- ⇒ Spinach
- ⇒ Mizuna
- ⇒ Tatsoi
- ⇒ Raw Honey

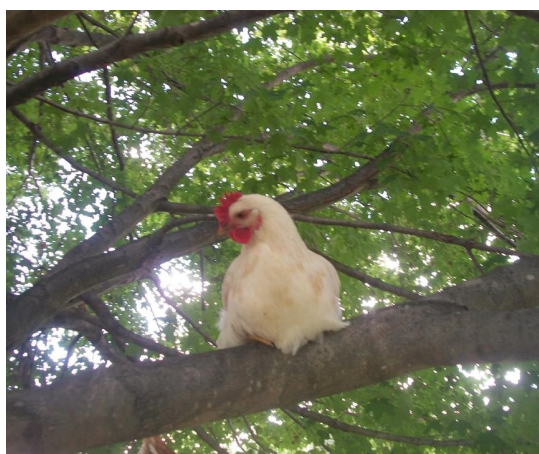

.

Welcome Back everyone to a new season. Our spring shares are starting right on time as projected.

What are wild ramps?

Considered a delicacy to many chefs these are a member of the onion family that grow wild and we walk the woods to find and harvest them..

I am so excited for our new Spring Shares 6 week program this year! We begin Hamburg market May 2nd and Blasdel Market starts on May 20th! So glad winter has finally left us and the beautiful sun is shining again. We are making changes again this year, adding more items and a larger variety. Looking forward to a beautiful summer and growing season. Thank you our customers for joining us again this year, and to new customers thank you for your support!

One of my most favorite pictures ever! All white chickens are named Lucy if they are hens and Lucifer if they are roosters (kinda hard to tell them apart except the hen and rooster part). This tree branch sits near the roadside stand and this has always been this particular chickens favorite place to roost. Our chickens lead a very happy life, no fences holding them in and never a cage, free to roam around and find bugs and such. Try our free range brown eggs sometime if you haven't already. They are awesome and always fresh!
