electronic database and map-generating tool (on CD-ROM)
- an indispensable reference tool for comparative linguistics and anyone interested in linguistic diversity
- a visualization of what we know about the structural diversity of the world's languages, comprehensible to anyone who can read maps

2. How was *WALS* put together?

- each chapter was contributed by a single author (or team of authors)

about 40 authors: 9 MPI-EVA scientists
 19 MPI-EVA visiting scientists
 12 others

- these authors gathered information about a particular feature from published descriptions of languages from around the world
- the resulting data were sent to the editors, accompanied by a text describing the feature and its values
- the editors checked the quality of the contribution and made sure the contributions conform to the specification of the project

first step: linguistic fieldwork

Khumi speakers (Bangladesh),
with MPI-EVA linguist David Peterson

A Mosestén speaker (Bolivia),
working with MPI-EVA linguist Jeanette Sakel

second step: **published descriptions of language structure**

Sakel, Jeanette. 2004. *A grammar of Moseetén*. Berlin, New York: Mouton de Gruyter, 504 pp.

third step: **language typology:**

desk linguists ("armchair linguists") read scores or hundreds of grammatical descriptions, classify languages into types, and extract general properties of human language

3. Some statistics (2005 edition)

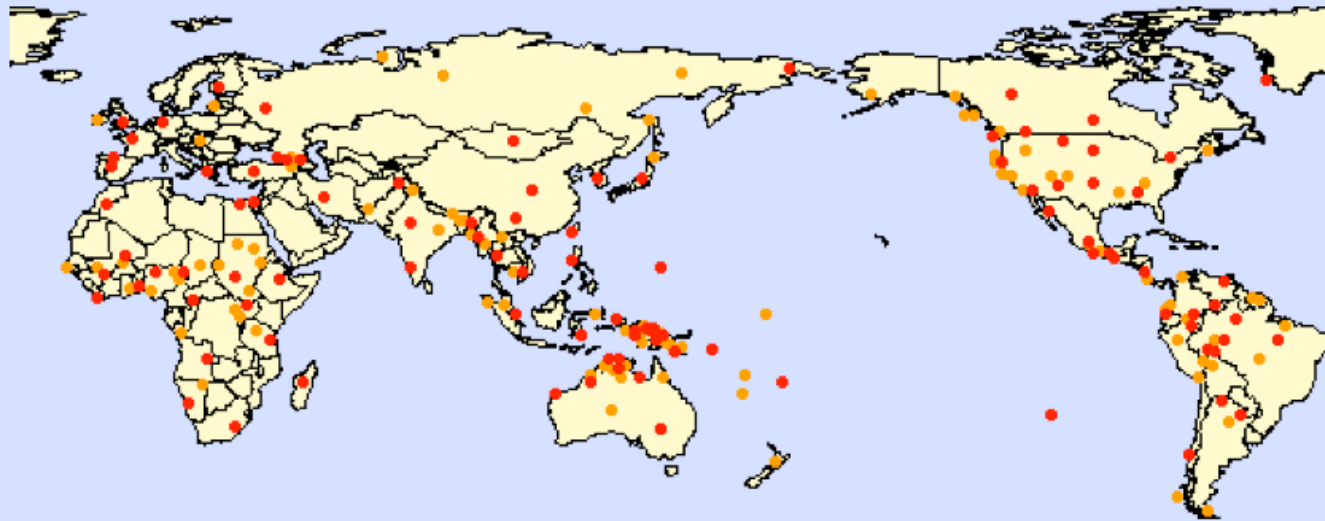

142 features:

Phonology	19
Morphology	10
Nominal Categories	28
Nominal Syntax	7
Verbal Categories	16
Word Order	17
Simple Clauses	24
Complex Sentences	7
Lexicon	10
Others	4

- 2560 different languages
- On average, 398 languages per map (minimum: 35, maximum: 1370)
- Altogether about 58,000 data points
- 6700 bibliographical references

World Atlas of Language Structures

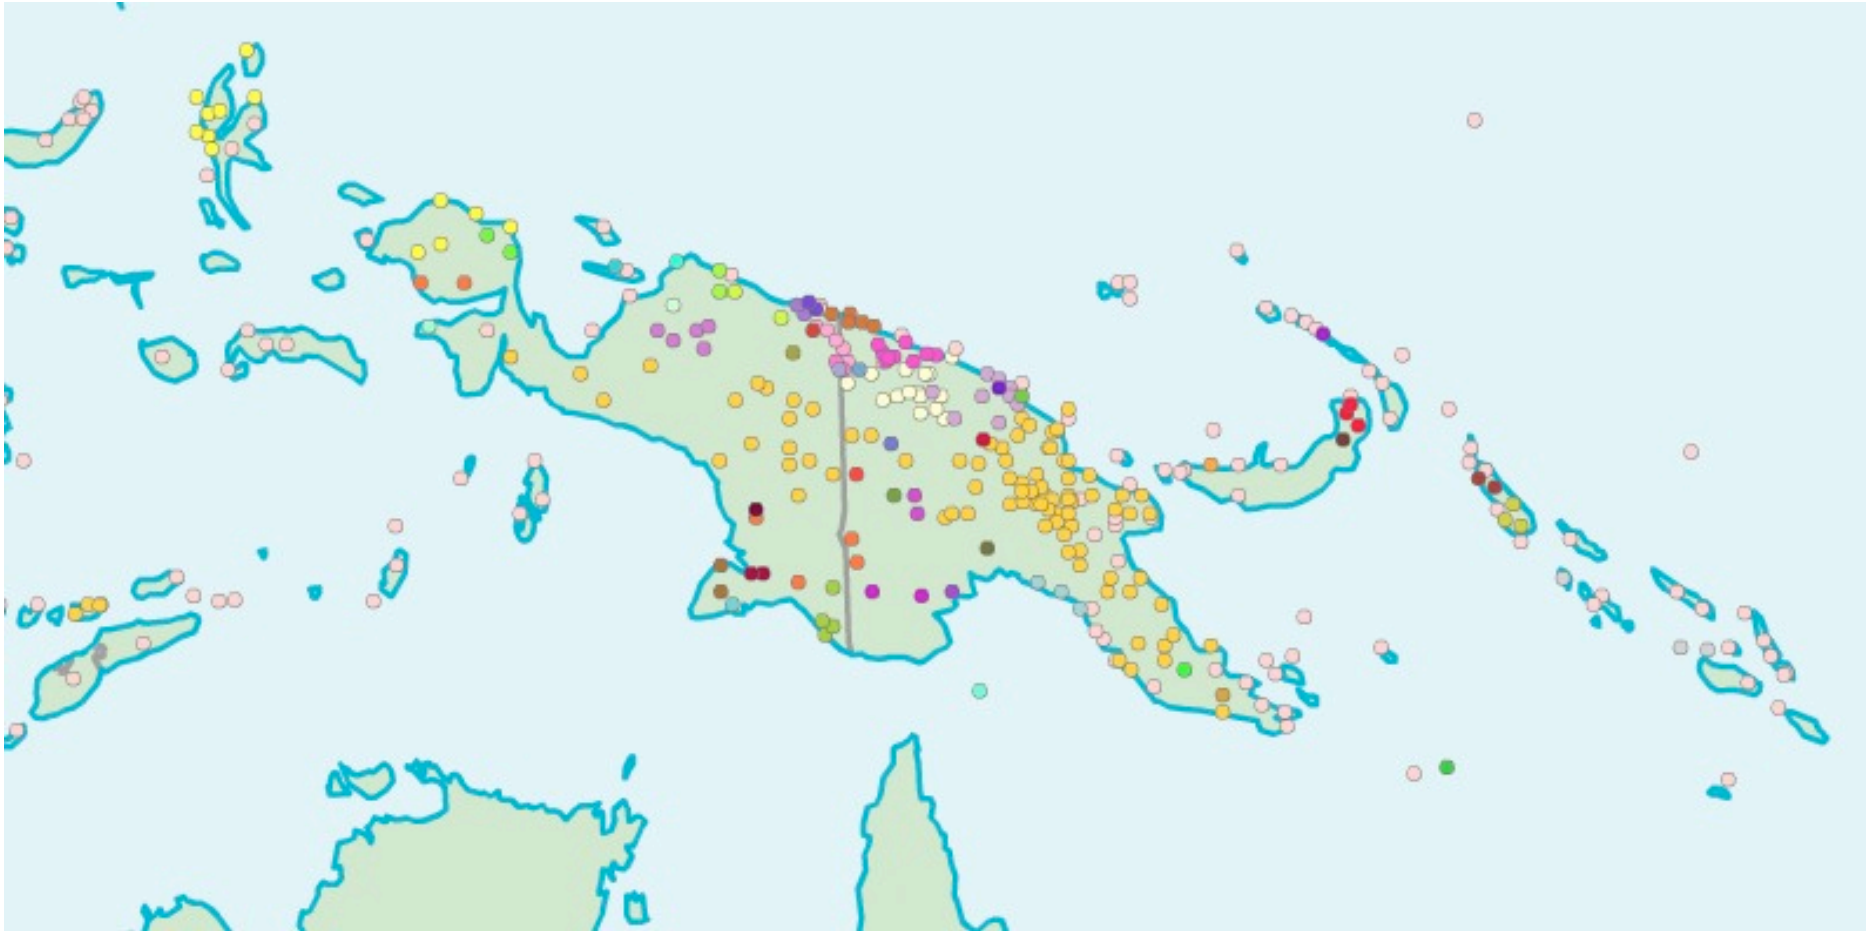

The WALS 100- [·] and 200- [·] Language Samples

4. What to do with *WALS*

4.1. Study the geographical distribution of structural linguistic features

New Guinea linguistic area

Coloring is by language family; the pink-colored dots represent Austronesian languages

Order of Subject, Verb, and Object

SOV (e.g. Japanese)

Taroo ga tegami o yon-da.
Taroo NOM letter ACC read-PST
S O V
'Taroo read the letter.'

SVO (e.g. English)

The student bought the book.
S V O

VSO (e.g. Irish [Celtic, Indo-European; Ireland])

Léann na sagairt na leabhair.

read.PRS the priest.PL the book.PL

V S O

‘The priests are reading the books.’

VOS (e.g. Nias [Austronesian; Sumatra, Indonesia])

I-rino vakhe ina-gu.

3SG.RLS-cook rice mother-1SG

V O S

‘My mother cooked the rice.’

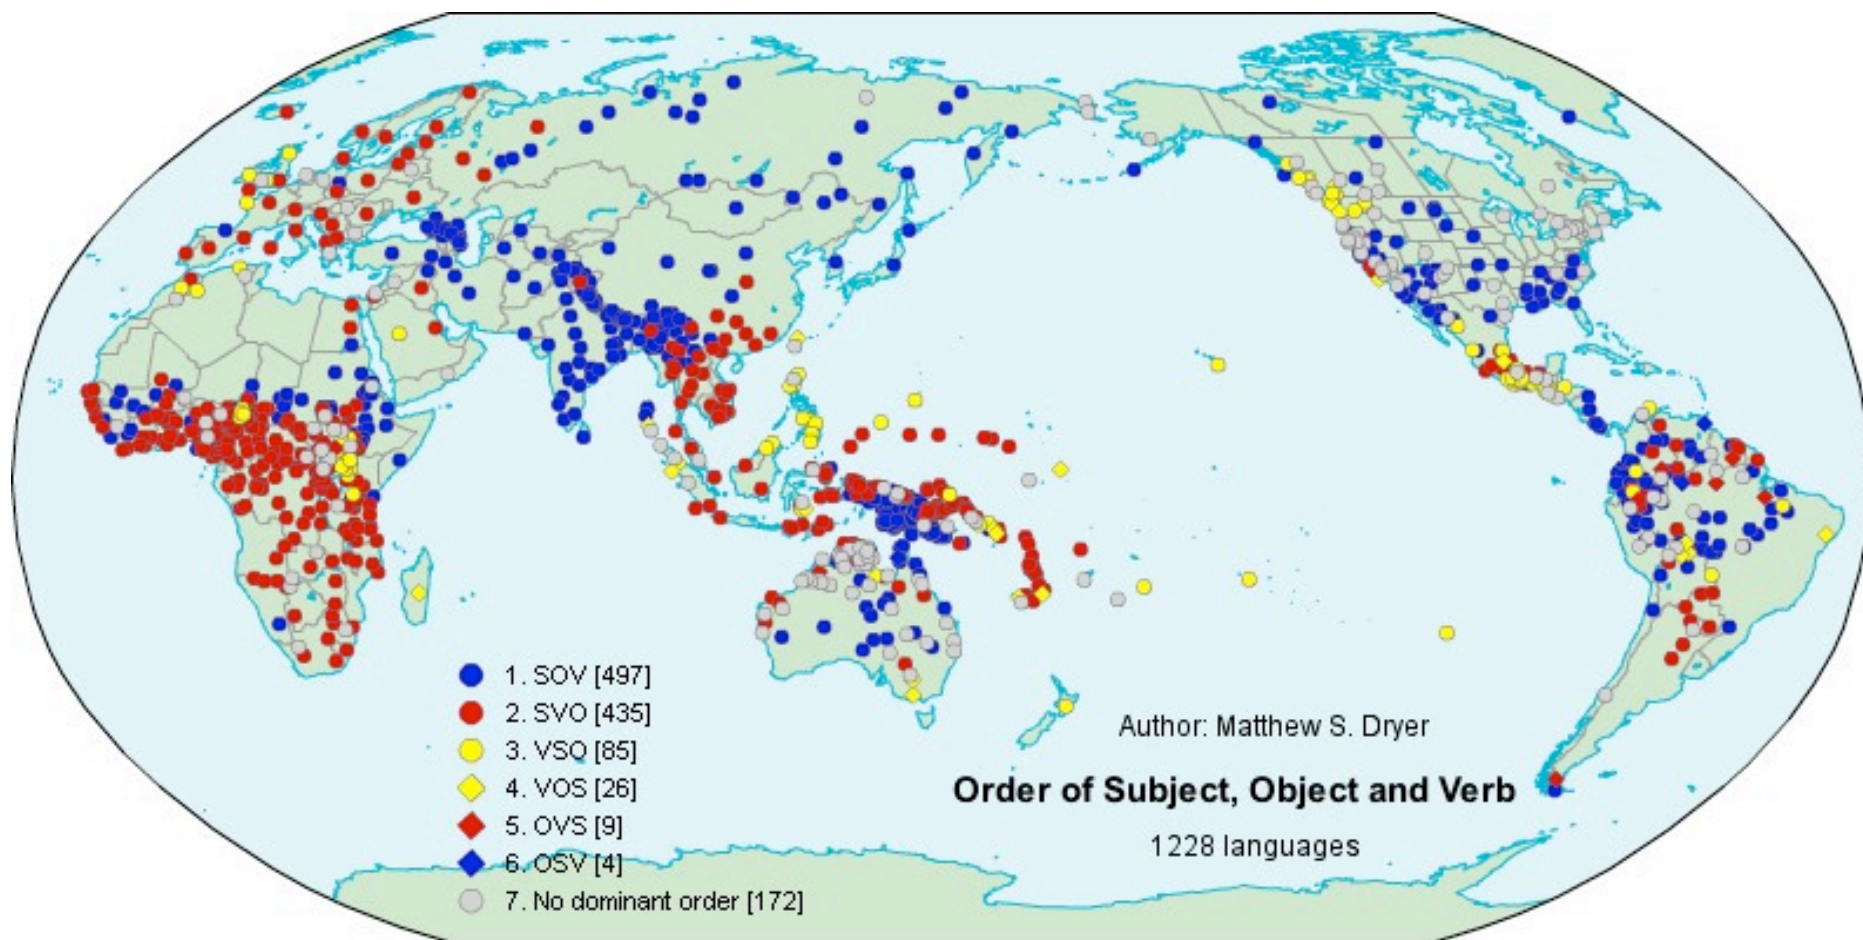

OVS (e.g. Hixkaryana [Cariban; Brazil])

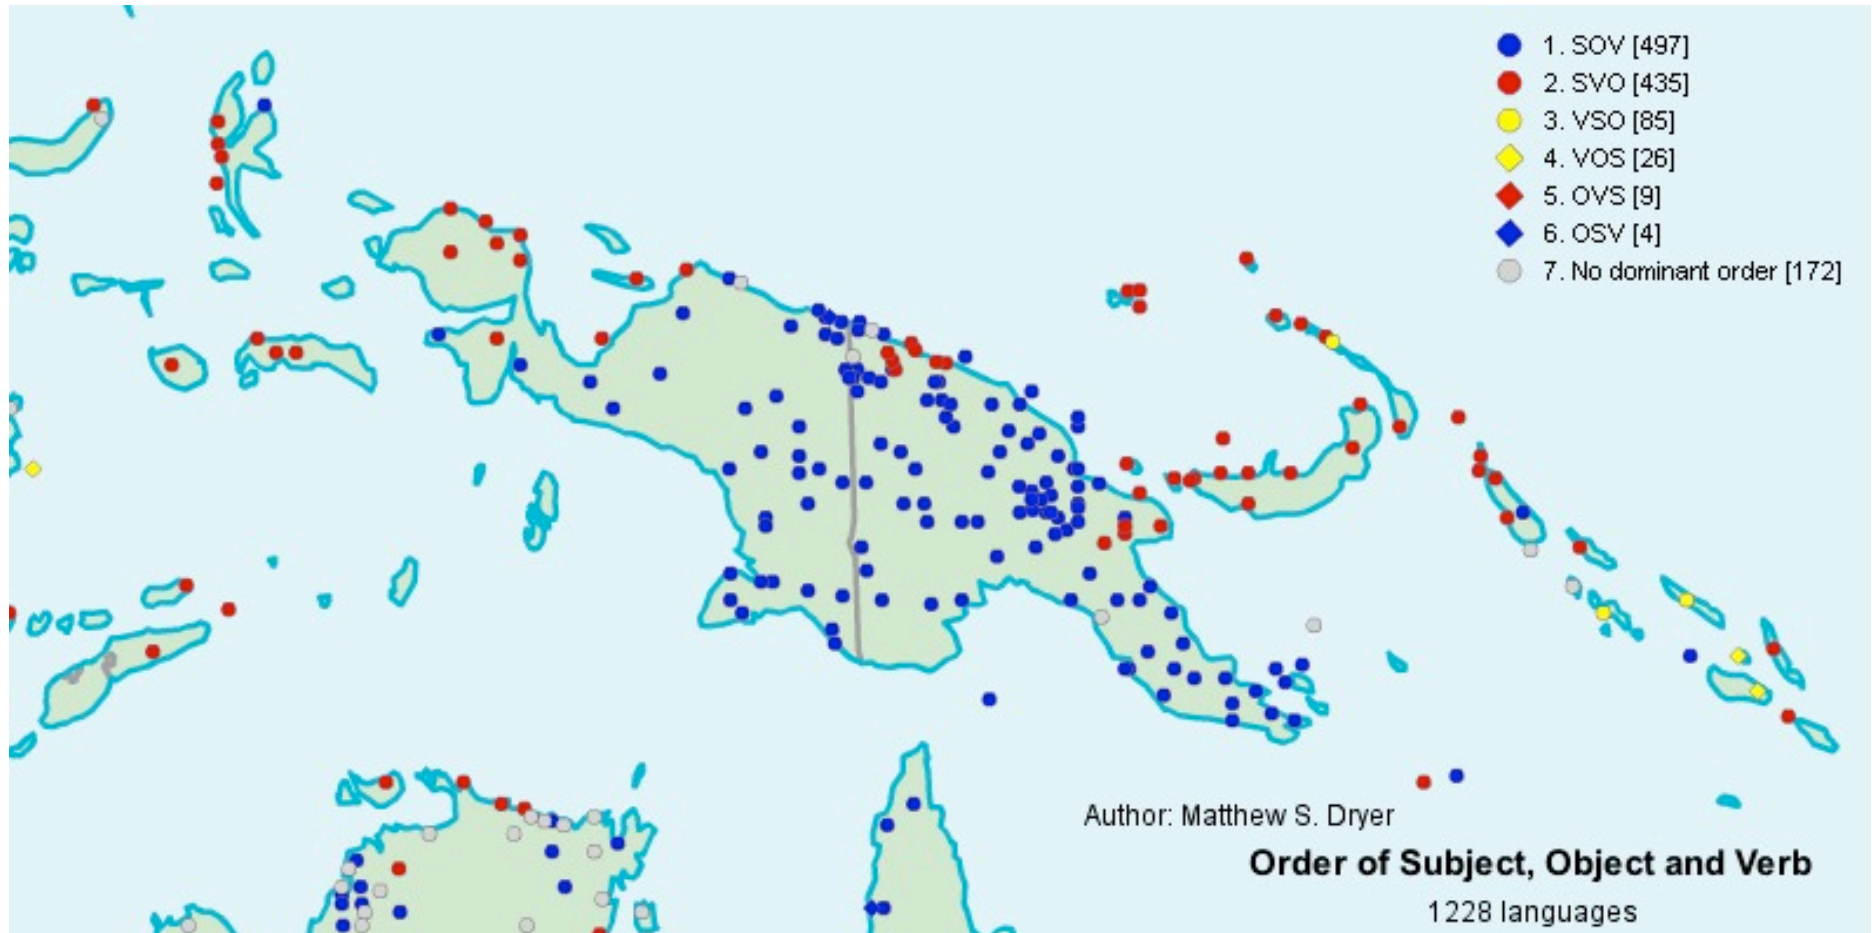

Toto y-ahosi-ye kamara.
man 3>3-grab-REMPST jaguar
O V S
'The jaguar grabbed the man.'

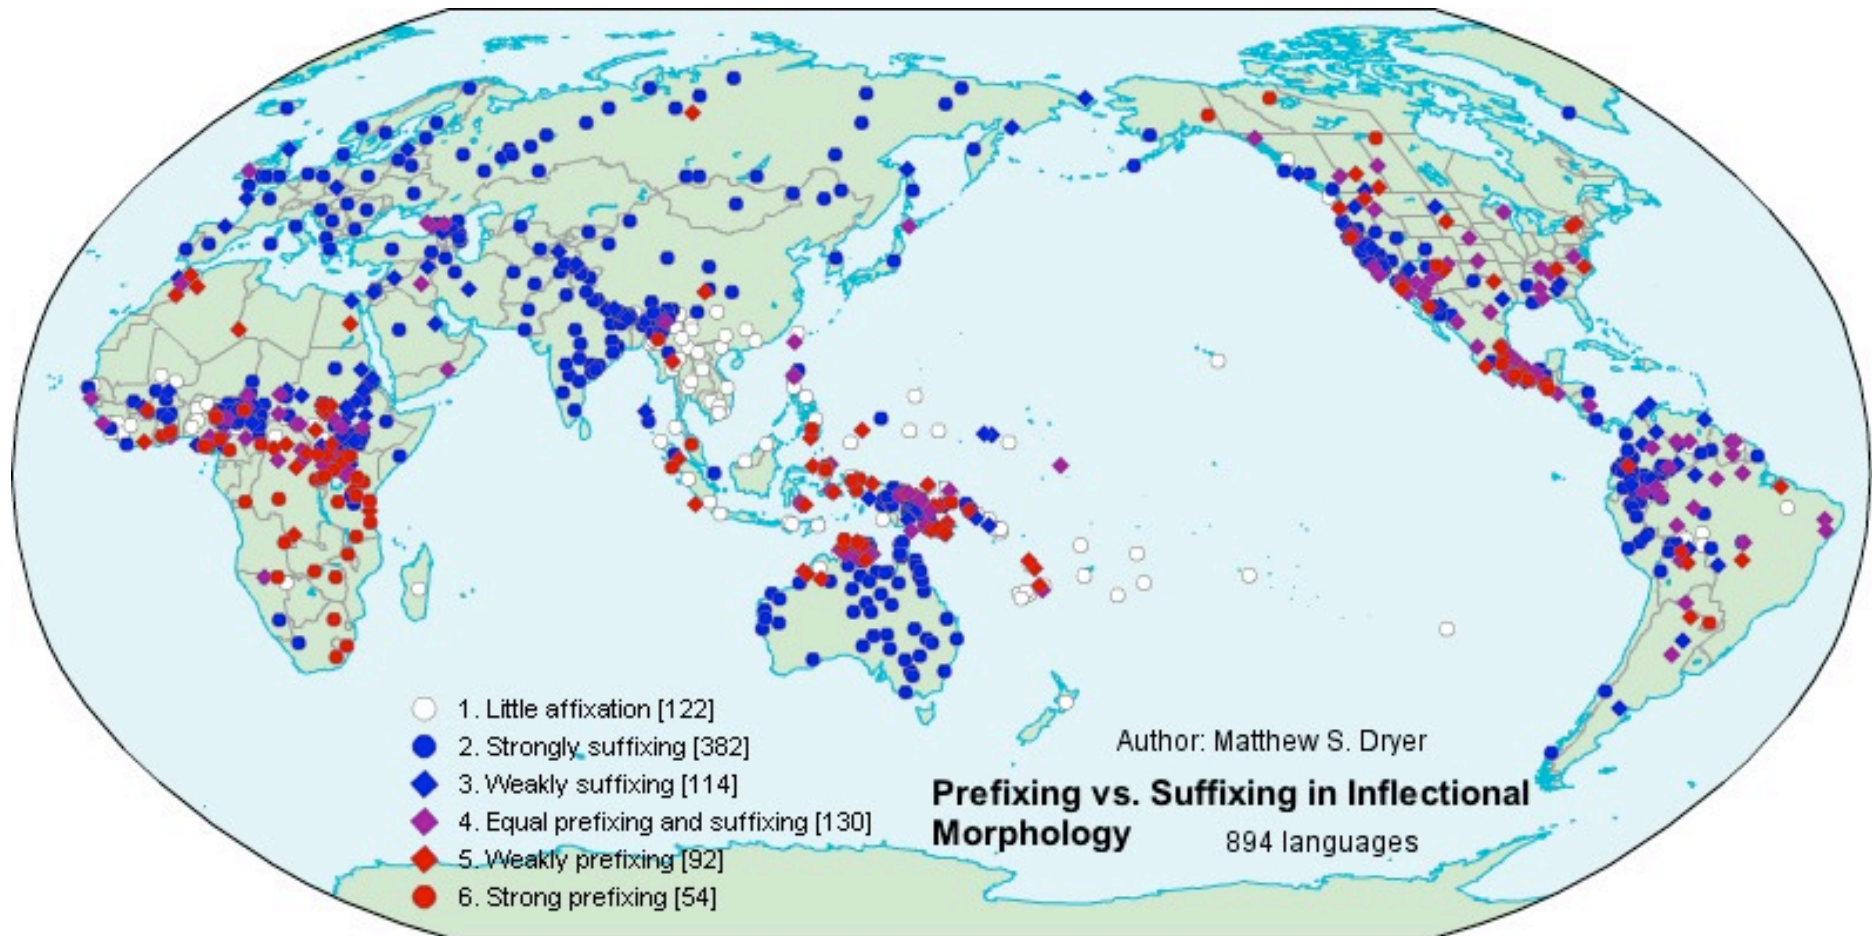

OSV (e.g. Nadëb [Vaupés-Japurá; Brazil])

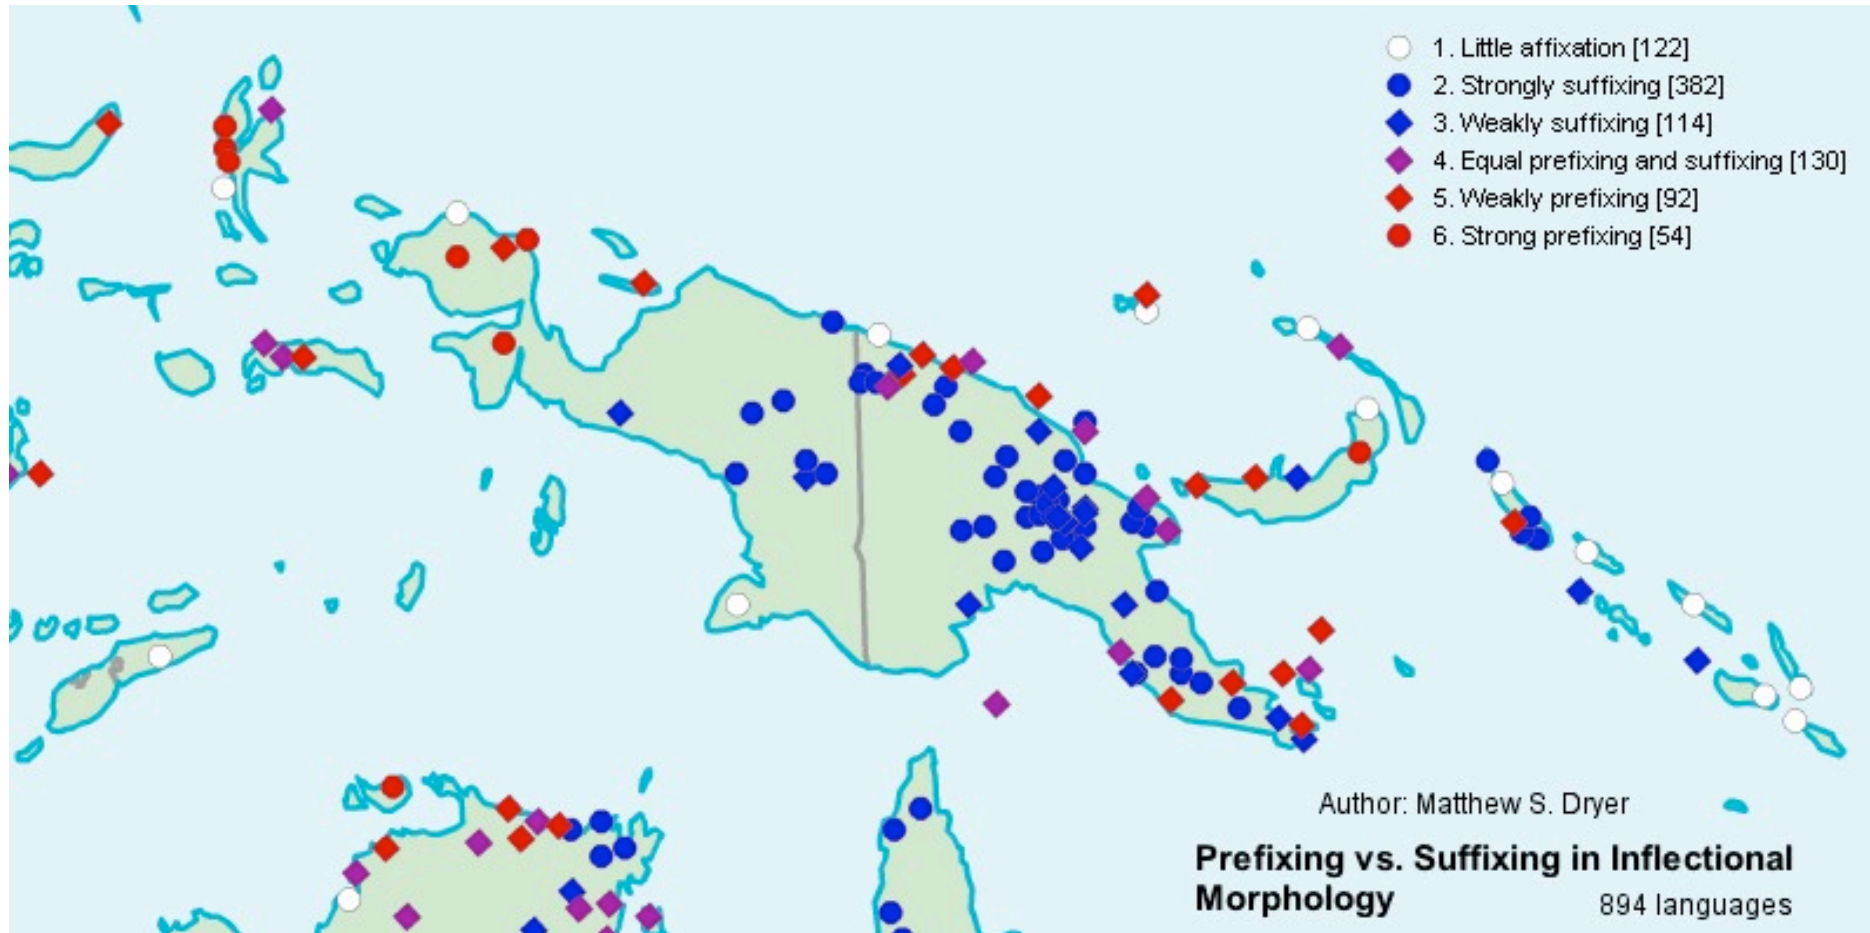

Awad kalapéé hapúh.
jaguar child see.IND
O S V
'The child sees the jaguar.'

No dominant order

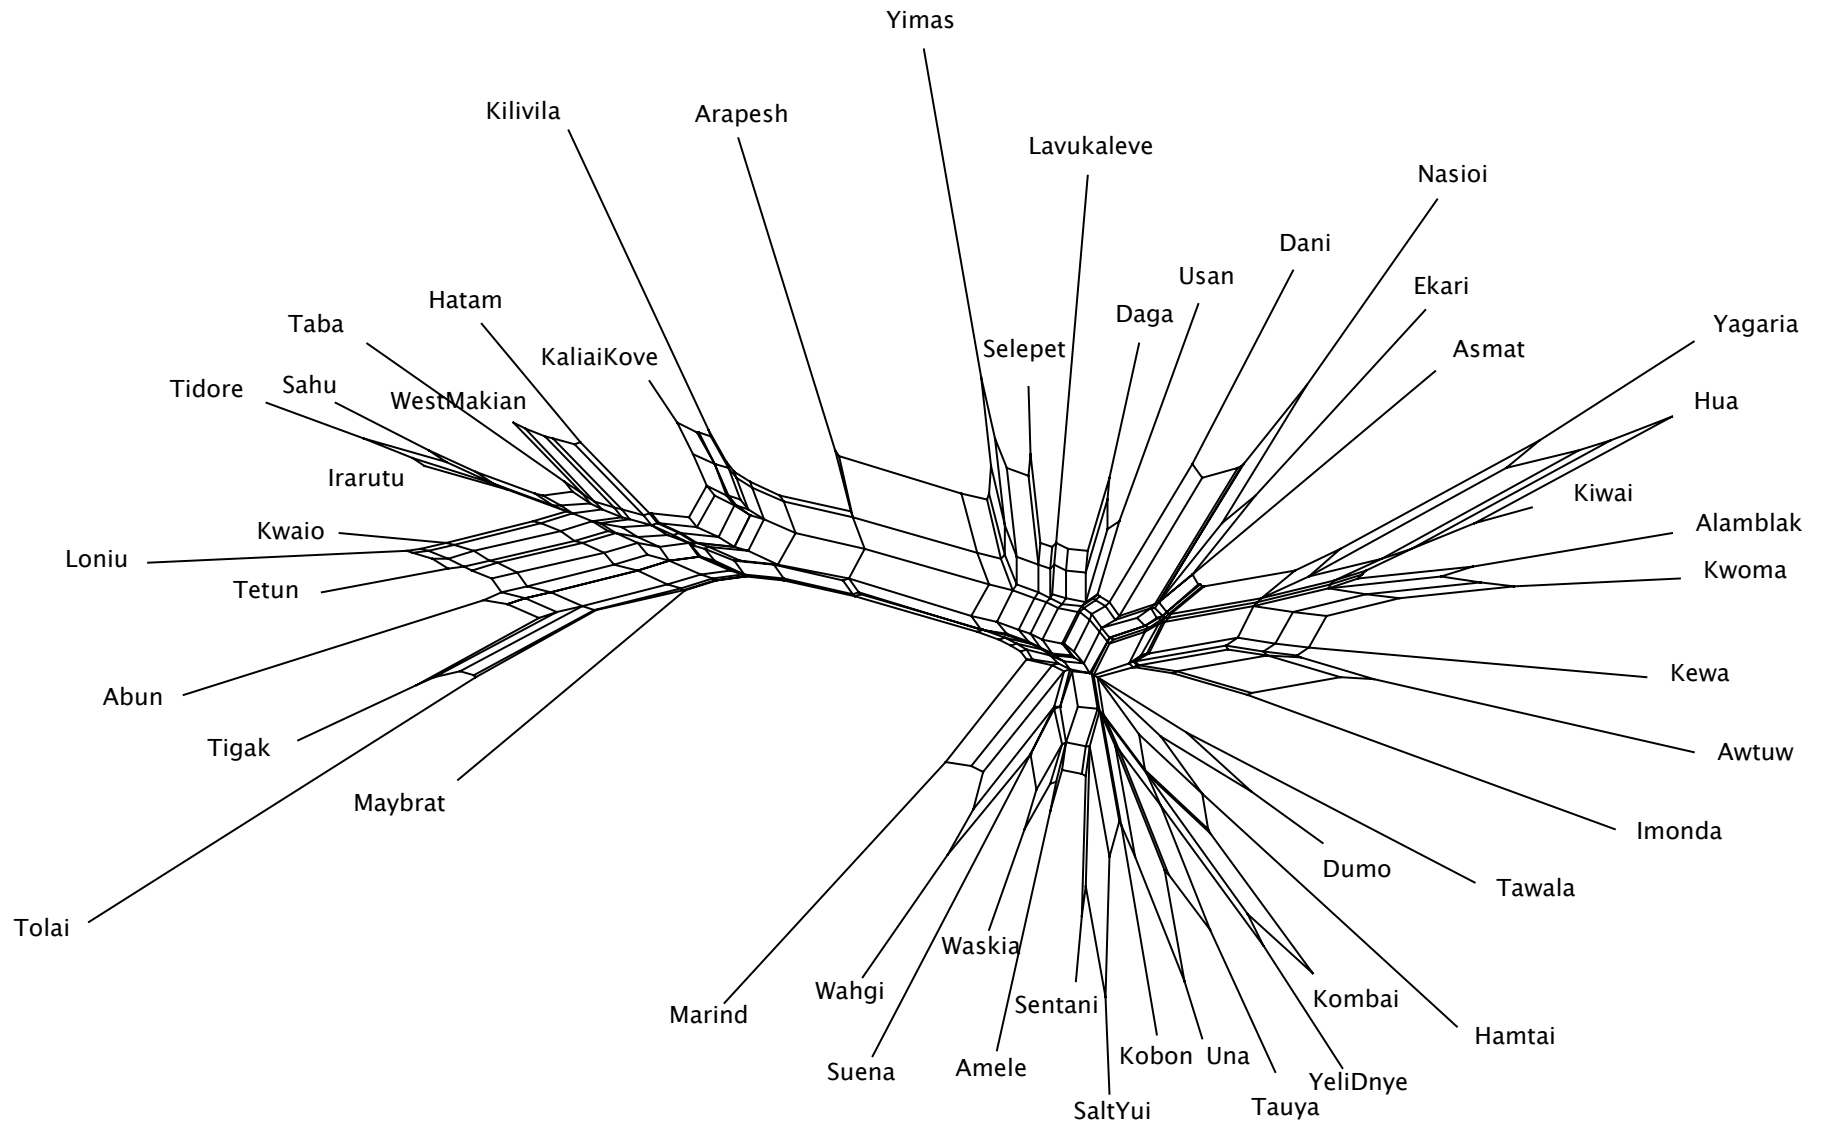

Comrie, Bernard & Michael Cysouw. 2012. New Guinea through the eyes of WALS. *Language and Linguistics in Melanesia* 30: 65–94.

<http://www.langxmelanesia.com/LLM%2030%20New%20Guinea%20through%20the%20eyes%20of%20WALS.pdf>

NeighborNet

Two major groupings
with Arapesh (Torricelli family) occupying a somewhat
intermediate position

1. (left-hand side of NeighborNet)

Austronesian family (except Tawala)
West Papuan family

2. (right-hand side of NeighborNet)

Other Papuan families (except perhaps Arapesh)
Tawala (Austronesian family)

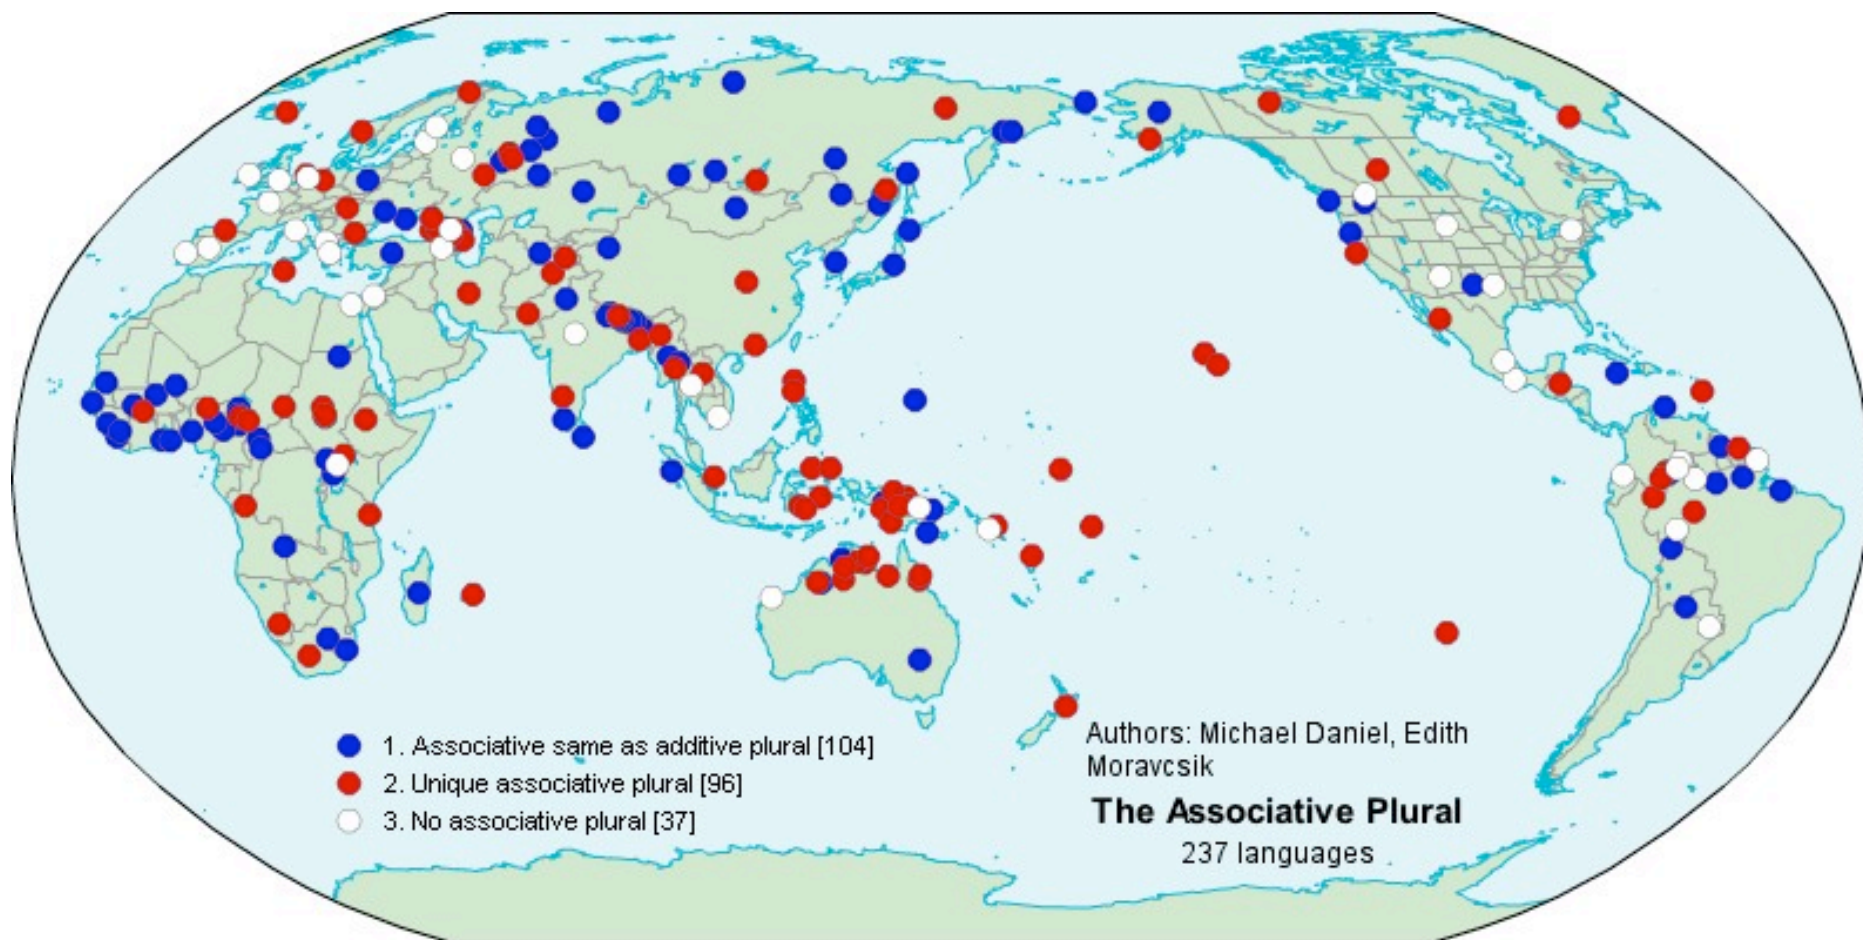

Associative Plural

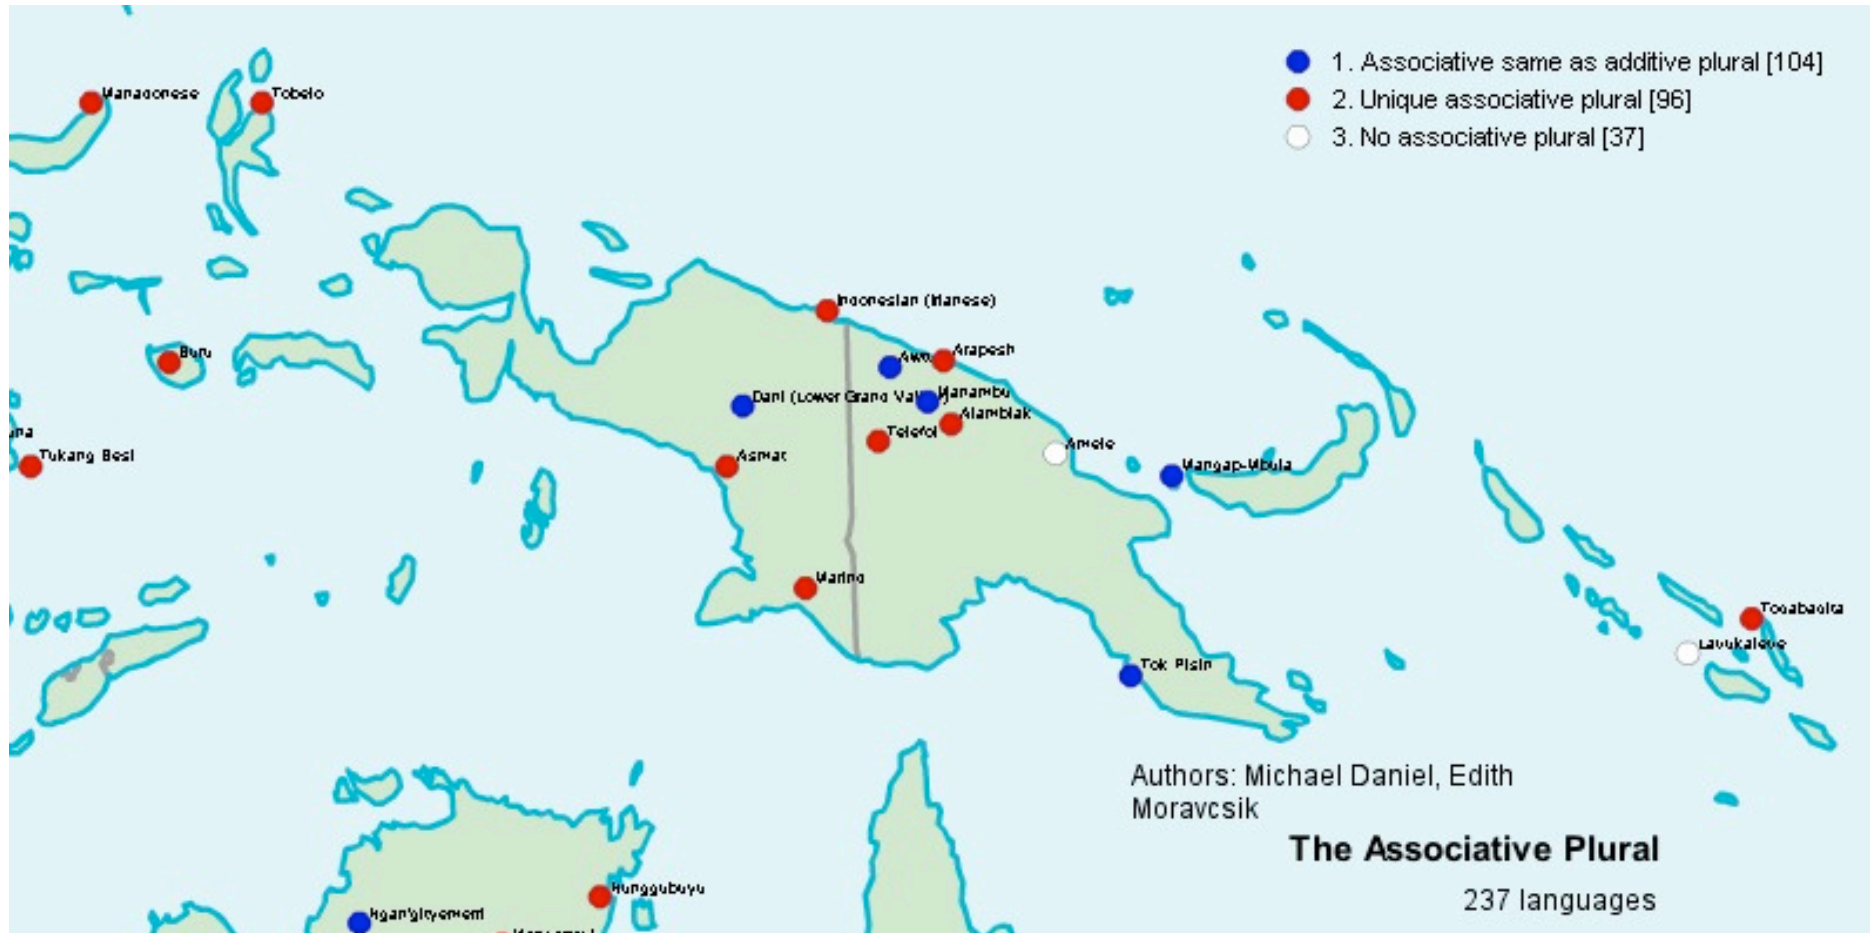

Taroo-tati

Taroo-PL

'Taroo and his group'

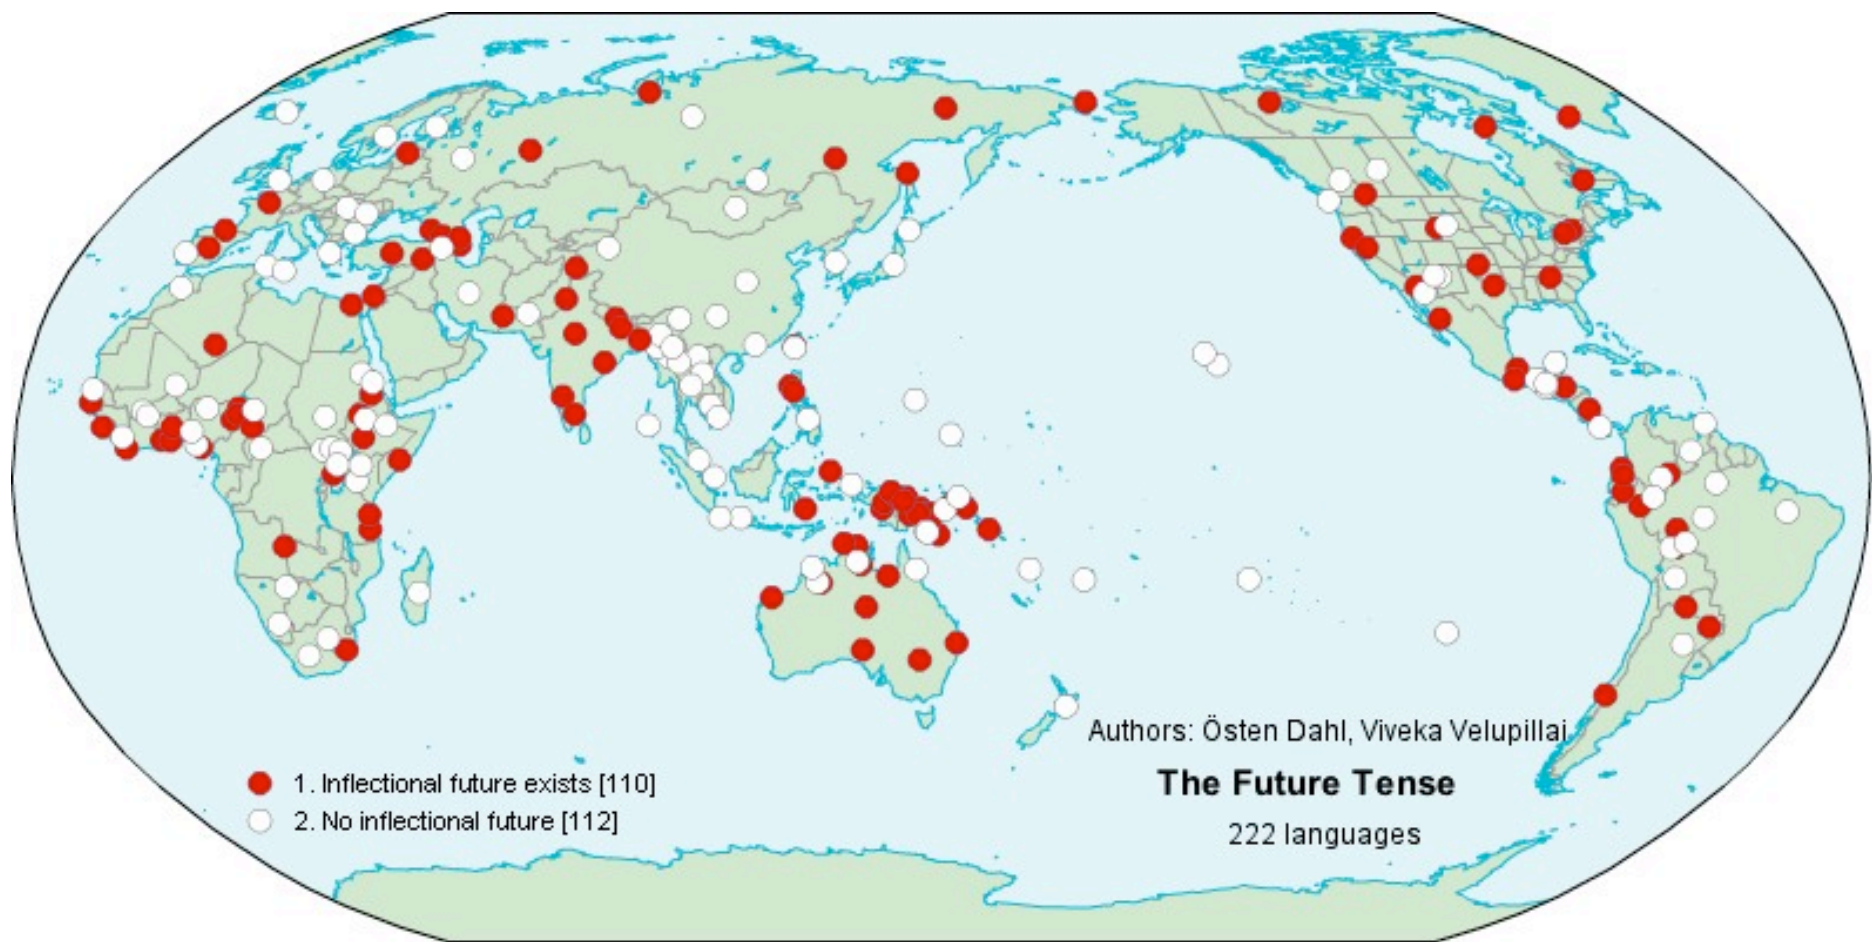

Japanese

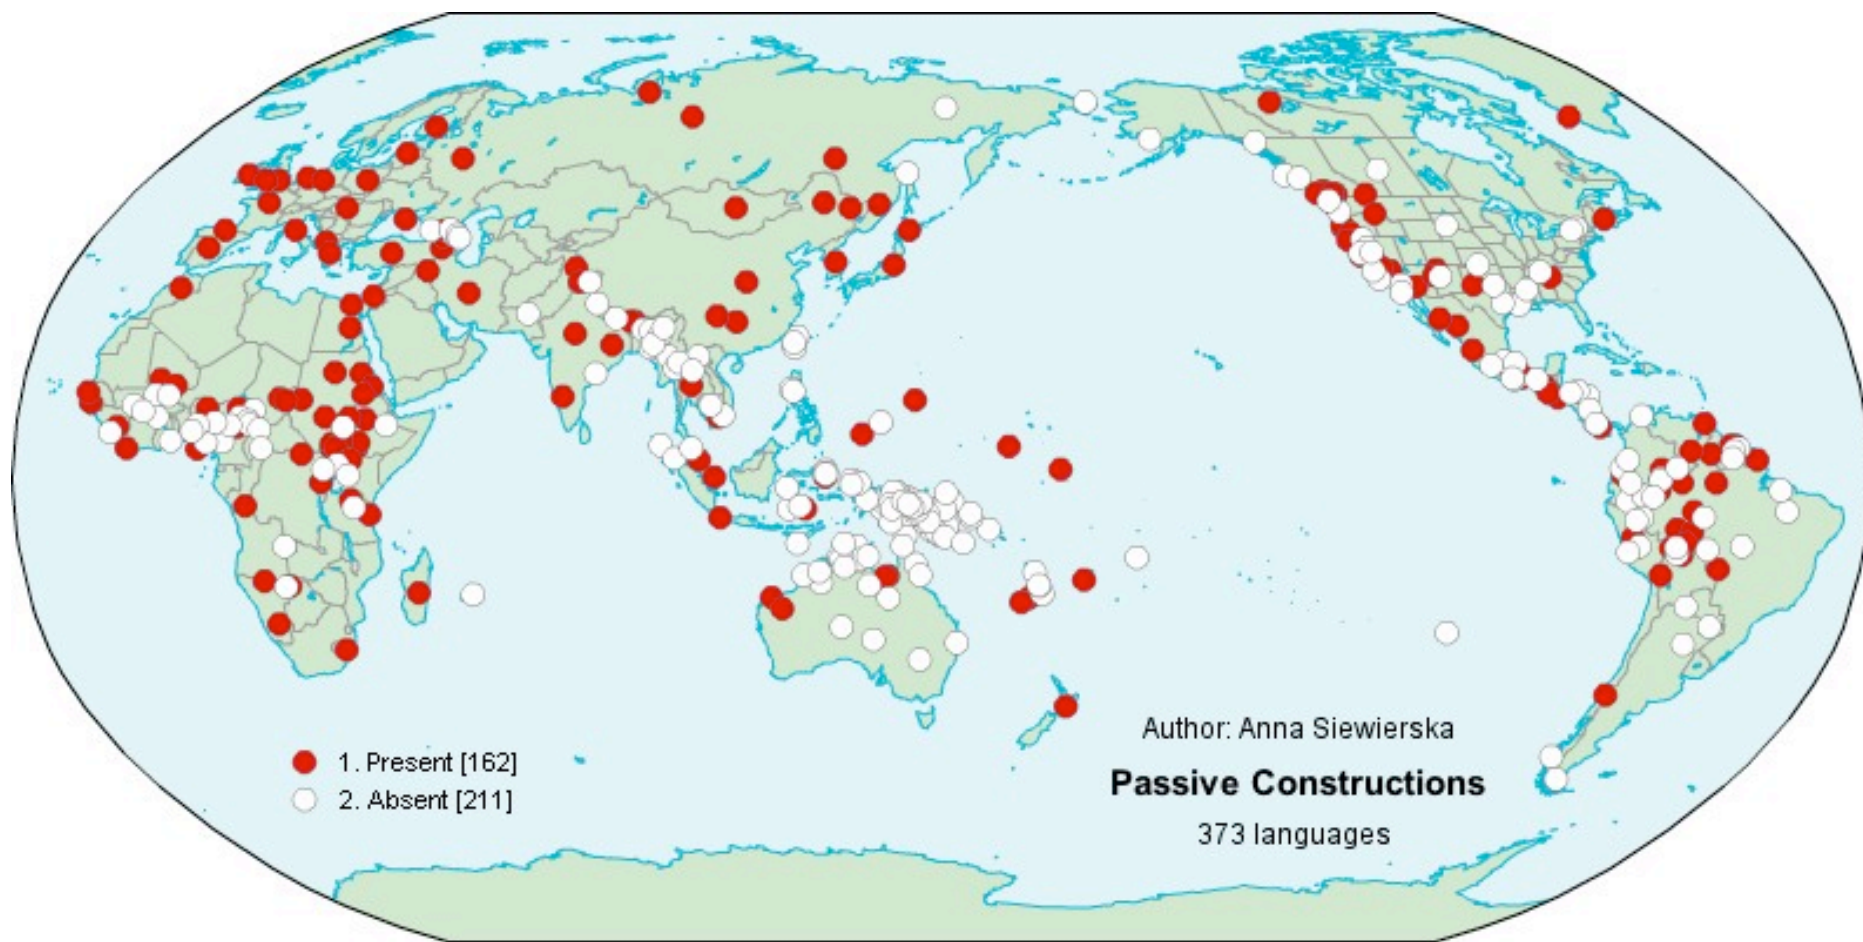

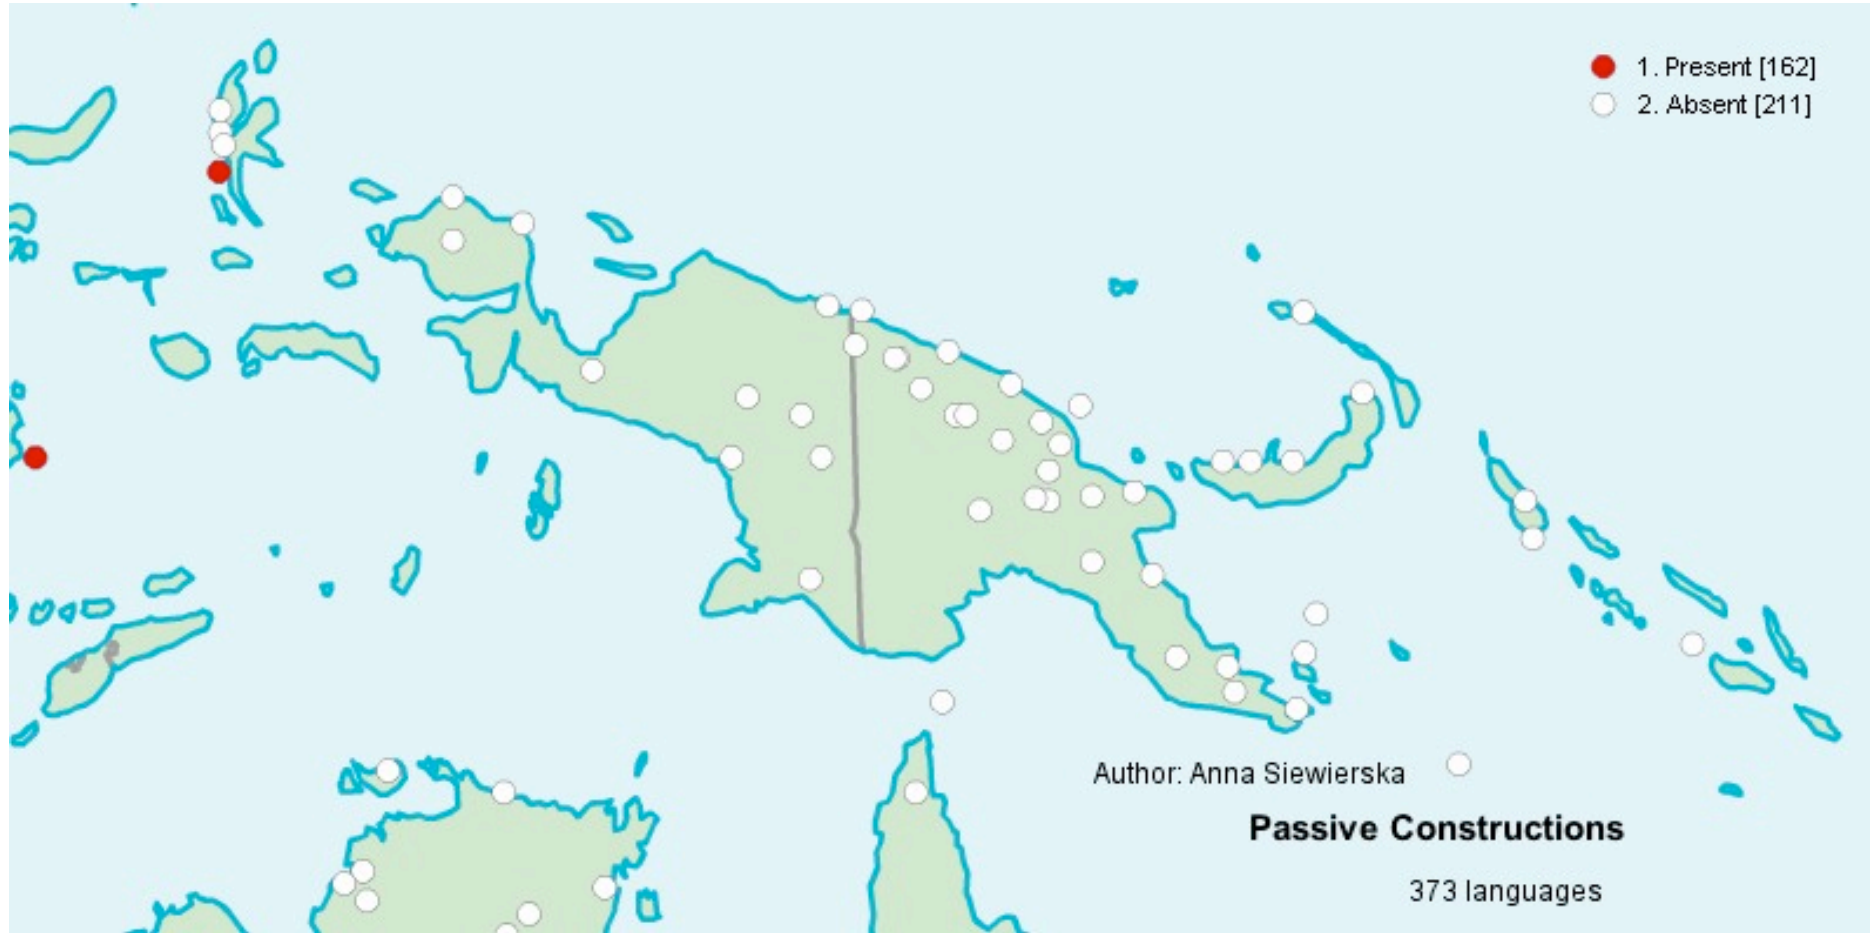

Inflectional Future

Latin *amabo* 'I will love', from *amare* 'to love'

4.2. Study correlations between different features

Head-final

OV
NpPo
GenN

AdjN

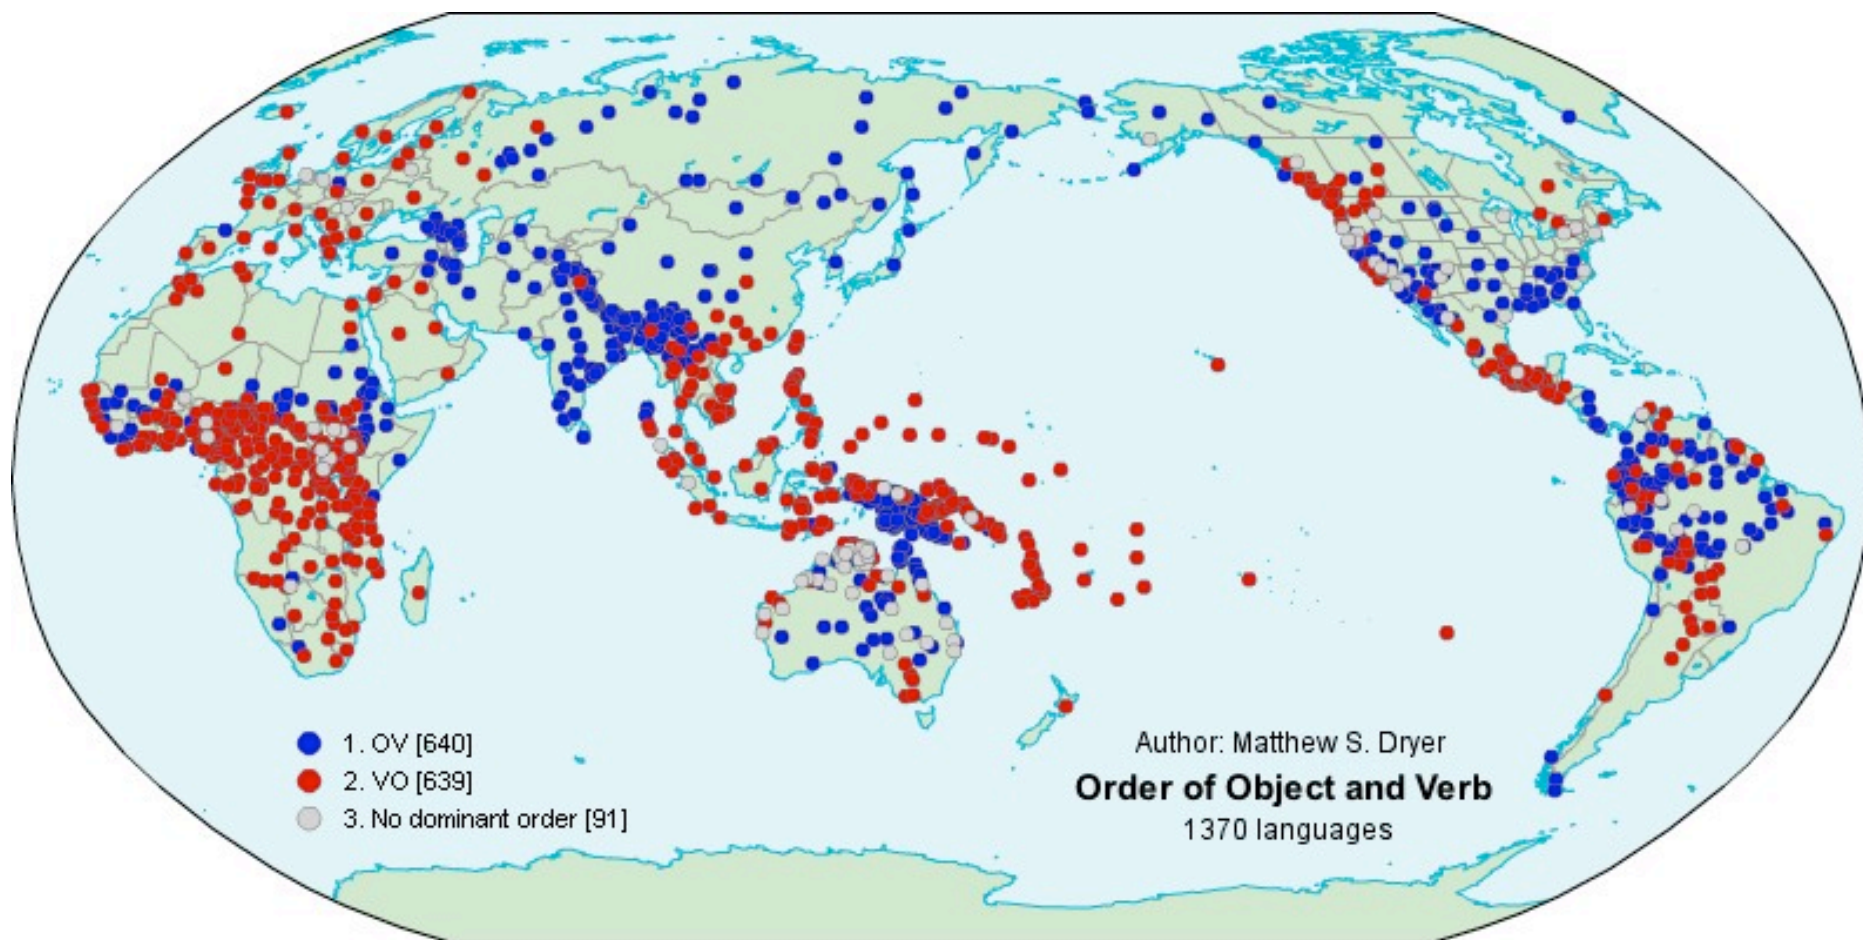

Head-initial

VO
PrNp
NGen

NAdj

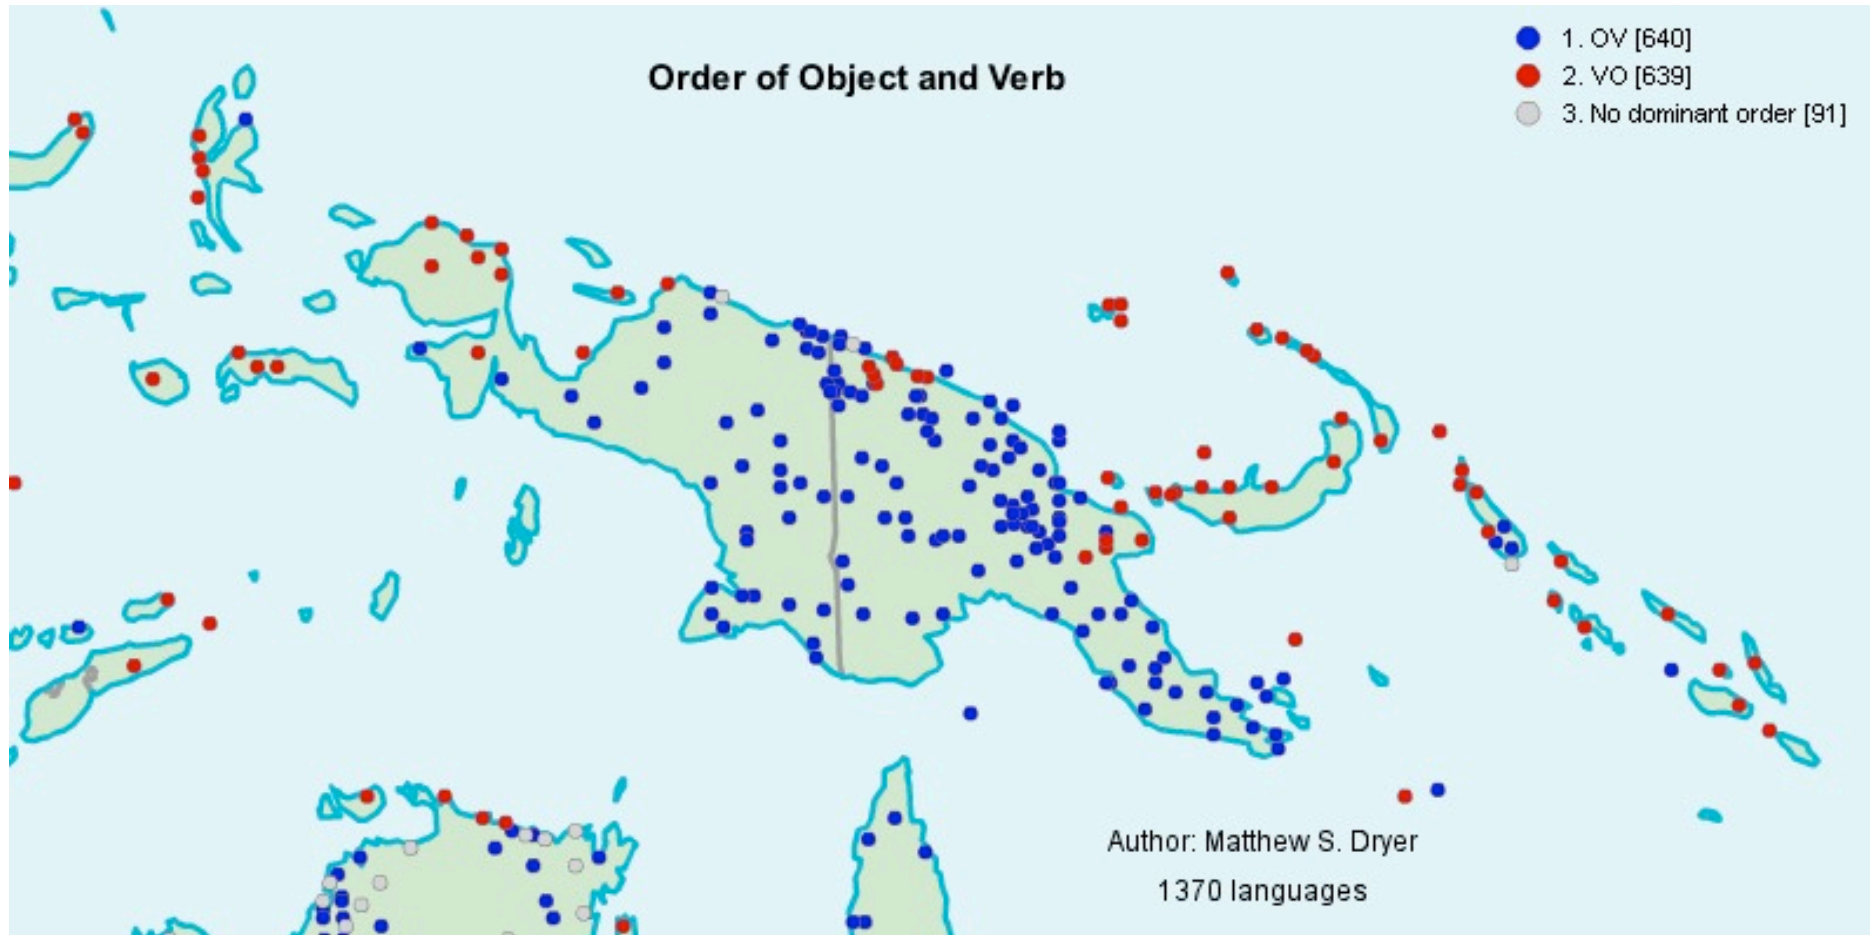

verb phrase
adpositional phrase
noun phrase

noun phrase

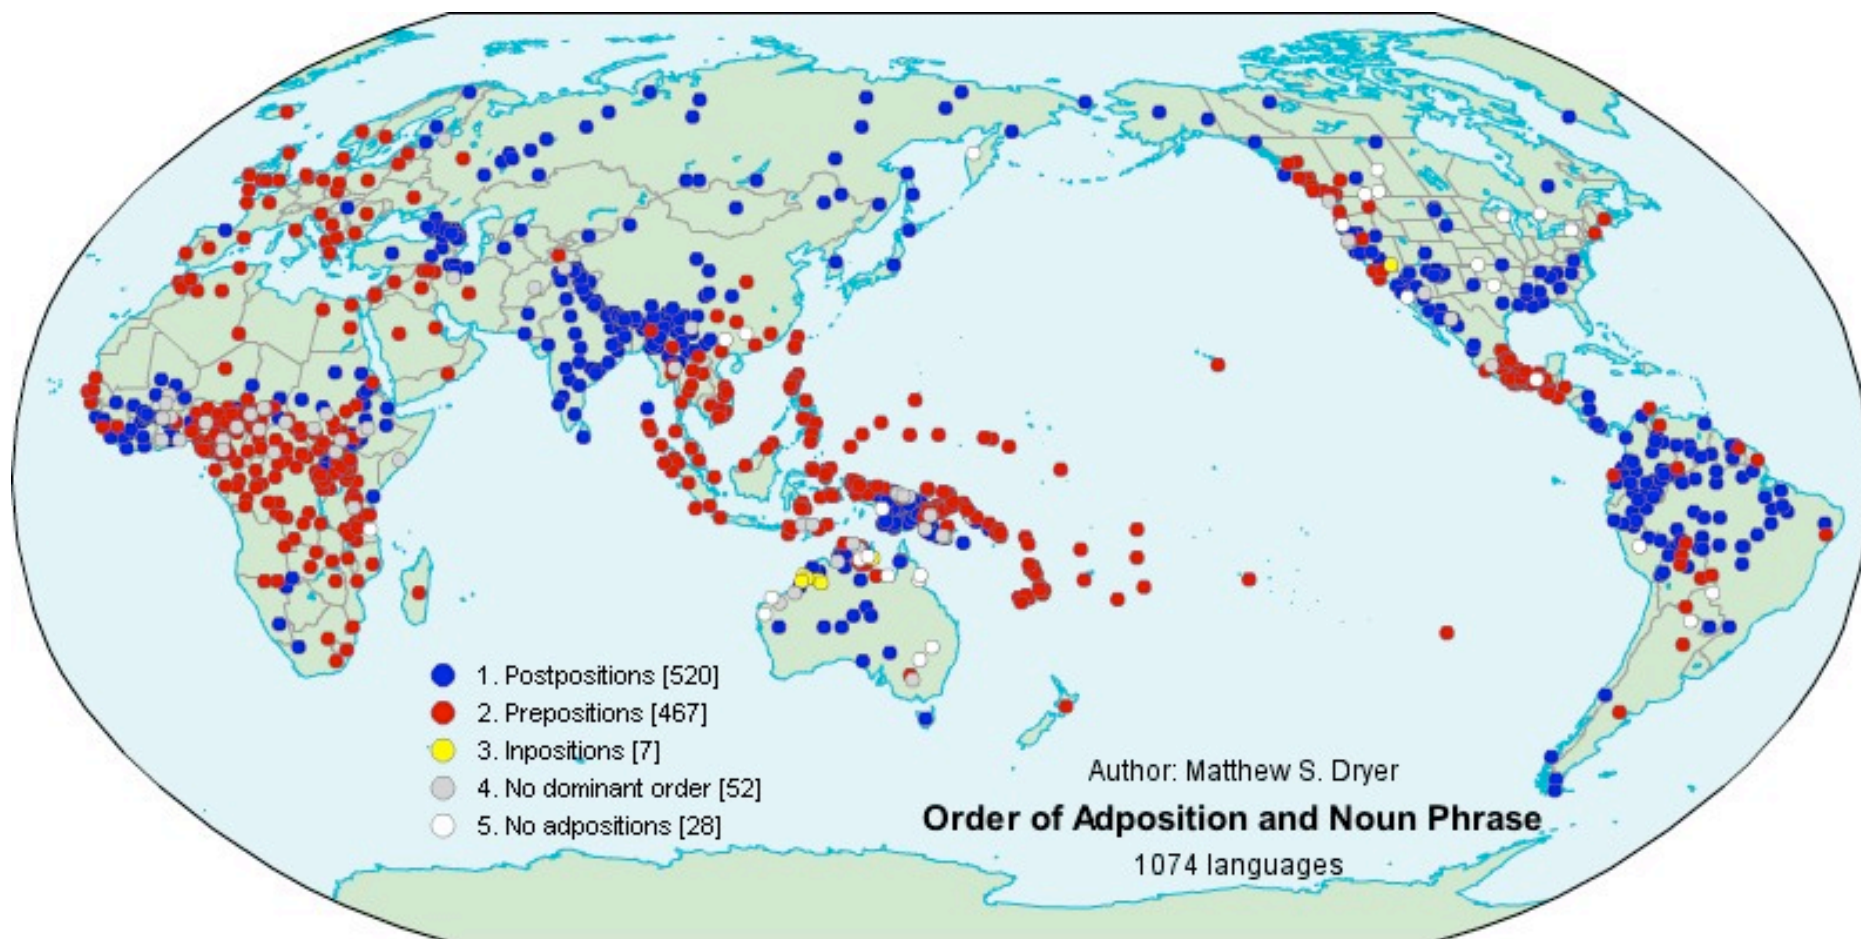

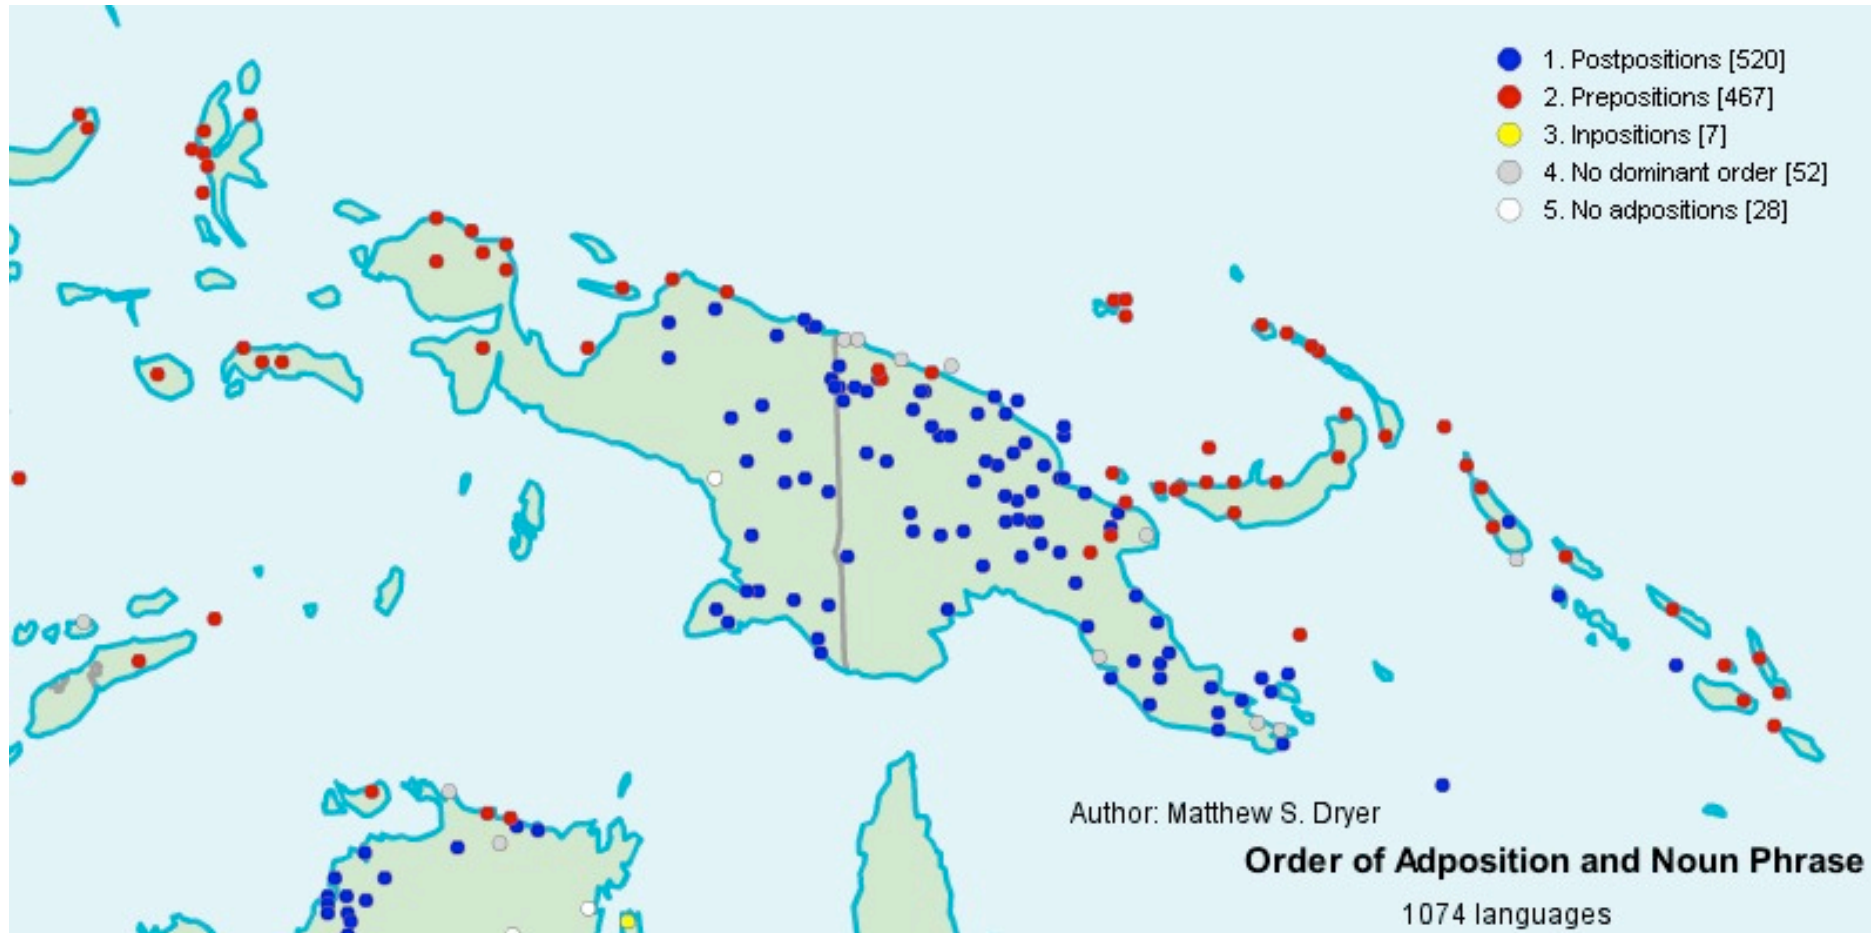

Order of Object and Verb

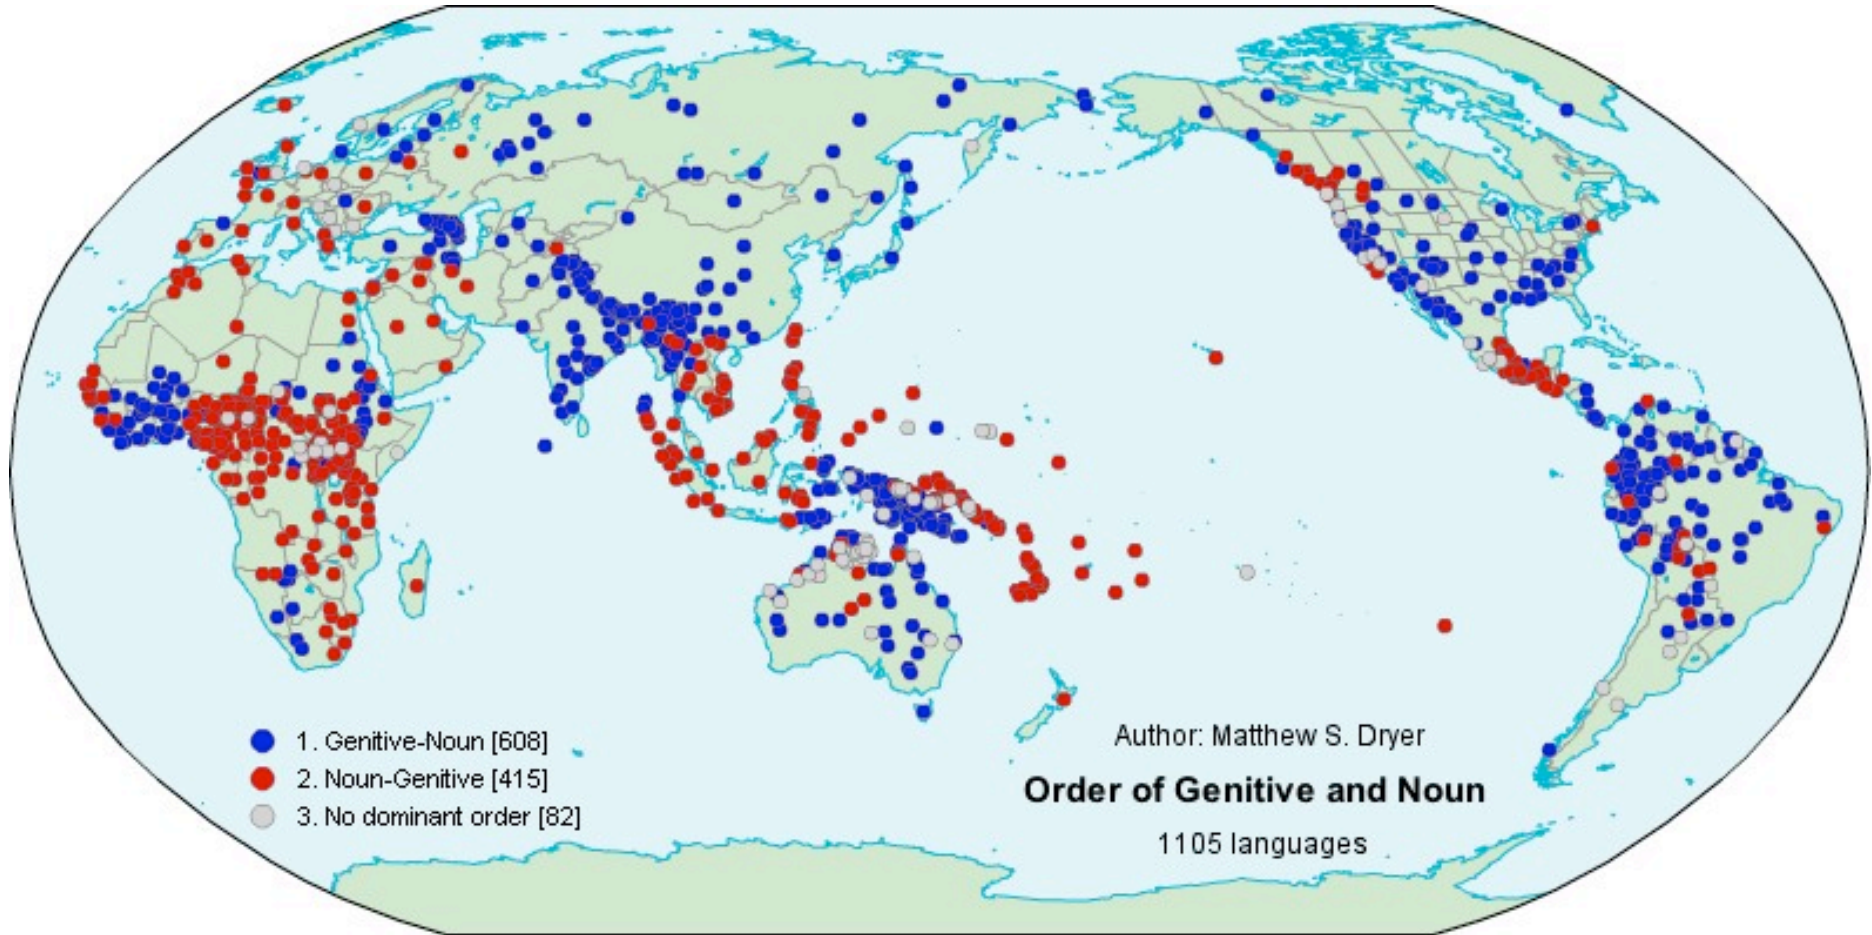

- 1. OV [640]
- 2. VO [639]
- 3. No dominant order [91]

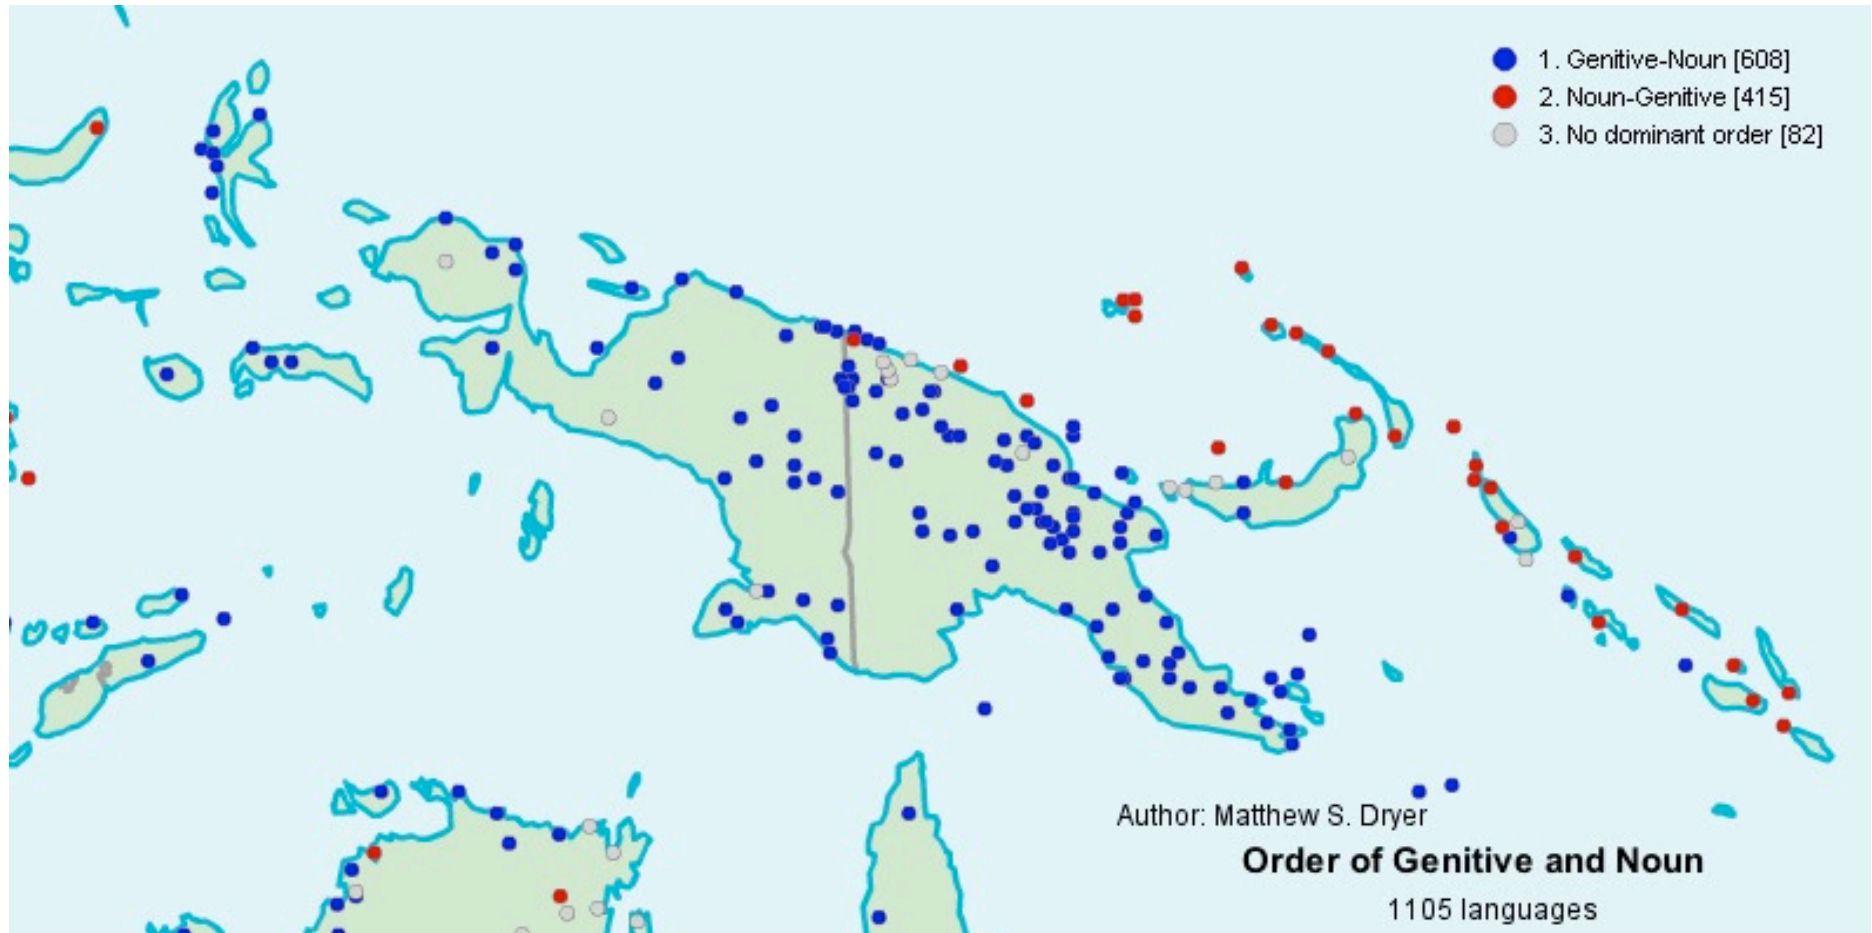

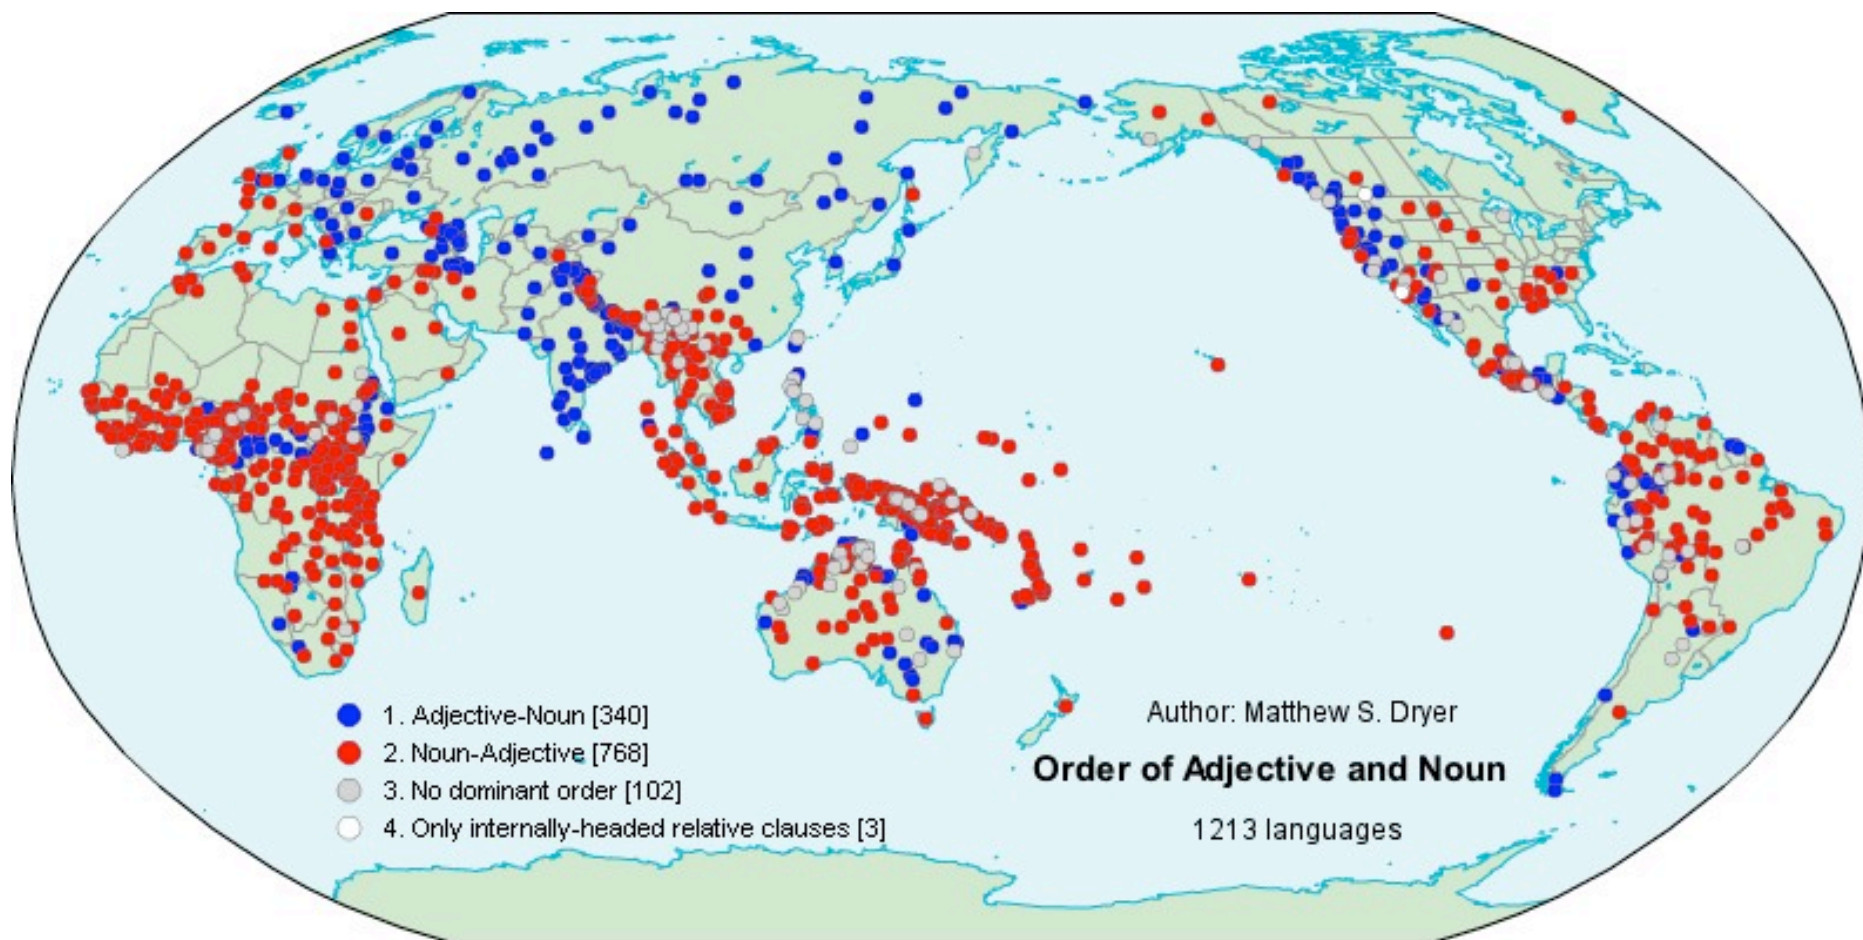

Author: Matthew S. Dryer
1370 languages

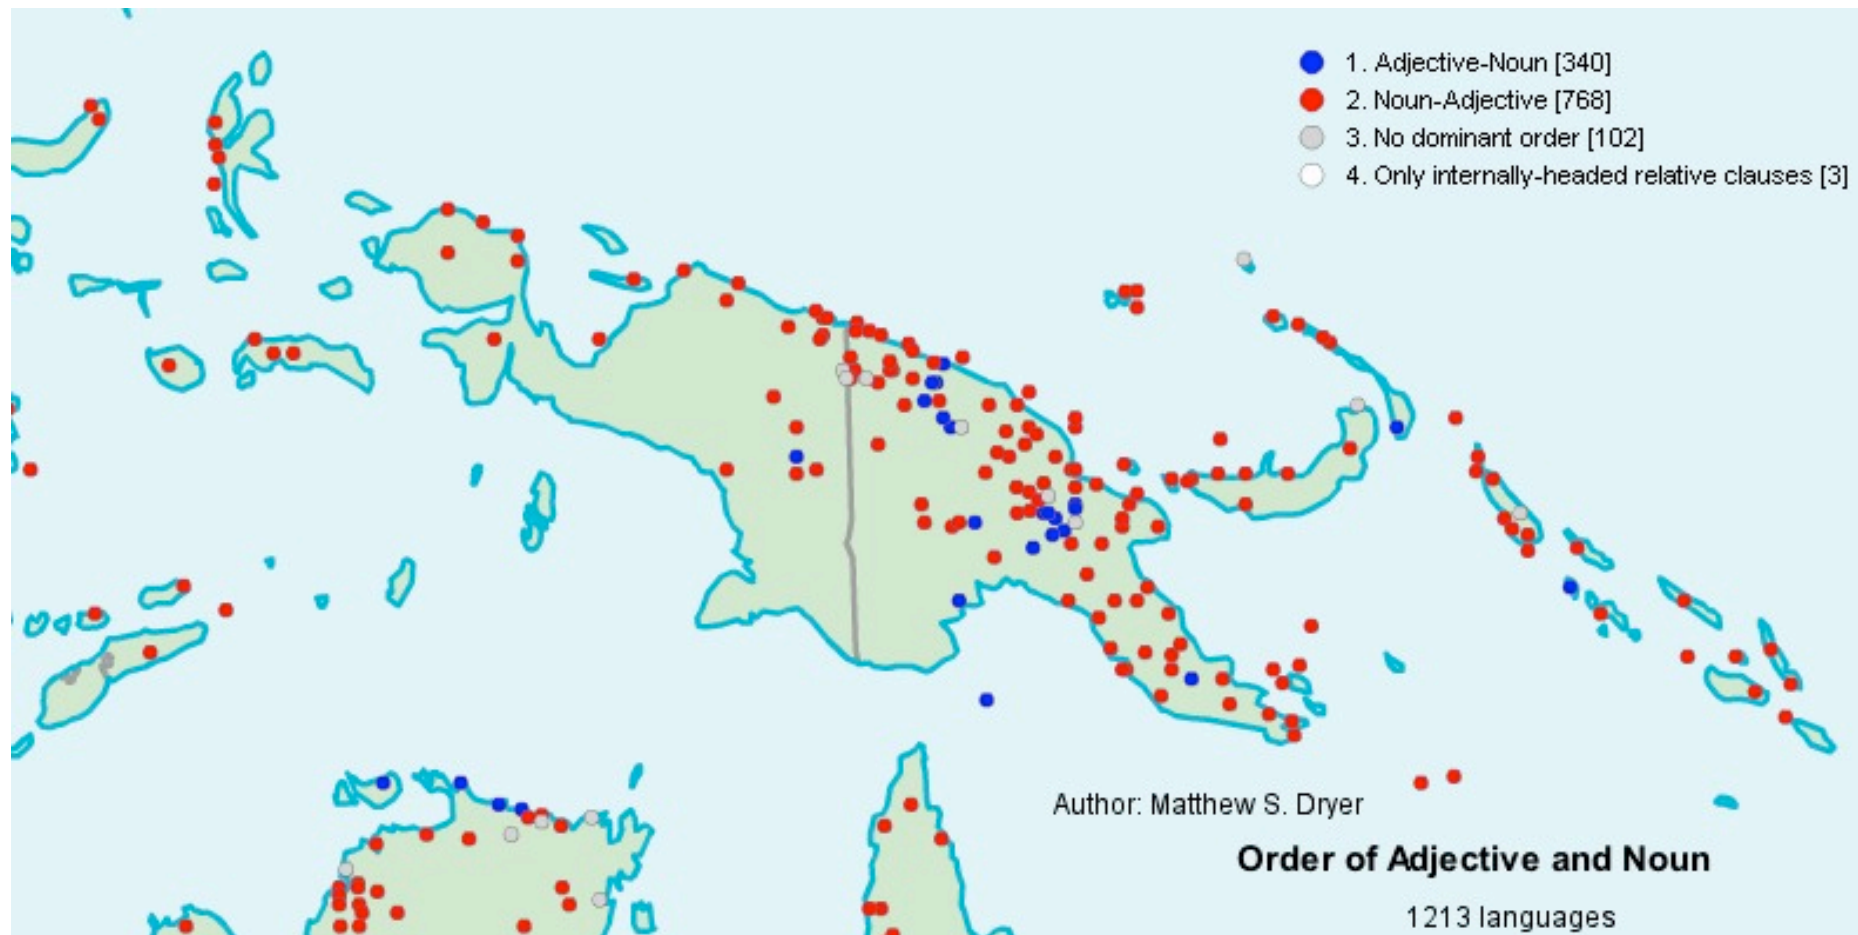

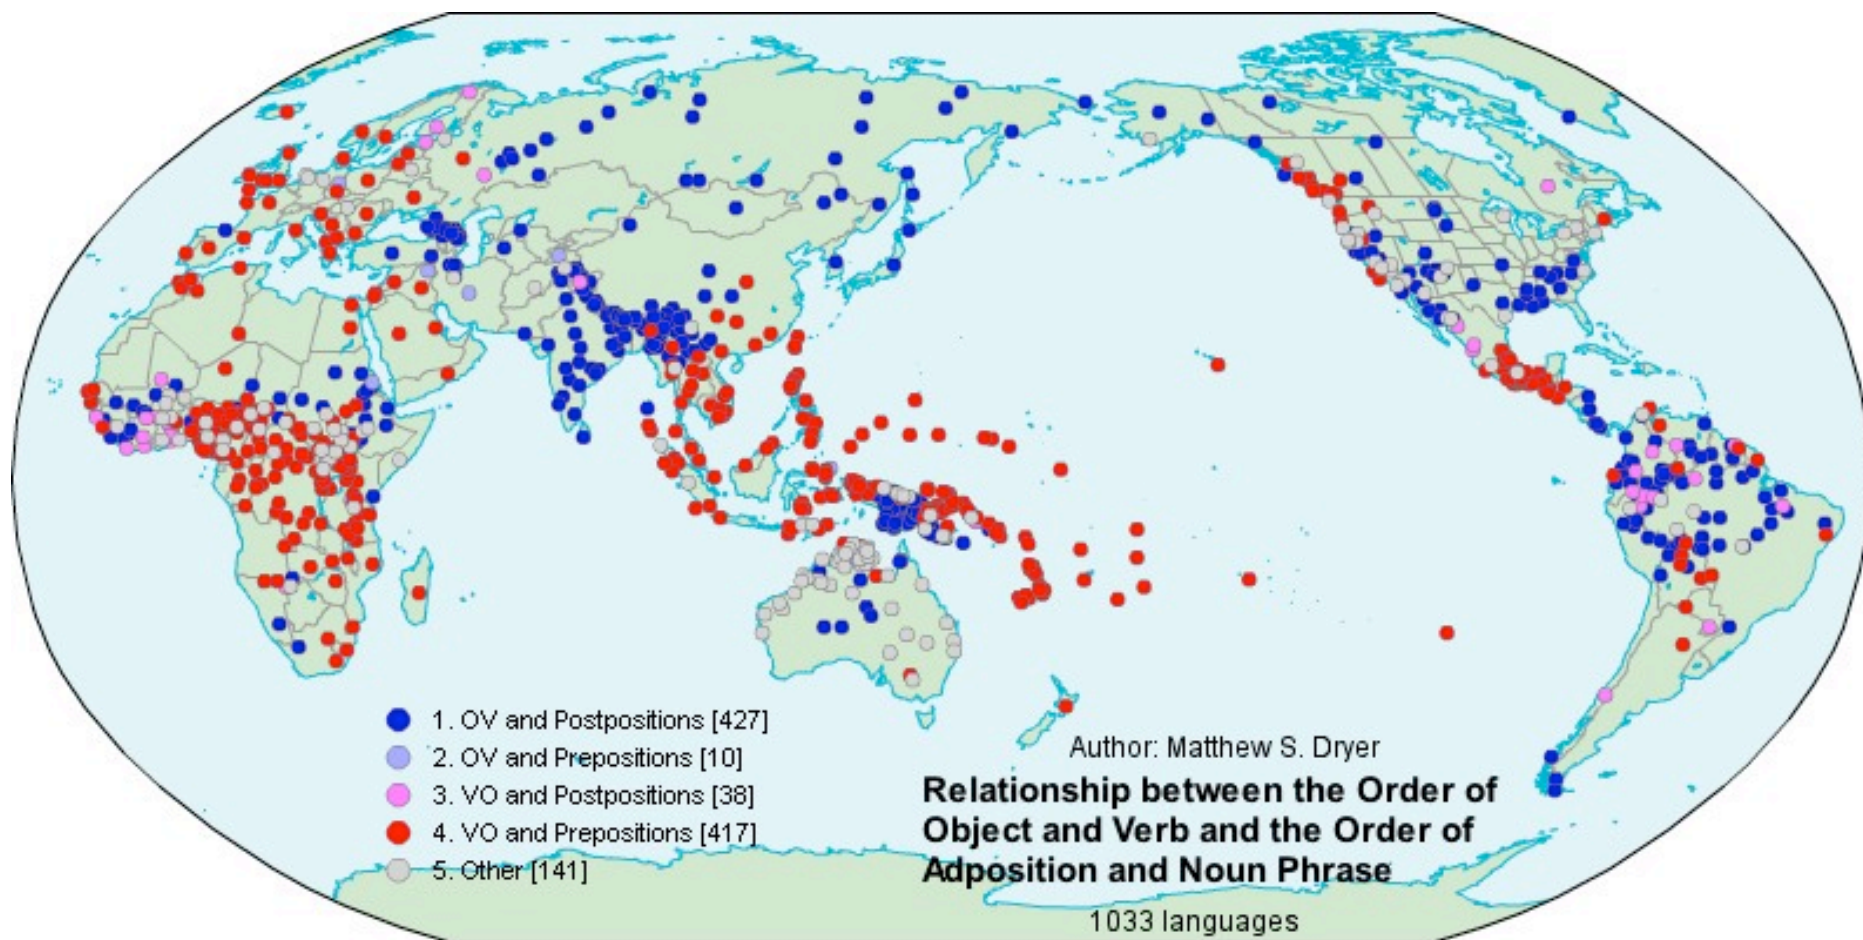

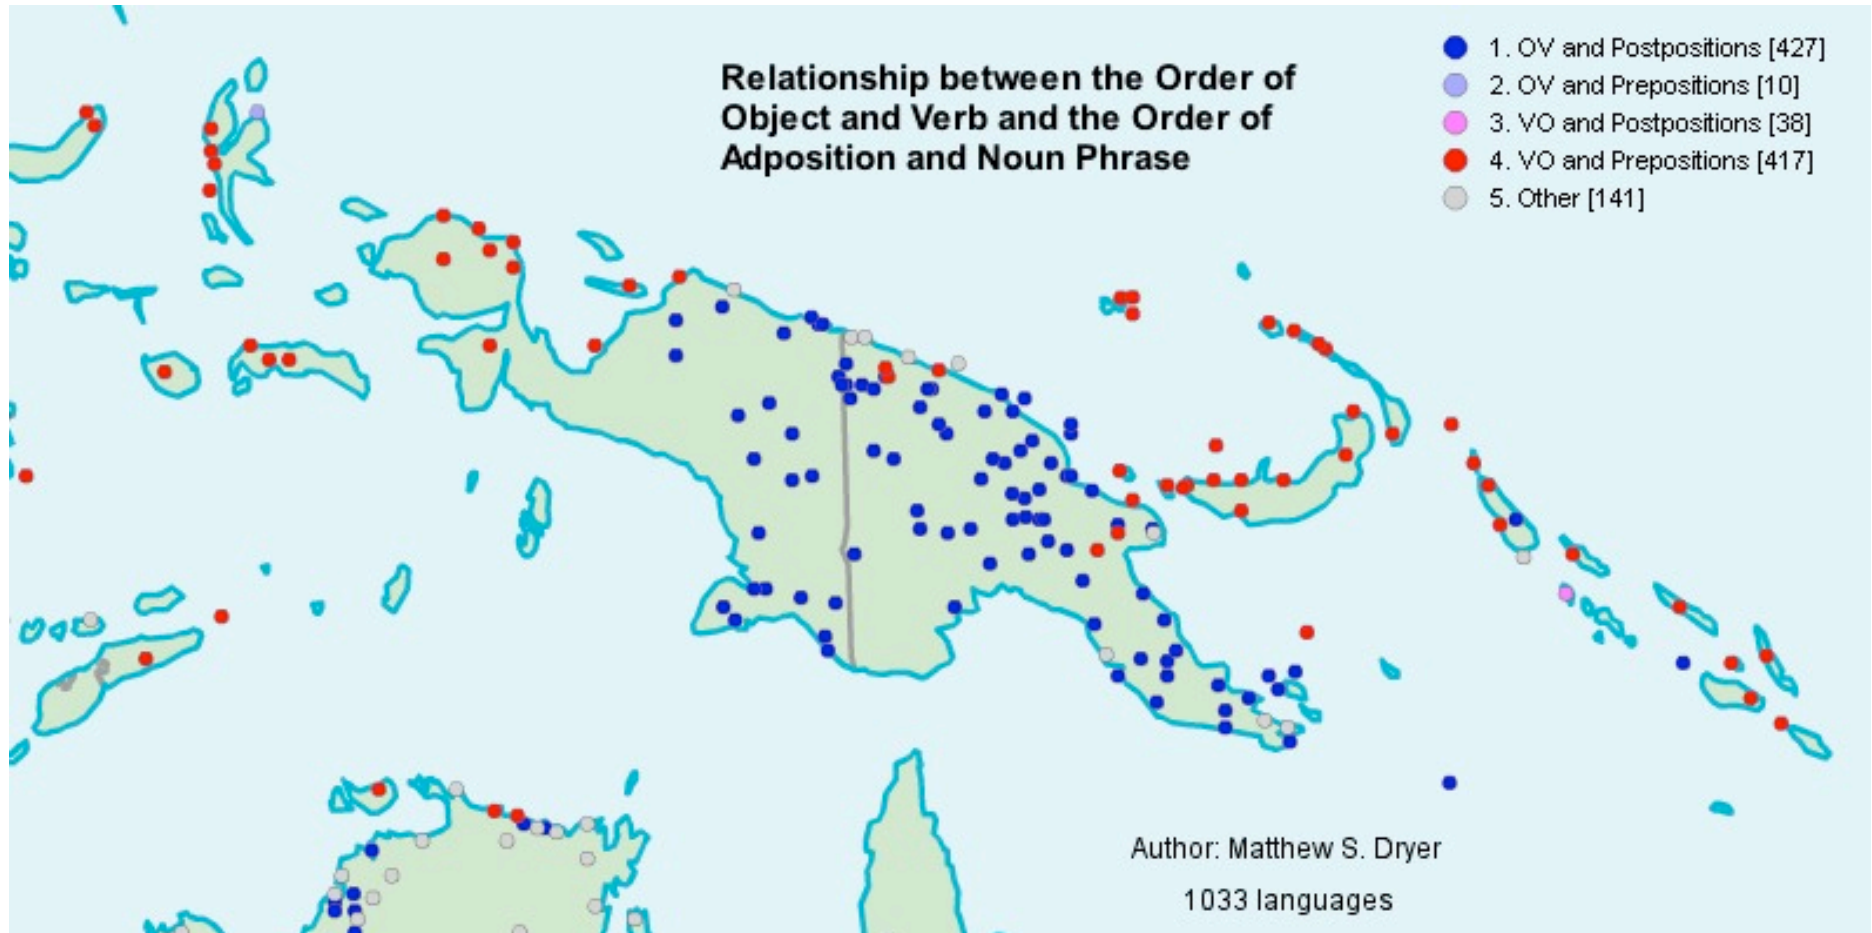

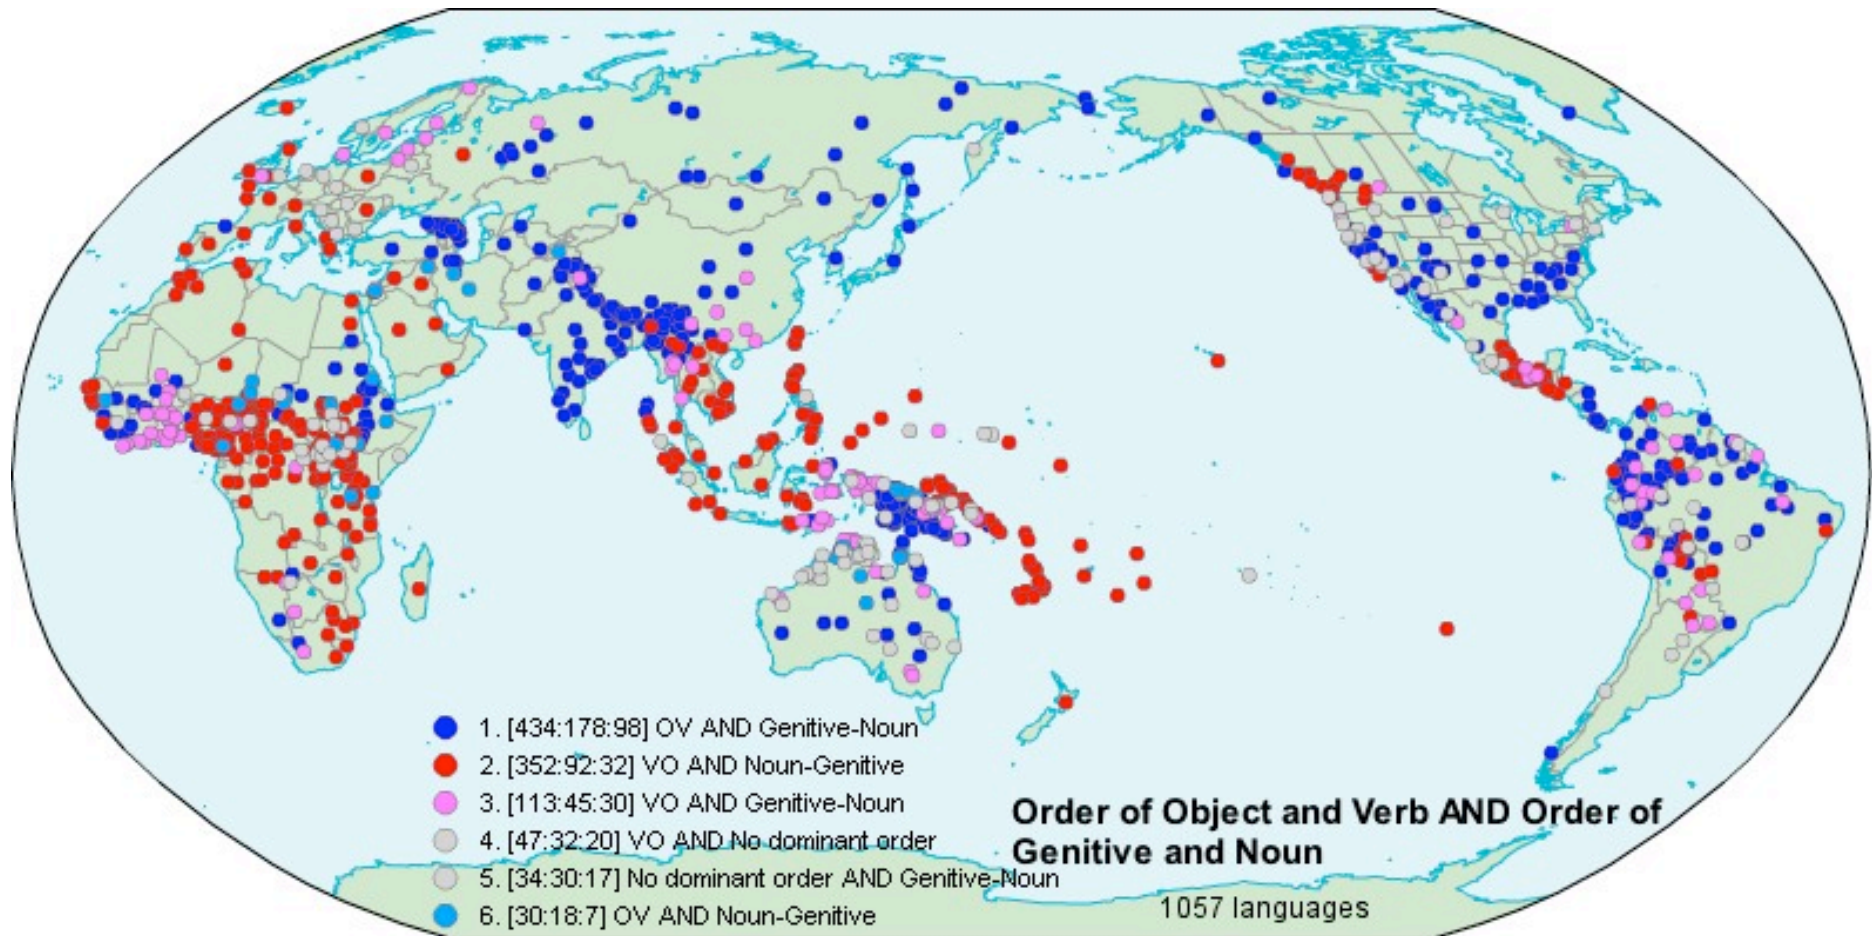

Relationship between the Order of Object and Verb and the Order of Adposition and Noun Phrase

- 1. OV and Postpositions [427]
- 2. OV and Prepositions [10]
- 3. VO and Postpositions [38]
- 4. VO and Prepositions [417]
- 5. Other [141]

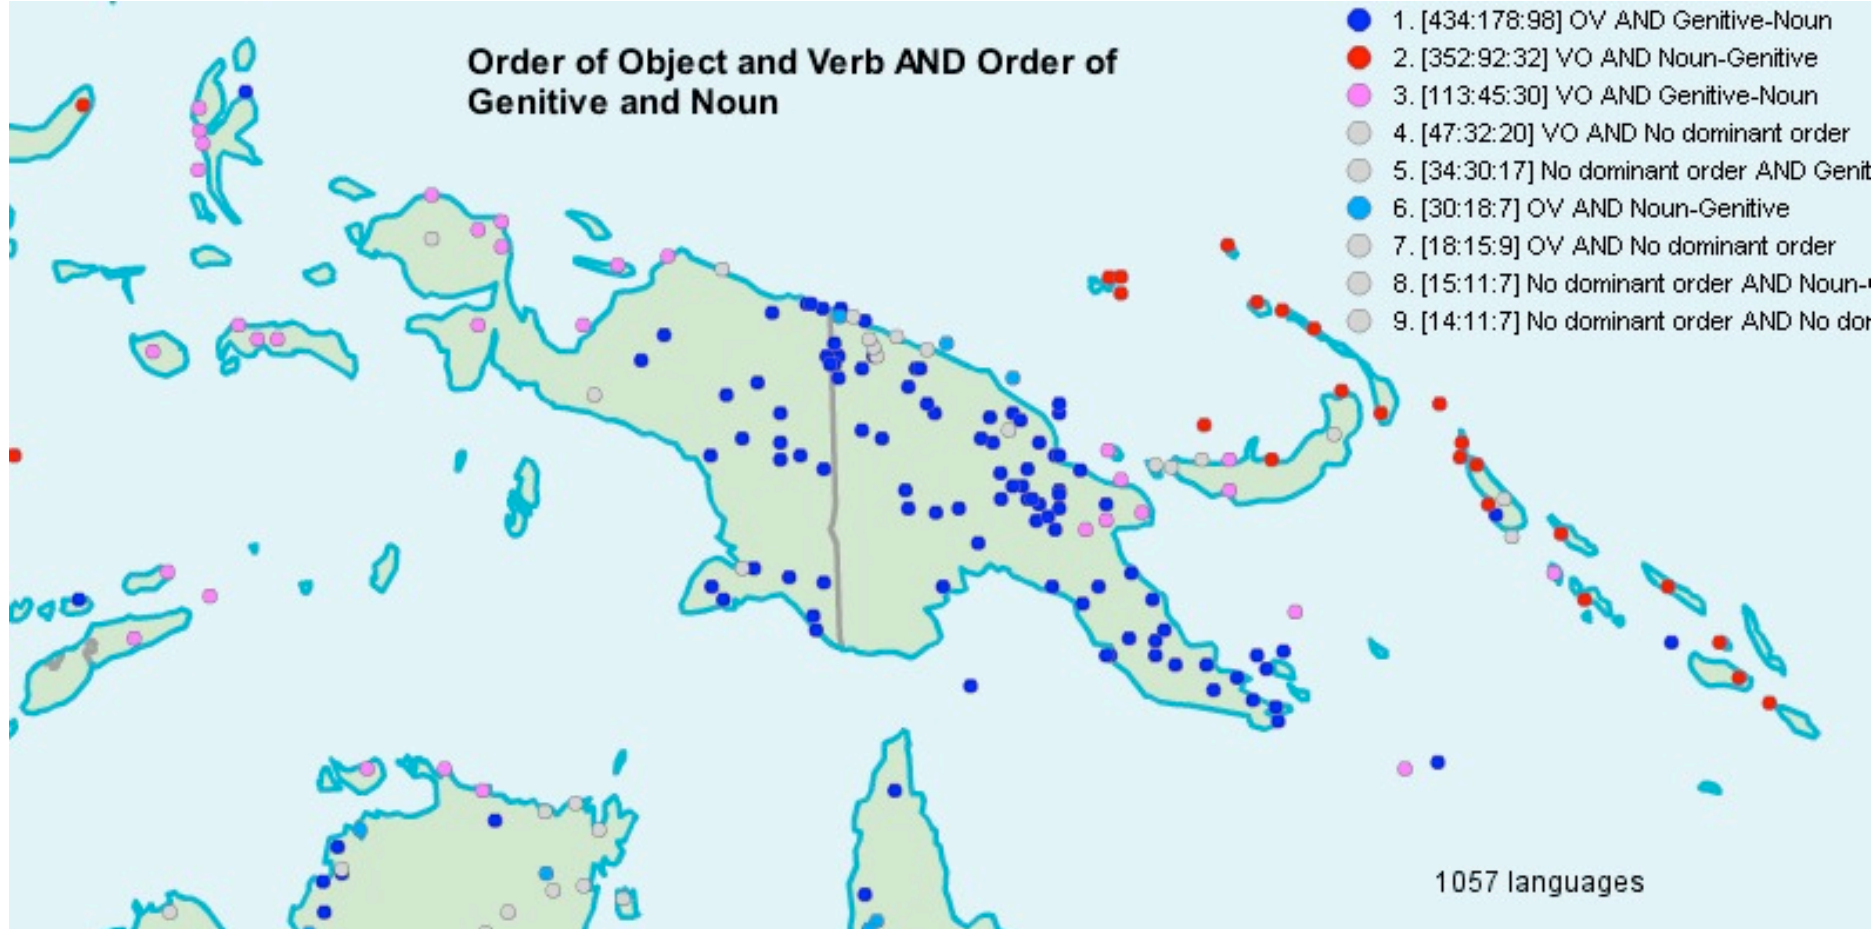

Author: Matthew S. Dryer
1033 languages

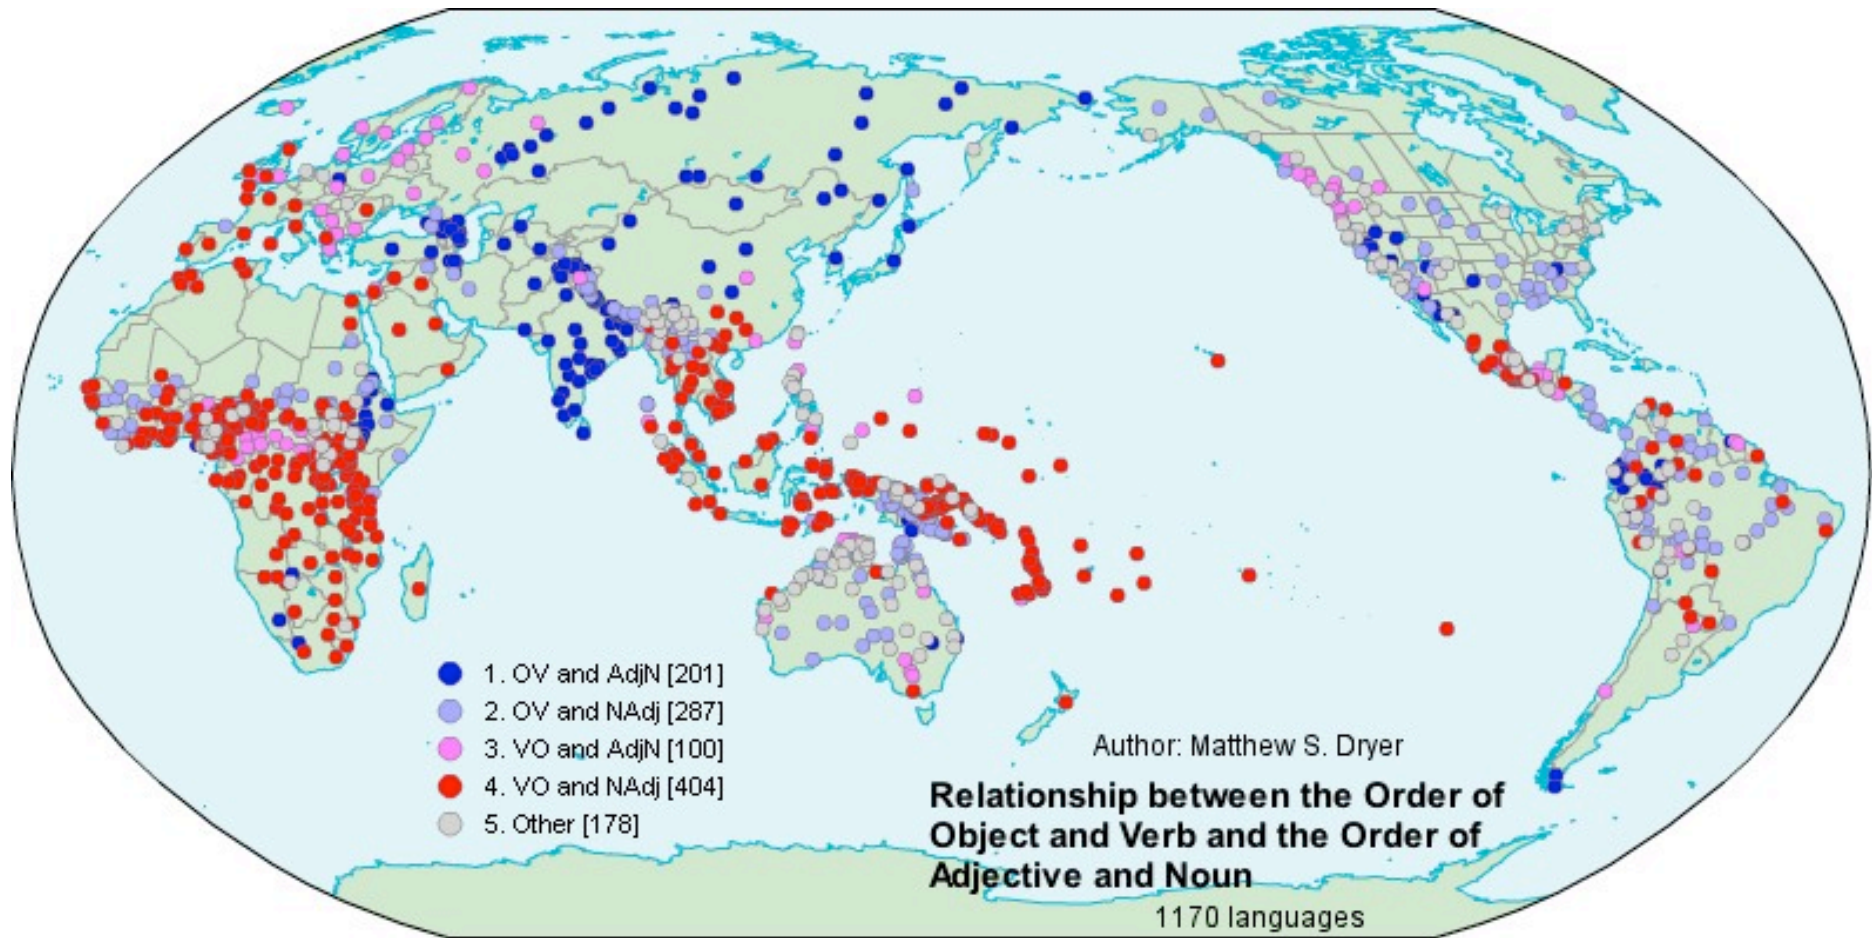

Order of Object and Verb AND Order of Genitive and Noun

- 1. [434:178:98] OV AND Genitive-Noun
- 2. [352:92:32] VO AND Noun-Genitive
- 3. [113:45:30] VO AND Genitive-Noun
- 4. [47:32:20] VO AND No dominant order
- 5. [34:30:17] No dominant order AND Genit
- 6. [30:18:7] OV AND Noun-Genitive
- 7. [18:15:9] OV AND No dominant order
- 8. [15:11:7] No dominant order AND Noun-
- 9. [14:11:7] No dominant order AND No dor

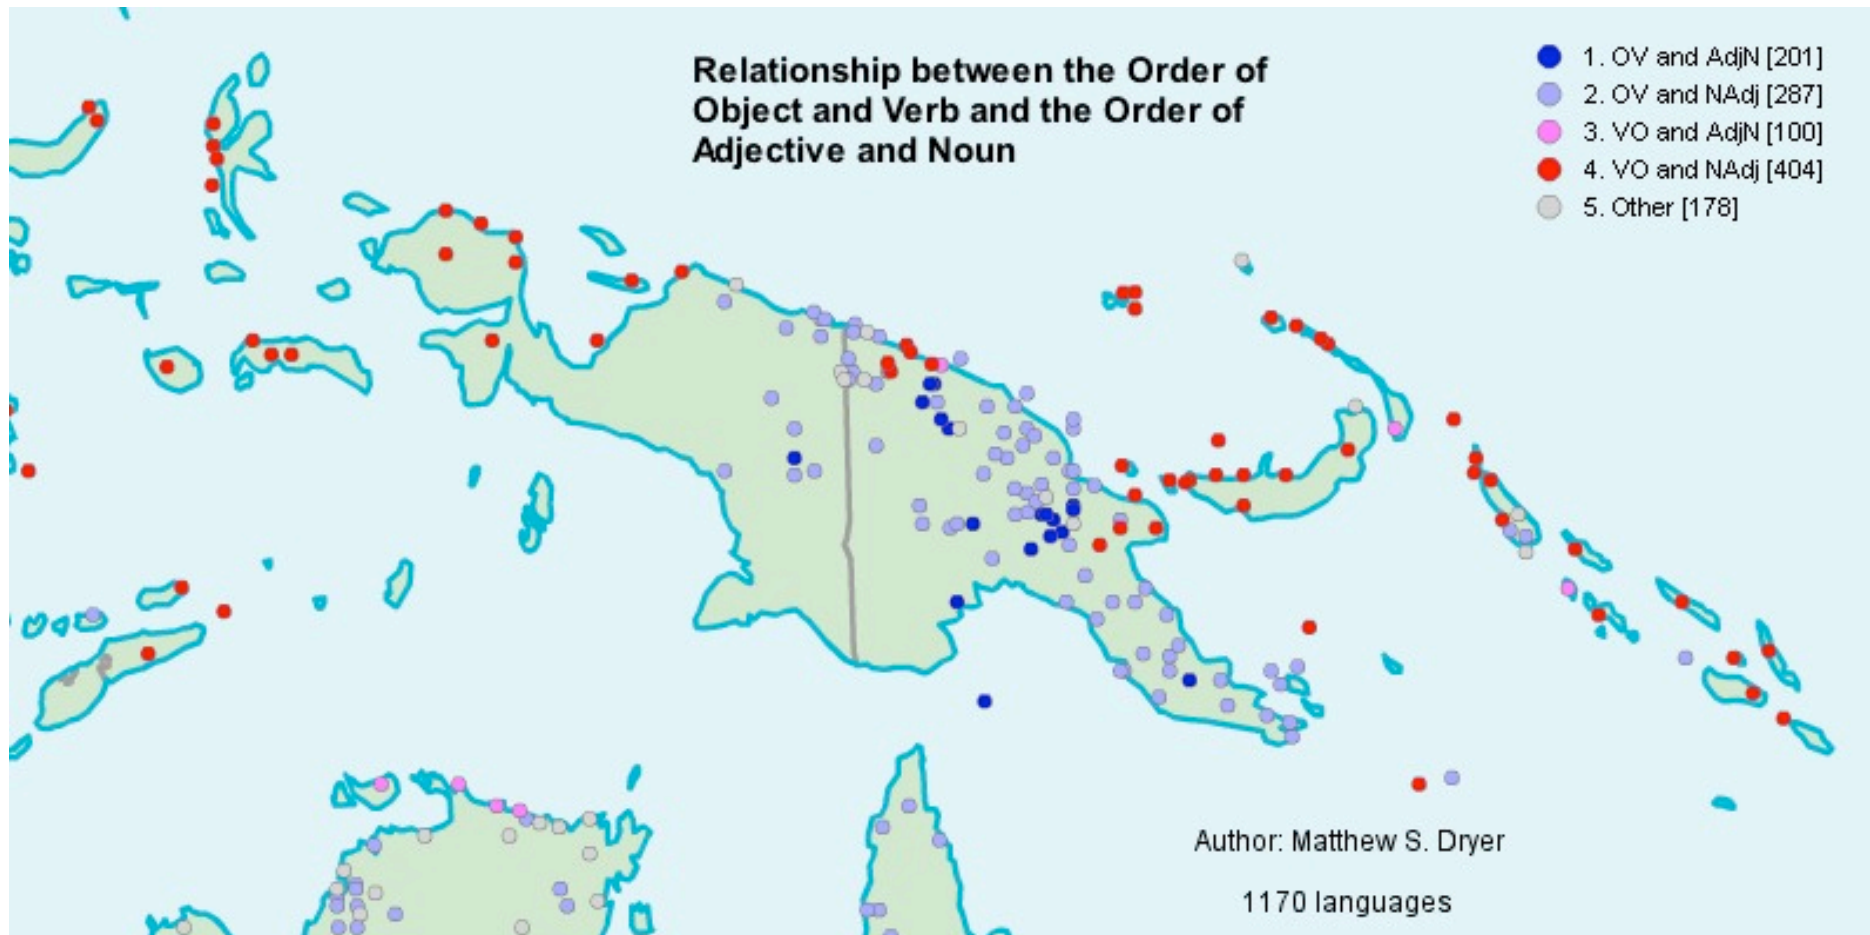

1057 languages

Relationship between the Order of Object and Verb and the Order of Adjective and Noun

- 1. OV and AdjN [201]
- 2. OV and NAdj [287]
- 3. VO and AdjN [100]
- 4. VO and NAdj [404]
- 5. Other [178]

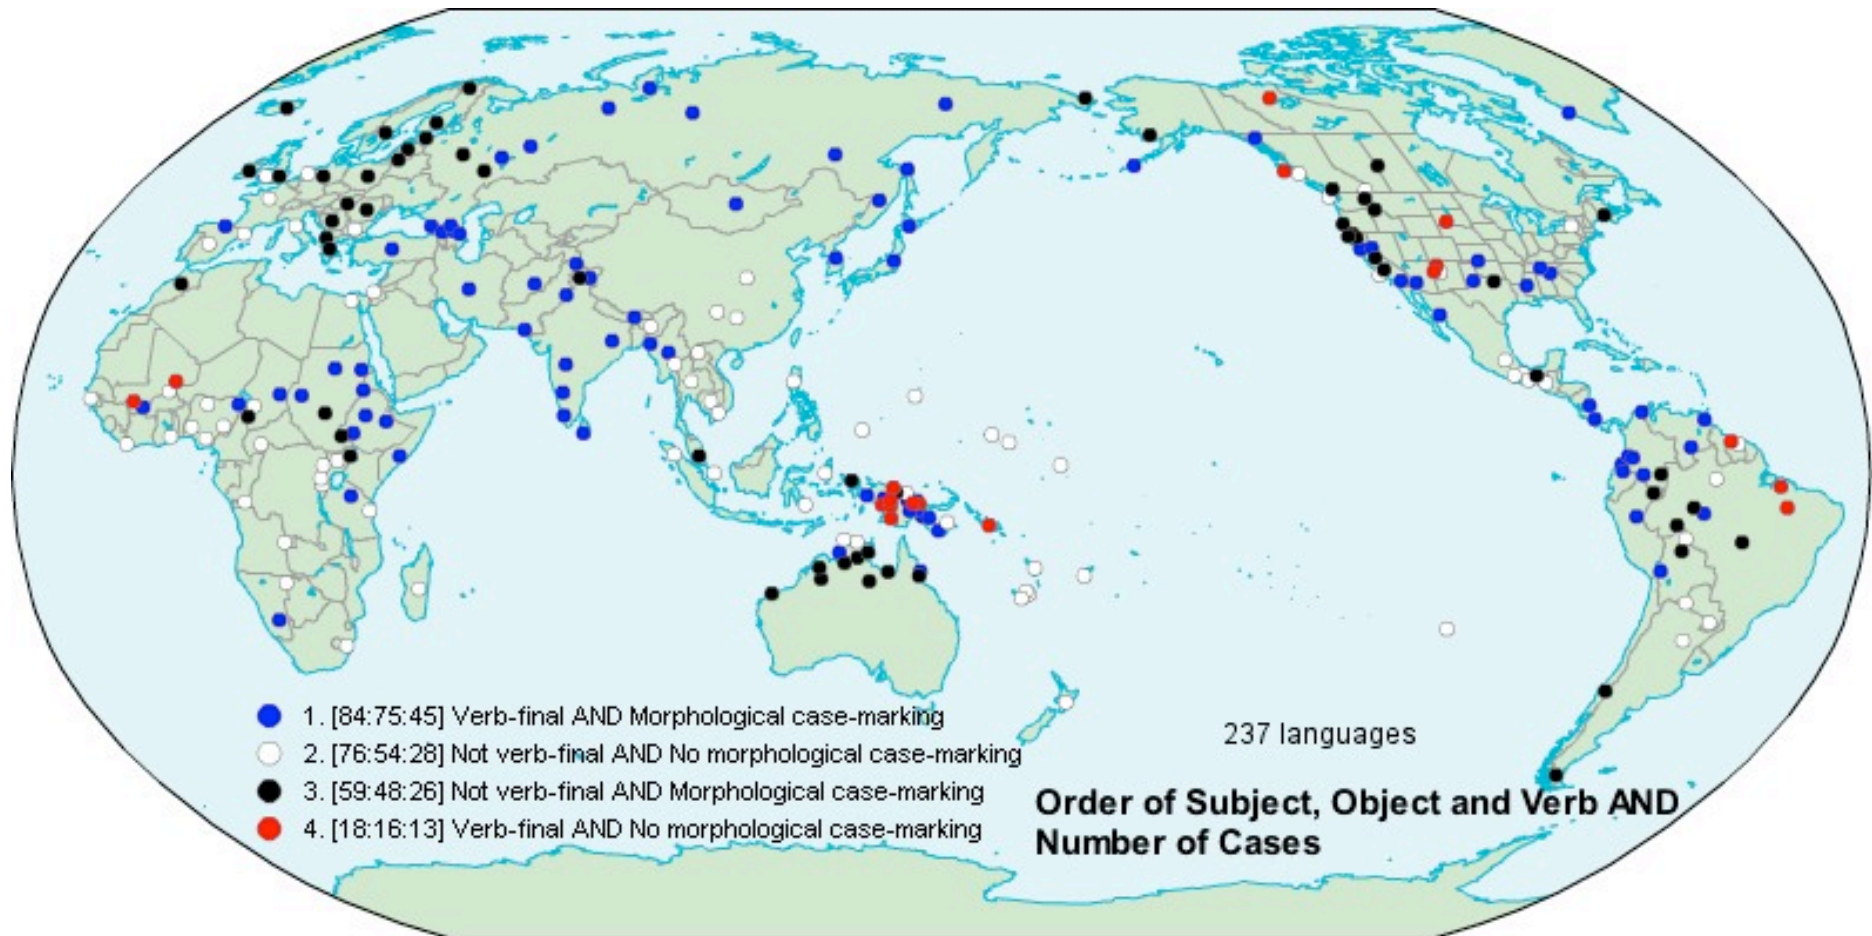

SOV and Case system

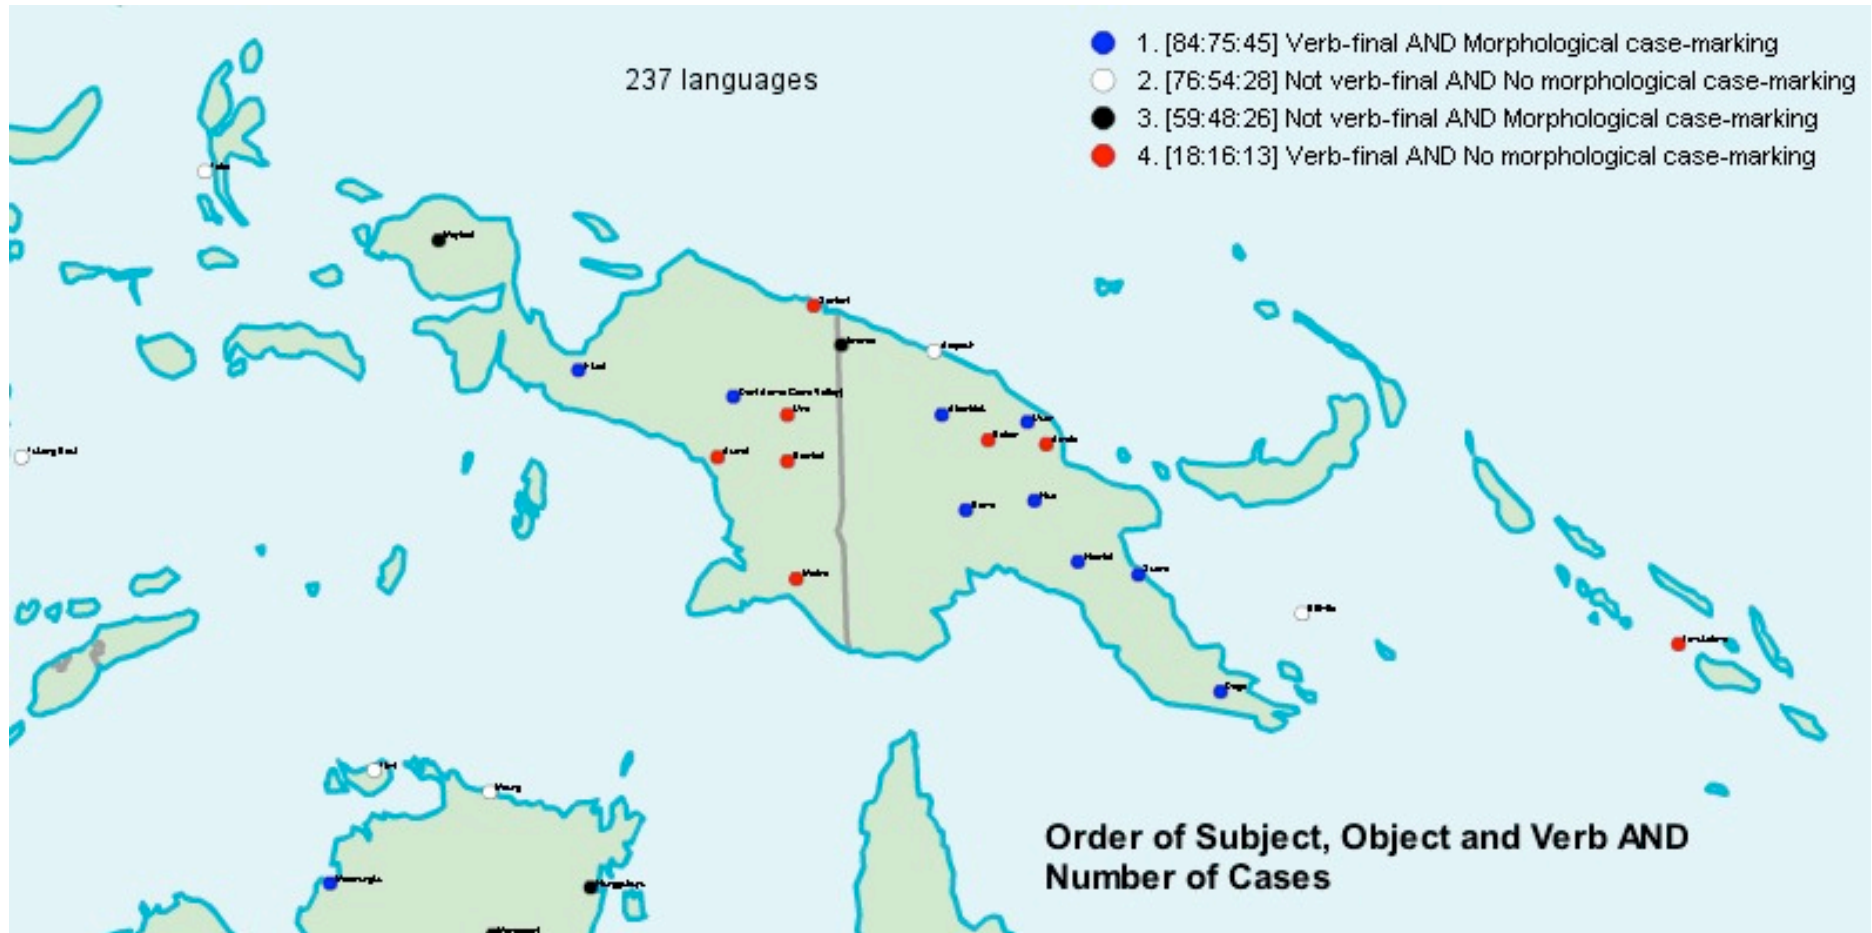

Greenberg, Joseph H. 1966 [1963]. Some universals of grammar with particular reference to the order of meaningful elements, in J.H. Greenberg (ed.), *Universals of language*, 2 ed. Cambridge MA: MIT Press, 73–113.

41. If in a language the verb follows both the nominal subject and nominal object as the dominant order, the language almost always has a case system.

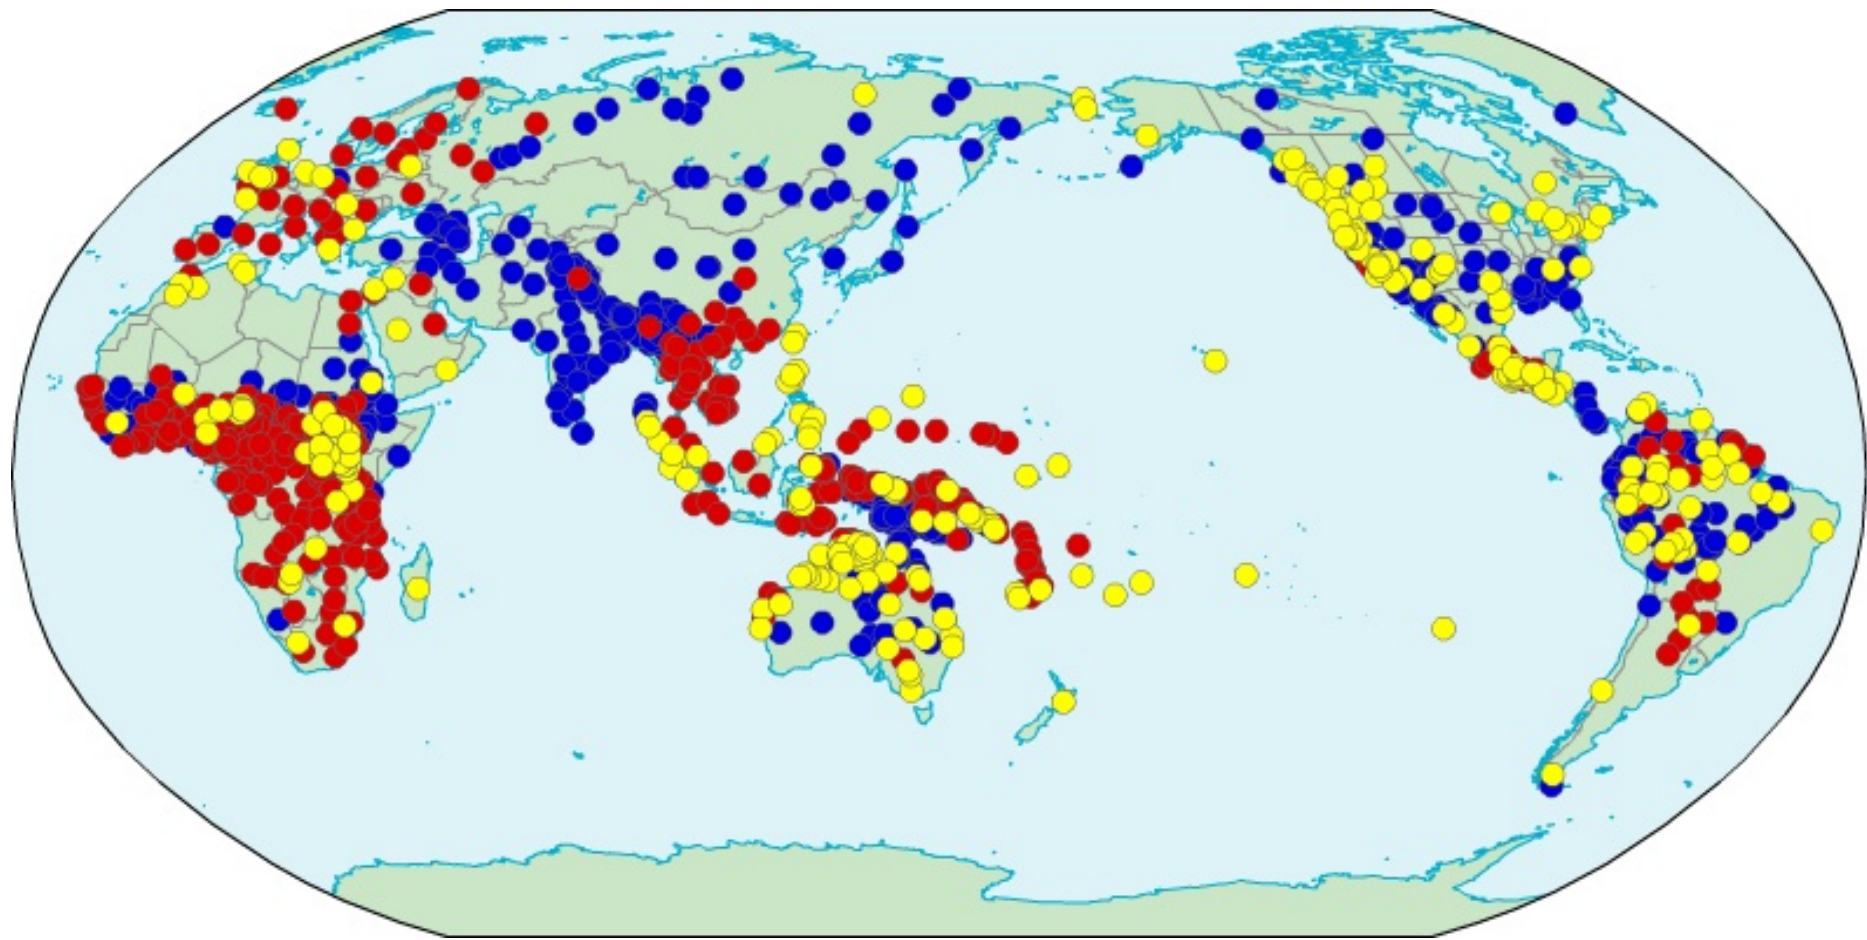

nöbö dib hön pai-ön-a.
man big pig hit-FUT(3SG)-DECL
'the big man will kill the pig.'

Haruai

	Worldwide sample	New Guinea area sample
Number of languages	237	22
Verb-final without case	18	8
Percentage	7.6%	36.4%
