But it needn't be a painful experience with these five lessons that help teach grammar without the hammer! Included: Five fun activities. Teaching the yearly grammar unit can be like giving a child cough medicine. Some students take it without flinching; others- those with a mental block about grammar- flinch at the mere mention of the word.

Teaching grammar has to be one of the toughest tasks a teacher faces. We all know that grammar skills are essential to students' success on standardized tests and college entrance exams, in their ability to communicate orally and in writing, and in nearly all other areas of life! So the more fun we can have with grammar—and the more varied approaches we can use to teach it—the more likely our students are to 'get it. These lessons help you lessen the pain, if you will. Appropriate grade levels for each lesson appear in parentheses. **Synonym Scramble** A fun activity reinforces synonyms and builds vocabulary skills.

Grades Pair Editing Students share their edits and then edit solo. Two humorous work are also sheets included. **Grades K Great Grammar!** Do you use Education World's Every-Day Edits to reinforce students' grammar, punctuation, and spelling skills? We offer a weekly activity for primary grade students and daily practice for students in grades 3-up. Daily practice and reinforcement are sure to improve your students' test scores, so check out our Every-Day Edits today. See these additional resources from Education World for links to more great grammar! **Grammar Lessons: Five Fun Activities.**

Yes, virtual teaching is improving with each passing week, but we all long to be in closer contact with students, particularly those who are struggling to receive basic needs. From a teaching standpoint, the biggest challenge of this setup lies in the need to essentially teach two different populations at once, sometimes at the same time: the students at home, and the students in the building. How can we serve both? **Buddy Up!** For students learning virtually as they watch their classmates live, understanding what is happening is a real struggle. For one thing, both the on-site teacher and students are likely wearing masks, which muffles sound and facial expression.

Furthermore, being able to see and hear anyone through a camera aimed at a classroom is a difficult proposition, one requiring both intense and continued concentration and that stamina is not possible for younger children in particular as well as excellent hearing. For this reason, strategic pairings or groupings are critical. Rather than house the virtual students on a screen in the back or similar, assign each virtual student an in-person peer. Schools using tablets or laptops and that is most of them these days can place an onscreen student on the desk of one who is sitting right there in the room, and who can act as an advocate. Suppose that Jane, a virtual student, is paired with Carly, who is sitting in the classroom.

Likewise, if Jane cannot hear something, she can ask Carly to type what just happened into the chat. The benefit of this system is not for Jane alone, either. Carly has a learning partner, and she can maintain her relationship with someone not wearing a face mask at a farther distance. It might be a distraction, but the potential benefit outweighs any downside. And if Carly is absent, Jane can be given to a new partner, or another group. **Keep Group Work Virtual** In the age of physical distancing, group work is problematic from a health standpoint. Therefore, rethinking how we group kids is vital to keeping the collaborative energy of a classroom intact. Even when students are sitting in class, group work can be conducted on Zoom to benefit both those learning at home and those in the classroom who cannot be in proximity, and who are wearing masks.

Imagine two students sitting across the room who are still part of a Zoom small group. They can see each other on the computer, and virtual students can be pulled into the process as well. In this situation, the in-person students have the advantage of being in the classroom and being able to ask for immediate help from the teacher, while the virtual students are able to work with masks off and be equal contributors to the work with the guidance of their peers. **No Double Duty Teachers** who are working with two distinct populations at one time one here, one there may feel the need to do twice the work, since one set of lesson plans might not work as well for a particular group. **Grade 5 English Language Arts. Grade 6 English Language Arts. Grade 7 English Language Arts. Grade 8 English Language Arts. Grade 9 English Language Arts. Grade 10 English Language Arts. Grade 11 English Language Arts.
