## HOW TO SELECT A LOCK CORE?

Example of calculating the lock core size for the flush and stile doors (40mm) with the face plate thickness of  $G = 7\text{ mm}$

$A/B = (C+G+3) / (D+G+3)$   
 $A/B = (15+7+3) / (25+7+3)$   
 $A/B = 25/35$

LOCK CORE
SIZE
26/36
30/30

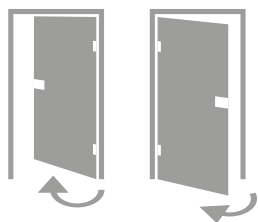

DOOR TYPE	DOOR LEAF THICKNESS	PROPORTION OF LOCK SETTING IN DOOR (C/D)	RECOMMENDED LOCK CORE SIZE (A/B)*
Flush, stile (rebated)	40 mm	15/25	26/36
Flush, stile (non-rebated)	40 mm	20/20	30/30
HERSE	46 mm	15/31	30/45

## HOW TO CALCULATE DOOR PRICE?

## AVAILABLE SOLUTIONS

# DOOR FACE FINISH TYPES

## FINISH

The Finish laminate is pre-impregnated, which means printing and then coating with paint with required properties. Using the performance finishing coats adds to the surface's basic resistance.

## GREKO

The Greko laminate is also pre-impregnated, which means printing and then coating with paint with required properties. Using the performance finishing coats adds to the surface's resistance and flexibility of the product. The paint's silicon content ensures the film resistance is enhanced.

The Greko laminate is manufactured on a high density Japanese base layer which is not resin coated. This makes the film ecological, healthy and safe for people and environment both in the production process and during use, as well as for disposal. No formaldehyde or other harmful ingredients is used.

Its distinctive patterns are what distinguishes the Greko film. The laminates bear striking resemblance to wood, as the high quality surface comes with a 3D natural wood effect. Woodgrain decors look just like wood

## PREMIUM

The Premium laminate is a product based on Polypropylene (PP), a material of very high resistance to abrasion and scratching, plus top quality appearance. It adds a refined looks and individual character to the doors, as it imitates natural wood perfectly.

Not only does the Premium laminate attracts with its appearance but with its functionality, as it resists scratching better than average products and is fire-retardant and abrasion resistant.

These properties ensure the extended longevity and maintenance-free use of the PREMIUM range products even in most adverse conditions.

## EDGE FINISH TYPES

### EDGE SOFT

The SOFT door leaf comes with a chamfered edges, which lends an aesthetic and modern look to it. The leaf is finished with a laminate of an improved resistance to scratching, which dramatically enhances its resistance during use. Okleina w skrzydłach SOFT łączona jest w dwóch miejscach pokazanych na szkicu (nie dotyczy dekoru ŚNIEŻNOBIAŁEGO GREKO w którym okleina łączona jest wewnątrz felca).

### EDGE STANDARD

It involves covering the flat plane with the 0.15 mm ST CPL laminate, CPL 0.2, CPL 0.7 laminates, polypropylene PREMIUM laminate, GREKO laminate or FINISH film. The door leaf made in STANDARD technology has unchamfered edges, which is where the face panel is joined with edging laminate, as shown in the diagram. The laminate in the CPL 0.2 and CPL 0.7 laminates is made of very durable PVC, the so-called ABS. The joining method of the laminate is also identical for the non-rebated doors and non-rebated sliding systems.

## ST CPL, CPL 0,2 I CPL 0,7

The CPL laminate is composed of a decorative layer impregnated in resins, and a base layer ensuring flexibility. Following the lamination process, the top resin layer is hardened for high resistance to scratching and abrasion. It is characterised by high resistance to impact, abrasion, scratching, heat and UV radiation. Thanks to using this type of material, the door can be installed in so-called "difficult" interiors [exposed to heat, moisture or extraordinary use].

Approx. laminate thickness: ST CPL - 0,15 mm, CPL 0,2 - 0,2 mm and CPL 0 CPL 0,7 - 0,7 mm. The CPL 0.7 laminate is used to cover only one leaf plane thanks to its unique hardness. The CPL 0,2 and CPL 0,7 laminated door leaves come with the leaf edge made of the so-called ABS, a highly durable PVC.

## UV VARNISH

The door surface has several coats of the WHITE TITANIUM UV modern UV hardened varnish.

The flat surfaces are covered with a specialist base membrane in the first phase, and then coated twice with a top quality paint and hardened with UV.

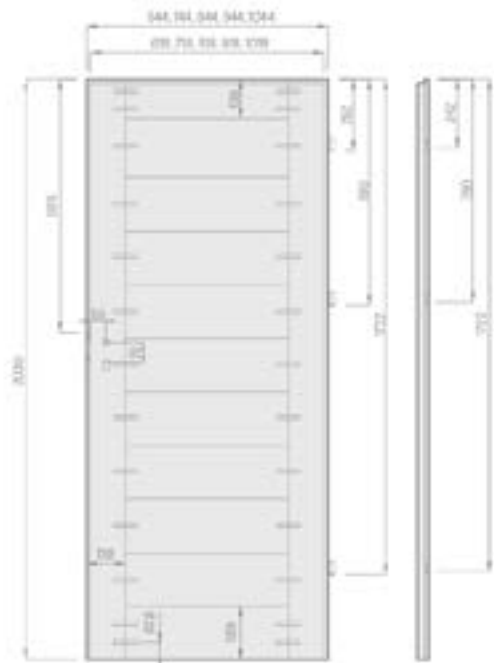

The moulded surfaces cannot be covered with the membrane for technological reasons, so they are coated with three paint layers and hardened with UV.

The fully automatic coating process follows scanning to ensure ideal quality of the surface. Hardening the paint with the cutting-edge method involving UV light source ensures very high mechanical resistance.

## VENTILATION

Ventilation door cut not available in non-rebated door leaves for wall-mounted and pocket sliding doors.

Square and round metal sleeves

## CUTTING THE DOOR LEAVES

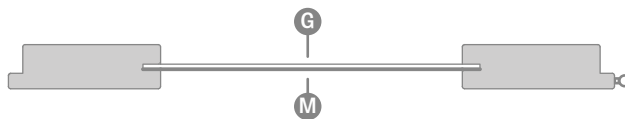

Cutting the door leaves to size by customer acc. to Polish standard, up to 50 mm, or up to 80 mm for the HERSE SET door leaves (unless pre-cut), as well as in the panel door leaves, is possible if an additional lower strip has been fixed by the manufacturer.

NOTE: cutting the door leaves to size by customer is not allowed for the FRAGI doors, double-leaf and fire doors, non-rebated leaves for sliding systems, glass GRAF doors, FORTECA RC2 and FORTECA RC3 burglar-proof doors, and stile doors acc. to the CZ standard.

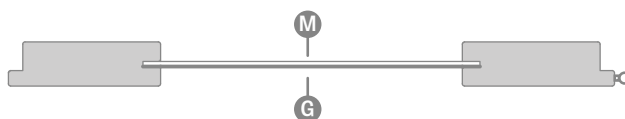

The door leaf height made acc. to the so-called CZ standard is lower than the PL standard by 47 mm.

## HARDWARE

### Deadbolt locks

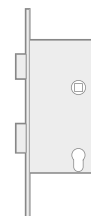

KEY LOCK

TOILET LOCK

CYLINDER LOCK

ECONOMY LOCK

### LOCK PZ CENTRES:

1. For rebated door leaves, the PZ centre of the key operated deadbolt lock, toilet lock and core lock is 72 mm.
2. For non-rebated and reverse door leaves, the PZ centre of the magnetic lock is:

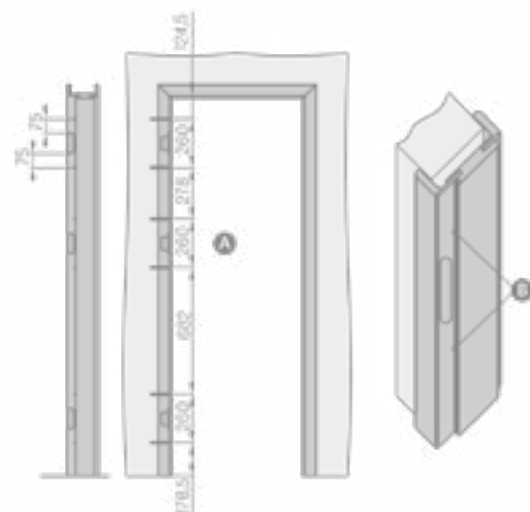

- key and toilet with 90 mm spacing
- lock core spacing 85 mm

The toilet locks have a square-shaped bolt hole:

- PL standard: 4 mm
- CZ standard: 6 mm

## INSTALLATION OF FRAME FOR NON-REBATED DOOR FRAMES

Available with FIXED and ADJUSTABLE DOOR FRAMES for REBEAT door, but unavailable with DOOR FRAMES for GRAF Glass panes and double-leaf doors.

**A** Drill holes for metal screws of min length 80 mm x Ø6 mm.

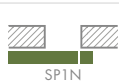

**B** Apart from installation foam, mounting anchors are required when installing the door frame. Drill the holes for screws under the gasket so that it hides them.

# SLIDING SYSTEMS

WALL-MOUNTED

## WALL-MOUNTED SLIDING DOOR SYSTEM

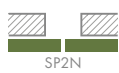

**SINGLE SP1Nz ( with bolt keeper )**

**SINGLE SP1Nb ( w/o bolt keeper )**

**DOUBLE SP2N**

Price includes: Aluminium track with a cover profile and door stop in the colour of the door leaf and length:

- 210 cm for "100" leaves
- 200 cm for "90" leaves
- 180 cm for "80" leaves
- 150 cm for "70" "60" leaves

Available wall-mounted sliding system sets:

- Track with a cover profile and door stop with gasket (only SP1Nz & SP1Nb)
- Track with a cover profile and tunnel door frame (only for SP2N)
- Track with a cover profile and door stop + tunnel door frame (only SP1Nz & SP1Nb)
- Track with a cover profile and door stop with gasket + tunnel door frame (only SP1Nz & SP1Nb)

## HOOK BOLT KEY LOCKS

Glossy chrome, brushed chrome, glossy brass, black matt

Key only in silver. The hook bolt key lock comes with two pull handles to choose

## EXTRA CHARGES

- tunnel type adjustable door frame for the price of the adjustable door frame
- hook bolt lock with hardware only for the single system
- oval, rectangular or round pull handle; glossy chrome, brushed chrome, glossy brass, black matt; two pcs. of pull handles per set
- synchronisation – simultaneous opening and closing of the door leaves using only one leaf; only for SP2N
- soft closing damper automatic leaf damping during the final closing phase only for SP1Nz and SP1Nb

## ROUND, OVAL AND RECTANGULAR PULL HANDLES

Glossy chrome, brushed chrome, glossy brass, black matt

# DOUBLE-LEAF DOORS

REBATED AND NON-REBATED

## DOUBLE-LEAF DOORS

- The double-leaf doors are supplied with a solid core filling for extra charge.
- The double-leaf doors are made according to available models of the flush single leaf doors, STILE doors with respective features: colour, finish (STANDARD, SOFT), glazing etc.
- Double-leaf doors available in CPL 0.2 & CPL 0.7
- Passive doors use pull latches.
- Under "60" width passive door available in the full plain version only – side panel (see drawing below).
- Side panels are made in the STANDARD edge flush technology. Available with the "honeycomb" filling as standard or solid core for extra charge. Grain direction of the side panels is vertical.
- Both active and inactive door leaves come with lippings.
- The double-leaf doors in non-rebated technology is available with a magnetic lock only.
- Double non-rebated leaf doors come with an adjustable door frame only.
- Electric door strike is not available for the double-leaf doors.

# COVERT CONCEALED DOOR SYSTEM

OPENING INWARDS AND OUTWARDS

## CONSTRUCTION

- Rebated or non-rebated door leaf.
- Wooden stile covered with two HDF boards.
- Honeycomb stabilising filling or solid core filling for an additional charge.

## FINISHING

- HDF board covered with PREMIUM laminate, UV paint or a laminate designed for subsequent paint coating or wallpapering.
- Door leaf edge made in rebated or non-rebated technology.

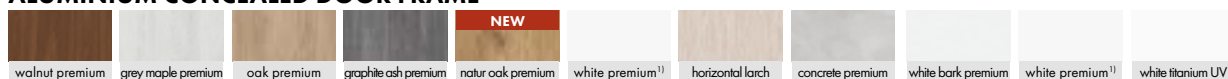

## HARDWARE

- Required two mortise hinges in the door frame (third optional, at an extra charge).
- Magnetic lock in the rebated and non-rebated leaf: with a key, thumb turn cylinder, economy or with a blockade.

AVAILABLE **DOOR LEAF WIDTHS**

60 70 80 90 100

## ALUMINIUM CONCEALED DOOR FRAME

## EXTRA CHARGES

White door frame. <sup>3)</sup>

Painted door leaf; WHITE TITANIUM UV.

Solid core filling.

Additional bottom bar in the leaf (can be cut by customer up to max 8 cm).

Round and square metal sleeves (4 pcs); finish: brushed nickel, patina, white and black.

Plastic woodgrain sleeves (4 pcs).

Ventilation door cut or grille.

"100" door leaf.

Drop-down gasket. <sup>4)</sup>

<sup>1)</sup> Plain white laminate imitating a painted surface.

<sup>2)</sup> Used for wallpaper hanging and painting.

<sup>3)</sup> Aluminium colour frame as standard.

<sup>4)</sup> A stop prevents application of a drop-down gasket and vice versa.

<sup>5)</sup> WHITE BASE leaves and aluminium door frame width "70" and "80" available on short lead times – ask your dealer for details.

# DOOR FRAMES

- The adjustable and fixed rebated door frames can be used for all types of ERKADO internal doors made in both flush and STILE technologies.
- The adjustable non-rebated door frames can be used for internal doors made in both flush and STILE technologies. These door frames are supplied with three concealed hinges.
- The door frame is made with high quality MDF board and covered with durable wood grain film or coated with durable UV paint.
- Depending on the technology, the door frames are laminated with: FINISH, GREKO, CPL, PREMIUM and UV paint.
- The frames for STILE doors have a third hinge as standard.
- Each adjustable and fixed frame comes complete with disassembled frame components, hinges and screws. The components are supplied with predrilled holes for fixing.
- Each set is enclosed with assembly manual and warranty certificate.
- The fixed door frame for Herse collection is rectangular and its core is made of glulam timber.

# TUNNEL TYPE ADJUSTABLE DOOR FRAME

REBATED / NON-REBATED

## TUNNEL TYPE DOOR FRAMES

The tunnel type door frames are adjustable door frames without any hardware. They are made with a top strip and two vertical strips.

They can be used to finish door openings and safeguard wall corners, but mainly are fitted for interior decoration effects.

The tunnel type adjustable rebated door frames are also used in the ERKADO sliding systems.

The tunnel type adjustable non-rebated door frames are not used in the sliding systems.

Depending on the system, we use the following rebated tunnels:

SLIDING SYSTEM  
WALL-MOUNTED DOUBLE

TUNNEL FOR  
SP1N
