Foods Keep Longer in Stoneware

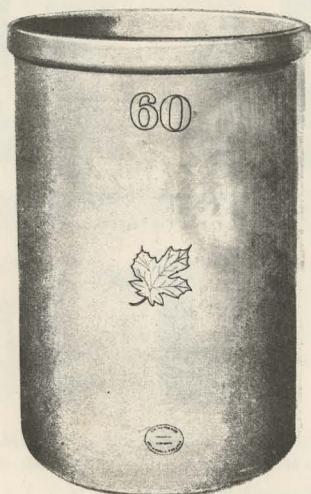

The Forecast School
of Cooking of New
York says:

"The economies of Stoneware in keeping all food-stuffs longer and better are very great. They mean real savings. Bread and cookies, cake, pastry, for instance, keep perfectly fresh and delicious for days longer in stoneware. Waste due to staleness is ended."

MANUFACTURERS QUALITY STONEWARE

60 Gallon Tubs

BETTER THAN BARRELS FOR BLEACHING,
PACKING OF MEAT, ETC.

SIZES

These Tubs are made in 15, 20, 25, 30, 40, 50

Sauer Kraut and Pickle Jars

Acid Proof

The above are popular sizes for packing eggs, butter, lard, vegetables, home beverages, used in kitchens and refrigerators extensively by hotels, clubs and restaurants.

Jars are furnished in the following sizes: $\frac{1}{4}$, $\frac{1}{2}$, 1, 2, 3, 4, 5, 6, 8, 10, 12, 15, 20, 25, 30, 40, 50, 60 gallons.

Maple Leaf Stoneware Jars are highly vitreous and well glazed making them strictly acid proof and are very much in demand by laundries, chemical manufacturers, photographers, batter manufacturers, also factories, mills, and stores for containers of all kinds including solutions for fire fighting.

All sized jars furnished with or without covers. Also all sizes manufactured with faucet holes any dimensions required.

COSTS LESS. EASY TO KEEP CLEAN. NEVER WEARS OUT

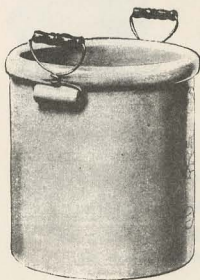

MANUFACTURERS QUALITY STONEWARE

The above illustration shows how an attractive window display can be made with Maple Leaf Jars.

Improved Bailed Jars

MANUFACTURERS QUALITY STONEWARE

The Monmouth Filter

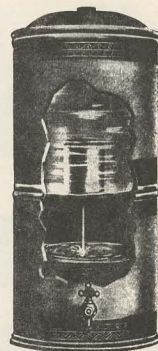

Sectional View

It Filters the impure ice as well as the water. It is simple, also practical.

Any child can operate it. No metals used, hence no corrosion.

Manufactured by
WESTERN STONEWARE
COMPANY

Monmouth, Illinois

The efficiency of the filtering stone used in the Monmouth Filter has been proved by repeated tests by state chemists and others who give it unqualified endorsement.

Mr. Jean Robert Moechel, the well known bacteriological expert and analytical chemist, in making a report of results obtained from the Monmouth Filter, says:

"This is the most efficient filter we have ever examined. The results speak of themselves and are most gratifying."

The tests made by Dr. Moechel are tabulated on the opposite page.

In these tests, count of bacteria was made before and after filtration. The results obtained by filtering are stated in percentages.

The typhoid germs are the only ones mentioned in this list that are really dangerous—the fact that this filter shows 100% efficiency in removing such dangerous germs should convince the most skeptical that it will remove all other kinds of germs as well.
