

EZY AS COMPRESSION STOCKING APPLICATOR

- The Ezy As Handle allows compression garments to be applied without having to bend down and is great for people with limited mobility.
- Unlike regular stocking donner doffer, a compression stocking aid can help you put on your properly sized compression stockings by keeping the stocking wide and reducing the amount of compression while you pull the stocking over the foot and heel. This will make the process quicker and reduce the strain placed on your back.
- An optional handle attachment is available to be used with the Ezy As applicator.

 **EzyAs™** **Warranty**
1 Year
