

You and your partner are driving a vehicle down a steep, uneven hill, off road. You notice Bill in the car in front of you pulling away fast and moving far too quickly for such a descent. You try to radio him to say **SLOW DOWN**, however he continues to speed up. At the bottom of the hill the vehicle crashes into a tree. You run over to provide assistance. What is your first step?

1) P \_ \_ \_ \_ \_ S \_ \_ \_ \_ \_ (1 mark)

2) What is included in the above? (2 marks)

3) Bill is **unresponsive and breathing**, what would you do? (1 mark)

4) What are some possible dangers you could come across? (2 marks)

5) Are there any immediate life threats, if so what? (1 mark)

**After approximately 5 minutes Bill begins to regain consciousness, he is very drowsy, groggy and confused. He has obvious difficulty in speaking and drooling. You notice he is slumped to his left side and has some left sided facial droop.**

6) What would be involved in your secondary survey? (3 marks)

7) Why should we act FAST? (2 marks)
