

## Fire Safety and Fire Marshal

The fire safety course covers fire prevention in the workplace and the behaviour expected in the event of a fire at work. The fire triangle is used to help the learner understand how fires are started, and how to spot fire hazards. Examples of workplace fire safety measures required to prevent common fires are explained. The importance of maintaining clear exit routes are also covered.

At the end of this session participants will be able to:

- List their obligations and that of their employer with regard to fire safety
- Describe actions to be taken in the event of a fire occurring at work
- Identify the correct fire extinguisher for use on a range of different fires
- Describe how fires occur and spread
- Describe how they can reduce the risk of fire occurring
- Understand how they may reduce the threat of fire in their homes (where applicable)
- Understand the duties that are undertaken by the fire marshal.
