

Exhaustive OBRY Bi-Glyph roots

compiled by Jon Machtemes and friends of obryprojekt.info

All OBRY words oriented from left to right. Masoretic Hebrew remains oriented from right to left.

USE OF CROSS REFERENCES:

Wherever "INDEX" occurs in the document, it will bring one back to the front page of this document.

Any Glyph Set (𐤀 – 𐤭) will advance on to the respective glyph's table starting point. This includes the glyph reference in the "relationship" column.

The bi-glyph roots are for navigation within the table, and the glyph in the "relationship" column brings one back to the beginning of the table.

BLACK COLOR CODING signals words listed in Strong's as bi-glyphs and have textual support as such

PURPLE COLOR CODING signals words listed in Strong's as bi-glyph roots, but currently have less textual evidence than BLACK coded listings

BLUE COLOR CODING signals words not listed in Strong's as simple bi-glyphs but that have a strong argument for the actuality of them being bi-glyph roots with modifiers

GREEN COLOR CODING signals words not listed in Strong's as simple bi-glyphs with currently less textual evidence than blue coded entries; however, they do have some evidence of being a bi-glyph root

RED COLOR CODING signals words listed in Strong's as bi-glyph roots but do not appear to have sufficient textual proof thereof

MAGENTA COLOR CODING signals a root or two glyph combination with no apparent Strong's entries to classify it under. Sometimes this combination can only be found within other words.

* - when an OP definition is applied based on a more precise understanding. Example: H2874 𐤀𐤅𐤁- n. 12x. a butchering*

The use of these terms is, in no way, to suggest they are appropriate. The part of speech designation goes only for the English translation's part of speech. The OBRY part of speech is then contrasted in the final column when applicable

| <p>𐤎 - used for "definite article" as "head"/prefix and to undefine or "spread" as "tail"/suffix (feminizes). A key to it's usage is found in Gen 17:5 and 15, wherein 𐤆𐤎𐤎 adds 𐤎 to 𐤆𐤇𐤏𐤍 (now 𐤆𐤇𐤏𐤍𐤎) and 𐤗𐤓𐤆 (now 𐤗𐤓𐤎) as he promises to greatly increase this couple who are old and have no children. The sense of "broadening", (if indeed it is a man stretching out his hands), whether to "increase" via widening, at the front, or "decrease" via widening, at the end, or perhaps just widening a thing or idea when inserted in the midst, is herein found.</p> | | | | | | | |

| L - used as prefix "to/for": appears to be denoting possession, as if scooping or lassoing: a swath or area. As a "tail" it may be moving away from the preceding glyph/word as when it's a prefix it is moving the previous idea to the following glyph/word. | | | | | | | |

It's a negative in a direction. ʔ' position simply MUST dictate that instead of the normal usage of L (to attribute to) that L is now being opposed, turned, denied, flipped. Lʔ, like L (as a prefix) is "toward". Lʔ is consistently "no; not". This final ʔ phenominon MUST be a very real factor, despite other words which, currently, seem to retain first position glyph function even with the final ʔ. |

| × - used as prefix "she-you-they will" and either "of" or "fem. pl." suffix. These, like all other popular uses, are not consistent. Seems to be "a mark; specific designation; accuracy". used to denote feminine plural (with u) and used as "of" suffix alone. Specific "head/tail" function not yet fully known. | | | | | | | |
