MRPC NEEDS Help!
TELL US ABOUT YOUR

Broadband Internet

The Meramec Regional Planning Commission (MRPC) is working to identify areas in rural communities that struggle to connect to reliable, high-speed internet.

To accurately identify these areas, we are asking residents take a few minutes to please visit www.mobroadband.org/speed-test-2/ and take a quick internet speed test to help us determine what areas in our community are underserved, or do not have access to internet at all.

If you do not have access to internet, but can use a cell phone, school, library, or work computer, please visit the speed test website, enter your address and click "there is no internet service at this location" to add your location to the unserved area list.

Please note: This test is not meant to assess cellular data and may only provide accurate data when connected to Wi-Fi or ethernet cable.

This test is not meant for cellular data.
