

The Honeybees of the British Isles

Beowulf Cooper's professional career was as an entomologist in the Government's Agricultural Advisory Service. He helped to found BIBBA, Bee Improvement and Bee Breeders' Association with others in 1964. He died suddenly in 1982 and left a huge amount of unpublished work which forms the substance of this book.

This book is not for beginners. However, it does make an interesting read if you want to take your beekeeping to the next level to include genetics and bee breeding.
