

CONNI CHAIR PAD

- The Conni Chair Pads are an absorbent and waterproof pad designed to assist in the management of incontinence when out and about or on seated furniture.
- The chair pads also include small rubberised dots in order to prevent the pad from moving. Use in places such as the seats in your vehicle, wheelchair or scooter, recliners or lounge chairs.
- The stay-dry top layer and slim absorbent core ensure comfort while the waterproof-breathable backing protects all seats, keeping them hygienic and stain free.
- Not only can you use your Conni Chair Pad for seated areas, but they can also be used for nappy changing, tummy time for babies, sitting during toddler playtime, in the boot of the car or after a water activity.
