

# Chronic Wasting Disease Surveillance

Help monitor the health of our wildlife populations

Chronic wasting disease (CWD) is a fatal disease that affects the central nervous system of deer, elk and moose. There is no cure or prevention for the disease.

The disease is caused by infectious proteins, called prions. These infectious proteins accumulate in the nervous tissue of the animal causing microscopic holes in the brain. Animals appear healthy in the early stages of the disease. CWD is invariably fatal and expected to have negative impacts on deer and elk populations throughout North America.

**The disease transmits from one animal to another through contaminated saliva, feces, urine, soil and water.**

### Priority surveillance zones for 2017

Any cervid (i.e. deer, elk or moose) harvested in Saskatchewan can be tested free of charge for CWD. However, in an attempt to increase sample size in certain areas of the province, priority surveillance zones have been set for 2017. These include; **WMZ 12, 13, 14E and 14W** in the south-west. **WMZ 16, 31 and 33** in the south-east. **WMZ 50, 63 and 64** in the north-central. In order to make submission easier, remote drop-off freezers have been set up at Saskatchewan Landing and Moose Mountain provincial parks. All hunters that harvest cervids in these zones are asked to submit samples for testing.

Field Office	Days	Street
Assiniboia Field Office	Tuesday and Thursday	401 1st Avenue W
Big River Field Office	Monday to Friday	Old Nursery Site
Buffalo Narrows Field Office	Monday to Friday	310 Davey Street
Candle Lake Field and Park Office	Monday to Friday	Highway 265
Christopher Lake Field and Park Office	Monday to Friday	379 Main Street
Creighton Field Office	Monday to Friday	298 1st Street E
Duck Mountain Field and Park Office	Monday to Friday	Duck Mountain Office
Estevan Field Office	Monday to Thursday	128 - 1302 3rd Street
Fort Qu'Appelle Field and Park Office	Monday to Friday	203 Victoria Avenue
Greenwater Lake Field and Park Office	Monday to Friday	Greenwater Lake
Hudson Bay Field Office	Monday to Friday	501 Prince Street
Humboldt Field Office	Tuesday and Thursday	12 - 1715 8th Avenue
Ile A La Crosse Field Office	Monday to Friday	Lajeunesse Avenue
Kindersley Field Office	Tuesday and Thursday	113 2nd Avenue E
La Ronge Field Office	Monday to Friday	1328 La Ronge Avenue
Leader Field Office	Tuesday and Thursday	103 1st Street W
Lloydminster Field Office	Monday and Thursday	121 - 4815 50th Street
Loon Lake Field and Park Office	Monday to Friday	Makwa Lake Provincial Park
Maple Creek Field Office	Tuesday and Thursday	116 Harder Street
Meadow Lake Field Office	Monday to Friday	Unit 1 - 101 Railway Place

Field Office	Days	Street
Melfort Field Office	Monday to Friday	107 Crawford Avenue E
Moose Jaw Field Office	Monday to Thursday	206 - 110 Ominica Street W
Moose Mountain Field and Park Office	Monday to Friday	Park Office
Nipawin Field Office	Monday to Friday	210 1st Street E
North Battleford Field Office	Monday to Friday	E-1600-1192 102nd Street
Outlook Field Office	Tuesday and Thursday	420 Saskatchewan Avenue
Pierceland Field and Park Office	Monday to Friday	198 1st Avenue S
Preeceville Field Office	Monday to Friday	239 Highway Avenue E
Prince Albert Field Office	Monday to Friday	1st Floor - 800 Central Avenue
Regina Field Office	Monday to Friday	146 - 3211 Albert Street
Rowan's Ravine Field and Park Office	Monday to Friday	Rowans Ravine
Saskatchewan Landing Provincial Park	Monday to Friday	Interpretive Centre

Weyburn Field Office	Tuesday and Thursday	201 - 110 Souris Avenue E
Yorkton Field Office	Monday to Friday	201 - 120 Smith Street E

## Chronic Wasting Disease Testing

Saskatchewan hunters can have their harvested animals tested for chronic wasting disease, **free of charge**.

For more information on how to submit a **sample for testing**, contact your local Ministry of Environment office or visit the ministry's website.
