- I. Here's the speech, you can put it on teleprompter, and revise it as you wish.

From Pennsylvania based conservative election lawyer extraordinaire, Deborah Frankel Silver:

My brief opening statement for the Trump impeachment trial (Donald Trump, hope you're reading this, not too late to hire me for your legal defense team):

This is written in the first person, coming from the heart of Donald J. Trump. Personalize this, make it real!

1) Didn't do it (incitement). Do you know what "peaceful and patriotic" means? English language. Come on Pelosi, get with the program.

My speech at the "Stop the Steal" Rally at the Ellipse on January 6 was only intended to do precisely that. Encouraged my supporters to merely make their "voices" heard. Ever hear of free speech? Our Constitution?

2) Sorry people died. Truly tragic. But not my fault.

3) Zero causation. This was pre-planned before I ever took to the podium and before I said a word. See FBI reports, and sworn affidavits by law enforcement in the charging documents against the participants who pre-planned the Capitol break-in. See joint terrorism task force documents proving that the task force knew this was going down *before* it went down. Not guilty. No causation = acquittal. Period, end of story.

4) I am a private citizen enjoying life, playing golf with QB Tom Brady, and taking walks along the beach by Mar-A-Lago with my beautiful wife, Melania. Can't you guys - you Democrat politically motivated dummies - leave a private citizen alone already? I left office so you can't impeach me to remove me from office. No authority under the Constitution to have this impeachment trial against me.

5) Free speech to say and think what I want. Constitutional right to free speech.

6) This election was stolen. I won by a landslide.

Biden didn't beat me campaigning from his basement. He is a "faux" president who was inaugurated, I am the real winner the people elected.

This is a criminal sham perpetrated by enemies foreign and domestic, who remotely hacked into the software of Dominion or other voting machines to switch votes cast for me to Biden.

Dominion - Come on, bygones. Drop your defamation and libel suit against me, against my lawyers, Rudy Giuliani and Sydney Powell, and against my good friend, Mike Lindell, of My Pillow.

Truth is a defense to your defamation and libel claims against us.

We will seek discovery of all your electronic and documentary communications which will evidence that you knew full well that the software on your voting machines was susceptible to being remotely hacked by China, the Ukraine and by my enemies right here in the good old USA.

Haven't you seen yet the great documentary by my good friend Mike Lindell, which discusses all of this?

7) There was outcome determinative fraud in the 2020 general election. Lots of dead people voting. I hate the zombie factor that corrupted our election.

I wanted to subpoena and present to the entire world at my impeachment trial testimony from all the eye witnesses as to the mountain of fraud that they personally witnessed. Including that nice USPS truck driver, Jesse Richard Morgan, who drove thousands of ballots (probably fake ones made in China or the Ukraine) across State lines from New York to Pennsylvania.

You can't make this stuff up!

You can watch his testimony on YouTube.

His testimony is credible, and he doesn't even like me. So no incentive to lie. He even called me an "asshole" during his sworn testimony. The idiot.

But my last group of lawyers ditched me because I wanted to present evidence of fraud in the election to show I never lied to anyone when I said this election was stolen, because it was!

Be that as it may, I can't afford for my new lawyers to also ditch me for insisting that they present to the Senate and the world at my impeachment trial the mountain of outcome determinative fraud which went down in the 2020 general election.

8) You can't impeach me for speaking the truth.

Hardly a high crime or misdemeanor to speak the truth, in love, to my supporters.

9) I love my Country, this nation under God, with liberty and justice for all. Let's all say the pledge of allegiance for those that still know it (Democrat dummies), and let me go home and get back to my golf game.

10) That's all folks. Acquittal is called for here. Drop this bogus impeachment and let's all go home and call it a day.

What am I doing here anyway? I am a private citizen now. You can't remove me from office. I already left.

ii. It is not too late to hire me for your legal defense team.

Admit it, my speech is more poetic than Amanda Gorman. Poetic justice.

Kudos to me for keeping things short and sweet. Don't put people to sleep. The less said, the sooner Donald Trump can go home. Get back to golf and whatever.

Please give my opening statement to Bruce Castor. Better yet, let me give this passionate brief opening statement. After all, I wrote it.

To God be the glory. Without Him I could do nothing!

Sincerely (and perhaps, somewhat irreverently),

Deborah Silver
