These solutions integrate products, processes, training and measurement systems to improve results, reduce risk and lower overall cost. Solutions for Operating Rooms, Patient Rooms, Resident Rooms, Emergency Departments, and Public Areas.
Steve Burleson	(806) 544-7783	sburles on @germblast.com	GermBlast high level disinfection program and Indoor Air Quality products - GermBlast Service, GermBlast Wash, GermBlast Equipment Cleaning, GermBlast Air Quality Assesment, GermBlast Water Management - GermBlast is a comprehensive program to reduce infections and illness while decreasing HAIs, improving facility and extending life of medical equipment.
Tom Thompson Chuck Lucero			Kurin Lock(R) - Kurin is designed to help hospitals address the critical financial and medical problems of contaminated blood cultures. The initial volume of blood, which might contain contaminants associated with blood culture contamination, is sent down a side channel, and when the blood culture bottle is attached, the new blood flows through the sampling channel into the bottle. Changing outcomes is tied to compliance and compliance is directly related to simplicity. Kurin works automatically, providing your staff the most simple way to address the costly problem of contaminated cultures.
	(303) 333-2233		We offer a blood culture collection device designed to reduce blood culture
