Powerful cleaning & disinfection

teon
teon +

Teon

Next step for reprocessing

The new Teon is a highly efficient thermal washer disinfectant. Thanks to its dedicated programs it offers the best cleaning and disinfection for your dental practice. Teon improves the job organization of your hygiene room, reduces the reprocessing time and increases the protection against cross contamination.

Teon is available without any interior, so you can tailor the device exactly to your needs. For example, with the »**starter pack**« (for more information, see page 6).

teon

Teon +

The best approach for reprocessing

Teon +, the premium W&H thermal washer disinfectant, ensures the most demanding clinics an excellent automatic cleaning system for instruments. Teon + offers full traceability to meet current regulatory requirements. Its innovative active air-drying system offers a new standard in terms of quality and performance.

Complete your Teon + with the interior you really need. The device is sold empty, but can be equipped with, e.g. the »**injection pack**« (for more information, see page 6).

teon +

High standard for cleaning and reprocessing

High chamber capacity

Ease of use display

Large selection of accessories

Cleaning of the hollow body

High cleaning performance

Gentle on material thanks to dedicated programs

Traceability and connectivity through Ethernet module

Reliability thanks to heater elements outside the wash and gapless chamber

teon+

Teon + offers in addition:

- › High drying quality for sensitive instruments
- › Active air-drying with HEPA filter

Smooth surface and modern design

The thermal washer disinfectors are distinguished by their high-quality performance and thus ensure a successful, holistic cleaning process for dental instruments. Thanks to their modern, elegant design, they can be perfectly integrated into your reprocessing room.

Safety

The integrated spray arm monitoring enables excellent reprocessing results. The speed variable pump increases/decreases the pressure according to the step of the reprocessing process. In addition, the filter system removes dirt particles to prevent damage occurring to your instruments.

Convenience and ergonomics

The salt container integrated into the door ensures easy and convenient refilling. Thanks to the ergonomics concept, no equipment needs to be removed.

Hygienic rinsing room

The rinsing chamber enables higher throughput with excellent hygiene purity. In addition, the optimal size allows a higher capacity per batch.

Ease of use

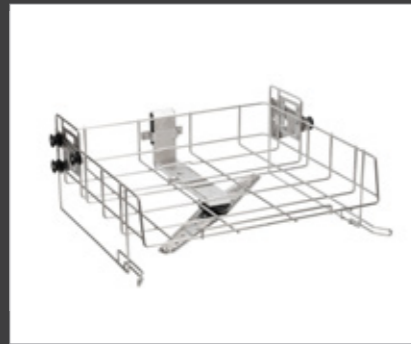

The modern design and intuitive user guidance make it particularly easy to operate in the demanding everyday reprocessing routine. The control panel is easy to operate and also serves as a door opener.

Complete and versatile

Reprocessing can be as simple and efficient: with the optimum equipment accessories.

1 – Upper basket

Flexible for inserts and height adjustable.

2 – Insert

Intended for different instruments and for flexible use.

3 – Lower basket

For holding mesh trays as well as various inserts.

4 – Insert

For accommodating various instruments and insertable for upper and lower basket.

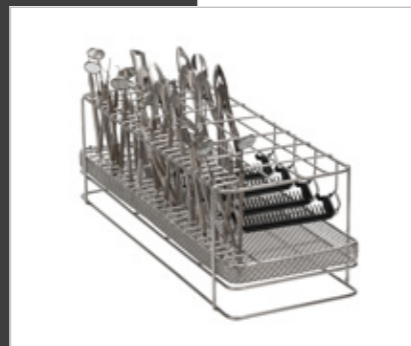

»starter pack« 1–6 includes the perfect range of basic equipment.

»injection pack« 3–8 complemented by an additional equipment perfectly and particularly suitable for handpieces.

5 – Insert

Different compartments for optimum loading of upright instruments.

6 – Insert

Equipped with different compartments for optimum loading.

7–8
Upper basket –
Injector nozzles
For various instruments with injector nozzles.

Please note: The devices are sold empty. Add the appropriate equipment to your device.
