

Oksana & Quinn Dutchyshen were killed on August 16th 2019 by a drunk driver when they were just 6 & 4 years old. Oksana & Quinn were bright, happy little girls who both had so much life ahead of them. Unfortunately, they are now #forever6and4 because of the selfish actions of one man. His actions have directly affected 4 generations of Oksana & Quinn's family, leaving them devastated and permanently heartbroken.

Each year on the girls' birthdays, friends & family of the girls perform random acts of kindness to remind the world that everyone's actions, big or small, affect all people & cause ripple effects, which is why you should always choose kindness and love over selfishness. Please don't ever drink and drive, drive distracted or fail to come to a complete stop at a stop sign. Lives depend on you! And always share love, joy and kindness....
