

MMA COLORED LANE TREATMENT

Delineates bike lanes, bus lanes, and crosswalks, and is ideal for refurbishing worn stamped asphalt markings.

Pathway Perceptions colored lane treatment combines state-of-the-art Methyl Methacrylate resins with hardwearing aggregate and premium pigments.

PERFORMANCE-BASED FEATURES

Durability: The state-of-the-art Methyl Methacrylate resins with hardwearing aggregate provide extreme durability.

Friction: Meets non-slip requirements for cyclists. Surface provides remarkable traction for safer pedestrian and cyclist traffic.

Color Stability: Advanced technology provides long-lasting color retention, especially against UV rays.

BENEFITS

- Increases awareness of shared roadway use among motorists, cyclists and pedestrians
- Enhances visibility of dedicated lane
- Provides clear delineation and traffic calming
- Promotes balanced multimodal transportation network
- Applied in a wide range of temperatures
- Open to traffic in approx. 15-20 minutes

APPLICATION

Resin and hardener formulations are to be systematically mixed, via continuous agitation, and sprayed at a 98:2 ratio to ensure proper cure times and performance. Each three coat application should be sprayed at 45-50 sq. ft. per gallon.
