

1. **Scientific community says DON’T** During a recent 60 minutes interview Dr Anthony Fauci said..... *“Right now...in the United States.... People should not be walking around with masks. Right now....there’s no reason to be walking around with a mask. When you’re in the middle of an outbreak....wearing masks might make people feel a little better....it might block a droplet....but it’s not providing the perfect protection that people think. Often...there are unintended consequences to wearing a mask ”*
2. **17 peer reviewed scientific controlled studies prove conclusively that face mask WILL NOT prevent the transmission of influenza virus. (Corona Virus) I will list a few.**
 - a. *Jacobs J.L. et al 2009*
 - b. *Cowling B et al. 2010*
 - c. *Bin-Reza et al. 2012*
 - d. *Smith J.D et al. 2016*
 - e. *Long Y et al. 2020*

Conclusions of all 17 studies. All studies concluded that there is no conclusive relationship between the use of masks including N95 masks and protection from influenza infection. (Corona Virus) Masks will not protect you from Covid 19

A 2015 study entitled **“A cluster randomized trial of cloth masks compared with medical masks in healthcare workers”** showed conclusively that cloth masks WILL NOT protect you from catching the virus and they actually put you at greater risk of catching the virus. Moisture retention, reuse increase exposure. Wearing a face mask on a regular basis is unhealthy. Wearing a mask will cause reduction in blood oxygenation (hypoxia) by as much as 20% and elevation in blood CO₂ (hypercapnia) These conditions cause headaches, dizziness, passing out, and many other serious health issues. **Stop participating in medical tyranny.**

3. **OSHA says DON’T** According to OSHA.....*“Surgical masks are not designed or certified to prevent the inhalation of small airborne contaminants. Surgical masks are not designed to seal tightly against the user’s face. During inhalation, much of the potentially contaminated air can pass through gaps between the face and the surgical mask and not be pulled through the filter material of the mask”.*
4. **“World’s Top Epidemiologists: “Masks Don’t Work ”**From a medical point of view, there is no evidence of a medical effect of wearing face masks, so we decided not to impose a national obligation,” **said** Danish Medical Care Minister Tamara van Ark.
5. **US Surgeon General said DON’T** “Masks could make individuals sicker and exacerbate the spread of the virus.
6. **National Institute for Public Health and the Environment says DON’T** Coen Berends says, “Face masks in public places are not necessary, based on all the current evidence. “There is no benefit and there may even be negative impact.”
7. **Anders Tegnell, Sweden’s top infectious disease expert says DON’T.** “With numbers diminishing very quickly in Sweden, we see no point in wearing a face mask in Sweden, not even on public transport,”
8. **The attorney General of the US and many governors and sheriffs say DON’T:** June 15th 2020 Georgia Gov. Brian Kemp on Wednesday suspended all local government mask mandates. Many other state and local government officials are doing the same. The US Attorney General recently warned all state AGs not to allow people’s civil rights to be violated. *The government didn’t give me my breath...and they are not allowed to take it away.*

- a. South Dakota was the only state in the nation that didn’t force businesses to close down and was one of only seven states that didn’t issue a “stay-at-home” order. There was no mask requirement. So, what happened? According to Governor Kristi Noem there was no surge in cases or deaths as a result of our lack of restrictions. How do you explain that? You are being lied to by the media, certain medical professionals like Dr Fauci and corrupt government officials that are involved in the take down of your freedom.
9. **Covid 19 is not as dangerous as you are being led to believe.** *Dr Fauci published an article in the New England Journal of Medicine on March 26th 2020 entitled “Covid-19 — Navigating the Uncharted” where he concluded Covid 19 is less lethal than the Flu “This suggests that the overall clinical consequences of Covid-19 may ultimately be more akin to those of a severe seasonal influenza (which has a case fatality rate of approximately 0.1%)” People have had the flu all my life and we never had to go through this. Come on peoplethink!*
10. **The CDC is lying – They are domestic enemies of the state** A May 21st article in the Atlantic entitled “How could the CDC make that mistake” informs us that the agency is mixing the results of viral [PCR] and antibody tests, even though the two tests reveal different information and are used for different reasons.” “‘You’ve got to be kidding me,’ Ashish Jha, the K. T. Li Professor of Global Health at Harvard and the director of the Harvard Global Health Institute, told us when we described what the CDC was doing. ‘How could the CDC make that mistake? This is a mess’.”
11. **Most deaths are reported as Covid deaths to increase fear.** Most deaths no matter how they occur are being reported as Covid 19 deaths Danielle Lama for Fox35 in Florida asked a Florida health official if a man that died from a motorcycle accident was reported as dying from Covid 19 and he said yes. When pressed further he said “you could actually argue that it could have been the COVID-19 that caused him to crash. It gets worse...keep reading
12. **The media and local governments have become weaponized and are lying to you like you wouldn’t believe.** Yes....a massive, coordinated propaganda campaign that is based on made up statistic and stories. Basically....America is at war but its asymmetrical warfare. It’s not bombs and bullets...yet. They are using the controlled media to get people to be willing give up their freedom, they’re business and their lives. If you want to live....you had better stop going along with this medical tyranny and start fighting. Don’t take my word for it....see for yourself.
 - a. **1 = 17** 8 states have adopted the CDC’s unscientific policy that **for every 1 person that tests positive, 17 confirmed cases are reported in the news.** This they say is because the infected person has “**probably**” been in contact with at least 16 other people. This means 1 case = 17 cases reported. 100 cases = 1,700 cases. When you see the news report a Covid 19 “Hot Spot”its just a hot spot of made up numbers to scare you into wearing a mask. Does that sound even remotely scientific? See here <https://banned.video/watch?id=5efab695672706002f367a0a>
 - b. **Google is lying to you** Pick any number between 1 and 1000 and put in that number with the word “cases” and you will get a fake article for each and every number. Example....237 cases 458 cases etc. What are the chances of their being a perfect article for every number between 1 and 1,000 The algorithms are lying to you?
 - c. 333 Florida testing labs tested 3,528 people and they reported that 100% of all of them tested positive. Do you believe that that is even remotely possible?
