What does "decentralized" mean? What are the advantages and what are the benefits?

Decentralized marketing is created with an automated contract that offers you maximum security and sustainability. A smart contract is an automatic execution algorithm. It exists within the Tron blockchain , one of the TOP cryptographics currency.

Smart contracts, like cryptocurrencies, are decentralized. They work strictly according to the underlying program, without the possibility of subsequently chan ging the defined execution. The code that contains all the logic of the contract expiration is on the blockchain and all calculations are provided by millions of computers around the world. This ensures that there is no risk of hacking into the smart contract and stopping the project.

* The blockchain is an immutable record of transactions and information, which is cryptographically protected from any subsequent manipulation using thousands of independent computers worldwide

Here, the order of cost by slot is different. The first one costs 200 trons, the second one costs 400, and then up to the 10th slot there is simply a doubling, and from the 10th the most interesting levels begin, revealing the possibilities of the Forsage. And here the order of value is clearly in the Golden Ratio (Fibonacci numbers).
Fibonacci number order is: 1, 2, 3, 5, 8, 13, etc.
And prices (in TRX) from 10 slot till 15 are: 100 000, 200 000, 300 000, 500 000, 800 000, 1 300 000

The first slot of **x3** & **x4** programs costs **100 TRX** each, and **xGold - 200 TRX**. They are bought together; separately the 1st slots cannot be taken.
Accordingly, the start to the platform is generally **400 TRX**. You can purchase all further slots separately, in order from the smaller to the larger. For example, it is impossible to buy a third slot without having a second open.

All partners in your slots of the Forsage x3 program are your personally referral partners. When you invite partners, they take places under you. The distribution of payments when filling out the matrix automatically occurs as follows:

The first referral partner takes a place under you.
100% payout goes to your personal wallet

The second referral partner takes second place below you.
Payment is also instantly credited to your personal wallet.

The third partner takes third place below you.
You again receive 100% income, but in the form of REPEAT.

REPEAT opens the same slot for you again, and you continue to receive income from it. Reopening the slot, you take next free place in your superior partners' slot. Accordingly, 100% for repeat is transferred to your superior.

In parallel, the **FORSAGE X4 PROGRAM** also works for you, here an overflow system is organized from above and from below. We are building a team together. There may be at least all of you invited, at least not one invited by you, or mixed.

Partners who takes two places below you in the first line are two places in the second line of the higher. A 100% payment goes to the wallet of your higher partner.
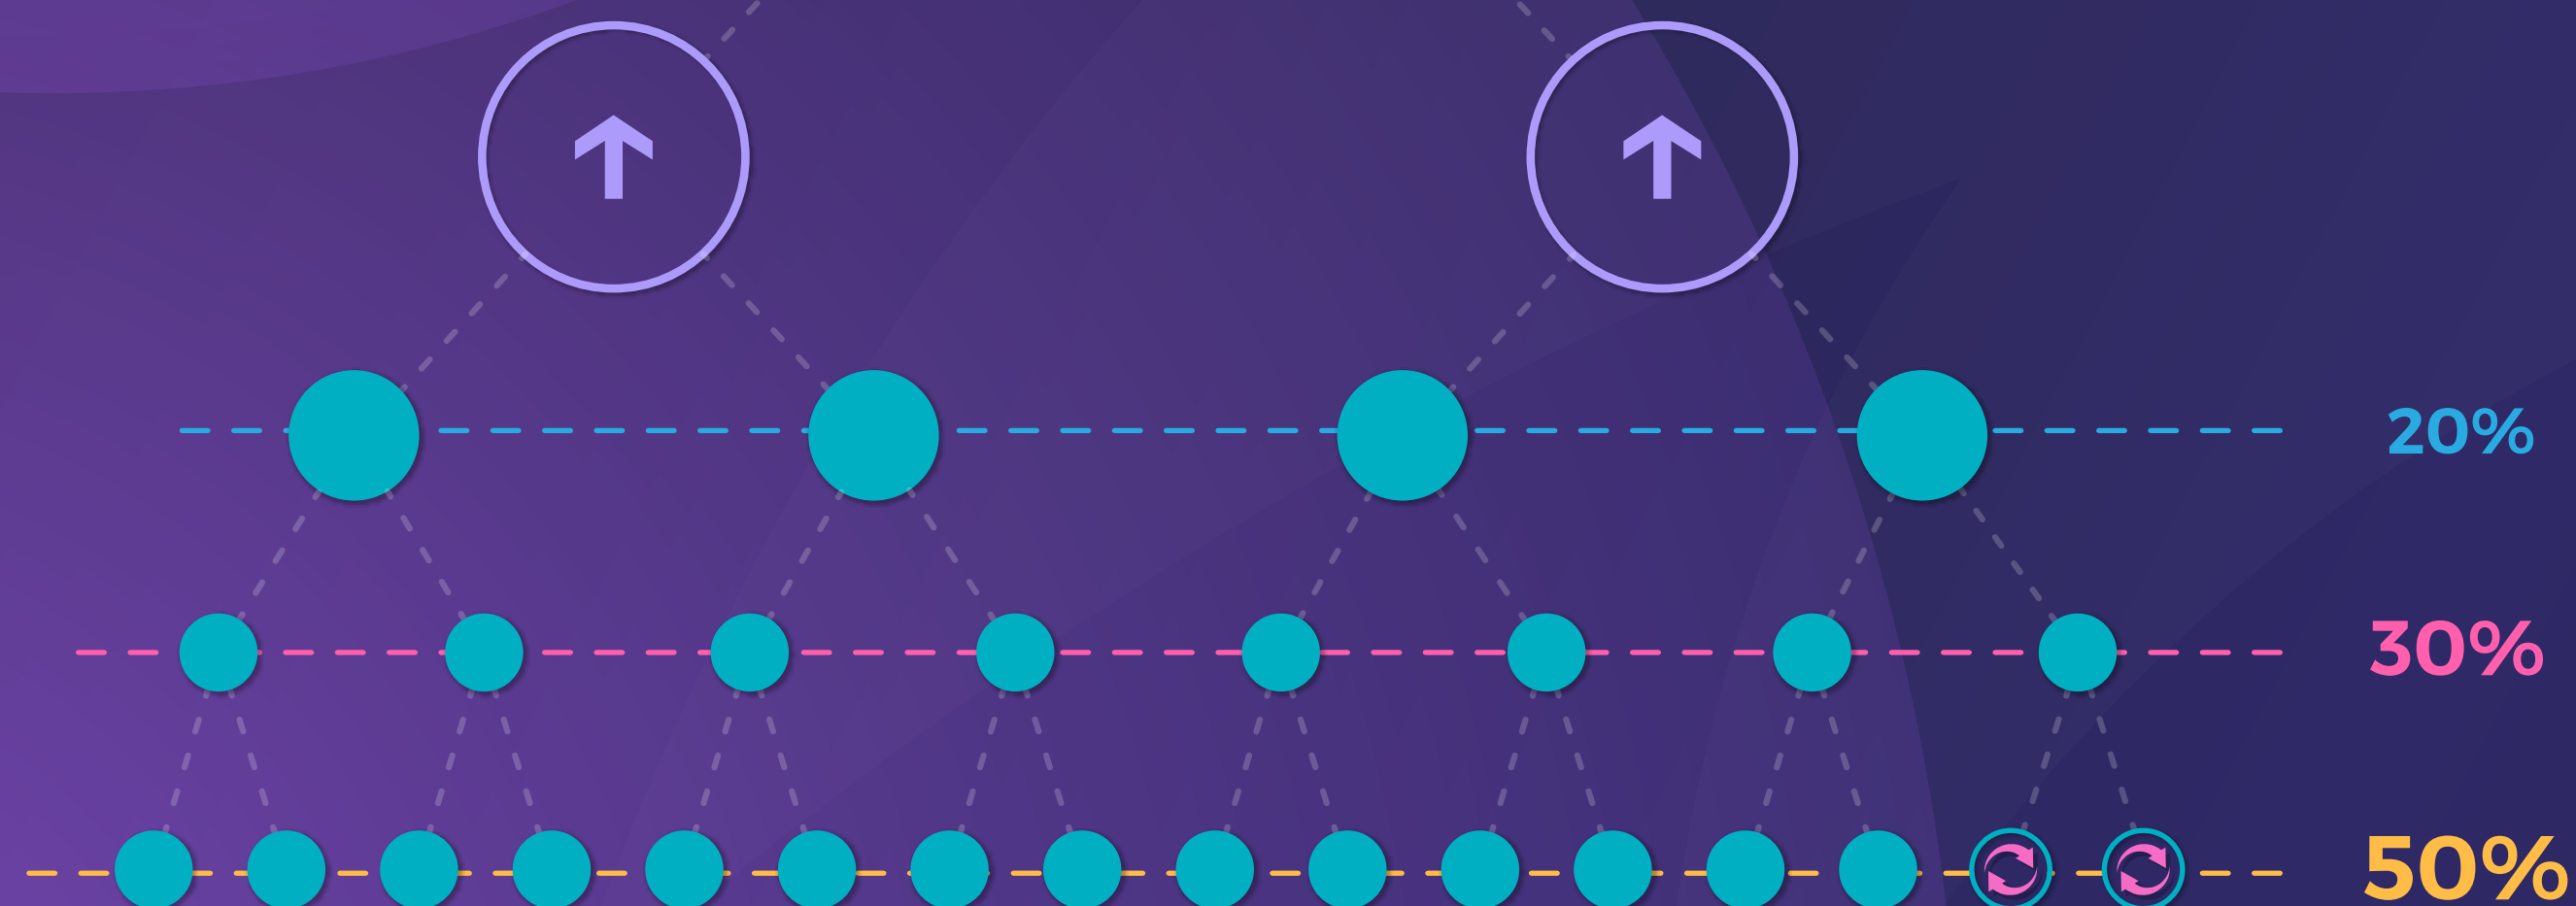

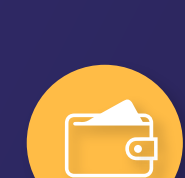

You also receive income from the second line, 100% from four people. Of these, 3 payments go instantly to your wallet.

The last payout is the closing slot, and it also makes a repeat, buying you the same slot again, and the payment of 100% is transferred to your higher partner.

REPEAT – this is the re-opening (purchase) of the slot at the current level.

Repeat opens the same slot for you again, and you continue to receive income from it. Without repeat, this slot would close, and that's it.

Repeat takes place automatically, as soon as you occupy the last free place, the current slot closes and goes to the archive.

You re-occupy the free space in the slot with a higher partner and a new slot with free places opens for you, and 100% payment goes to the wallet of your higher partner.

Similarly, your refferal partners will have repeats, and you will instantly receive income every time.

But how automatic repeat in xGold works?
The secret is - in... your own smart contract!

For a new activation of same slot, you need amount of 100% of its value.
But payments from 4 lines are 50% each, so you need to collect 2 payments.
It is impossible to know exactly in advance in what position the partner should stand inside the matrix, so you cannot take a place in advance.
It is also unacceptable for us to create a fund accumulation in the smart contract of the Community.
We always emphasize that we do not collect participants' funds on the Forsage smart contract balance!
But we need an automatic repeat! Otherwise, situations will constantly arise when you do not have time to pay repeat in time, your partners can get ahead of you. And this is unfair, because it is impossible to monitor the right moment around the clock. Your matrix may close, for example, while you sleep.

But in Forsage, you have your own smart contract on the Tron, which is not available to anyone but you!
The penultimate payment of 50% goes to you individual contract, and only you can manage these funds.
As soon as the last matrix payout comes, it is summed up with the penultimate one, and the new same matrix is automatically activated.

Then everything goes in a circle. And your partners, in the same way, closing their matrices again rise to you in a new matrix.

UPGRADE – is the opening (purchase) of the next slot of a more expensive level. It is done once at the first opening of the slot. The payment goes to your superior partner, provided that he has a slot of this level.

There is enough income from each slot to repeat the slot of the same level and buy a slot of the next level.

You decide whether to purchase the next level slot!
A repeat of the slot occurs automatically. If the next slot is not open for you, then from the second round, after repeat, all payments will be redirected to a higher partner.
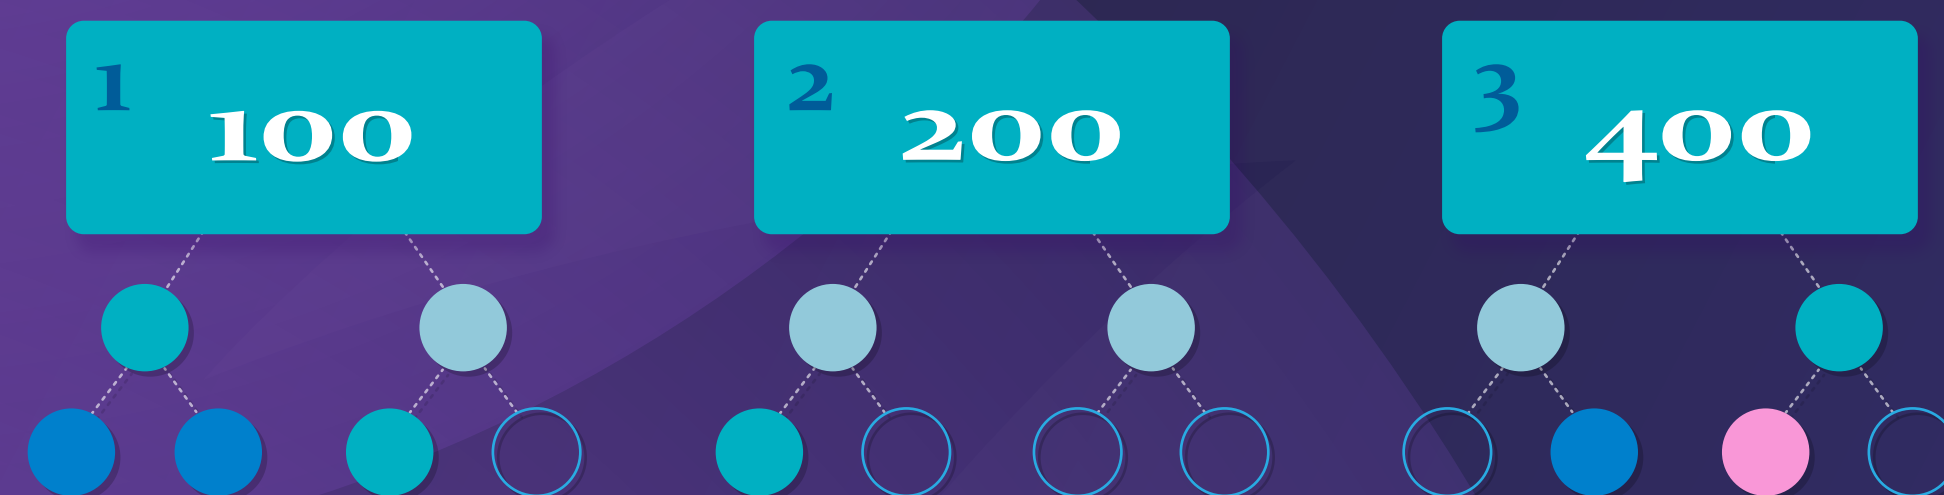

When you buy the necessary slot, then at the next repeat your referral partner will take a place under you, and with each repeat will take a place under you again.

⚠️ **8**   🛒 **9**

➖ **Lost profit** – payment left to a higher partner, due to the lack of an upgrade to a more expensive slot.

🎁 **Extra profit** – payment received to you at the expense of the Lost profit of a lower partner.

● personal partner

● overflow (personally invited partner of your superior)

● overflow from below (personally invited partner of your downline)

● partner who overtook his superior

You can overtake your superior partner by opening slots which he has not yet reached.

In this case, you get up to his superior partner, the closest who has such level of the slot, and the income goes to him.

If he doesn't have this slot available, then in the same way you are already overtaking two superiors until the system finds a partner who already has active slot of this lievel.

Referral link returns the partners. This means that when your superior buys this slot, then the next repeat, you will again take a place under him.

The calculations are underestimated and made at the very minimum indicators, which in principle can not be, because at the time when you buy a level 15 slot, you will have many times more repeats of the low level slots

In fact, if have two with a 15 level slot, then the calculations can be multiplied by 2, 3, 5 .. times

The minimum income from each partner who has reached 15 level of the slot

It is recommended to activate minimum first three slots at the start. This ensures good initial results.
Of course, you can only start with only first slot.
However, just starting with a slot could quickly lead to overflows if your structure develops quickly.
The most successful partners use strategies for starting from several slots at once. They set such an example themselves and the partners do the same. As a result, their turnovers grow faster.
Many start from **5 slots** at once, some even from **7 slots or more.**
