

Pleasant Lake Starry Stonewart(SSW)

Kevin Bergstrom

Vice President Pleasant Lake Improvement Association

History

- ▶ DNR found on North Landing (County Landing) August 8, 2018
 - ▶ Two small patches found in 8 locations less than an acre
 - ▶ Actions Taken
 - ▶ The county closed the landing
 - ▶ Additional Surveys completed by DNR, Bluewater, and Freshwater
 - ▶ Did not find anywhere else in the lake
 - ▶ Blue Water Science Dove and manually harvested
 - ▶ Copper Sulfate applied to the area

Management

- ▶ Every Month from May through September County Landing
 - ▶ Survey and dive to find SSW
 - ▶ Manually harvest SSW
 - ▶ Treat with Cutrine plus
- ▶ Once each Summer
 - ▶ Do a whole lake survey
 - ▶ Survey and Dive on City landing

Progress

- ▶ As far as we know SSW has not spread to other parts of lake
- ▶ 2018
 - ▶ Harvested about 5,000 grams
- ▶ 2019
 - ▶ Harvested about 4 grams
- ▶ 2020
 - ▶ Harvested about 187 grams

Lesson Learned

- ▶ Find it early and treat aggressively
