

Lindsey Morrow.

Lindsey Morrow was very public about her dislike of me and my rescue. One day I came across a post on facebook about there being a bunch of kennels in a residence she had recently vacated. I went with a UB volunteer the same day to get the kennels. Upon arrival we found a dead dog skeleton. We decided to look around the property and found another deceased dog and lots of feces filled kennels. **I went home and called Josh Colvin and told him what I had found. I also told him she had left the night before with over 10+ dogs who were said to be in awful condition.** I had previously emailed the state about Lindsey operating without a license as well. **The ARL would have not known about any of this had I not told them.** Kiya Koda, the local animal shelter had been there and seen the dogs just 2 days prior and did nothing. These are photos that I took myself and the original post.

This is neglect.

Lindsey's charges-An Indianola woman who was arrested after authorities rescued 19 malnourished and injured dogs from her care pleaded guilty Monday to 22 misdemeanor charges of animal neglect.

Teresa Muhs & Thomas Mauk.

According to the affidavit, at 7:40 p.m. Feb. 21, 2018, Clinton police officers were called to the residence in reference to a report of animal neglect. Officers made contact with Muhs, who met with officers on the back porch of the residence.

The affidavit states eight dogs all over the age of four months were found inside the residence, which had no working utilities. Muhs said she owned three dogs inside the residence. She said Mauk also owned dogs inside the residence. Muhs said one of Mauk's dogs was killed inside the residence and had already been removed. All the dogs removed from the residence were covered in feces. Several dogs were covered in blood.

The dogs were removed from the home and transported to the Clinton Humane Society. Five dogs were reported as injured by Clinton Humane Society representatives.

The affidavit states that on Feb. 25, 2018, a search warrant was executed at the residence. Officers found feces on the floor in every room throughout the residence. Officers observed what was believed to be dried blood on the walls, floors and appliances. Dog dishes were found empty, except for one containing a small amount of water. No dog food was found in any of the dog dishes or the empty food bags. Some loose dog food was found on the floor among the feces.

Mauk on Feb. 26, 2018, allegedly admitted that in the past five years he had possessed approximately 40 dogs. Mauk claimed he provided vaccinations to the dogs' offspring himself but had failed to begin a course of disease prevention and immunization against common disease under the direction of a licensed veterinarian as required by the city of Clinton. Officers recovered a green binder containing dog sale contracts.

Mauk also allegedly admitted the dogs would fight with each other and suffer injuries. Mauk said because of his mixed martial arts experience he learned to treat the injuries.

“Mauk admitted he has neglected the basic needs of all nine dogs and because of his failure to properly care for his dogs they have been forced to endure severe pain,” the affidavit alleged.

This is neglect.

Thomas J. Mauk, 35, 422 Fourth Ave. North, was found guilty of eight counts of animal neglect, no death or serious injury, a simple misdemeanor.

In the same case, Teresa A. Muhs, 34, 422 Fourth Ave. North, was found guilty of eight counts of animal neglect, no death or serious injury, a simple misdemeanor.

UB took in 3 of the 8 dogs rescued from Tommy & Teresa.

AKA "Ivan" name given by Clinton Humane Society, came into the shelter the night of February 21, 18. Ivan is a black and white unaltered male American Staffordshire Terrier who is about 2 years old. His face was completely swollen and had open wounds to traumatic bite wounds to the face and ears. His hands that were visible were old mixed in with fresh wounds. His face was fully covered in blood. Both front forearms have edema due to bite wounds. Swollen and limping on the front leg. Visible scars on hind legs from blood and feces. His demeanor upon arrival was extremely terrified and growling due to pain, stress, anxiety and change of environment. He was left with leash on in kennel. Next morning, he was growling, but not bearing trying to bite. He was visibly in pain and could not stand. I retrieved leash off and began working with him and trying to connect emotionally to build a trust that here to help. I left him alone and he watched me with the other dogs. I then went back to him and his demeanor changed, he tried to stand and walk out of kennel and put his head in my lap and licked my arm and wagged his tail. He has since been sitting up on his own and walking on a leash with me. He completely wags his tail when he is to be petted.

B4

"Genovani" name given by Clinton Humane Society, came into the shelter the night of February 21, 18. Hades is an unaltered male brindle and white American Staffordshire Terrier mix who is about 2 years old. He has no visible trauma through his body. He is not able to touch him or get him out of kennel due to growling and barking. His tail is tucked and he is visibly frightened. His anger is towards humans wanting to bite. He is extremely fearful of human interaction.

B4

NOW

HADES

"Hercules" AKA "Bobo", name given by Clinton Humane Society, came into the shelter the night of February 21, 18. Hercules is a brindle and white unaltered male Staffordshire Terrier mix who is about 2 years old. Hercules shows minimal visible wounds. He has old scarred wounds on front right forearm. Hercules is a happy tail wagging dog. He walks on leash. He does slightly cower when he does not walk with him straight up, he army crawls on his back hind end.

HERCULES

ZEUS

NOW

NOW

Karen and Ron Krutzenkamp.

I took a call about some neglect dogs in Terril Iowa. This is what we found.

Dogs covered in sores with skin falling off, paralyzed and suffering from ruptured tumors. 2 of the 6 dogs had to be euthanized immediately. The other 4 were vetted and adopted out through UB.

This is neglect.

With local law enforcement fully aware of what had gone on, Karen & Ron received no charges.

Angela Earles and Adam Brown

A dog named Hercules was beaten with a shovel, punched, kicked, shot at 7 times and finally thrown into a 30 foot ravine by a group of drunk teenagers. They all admitted to what they had done and sent someone to where Hercules was and he was then taken into the Stephen Memorial Animal Shelter and 10 days later taken in by UB.

This is neglect.

With local law enforcement fully aware of what had gone on, none of the abusers received any charges.

James Goodburn

In late March, David James Goodburn, 21, adopted the dogs from the Animal Rescue League of Iowa, according to a criminal complaint. Goodburn then left the dogs in an apartment without food and water, where they eventually died, the complaint said.

ARL of Iowa Executive Director Tom Colvin confirmed Goodburn adopted the dogs from the shelter and that they starved to death. On May 18, a strong odor was smelled coming from Goodburn's apartment, the complaint said. The power to the apartment was also cut, the complaint said.

Norie & Brie

This is neglect.

Goodburn received two count of animal neglect.

Prince

Diva

Old Man

This is not.

Prince came to me with a broken hip on 9-20-19. The day he arrived he was taken to Starch Veterinary Hospital by myself and Heather Hose. It was confirmed that he had a broken hip and would need an FHO. It was also confirmed that this injury was not as recent as his previous owner had made it sound. The reason Prince was moving around so well and seemed to not show signs he was in pain was because the injury was older which you could clearly tell by the muscle atrophy in the back injured leg and had begun to heal. The veterinarian at Starch put Prince on Carprofen for pain which he took regularly until he was picked up by a girl who has a vendetta against me. Kelsey Reimers who everyone knows used to be in UB but was removed after stealing 300.00 after a fundraiser is who picked up Prince, not his previous owner like I was being told by my foster Jeannie. In the police report that I am now finally seeing, Prince's previous owner states that Prince was injured in early September or late August. So if Prince went for a month without medical care it can be established that the injury had already begun healing. So my question then becomes why is he not being charged?

Atrophy (of body tissue or an organ) waste away, especially as a result of the degeneration of cells, or become vestigial during evolution.

"without exercise, the muscles will atrophy"

synonyms:

waste away · **waste** · become emaciated · **wither** · **shrivel** · shrivel up · **shrink** · **[more]** **gradually decline in effectiveness or vigor due to underuse or neglect.**

1. A fundraiser was executed in hopes of raising the money needed to have the FHO Prince needed. It generated 300.00, enough to cover the cost of the FHO if it were to be done at ISU. Xezna Beard, who had Prince as a foster at that time called and scheduled the FHO for December 10th 2019. The police claim this call was never made and there

was no appointment. My question is how hard did they look? Did they look under my name? Xena's name? Did they check with the shelter program who was going to do the surgery? Or did they just ask the front desk if Unbreakabull Bullies had any dogs scheduled for surgery around that time? On 11-30 he was placed in a foster home with Jeannie Connor in Nevada so he would be close to ISU on the date of his surgery. Prince was moved back from Cedar Rapids by Colleen Jossie who has provided a statement. Prince jumped from her vehicle to the next transport vehicle at my house that night without any assistance and showed no signs of discomfort other than holding the leg up. Jeannie kept him in her basement and he was able to do the stairs with no issues. When left in the kennel Prince would whine. It was determined by Jenna Hutzal that Prince's whining when he was in the kennel was due to anxiety and not pain. In Prince's previous foster home with Xezna Beard Prince would play and even run with the other dogs. Prince was not left to suffer, his injury was not ignored, he had seen a vet and was receiving treatment and his surgery had been scheduled. The date of Prince's surgery was not shared with Jeannie since Xezna was handling his case and hadn't reached out to her yet. She planned on contacting Jeannie before the tenth when his surgery was scheduled. On December 4th Jenna Hutzal asked me if she could send Prince back with his previous owner. I said that was fine if he thought he could get the surgery done sooner. Jeannie and Jenna were lying. They gave Prince to Kelsey who was removed from the rescue after stealing 300.00 after a fundraiser. She took it upon herself to get my foster to lie to me and say he was going back to his owner for the surgery when Kelsey was actually picking him up and taking him to the ARL. It was never said by me that I wanted Prince at the ARL, that is absurd. Kelsey picked Prince up on 12-6-19, just 4 days before he was scheduled to have surgery. With Kelsey Reimers and her friends like Miranda Kraft calling every person who has donated and stalking my fundraisers and messaging people and telling them not to donate which can be proven, we were not able to come up with the 2,000.00 to have it done any sooner. They want to file complaints that I neglect animals but then make it impossible and ruin every fundraiser I put up. They put me in a situation where I couldn't help Prince any sooner than December tenth. I had to wait for ISU to have an opening since that was all we could afford. He was kept on pain meds which I have a drawer full of to this day. The bottle that was sent with him was the right meds, but I grabbed the wrong dog. The foster told me and I said yes, those were the same meds and to give it to him. How can people make it impossible for you to do something and then complain that it doesn't get done? I had called Critter Crusaders and was told they did not have the funding. I couldn't take him to the ARL, they would have put him down. The only reason they did the surgery was because they knew they could use it against me. The ARL had been telling people they were seizing all of my dogs. A woman named Julie Diskey Lalis that works at the Sparta Animal Control in Illinois told me that she had talked to them and that is what they said. At that time I asked my fosters if they would like to adopt their foster dog at no charge, no fee. I lost thousands of dollars that day that I could and should have made in adoption fees but I knew that if they were to wind up at the ARL that they could end up dead, just like Hades and Diva.

Kelsey has been a problem ever since being removed from the rescue for stealing 300.00 after a fundraiser. Her boyfriend at the time and her best friend have both told me she did it. Also, at one point she was going to mail a money order but then stopped talking to me and denied having any money of the rescues at all. She was the one who called and pretended to be my landlord and caused the whole issue on November 22nd.

These are just a few of the emails Kelsey sent to my landlord. Some date back to September and some are November and there are before and after. She also called and got my medical insurance canceled, has called the ARL on me over a dozen times and I know she and her friends are who called the Dept of Ag. Kelsey wants revenge. She knew for the year she was with UB that there were more than 3 dogs in my home. At that time and currently she has more than 3 dogs in her home. She had no complaints when she was with UB but ever since she was removed it has been nothing but drama.

One last thing. I checked the dates on Prince's surgery. Kelsey picked him up on the 6th of December and took him to the ARL according to the following document. The document after that one states he did not receive surgery until January 28th. The ARL made him wait another 50+ days when it was scheduled to be done on the 10th. How can anyone say I neglected Prince when he wasn't with UB on the 10th to be able to get the surgery? Why did I move him to

Nevada if he wasn't scheduled for surgery? Why does my foster Xezna insist she made the appointment? And where are the neglect charges for the ARL of Iowa for making him wait another 50+ days for the surgery?

Kelsey who had no involvement in this at all picked Prince up on the 6th of December.

January 28th is when Prince had his surgery, 50+ days later.

Prince's owner told me Prince had been recently injured. He didn't mention it had been a month although he did not need to, it was apparent by the muscle atrophy in his injured leg and how well he got around.

Screenshot of my foster stating Prince gets around fine. If this dog was in excruciating pain he would not have been able to go up and down her stairs.

It can be concluded that Prince was not anymore neglected in my care then he was at the ARL, and that the injury was old and healing before he came to me. If he would have still been with UB on the tenth he would have gone for surgery. If there was an issue with scheduling it would

have been fixed that day and rescheduled for another date. He was provided with pain meds for the duration of the wait.

Old Man

Old man was taken into UB on 9-13-19 with 3 littermates and his mother Autumn. At the time they were 3 weeks old. They all stayed with me until 9-18-19 when they were 4 weeks old. We normally do not vaccinate puppies until 6-8 weeks but I knew Jamie Cotten, their foster, had a lot of other dogs and fostered for other rescues as well as UB so I vaccinated them for parvo and distemper only on 9-18-19. They were wormed again at that time as well. All of Old Man's siblings were vetted and adopted, he was the last one from his litter at Jamie's house when I asked her to take in another litter on 11-20-19 that arrived to UB less than 12 hours prior. This litter had come from a Vet Clinic in Oklahoma City, not the city pound like Autumn and her puppies had. There were 5 puppies in the litter. All were 8 week old females and arrived spayed and vaccinated and with a health certificate as did Old Man's litter. I noticed one of the puppies was quite a bit smaller right away. I initially asked Jamie to take that puppy. She didn't respond so I sent her with a different foster. That foster came and picked up the small puppy on 11-20-19 a few hours before Jamie arrived to get the other 3, as one was supposed to be going with a foster who wanted to adopt on 11-22-19. The same night Jamie called me and said they were coughing and had fleas but were happy just playing. Her previous litter arrived with fleas and she bathed them in dawn dish soap so I assumed she would do the same for these puppies and the coughing was likely kennel cough or from the endotracheal tube from the spay. Kennel cough is a virus so other than supportive care there is little that can be done for it unless it turns into pneumonia which requires antibiotics. All of Jamie's dogs were vaccinated against Kennel Cough. The foster that had the smallest puppy contacted me on 11-21-19 and told me that the puppy had parvo. It is not uncommon for the runt to get full blown parvo and the bigger healthier puppies never show any symptoms, especially vaccinated puppies. All of Jamie's dogs were vaccinated and Old Man had been too so I saw no need to panic. The following day, 11-22-19 the police showed up and arrested me for having too many dogs in my home. We had brought back a group of dogs that were all scheduled to die that night with the puppies and they were all here waiting to be picked up by fosters. I also had 2 other dogs here waiting to be adopted the following day. At 6:10pm while I was in jail Jamie messaged me telling me that Old Man had parvo symptoms. She messaged me again at 10:06 pm. She messaged my daughter who told me that night around midnight when I was released and I messaged Jamie right away, within minutes of being informed. I was shocked. I was assured these puppies were healthy since the last 3 litters we took from the Oklahoma City pound had either parvo or pneumonia and these puppies were never in the pound and because these puppies appeared to be healthy. The vet had just spayed all 5 of them and they never would have spayed them if they were showing signs of parvo or any other virus. They also had health certificates clearing them to leave the state. No vet would write health certificates for parvo infected puppies. It turns out the puppies were getting parvo at the ladies house who was overnighting these puppies the night before transport. Jamie messaged me back on 11-23-19 and I told her to take Old Man to the fosters house where the puppies were that got him sick. The foster who was caring for them had all of

the supplies on hand from the puppies who got him sick. They had lactated ringers (fluids), injectable antibiotics, cerenia, canned ID and nutrical and heating pads. The foster that I told Jamie to take Old Man to had successfully saved almost all of the parvo puppies she had that we took in from Oklahoma City in October and had vet tech experience.. Like I said these puppies came from a vet clinic and not the pound and had health certificates and no symptoms of parvo when they arrived here. The puppy that stayed here that had a foster to adopt home waiting never tested positive and never had any symptoms. The 2 puppies that came from Jamies that infected Old Man with the parvo virus both survived and were adopted out, as was the small puppy that I was concerned about that was also dropped off at this fosters house after testing positive for parvo. It is important to know that the small puppy I was concerned about I was not concerned had parvo as she has none of the symptoms while she was here. My concern for her was that she was only 3lbs and had just been spayed and her siblings were all 10lbs and up. Failure to thrive and being weak from the surgery were my concerns for her. The incubation period for parvo is 3-7 days. They were infected on 11-19-19 so they were not exhibiting symptoms while in my care. Let me also add here I have been working with animals since I was old enough to have a job. I have worked in 5 different vet clinics here in Des Moines and in Fort Dodge with all types of animals from exotics to livestock. I also was the director of the Humane Society of North Central Iowa and have a close friend who is a veterinarian who has taught me a lot. When I talk about animal care and health it is with 31 years of experience. Do I think I am a vet? No. Do I regularly use a vet? Yes.

  **Jamie**

NOV 20, 2019 AT 4:32 PM

 Yes I can come get them. I'm just waiting to see if we are still going out of town next weekend and they would have be gone by then if we do go. And I would be able to get them back when we get back Sunday. What time you want me to come get them

anytime.

 Heading to you now

awesome.....call me from the alley behind the house.

The tiny puppy is going with Anna.

so you can take the 4 bigger ones.

 Ok.

NOV 20, 2019 AT 4:51 PM

 You missed a call from Jamie.

Aa

1:35 [status icons]

Jamie

whats going on with old man?

He's coughing and has diarrhea. I'm afraid that he might have gotten sick from the other pups

He won't even eat

SHIT. Can you take him to where you took the other 2?

NOV 24, 2019 AT 4:38 PM

Here's his shit

Aa

Jamie

He is an adult

He doesn't have parvo. And no I did not know they were sick. The lady that sent them to me guaranteed their health.

They were in a vet clinic for a week prior to coming here.

They had been seen by a vet and cleared to leave the state.

I had no way of knowing those puppies were sick.

They had all just been spayed, they were healthy.

I wouldn't have taken them if I would have known they were sick.

Ok even Rachael said those pups had parvo. She was the parvo house. The house where all the sick dogs go to.

But if you get him to Jaclyn who is a vet tech she can get him on fluids and start supportive care and antibiotics.

Aa

Jamie

They had their vaccines too. I like anyone else would not assume parvo

I never would have sent them to you if I would have known it was parvo

I would have sent them to jaclyn.

She has saved all but one out of the 20+ we have had.

Whatever I'm done with this back and forth. And obviously the vet doesn't know what they're doing they just want them out of Oklahoma and somewhere else.

I'm not exactly happy with the vet either. That little one never should have been spayed

She isn't even 3lbs.

None of them should have. But bottom line he needs to go to the vet. I want to know what's wrong with him bc my dogs are at risk too bc if my dogs get sick this will get worse. And FYI I know you know but her house really isn't the cleanest

Aa

Jamie

NOV 24, 2019 AT 6:52 PM

That doesn't surprise me, that
shit spreads like wild fire.

Do you have care credit?

Mine is maxed out from the last
parvo puppies but if you can get
it I will make the payments.

NOV 24, 2019 AT 9:28 PM

How is he?

NOV 25, 2019 AT 1:06 AM

Hey, I just want to take a second
and apologize. I've got a lot
going on right now, more than I
can handle alone and I do 99% of
this alone. My mind is frazzled
and my brain is fried. I'm
emotionally and physically
exhausted. I'm so far in debt and
broke it isn't even funny. These 5
puppies that came fully vetted
were supposed to help make up
for the thousands in debt we
went over on the last 17 parvo
puppies that we sent out. They

Aa

7:16

Jamie

alone.

did you tell them it was my dog?

Yes they know he is your dog.

NOV 27, 2019 AT 6:51 PM

when does your aunt want to adopt Autumn?

This weekend whenever you have time

anytime is fine.

NOV 29, 2019 AT 6:17 PM

When is your aunt coming?

NOV 30, 2019 AT 8:20 PM

When is your aunt coming?

NOV 30, 2019 AT 11:58 PM

I have been able to get ahold of her.
I'll see if she can come tomorrow

Aa

Iowa Code 717B.3 – Animal neglect

Current as of: 2020 | *Check for updates* | *Other versions*

1. A person who impounds or confines, in any place, an animal is guilty of animal neglect if the person does any of the following:
 - a. Fails to supply the animal during confinement with a sufficient quantity of food or water.
 - b. Fails to provide a confined dog or cat with adequate shelter.
 - c. Tortures, deprives of necessary sustenance, mutilates, beats, or kills an animal by any means which causes unjustified pain, distress, or suffering.

Prince, Diva and Old man were not denied medical care, shelter, food or water. They were not tortured, deprived, mutilated, beaten or killed. Any unjustified pain distress or suffering any of these dogs endured was not caused by me. I did not break Prince's hip or give Diva lung cancer or heartworms. Old Man did not get Parvo from my home or from me not vaccinating. He caught it from a litter I didn't know had it that arrived vaccinated and with health certificates. I along with everyone else thought they were healthy. A vet had just looked at them the day they left for Iowa. If a vet didn't catch it how would anyone else? Diva was failed by her previous owners who did not have her on heartworm prevention. Prince's hip may have been an accident but his owner was not honest about when it happened and then left him to sit for 2 months with no pain meds and no surgery scheduled.

Right now we are assisting with a large scale rescue that involves 80 dogs. They were all in a licensed 501c3 rescue. Here are some before and afters of a few of them.

A neglect charge will prevent dogs just like these from getting a second chance. Local shelters said they would euthanize upon entry, these dogs have no one else.

The woman in charge of the rescue that had all 80 dogs is receiving no charges.

Diva-

Diva was found as a stray in Southern Illinois in December of 2018 and came to UB on January 29th of 2019. She was chosen out of a group of dogs by Crystal Brown, a foster. Crystal arrived to get Diva the night she arrived at UB in Iowa. She was spayed, vaccinated and we were told she was HW negative. A different dog that we took in from the same shelter on the same date tested positive, so I know all 3 of the dogs we took in that day had been tested. Diva went to her foster home and did fine. On August 9th Diva started coughing up pink flem that looked like it could have a little bit of blood in it. Crystal had just taken in another foster who we suspected had given Diva kennel cough but I had her bring her back to me immediately so I could keep an eye on her. She seemed fine upon return and wasn't coughing at all until August 15th and at that time we took her to Iowa Veterinary Specialties which is an ER clinic here in Des Moines. Stephanie Larson DVM did an x-ray of Diva's lungs and I was informed that Diva had lung cancer. There were nodules all over Diva's lungs and Dr Larson said it was inoperable. I sent the x-rays onto Dr Carnavale DVM at ISU. She suggested another heartworm test. I took Diva to Starch Pet Hospital on 8-19-19 and LeAnne Wichman DVM looked at the x-rays and also thought a heartworm test should be done. We did one at that time and it came back positive. It was concluded at that time that Diva had both lung cancer and heartworms. Diva had gained back 5lbs in the previous month and was looking and feeling much better then she had been in August. This was largely due to the prednisone that she was taking for her heartworms. Dr Carnavale and I talked about quality of life and discussed whether or not Diva should be on prednisone on a long term basis because without it she coughed bad and had no energy and would not eat. We had no idea how much longer Diva was going to be with us so we made her a bucket list and started checking things off. We took her for lots of car rides.

We went out for plain cheeseburgers.

We went shopping at petco.

And Diva was allowed to sleep in bed with me and the other dogs.

As you can see in the previous photo and one taken the following month Diva had put on weight.

She had become a part of my pack and had bonded with me and my dogs.

If a surgery even might have saved this dogs life I would have done it no questions asked. I was told by 2 of the vets that saw Diva that her condition was inoperable due to the nodules all over both lungs. I am attempting to get a statement from the vet at IVS. We were treating Diva's heartworms with the slow kill method. I was advised by a vet in Texas that the injections would be too hard on her and that she may die from them. Who knows more about heartworms in dogs then the veterinarians in Texas? We decided keeping the numbers of the heartworms down and killing them off slowly with the oral ivermectin, and the heartguard which kept the heartworms from being able to multiply and kept her from being able to transmit it to other dogs as well as the prednisone to keep her comfortable was the best way to go. The injections would have meant she would have had to be kenneled for 30 days after and that meant 30 days of unhappiness for Diva and that could have all she had left to live. So it comes down to quality of life as far as the heartworm treatment went and we decided that the injections were too risky and the recovery time was too lengthy for a dog with limited time left. Diva was a part of my daily life for several months. She and I bonded and I would have done anything to save her. Now, having said that I know of plenty of people who have opted out of life saving surgeries for their dogs and let them pass on at home from natural causes. As far as I have ever known this was not a crime. Would the ARL have performed this surgery on Diva? Obviously not since they chose to leave her in a cage from November to February and then euthanize her. It is my belief that the only reason Diva was euthanized is so they could say my neglect had resulted in the death of a dog which is hardly the case. I loved that dog like one of my own and as I said I would have done anything to save her. The head of animal control was sent a text on the morning of November 23rd telling him that Diva was sick and what meds she needed. Ben Ihde called me 5 days later and told me she was not doing well and asked me if he could come and get her meds. I said yes and the same day someone from the ARL came and picked them up. Her prednisone was not in a bottle with her name on it since I had it on hand from a bulk order I had put in for it when we treated the 30+heartworm positive dogs we brought back from Texas after the hurricane. I used that instead of going to the vet to get it filled. Dr Carnavale and I had discussed her being on prednisone previously.

As you can see by reading the details of these cases I did not neglect any dogs. I believe this was done in retaliation to a post I put up about Ben Ihde, the officer who entered my home with no warrant and seized Diva and all of the others I had here waiting to be picked up by fosters or adopters in the next 2 days. He started the investigation that lead to these bogus charges and his name is on every one of them. Ben with the help of Kelsey Reimers, a volunteer that I removed from the rescue in February of 2018 for stealing 300.00 (I have a witness who was there and will testify to her stealing the money) and a group of people that she has recruited want me shut down. Officer Ihde was yelling at me that "I knew nothing about these dogs" and made it clear in so many words that he did not like Pit Bulls. I would ask how a person survives working at the ARL with a grudge against this type of dog but it seems to be widely shared by several ARL employees. I will attach the post I put up about Ihde the night I was released from jail.

As far as the citations earlier in 2020 and the end of 2019, I have proof in the form of a document from the Department of Agriculture that Josh Colvin who at the time was head of

Animal Control which was run by the ARL, had been in my home and saw that I had over the limit of 3 dogs and said as long as they did not live here and it was temporary he had no problem with it. The Dept of Ag was with him that day and recorded how many dogs were in my home. I have that document and will add it here as well. It is my personal opinion and the opinion of Unbreakabull Bullies supporters that this is harassment on the parts of Ben Ihde and Kelsey Reimers and a few other women. I will be filing a lawsuit just as soon as this is over for harassment, defamation, slander, libel and revenge porn as the women who I am not naming at this time shared a private naked photo of me on Facebook. They also have messaged supporters and people who would have been supporters and told them not to donate, support, adopt or foster for UB. They also have a photo of me from 2013 smoking wax, a marijuana derivative and are telling people it is methamphetamine and it is a current photo. That can be proven to be a lie since the Pit Bull tattoo I got after I started this rescue in 2014 is not on my arm. They have also done things like sneak onto my property and take photos, send pizzas to my house and filed complaint after complaint to the Department of Agriculture. Somehow Kelsey Reimers knew I was going to be arrested on November 22nd and February 20th as she was outside my home recording it with her phone. This gives weight to my theory that Kelsey and Ben are in fact on a mission to get revenge since Ben would have had to have told Kelsey that he was going to be arresting me on both occasions. I have screenshots of both of the recordings Kelsey took since she shared them on facebook with obvious excitement and joy that she had caused all of this. Kelsey and Ben have caused the deaths of close to 100 dogs by causing all of this. We pull dogs from high kill shelters and many of them have been destroyed as a direct result of them no longer working with us due to the lies and bogus charges. Kelsey is patting herself on the back no doubt. She has relentlessly called and emailed my landlord in hopes of me ending up homeless. I will attach those emails as well. She pretended to be my landlord on November 22nd when she made the call that wound up with my dogs being illegally seized and me put in jail. I confirmed with my landlord on the 25th of November McAfee realty and Roberta McAfee did not make that call. I have that email and will attach as well.

One of the dogs seized by Ben Ihde on November 22nd was my daughter's dog, Hades. He was one of Tommy Mauk and Theresa Muhs dogs whose story I shared earlier in these documents. He did not live in my home full time. He came and went with my daughter back and forth to Fort Dodge where he was licensed. Since my personal dog Beast is my service dog for my epilepsy that makes him not count towards the total of 3 dogs that you are allowed in the city of Des Moines. I have a letter from my doctor that states Beast is my service dog and allowed to be in my home from 2013. That would have made Hades here legally. He was licensed, vaccinations were current and I had proof on hand, and he was covered under my insurance. They seized him anyway without even looking at the document from my doctor. They then adopted him out and he was returned after Ben Ihde illegally gained ownership of all of the dogs taken from my home on November 22nd. He did this by emailing me at 9:30pm and telling me I had to have a list of people picking up the dogs to him by 9:30am the following day. Those are not business hours so I did not see the email in time. He was sent the list the same day before closing at the ARL and long before the 24 hours were up that you are supposed to give someone to respond. The post the ARL put up about my arrest has done irreversible damage to the rescue. The seizure of my dogs on November 22nd was reported to the local news stations as not a

hoarding situation and it was noted there was no neglect. After my arrest on the 20th of February there were claims of hoarding and neglect that stemmed from my dogs being seized on the 22nd of November by the local news stations. They contradicted themselves and negatively affected the daily operation of this rescue. I will attach both news stories.

Message between Joe Stafford and I about Diva that took place on November 23rd.

Officials seize about 17 dogs from home; DSM PD says it isn't hoarding case

Updated: 10:18 PM CST Nov 22, 2019

Reporter

DES MOINES, Iowa — Des Moines police arrested a woman Friday for allegedly keeping at least 17 pit bulls in her home. However, the woman was running a nonprofit animal rescue organization.

Authorities were called to the 1300 block of Ascension Street, where officers with Animal Control Services removed 17 dogs from the home. Police arrested 46-year-old Tina Petraline on suspicion of possessing the dogs.

DSM PD says it isn't a hoarding case on November 23rd.

Again it is said it is not a hoarding case on November 23rd.

The Sandyville case is the Lindsey Morrow case which I have attached photos and a story on in the beginning of this document.

This states it was a hoarding case when on November 23rd the DSM PD said it was not a hoarding case.

The DSM PD did not call the ARL for help. The ARL called the DSM PD for help. Officer Ben Ihde was the police officer on duty for the ARL that day and the ARL was here before any police were earlier that day and were with Ben when I was arrested. The DSM PD were then called by him for reasons unknown by me.

This is a section of a different news story. The section where it claims I was selling a dog to a breeder under a contract is not accurate. This is where the harassment claim comes in. I had a french bulldog puppy that I had bought from a friend in October for 1,000.00. She was illegally seized along with the other dogs on November 22nd. The ARL knew I had gotten a 4th dog and told me I did not have to send the 4th dog waiver in until she was 6 months old. I had it completed on my desk. In the city of Des Moines to have a 4th dog it has to be under 20lbs, spayed, vaccinated and you have to apply for the waiver. Cj my puppy was not old enough to be spayed or have her rabies vaccination. I was given the excuse that they do not allow french bulldogs as 4th dogs because they can get to be more than 20lbs. I have since gotten a 5 year old french bulldog and had no issues obtaining a 4th dog waiver. She is only 18lbs, spayed and vaccinated. The woman I got my puppy from agreed to go to the ARL and claim Cj but had to forge a fake contract and forge my signature on it in order to do it. She then agreed to hold Cj until I could get moved and then return her to me. Instead she sold my puppy for 3,000.00 and kept my money and the additional money she was paid for Cj bringing her to 4,000.00 for my puppy. If someone can subpoena the contract I can easily prove that I did not sign that

document. I have the original contract that I signed. The one she made up after Cj was seized is not the same contract. The ARL would not have allowed her to pick up Cj if she had provided the original contract that was signed by me. I called the woman who sold me the puppy after I learned that my friend had sold her demanding her back or the return of my money, neither of which she complied with. Instead she filed harassment charges on me for a post I put up naming the woman and telling about the medical bills associated with the puppy after I got her. She had kennel cough and coccidia and needed to be treated for both. I also talked about her selling my puppy behind my back. My question then becomes if I received harassment charges after posting true statements that can be proven to be true

All of the previously mentioned has caused me a great deal of stress. My dogs never should have been seized without a warrant. Had they not been seized none of what followed like the neglect charges and me losing my puppy would have happened. The post the ARL put up about me never would have been posted and my rescue would still be thriving. What they have done cannot be undone. The damage they have done to my reputation is not able to be mended. They have destroyed a rescue that has saved the lives of over 1,000 dogs and 100 cats. Not only has this caused me a great deal of stress it has affected every aspect of my life and caused my depression to become debilitating.

I have all of the documents, screenshots, news articles and posts to prove everything I am saying. Anything I have forgotten to add or attach I will gladly send to you at any time.

Update: I signed the plea bargain as that was the only way the ARL would ensure the safety of my personal pets. I have an email between my first attorney and I to confirm this. The plea bargain consists of a 65.00 fine. No jail time or community service, and the 65.00 fine is the lowest it could have possibly been. My second attorney refused to allow anyone else in the room with us or speak to the Animal Justice League of America's founder Shane Rudeman who wanted to talk to him and had set aside time to do so that day. My boyfriend who was not allowed to come into the room when I was forced to sign the plea bargain could hear my attorney yelling at me and asked to come in and once again I was told no. Had he allowed my boyfriend in the room or had he talked to Shane the plea bargain would not have been signed. I am adding a screenshot between my boyfriend and myself from the time I was in the room with my attorney.

The lower half of this screenshot shows that my boyfriend was not allowed in the room and that the attorney was being forceful and his behavior was inappropriate.

The following are vet bills from the “neglected” dogs.

State report from a surprise inspection conducted by Alissa and Josh Colvin. There were 5 dogs here that day and Josh said it was fine as long as they did not live here. I had no issues with Animal Control the entire time Josh was the head of the department. Everyone knew there were more than 3 dogs in my home and there were never any concerns about the conditions or about the care of the dogs. I have never had a neighbor complain or a dog at large. All of the dogs that came and went from my home were carefully contained and kept healthy or restored to health if they arrived unhealthy.

In short the only thing I am guilty of is having too many dogs in my home. Officer Ben Ihde knew without a doubt that I was going to sue and make it be known that my dogs were seized illegally. He then had to find a way to make me look like the bad guy and who better to file bogus charges than a police officer? One of the charges he filed was past the statute of limitations but that didn't stop him. He was out to ruin my name and to save himself from a lawsuit. If any of the charges stuck he knew that my lawsuit would not carry as much weight in the eyes of the law. It is not about the animals to the people who created this disaster. It is about revenge and getting out of a lawsuit. I am debating on still filing a lawsuit against the DSM PD. As you can see in the news stories they admit to not having a warrant and they said it live on the news as well. The interview that channel 8 did in my home on February 23rd was cut down to nothing so no one knows any of this. Also, the ARL of Iowa attorneys told Shane Rudeman of AJLA that they thought the charges needed to be thrown out.

If there is any area of any of this that is not clear or you have questions on please email or call or message me. Thank you to anyone who took the time to read all of this.
