is between:

Client:

and

Inspector:

For an inspection of the following Property:

Common Street Address:

Fee:

SCOPE OF SERVICES PROVIDED

SCOPE OF THE INSPECTION: A home inspection is a noninvasive, visual observation and operation of the accessible systems and components of real property, including buildings and other improvements. Its purpose is a) to identify conditions that, in the professional opinion of the Inspector, are significantly deficient or b) to identify systems and components that are at the end of their service lives.

The Inspection is strictly limited to the examination of readily accessible, installed systems and components of homes by using normal operating controls and opening readily operable access panels, where applicable, of the following components of the Property: structure, foundation, exterior, roof, attic, major mechanical systems (heating, air conditioning, electrical, and plumbing), built-in appliances, and interior (floors, ceilings, walls, windows, and doors). All components will be inspected using the current Standards of Practice (SOP) of the American Society of Home Inspectors ("ASHI") posted at www.homeinspector.org. Where multiple instances of the same component exist, a representative number shall be inspected. The observations of conditions are limited to those areas of the home which can be reached, entered, or viewed without difficulty, moving obstructions, or requiring any action which may result in damage to the Property or personal injury to the Inspector. Any additional services outside the list of components in this contract or in those rules must be specifically agreed to in writing between the Inspector and the Client.

The Inspector will prepare and provide the Client with a written report for the sole use and benefit of the Client. The written report shall document any deficiencies discovered in the Property's systems and components. A deficiency is a condition that, in the reasonable judgement of the Inspector, is not functioning properly or is unsafe. However, the fact that a system or component is near, at, or beyond the end of its normal service life is not, in itself, a deficiency in the system or component.

Nothing in the report and no opinion of the Inspector should be construed as advice to the Client to purchase, or not to purchase, the Property, or serve as a prediction of future conditions or the value of
