Carmel Coffee Table with Black Base and Pebble Granite Top

NATURAL GRANITE TOPS

As old as the earth itself, Granite is a beautiful natural stone that is rich with historical significance. It dates back to the great structures of ancient Egypt and Greece and the roads built by the Romans, more than 4,500 years ago. Throughout time it has been the material of choice for artists and architects to create splendid monuments, sculptures, and buildings, including the Roman Pantheon.

Granite is among the world's most beautiful, prestigious, and durable stones. It is an igneous stone that forms at great depths and pressure under the Earth's surface, chiefly of feldspar, quartz, mica, and hornblende. The color depends on the proportions and varieties of the minerals in the crystalline stone.

Durability – Since Granite is the hardest of dimensional stones, it is very functional and

Black Mahogany Granite

practical. Due to its mineral composition, it cannot be affected by acids such as in juices or rain and is very difficult to scratch or stain.

Maintenance – This top requires only regular wiping with water or occasionally with mild soapy water. Do not use vinegar, cleaners that contain acid, abrasive cleaners, or furniture polish.

For optimum protection, granite tops should be sealed with a granite sealer upon receipt and resealed every 6 to 12 months. It takes just a few minutes to distribute an even coat of the sealer and then wipe the tabletop dry.

We suggest the following routine care:

- **Blot up spills immediately**
- **Dust with an untreated cloth**
- **Use coasters**
- **Keep planters off the surface**
- **Keep covered when outdoors and not in use**

There are a variety of products available to clean, protect, enhance, and seal through your local marble supplier or in any hardware or building supply store. Use impregnating sealers. For the best long-term maintenance, store the top in a dry location during the off season.

Beauty – Granite is the perfect choice from Mother Nature to enhance its surroundings with antiquity, style, and elegance.

NATURAL MOSAIC TOPS

Care and Maintenance – All Mosaic tabletops are coated with a Stone Enhancing Sealer. The sealer provides extraordinary resistance from stains and moisture and helps maintain the stone's natural color. For optimum protection, tops should be resealed every 6 to 12 months. It takes just a few minutes to distribute an even coat of the sealer and then wipe the tabletop dry.

Airborne dust and dirt can easily be removed with plain water. For more thorough cleaning use a pH-neutral cleaner such as Simple Green, a water-based biodegradable cleaner available in most supermarkets. Avoid ammonia-based cleaners, which can break down the sealant. Spills should always be cleaned up reasonably quickly, since over time they may begin to penetrate the sealant.

Solano Chat with Laguna Mosaic Top

San Simeon with Capistrano Mosaic Top

Cold Climates – We recommend that Mosaic tabletops be stored in a dry area in cold climates or be covered with a suitable outdoor furniture cover. Make a tent with the cover so that it is not sitting on the table – this will promote airflow and allow moisture to escape. A cover that sits directly on the tabletop will trap moisture between the cover and the stone. It is possible that snow sitting on a tabletop for an extended period of time can cause moisture to penetrate the sealer. Marble is porous, and if moisture were to enter the stone and freeze, it might cause the marble to crack. Always seal the tabletop before storing each winter.

ARTISAN-MADE COPPER TOPS

Care and Maintenance – Hammered copper tops are custom-designed and hand-made by artisans. Copper is mined and extruded into copper sheets which are shaped and hammered by hand to produce a one-of-a-kind top. A dark, acid-etched finish is applied to give the top a rich, classic look. These tops are formed onto outdoor substrates according to the customer's needs. Outdoor substrates are ASTM tested, are water/warp/UV-resistant wood-composites, and provide a sturdy foundation into which metal or wood screws can be fastened for base attachment. Heavy, 18-gauge copper is used making each top a lasting work of art.

Artisan-Made Copper Top

Palm Chat with Hammered Copper Top

Maintenance – Each copper top has a special finish applied to maintain the Patina. It requires only regular wiping with water or occasionally with mild soapy water, using a soft cloth. Do not use vinegar, cleaners that contain acid, abrasive cleaners, or furniture polish. Incidental scratches resulting from regular wear and tear can be removed by using a non-abrasive, clear car wax. Apply per product instructions using a soft cloth, let dry, buff.

Del Mar Chat with Brown Base and Sunset Gold Granite Top

Monterey

FIRE PIT SET UP

Del Mar Chat with Black Base and Laguna Mosaic Top

Quick Set Up

1. Check shipment for any potential concealed damage.
 - a. All shipments leave our warehouse wrapped in Orange shrink wrap. If you received your shipment without Orange shrink wrap, it has been repackaged in transit and care should be taken when checking for concealed damage.
 - b. All shipments leave our warehouse with a triangle cone attached to the top to prevent top stacking by the carrier. If your shipment arrives with this triangle cone crushed or missing, care should be taken when checking for damage.
 - c. Product will be received:
 - i. Without damage – sign the receiver without any notations and keep a copy for your records.
 - ii. With damage – Note on the receiver all damage and keep a copy for your records. If the damage is not noted at this time the shipment will be regarded as received by you without damage.
2. Remove all packing material and save until you have verified all parts are in good condition.
3. Separate your shipment
 - a. Fire Pit Base
 - b. Media
 - c. Granite
 - d. Adaptor ring (where applicable)
 - e. Granite insert (when appropriate)
4. Open the box containing the Fire Pit Base and be sure that you have all parts.
 - a. Base
 - b. Trim Ring
 - c. Transition Ring (Del Mar Only)
 - d. Burner
5. You will need to disconnect the burner from the connecting hose to complete the assembly of your Fire Pit.
6. If you are using Natural Gas:
 - i. You will not need the hose with a regulator that is included.
 - ii. You will need to change out the LP orifice that is attached to the bottom of your burner to the NG orifice which is included in your burner box.
 - iii. When using natural gas you need to install the natural gas orifice and then the brass adaptor. You will need to provide a listed flex hose to go from the natural gas source, normally a gas stub to the inlet side of the on/off valve on the unit. Again always check all connections with a soapy solution to check for leaks.
7. Check all fittings to be sure that they are secure. Code requires that all fittings be tested with soapy water prior to lighting to be sure that the fitting is secure.
8. Set your base in your desired location being sure it is on a flat, well supported and level place.
9. If you have a Del Mar Fire Pit, now is the time to place the transition in place.

Carmel Round with Brown Base and Black Mahogany Granite Top

FIRE PIT SET UP *cont.*

10. If your top comes with an insert and requires an adaptor ring, place it on top of your base making sure it is centered prior to placing your top onto the base.
11. If your Fire Pit has a top on it, set the top onto the base. Be sure to have ample help when placing your top onto your Fire Pit base.
12. Place your trim ring in place into the top.
13. Reconnect your burner to the connecting hose and set it into the trim ring. Fire Pits without a special top may not come with the trim ring. Be sure to check that the fitting is secure and test appropriately (See step #6).
14. Put your media, Reflections Glass or Gas Logs, into the burner. When using Reflections Glass, be sure to place all of the Reflections Glass shipped with your Fire Pit into the burner.
15. Remove the door on your Fire Pit:
 - a. If you are using a 20LB LP tank, connect the LP tank to the burner hose with the gas regulator.
 - b. Place the LP tank into the base. Be sure that the LP tank is turned to the "Off" position. If your unit comes with the Deck Guard, place the LP tank onto it to minimize the opportunity for damaging the deck or ground beneath your Fire Pit.
 - c. If you have a natural gas source you will need to change the brass orifice from Propane to Natural gas. The propane orifice should be preinstalled in the burner, if not you can identify the propane orifice which has an adjustment nut on it. The natural gas orifice does not have the adjustment nut.
16. Replace the door on the side of your Fire Pit base.
17. When lighting your Fire Pit:
 - a. Be sure that the control on the side of your Fire Pit base is turned to the "Off" position.
 - b. Remove the door on the side of your Fire Pit and turn the valve on the top of the LP tank to the "On" position. This step is not required for Natural Gas.
 - c. Replace the door on the side of your Fire Pit base.
 - d. Using a long match or "Log Lighter" to ignite your Fire Pit
 - i. Hold the long match or Log Lighter over the burner
 - ii. Slowly turn the knob to the on position
 - iii. When ignition takes place
 - iv. Remove the match or Log Lighter
 - v. Turn the knob to the desire flame height
18. Sit back and enjoy your Fire Pit.

La Paz *Waterfall Firepit Series*

- Remove your La Paz from its protective packaging and place on LEVEL SURFACE in the desired location. To obtain proper water flow it is critical that the La Paz unit be placed on a LEVEL SURFACE.
- The black trim ring (830) will be in place at the top of the La Paz.
- The Stainless Steel burner will be held in place by the black trim ring (830). If it has shifted in transportation be sure that the burner is placed back into the trim ring.
- **Check to be sure that the burner is free of any debris and water before using.**
- Check all fittings to be sure that they are connected and tightened appropriately.
- Check list:
 - Connector hose is attached to the top side of the integrated valve located in the side of your unit and to the LP orifice located at the termination of your burner.
 - For LP connections the end of the hose with regulator is connected to the LP gas supply (tank) and the opposite end of hose is attached to the bottom of the integrated valve.
 - For Natural Gas installations:
 - Replace the orifice that is installed in your burner with the Natural Gas Orifice that is supplied in your instruction envelope.
 - Note: If you have a Natural Gas set up, you will not use the hose with the regulator.
 - Connect the natural gas supply to the open end of your integrated valve. This can be accomplished with a flex line which you will need to purchase.

Water Feature Fire Pit Set Up

- Check all connections for a gas leak by using a soapy water spray. Bubbles will appear if a leak is present. If bubbles appear, tighten the connection and test the area again. Continue this process until you are comfortable that there are no leaks present in your gas supply system.
- Place your LP tank on the metal platform located above the water reservoir at the bottom of the La Paz and attach the LP hose with regulator.
- Your La Paz firepit is match-lite and requires the use of a long handle lighter.
- Load your burner with the supplied media (glass or gas logs) before lighting.
- Light the long handle lighter and hold over the firepit.
- Turn the gas on slowly to allow for a small fire upon ignition. After ignition remove the long handle lighter and adjust the flame to the desired height.
- **Excessive gas should not be used for lighting!!!!!!**

Once you have completed the gas hook up portion of the assembly, you are ready to go forward:

- Check to be sure that the water hose is connected to both the pump and the outlet to the face of the La Paz.
- Place your pump into the water reservoir which for the La Paz is the bottom of the base unit.
- There is a recess at the bottom of the door opening to allow the electric cord to be laid into it and the door to be located in a secure fit.
- Fill the base with water approximately 4 – 5 inches of water. Enough to cover the pump, but not so much for it to pour out of the front return crevice.
- Before plugging the pump into the electric outlet, be sure to wet down the entire face of the La Paz to minimize the opportunity for water to spill onto the floor surface.
- The water pump supplied with your La Paz allows you to adjust the water flow, if necessary.
- Place the door in place and enjoy your La Paz.

www.californiaoutdoorconcepts.com

La Jolla *Waterfall Firepit Series*

- Remove your La Jolla from its protective packaging and place on **LEVEL SURFACE** in the desired location. To obtain proper water flow it is critical that the La Jolla unit be placed on a **LEVEL SURFACE**.
- The Stainless Steel burner will be in place at the top of the La Jolla.
- If it has shifted in transportation be sure that the burner is placed back into its original position.
- **Check to be sure that the burner is free of any debris and water before using.**
- Check all fittings to be sure that they are connected and tightened appropriately.
- Check list:
 - Connector hose is attached to the top side of the integrated valve located in the side of your unit and to the LP orifice located at the termination of your burner.
 - For LP connections the end of the hose with regulator is connected to the LP gas supply (tank) and the opposite end of hose is attached to the bottom of the integrated valve.
- For Natural Gas installations:
 - Replace the orifice that is installed in your burner with the Natural Gas Orifice that is supplied in your instruction envelope.
 - Note: If you have a Natural Gas set up, you will not use the hose with the regulator.
 - Connect the natural gas supply to the open end of your integrated valve. This can be accomplished with a flex line which you will need to purchase.

Water Feature Fire Pit Set Up

- Check all connections for a gas leak by using a soapy water spray. Bubbles will appear if a leak is present. If bubbles appear, tighten the connection and test the area again. Continue this process until you are comfortable that there are no leaks present in your gas supply system.
- Remove the rear door and place your LP tank inside the La Jolla on the bottom of the base and attach the LP hose with regulator.
- Your La Jolla firepit is match-lite and requires the use of a long handle lighter.
- Load your burner with the supplied media (glass or gas logs) before lighting.
- Light the long handle lighter and hold over the firepit.
- Turn the gas on slowly to allow for a small fire upon ignition. After ignition remove the long handle lighter and adjust the flame to the desired height.
- **Excessive gas should not be used for lighting!!!!!!**

Once you have completed the gas hook up portion of the assembly, you are ready to go forward:

- Check to be sure that the water hose is connected to both the pump and the outlet to the face of the La Jolla.
- Place your pump into the water reservoir “kangaroo pouch” located on the back side of the front wall.
- There is a recess at the bottom of the door opening to allow the electric cord to be laid into it and the door to be located in a secure fit.
- Fill the water reservoir with enough water to cover the pump, but not so much for it to pour out of the front crevice.
- Before plugging the pump into the electric outlet, be sure to wet down the entire face of the La Jolla to minimize the opportunity for water to spill onto the floor surface.
- The water pump supplied with your La Jolla allows you to adjust the water flow, if necessary.
- Place the door in place and enjoy your La Jolla.

Trouble Shooting

Problem Observed	Possible Cause	Corrective Measure
Gas Odor	Gas Leak	See "What to do if you Smell Gas" Page 1 in manual
Gas Odor before ignition	Gas Leak	See "What to do if you Smell Gas" Page 1 in manual
Delayed ignition	Low Gas Pressure	Check gas supply pressure
	Clogged or dirty burner ports	Clean burner ports
	Blocked orifice	Check orifice opening
	Faulty valve	Replace valve
Burner lights but does not stay lit	Low Gas Pressure	Check gas supply pressure
	Faulty valve	Replace valve
	Clogged or dirty burner ports	Clean burner ports
	Faulty regulator	Replace regulator
	Windy conditions	Shield from wind
	Out of Gas	Refill tank of propane
Low burner flame	Incorrect gas supply or pressure	Check gas supply pressure
	Blocked orifice	Check orifice opening
	Clogged or dirty burner ports	Clean burner ports
	Faulty valve	Replace valve
	Faulty regulator	Replace regulator
	High altitude	Adjust orifice size for altitude
	Safety valve in regulator tripped	Disconnect fitting from gas tank and reconnect
Backfire of burner	Blocked orifice	Check orifice opening
	Clogged or dirty burner ports	Clean burner ports
Gas Logs Sooting	Carbon (soot) may build up on the surfaces of the gas logs with heavy use. This is more likely to occur when using LP gas. The soot should be cleaned off the surface of the gas logs periodically.	To clean the logs, be sure the fire is out, the gas supply is turned off and the 4 logs are cool to the touch. The soot can then be brushed off with a dry bristle brush. Gas logs can be damaged if mishandled. Dispose of the soot and cleaning materials properly. Keep the soot away from clothing and outdoor furniture.

WARRANTY

Fire Pit Bases:

Construction is warranted against defects in material and workmanship for one year from purchase date. Warranty is voided if any of the following occurs: 1) Incorrect installation, 2) damage caused by accidents, 3) misuse, 4) alterations made by anyone without prior written authorization from California Outdoor Concepts, Inc.

Finishes:

Paint finishes are warranted against peeling, cracking and blistering for two years from purchase date provided the item has not been scratched or abraded. Chips and scratches or fading resulting from normal wear and tear and exposure to the elements are not covered. Warranty is voided if any of the following occurs: 1) Incorrect installation, 2) damage caused by accidents, 3) misuse, 4) alterations made by anyone without prior written authorization from California Outdoor Concepts, Inc.

Burner and Components:

Burners and components are warranted for five years, functional warranty only with proper maintenance from date of purchase for all burners and related components supplied by California Outdoor Concepts, Inc. Although stainless steel is used to manufacture our burners, surface rust may appear on the burner. This surface rust, if it appears, will not affect the operation or life of your burner. Warranty is voided if any of the following occurs: 1) Incorrect installation, 2) damage caused by accidents, 3) misuse, 4) alterations made by anyone without prior written authorization from California Outdoor Concepts, Inc. Product used for commercial or institutional use is warranted for one year.

Table Tops:

- **Granite** - 90 Day Warranty on structural integrity and breakage during normal use from the date of purchase. This warranty is valid only with proper maintenance from date of purchase. Fading, chipping, staining or pitting can occur in natural stone surfaces and these conditions are not covered. Warranty is voided if any of the following occurs: 1) Incorrect installation, 2) damage caused by accidents, 3) misuse, 4) alterations made by anyone without prior written authorization from California Outdoor Concepts, Inc.
- **Mosaic Tile** – If a mosaic tile top develops structural defects due to materials and/or workmanship during the first year from date of purchase, we will replace the table top at our option. This warranty is valid only with proper maintenance from date of purchase. If the original table top is not available or has been discontinued the manufacturer will replace it with one of similar style and quality of our choice. Fading, chipping, staining or pitting can occur in natural stone surfaces and these conditions are not covered. Warranty is voided if any of the following occurs: 1) Incorrect installation, 2) damage caused by accidents, 3) misuse, 4) alterations made by anyone without prior written authorization from California Outdoor Concepts, Inc.

- **Note** – The Granite and Mosaic tops used by California Outdoor Concepts are made or prepared from natural stone and may contain unique coloring, markings or accent spots. These are normal with natural products and do not indicate a blemish or product failure.
- **Non California Outdoor Concepts Tops** - This warranty does not apply to the use of another manufacturer's top, nor does it apply to the incorrect installation of the table top onto the base by the retail store or the consumer.

Not covered under warranty:

- This warranty does not apply to any damage caused by shipping, accidents, normal fading, staining, natural weathering, misuse, unapproved alterations or repairs. No other person is authorized to assume liability on behalf of California Outdoor Concepts, Inc.
- Any failure caused by unreasonable use or abuse.
- Rust and/or oxidation of frame resulting from exposed metals that have been scratched, chipped or not properly maintained by the guidelines listed in the Product Care Instructions.
- Customer's own material choices.
- Accidental damage or element damage such as fire, wind, rain or sun.
- Permanent stains caused by lotions, oils or other substances.
- Discoloring of the fire glass due to unreasonable use.

Warranty Guidelines

Prior Authorization from the manufacturer is required. You must be the original purchaser and be able to provide proof of purchase when you make a claim. To submit a warranty claim, contact our warranty department at (877) 274-6773, via fax (877) 274-6017 or email to info@californiaoutdoorconcepts.com. You may also contact your local dealer.

If the warranty is covered, California Outdoor Concepts, Inc. will arrange for freight pick-up and pay, exclusive of "White Glove Service", the ground freight to and from manufacturing. Return of all California Outdoor Concepts, Inc. must be packaged properly for freight pick-up. California Outdoor Concepts, Inc. tables must have been used only for residential purposes.
