

HERE WE GROW AGAIN!

Growing automation & machining company located in Sarasota, Florida is looking for qualified candidates.

Controls Engineer needed:

- 5 to 10 years' experience in controls for automation machinery.
- Engineering degree bonus but not necessary.
- Familiar with Rockwell & Siemens platforms—design, sourcing & programming.
- Familiar with Robot Programming.
- This is a hands-on position working closely with our design engineering & assembly teams on unique projects & automation solutions for our customers. The position requires robust interpersonal & teamwork skills.
- The position requires the ability to take responsibility for controls project completion & meet customer & company expectations within the quoted budget. The ability to develop unique, viable & cost-effective solutions is highly sought.
- Fast paced environment with 30% growth each of the past 3 years.
- Compensation based on experience.
- Air-conditioned shop with modern equipment as we machine most of our own parts for our solutions.
- Please, no phone calls or walk-ins.
- Submit resume to this ad via JFBarrett@SunshineMachining.com.
