# Essentials vs Accessories

Indoor comfort in your home is about more than just adjusting the temperature on the thermostat. Many homeowners overlook the need for necessary components and systems that can improve the indoor air you breathe. Indoor air quality products and systems are quite frequently treated as accessories. We define them as indoor air essentials.

## 'Round the clock freshness

A tight, well-insulated home helps keep you comfortable and helps you save on energy. However, it can also trap stale air, pollutants, and moisture inside your home. Opening a window to get fresh air isn't an energy-efficient or comfortable answer during the winter or summer months. A Clean Comfort brand Heat Recovery Ventilator

(HRV) or Energy Recovery Ventilator (ERV) offers a simple, energy-efficient solution to both problems by using the stale indoor air leaving the home to condition (heat or cool) the fresh outdoor air entering the home through the HRV or ERV.

## Whole-Home Ventilators

### Why buy an HRV and ERV?

The Clean Comfort brand VH Series HRV Whole-Home Ventilators exchange heat between the fresh incoming air and stale exhaust air.

**Benefits include:**

- Provides balanced, energy-saving ventilation by bringing outdoor air to the house while retaining up to 60% of the indoor heat
- Offers balanced ventilation with two, independently controlled German-engineered motors that help manage the pressurization of the home
- The heat exchange core of the VE Series Ventilators prevents up to 40% of the moisture content in the air from passing through the ventilator, helping to keep humidity outdoors in the summer and indoors in the winter

# What Our Customers Are Saying

"I contacted ServicePlus late at night when we were having issues with our furnace. Scheduling an appointment was easy and quick. Andrew and his colleague were professional, helpful, extremely punctual (arrived at 8am sharp and called when they were on their way) and efficient. They were informative and helped us fix our furnace issues promptly. We will definitely continue to use them in the future for all of our heating and cooling needs."

-Rachel, December 2019

"My AC wasn't working properly so I called a few companies to have someone come look at it. Most companies were unable to come the same day so I kept calling other companies but when I fell on ServicePlus, Andrew took the call. He was the only one of all the companies that I call that day that asked me what was my AC issue. He was so helpful, I felt at ease right away. He came today and fixed my AC problem in 2 seconds. Andrew was so professional and so friendly, I felt like I had known him for years. I would definitely recommend him!!! I will be using ServicePlus in September for my yearly AC and furnace checkup. Thank you so much Andrew for your help today, I really appreciate it!!!"

-Francine, July 2019

"Andrew was quick and willing to help us on a late Sunday night call for a gas leak. We couldn't have asked for better service."

-Tyler, November 2019

## Our complete family of Clean Comfort products improves indoor air quality:

### Filtration

Air filtration systems capture up to 95% of particles ranging in size down to 0.3 micron and keep them from recirculating back into your home's air.

- 5-Stage Air Treatment
- Hepa Air Cleaner
- Media Air Cleaner
- Electronic Air Cleaner
- Hybrid Air Cleaner
- Replacement Filters

### Humidity Control

Dehumidifiers and humidifiers work with the home's heating and cooling system to help maintain a comfortable humidity level in every room.

- Whole-Home Humidifier
  - Bypass Evaporative Humidifier
  - Steam Humidifier

### Dehumidification

Dehumidifiers work with the home's heating and cooling system to help maintain a comfortable humidity level in every room.

- Whole-Home Dehumidifier

### Purification

Air purification systems are attached to the furnace or air handler, contaminants are deactivated before the air is recirculated back into the home.

- In-Duct Air Purifier
- Coil Purifier
  - For Furnaces
  - For Air Handlers

### Ventilation

Ventilation systems replace stale indoor air with outdoor air — providing the fresh-air feel of an open window, with minimal heat/energy loss.

- Heat Recovery Ventilator (HRV)
- Energy Recovery Ventilator (ERV)
